and other improvements, and the benefits of these forests to the people were very slight. Before the service took charge of them the national forests constituted a resource whose usefulness had been little developed and whose safety was seriously endangered by lack of effective administration on the ground.

At a money cost of $700,000 to the Federal Government the Forest Service has accomplished these things upon national forests. It has increased their value, their usefulness, and their safety from fire by the construction of 708 miles of roads, 9,421 miles of trails, 3,400 miles of telephone lines, 50 miles of fire lines, over 400 cabins for its rangers, and 644 miles of fence. It has planted two and one-half million trees, and it has 9,000,000 more in its nurseries as stock for future planting. It has issued 87,219 grazing permits, under which 4,289,203 horses and cattle and 21,216,381 sheep and goats have been grazed. It has made 8,663 timber sales, and it has granted 66,182 permits for the free use of timber for domestic purposes by settlers. More than half of the 5,923 permits issued for the conservative use of lands for special purposes of various kinds have been given free of cost to those who benefit by them. Applications for agricultural settlements to the number of 2,514 have been approved, which has opened 295,000 acres to farming. The total number of permits of all kinds issued for the use of the national forests is close upon 200,000. The total amount invested by the Forest Service in permanent improvements on the national forests is $675,259, or nearly twice the net cost of administering these forests for four years.

Through the administration of grazing on national forests by the Forest Service, range wars within them have absolutely ceased. The investment of productive capital in national forests by the people of the West in power plants, sawmills, transmission lines, railways, and other improvements has increased by many millions of dollars, giving added employment to labor and added industrial development to the regions in which the national forests are situated. The use of the national forests by the people has multiplied many times in every respect, but the use of the national forests by the small man has increased in proportion to its use by the large owner in the relation of 10 to 1.

In 1902, under the adminstration of the national forests by the General Land Office, an average of 5¼ acres to every 1,000 acres were burned over. In 1907, under the administration of the Forest Service, less than 1 acre per 1,000 acres burned over. In 1908 the Forest Service saved, compared with the forest-fire damage on a similar area of private forest lands, $34,000,000 worth of timber in national forests by its fire patrol.

These facts show that the total net cost of administering the national forests is utterly insignificant compared with the results attained in the increased usefulness of the national forests to the people, and in the actual value of the national forests themselves, through their development by the construction of permanent improvements, through the improved condition of the forest and the range, and through added safety from damage by fire.

The national forests should not only be so handled as to prove of permanent and increasing public benefit, but that they should pay all costs of their maintenance. If the Forest Service is permitted to pursue its avowed policy with reference to national forests, and is given the funds urgently needed for its work, it will not only attain, but it will much surpass this result.

But it is necessary to face the fact squarely, that the appropriations hitherto made for the national forests are barely sufficient to provide for their protection alone. They do not make provision for the proper handling of current business, and they entirely fail to take into account that this business is increasing. Last year so great were the demands upon the time of the forest rangers to handle the business of the people upon national forests, that only about one-fifth of their time could be devoted to fire patrol.

The force upon national forests, never adequate for fire patrol alone, not only has to protect the forests but to handle a business which in the aggregate has increased several times faster than the force available. In the year 1908 the business of the national forests, as shown by the actual number of permits granted, was about five times the business transacted in 1905. But the force which handled this business in 1908 was less than two and one-half times the force which handled one-fifth as much business in 1905. Not only the business but the area which each forest officer must cover has increased, until now the average area in charge of a ranger is about 125,000 acres, or nearly 200 square miles. To handle grazing, timber sales, and other uses of various kinds on an area of this size in rough mountain country, and also to protect it from forest fire, is much more than one man can do effectively. Not to increase the force means inevitably to increase the already excessive burden upon the ranger, because the demands upon him by the people who wish to use the national forests are steadily growing larger.

Should the funds needed by the Forest Service to protect the national forests and to supervise their legitimate use not be made available, this service faces the alternatives: To reduce a forest-fire patrol already insufficient to the point of grave danger, or to limit the growing use of the national forests by the people. Under such circumstances the proper course for the Forest Service to pursue would be to limit the use rather than to endanger the forests themselves. This would necessarily mean that much timber which is ripe for the ax and for use by the people could not be sold, that grazing would have to be limited correspondingly, and that in other important respects the forests beyond the point to which they could be safeguarded by the funds available would have to be locked up against use by the people.

II. IN FOREST STUDIES.

Since the Forest Service took charge of the national forests, in 1905, it has expended $1,175,000 in studies to bring about a more conservative use of forest products and of forests in private and state ownership.

In considering the need for the continuance and extension of this work, a brief summary of how this Nation stands with relation to the forests is of value.

Four-fifths of the forests of the United States are in private hands. From these forests the timber supply of the future must mainly come. At present less than 1 per cent of the forests privately owned are logged conservatively or adequately protected from fire.

The growth of timber in all the forests of the United States approximates 7,000,000,000 cubic feet per year. But this Nation is using 23,000,000,000 cubic feet of timber per year, or more than three times as much as all our forests produce.

Since 1870 forest fires have annually cost an average of 50 lives and not less than $50,000,000 worth of timber. They have burned over at least 50,000,000 acres of forest each year. Through destructive logging one-fourth of the timber which might be utilized is wasted. The waste in the mill is from one-third to two-thirds of the lumber sawed. These wastes combined mean that for each 1,000 feet of timber which stood in the forest, about 320 feet, or less than one-third, is actually used. The remaining two-thirds are wasted.

We can not count upon other countries to supply our need when our own forests are gone. The condition of the world supply of timber makes us already practically dependent upon what we produce. We send wood out of our country and we bring it in, but we export one-and-one-half times as much as we import. From this time on we must grow our own wood supply or we must do without.

These central facts have recently been compiled by the National Conservation Commission. They are not hysterical statements based on guess work, but conservative estimates, backed by reliable data. It is much more probable that they understate than that they overstate the actual condition.

These facts mean that we must act vigorously if our forests are to be preserved. Even the most vigorous action will not prevent grave timber scarcity which our waste of the forest has made inevitable. But if we fail to act we shall face not merely timber scarcity, but timber famine.

Realizing these facts the Forest Service has felt that its duty to promote the conservative use of forests not in federal hands, as well as all economy practicable in the use of forest products, is no less urgent than its duty to rightly administer the national forests. To this end the Forest Service is doing all it can with the funds available to teach American citizens how to practice forestry. It has carried forward a national campaign of education in forestry by spreading broadcast the useful knowledge obtained by its forest studies in actual cooperation with States as well as with the individual forest owner and user in the handling of his timber tract, his wood lot, his forest plantation, and his timber-treating plant.

The results of this work, so far as they can actually be measured in dollars, are worth to this Nation many times the amount expended in obtaining them. But an even greater accomplishment is the awakening of the American people to their national and individual need for forest conservation. We are still far behind all other great nations in our treatment of the forest. But no nation possesses a more wholesome public sentiment upon which to build a structure of forest conservation which will endure than does our own.

In the period and for the expenditure specified, the Forest Service has, in cooperation with private owners, made detailed working plans for the conservative handling of nearly 6,000,000 acres of private forest land. It has prepared 114 planting plans for settlers and small farmers, especially in the Middle West. Through its timber tests, which are now accepted by engineers, architects, and builders as the standard timber tests in the United States, it has promoted economy in the use of structural timbers and greatly increased the range of species used for this purpose, thereby decreasing the drain upon our forests. Chiefly as the result of educational work done by the Forest Service as to creosoting and other useful methods of wood preservation, about 60 timber-treating plants are now in successful operation in the United States, which turn out one and one-quarter billion feet of treated lumber annually. The increased life given to timber in use through preservative treatment would mean, if all timber which could profitably be treated were treated, an annual saving of about $72,000,000. The Forest Service answers about 140 inquiries a week for practical advice in timber preservation alone. It is a shame, is it not, that a few dollars have been spent by way of education to bring this about?

Through its studies of wood utilization the Forest Service is pointing out practical economies in the sawmill, in the factory, and in the use of timber itself, which have had a material effect in reducing these great forms of waste.

These are a few examples only of the direct results from the studies conducted by the Forest Service. The range of its usefulness in answering requests for advice regarding the best use of forests and forest products in every field is indicated by the fact that these requests average 100 a day.

Since 1905 the Forest Service has distributed over seven and one-half million publications containing useful information in the field of practical forestry.

In its work with the States the Forest Service has put into actual effect the principle of cooperation between State and Nation, upon which the effective solution of our national-forest problem directly depends. It has completed cooperative studies with 13 States, and cooperation with as many more is either in operation or directly pending.

The results of this state cooperative work have been far-reaching. The admirable forest law of California is the direct result of a study of state forest conditions made by the Forest Service, one-half the cost of which was borne by the service and half by California.

Through a study made by the Forest Service, Alabama has enacted advanced conservative forest legislation.

Illinois has profited greatly through the information furnished by the Forest Service on the care of the wood lot and on forest planting.

The service has for two years been making a state forest study in cooperation with Kentucky. The result will be to improve logging methods, bring about more accurate knowledge as to timber values, and lead the farmers and other owners of timber land to take better care of their holdings.

In Michigan an examination of a portion of the State has been made, particular attention being paid to forest fires. This has led to important pending state legislation in regard to the control and prevention of forest fires.

In Delaware a study of forest conditions was made with special reference to the advisability of growing loblolly pine.

In Maine and Florida forest fires were studied with a view to shaping legislation for their control. These studies have already borne fruit in better legislation.

In Maryland five counties were studied, and the facts ascertained in these counties led to the appointment of a state forester and to much better care of forests within the State.

In Mississippi a cooperative study was made of cut-over longleaf pine lands. This resulted in the gathering of much useful information, and called to the attention of the state legislature the need for forest legislation along various lines.

In Missouri a detailed study of forest conditions in the Ozarks awakened a keen interest in forestry in the State, which promises splendid results.

In New Hampshire two studies have been made, one of forest conditions, the other of forest taxation, which have had admirable results.

Forest conditions in Wisconsin have been studied by the service, with the result that a state forester has been appointed, and Wisconsin stands now probably at the head of States in the care of its forests.

To sum up, the studies made by the Forest Service, both independently and in cooperation with States and with individuals, and the wide distri-

bution of their results, have been and are the prevailing influence in the United States for the better use of the forest and its products. Of the two great tasks before the service—the administration of the national forests and popular education in forestry—the one is quite as important as the other. It is no less necessary to the future of our forests that right use of the four-fifths of them, which are in private hands, be encouraged than of the one-fifth, which is in the hands of the Government.

TIMBER SALES.

The receipts last year from the sale of timber on national forests were about $850,000. Had the Forest Service sold all the timber it was asked to sell it would have sold about ten times as much. Had it made these sales the receipts from them alone would have covered the total expenditure of the Forest Service for the year and put a net balance over $5,000,000 into the United States Treasury.

It costs the Forest Service from 20 to 30 cents per thousand feet of timber sold to mark the trees to be cut, to supervise the logging, and to burn the brush as a precaution against fire. This expenditure is necessary to insure clean work in the woods and the production of a good second crop.

The reason why the service did not sell more timber last year and thereby much more than pay back the total cost of all its work, is that it did not have the money needed to safeguard the forest in logging. The Forest Service therefore confined its timber sales strictly to the number which it could handle properly with the funds available. It would have been very easy for the Forest Service, at the expense of the national forests with whose welfare it is intrusted, to have shown a large credit balance at the expense of the forests themselves. This it has declined to do.

During the past year the Forest Service gave timber to settlers in small quantities for domestic use to the total value of $169,000. This is in pursuance of the policy of the service to give all aid practicable to the small man within and near the national forests who is trying to establish a home. This free use of timber by settlers involves certain necessary expenses in supervision by the Forest Service, from which of course there is no direct return.

The national forests contain over 4,000,000,000 feet of timber, which is one-fifth of all timber standing in the United States. They contain also vast quantities of wood suitable for posts, poles, and fuel. Handled on a strictly commercial basis, the timber alone in the national forests could be made an important source of money revenue to the Government. Handled as the Forest Service is handling them, with a view to reasonable money returns, but also with a view to making them of direct public benefit in the development of the West, the national forests will easily pay back all costs of their administration and protection. Thus far the Forest Service has not been given an opportunity to make the national forests pay their costs, because the funds provided have never been sufficient for the adequate protection of the national forests. And the Forest Service has steadily refused, and rightly so, to devote money needed for fire patrol to increasing current business at great risk to the safety of the national forests themselves.

FOREST FIRES.

For the last thirty years forest fires have destroyed annually in the United States an average of 50 lives and $50,000,000 worth of timber. The area burned over each year has averaged not less than 50,000,000 acres.

For the last year, the most calamitous year as to forest fires that this country has known for a decade, the total damage by forest fires in the United States has been conservatively estimated at not less than $100,000,000.

Through its fire patrol on national forests the Forest Service saved last year, compared with the actual fire damage on private forest lands of similar area, over $34,000,000, or enough to pay all the expenditures of the service, at last year's rate, for about ten years.

The force employed upon fire patrol through which the above result was obtained was equivalent to 1 man to each 500,000 acres, an area half the size of the State of Delaware. The public expenditure was about one-third of a cent per acre. The result was the protection of timber worth seldom less than $75 per acre, and frequently as high as $100 and even $200 per acre. This is fire insurance at an average rate of one three-hundreth of 1 per cent.

The national forests contain one-fifth of the standing timber and one-fifth of the forest area of the United States. In West Virginia, whose forests comprise one-tenth of the area of the national forests, the damage by fire was five times as great. In Wisconsin, whose forests comprise one-fourth of the area of the national forests, the damage by fire was nine times as great. In the Adirondack region of New York, whose area is about one one-hundreth of the national forests, the damage by fire was equally great.

The expenditure for fire patrol per acre on national forests is far below the amount actually expended by the lumbermen associated together for fire protection in the States of Washington and of Idaho. The Washington Forest Fire Association, organized by private owners of timber land to protect their holdings from fire, has a membership of 138, and comprises a total acreage of nearly 3,000,000 acres. This association expended 1 cent per acre in the protection of the forests of its members from fire in 1908, or three times as much as the Government expended in the protection of the property of the people in national forests.

The national forests, with the safeguarding of which the Forest Service is charged, are worth about $2,000,000,000, which is more than the total value of the equipment of the army and navy combined.

The commercial timber alone in national forests is worth $1,000,000,000, or equivalent in value to seven such fleets as the one which has just carried the American flag around the world. The preservation of this vast natural resource is no less essential to our national prosperity and industry than is the fleet to the maintenance of our independence as a Nation.

The force upon national forests is called upon to protect the forests from fire and to handle at the same time a rapidly increasing business with the people. One hundred thousand persons used the national forests under permit last year. In the not distant future this number should be increased to 1,000,000. It is unjust and unwise to require the Forest Service to give adequate protection to the national forests for one-third the amount which private owners are expending in the protection of their timber lands, and at the same time to extend this force to handle a business already vast and rapidly growing.

The fire-patrol force has been inadequate for safety since the beginning, through lack of funds. Congress has assumed that the increased appropriation asked by the Forest Service is due only to increasing business. It is due mainly to the desire of this service to effectively safeguard the national forests from fire.—Doctor Shank on Biltmore estate.

Unless the force on national forests is greatly increased, and that necessarily carries with it an increase in appropriation, the Forest Service must do one of these two things—turn away national forest business or reduce a fire patrol already insufficient. This is an urgent and immediate condition, not a theory.

GRAZING.

The regulation by the Forest Service of grazing upon ranges within the national forests has in three years reduced the waste of forage at least 30 per cent. This means that the number of sheep and cattle fed upon these ranges is increasing in proportion.

Through the control of these ranges by the Forest Service steers grazed in many of the national forests last year weighed from 50 to 100 pounds more than steers grazed on outside ranges, and brought from $5 to $10 per head more on the open market. The same is true of lambs and sheep. The natural increase in calves and lambs from stock ranged on national forests is from 10 to 20 per cent larger than from stock ranged outside national forests.

During the past year the killing of mountain lions, wolves, and other predatory animals within national forests by hunters employed by the Forest Service has saved the stockmen from losses which, on the basis of actual past experience, would have considerably exceeded the amount paid by these stockmen in grazing fees.

The grazing fees charged on national forests are from 30 to 35 cents per head for cattle and from 10 to 12 cents per head for sheep for the entire year. These charges are far below those paid for similar grazing privileges outside the national forests. For example, on Indian reservations in Arizona and New Mexico a fee of $1 per head for cattle and 25 cents per head for sheep is paid, or two or three times as much as the fees on national forests. Large tracts of grazing lands in southern Colorado, owned by the Ben Butler estate, are leased at a rate equivalent from $1.25 to $1.75 per head for cattle, or from three to over four times the rate charged on adjoining national forests. Lands owned by the Southern Pacific Railway Company within the boundaries of the Tahoe National Forest are leased for grazing at a rate equivalent to about 25 cents per head for sheep, or nearly four times as much as is paid for grazing on public lands in the same forests. On Indian reservations in Oregon and Washington a charge of $1.50 per head is made for cattle and 25 cents per head for sheep. On adjoining national forests the charge is from one-half to one-third as much. The opponents of the Forest Service complain of overcharges for use of range and also for extravagant appropriations.

The above figures show that the Forest Service in its administration of ranges within national forests is giving for fees which run from one-half to one-fourth the actual value of the grazing privileges, effective protection of the range, increasing safety from predatory animals, and a product in beef and mutton, worth considerably more on the market than the product of outside ranges.

Had the Forest Service charged last year for grazing privileges what they were actually worth, these charges would have more than paid all the expenditures of the service for the current year. That the service did not increase grazing fees is due directly to its conviction that the great value of its administration of grazing is to aid the small man in establishing a home, and that the translation from free range to grazing fees should give opportunity for the easiest adjustment practicable of the stock industry to the new condition. Had not this opportunity been given, the transition would have meant inevitable hardship, especially to the small stockman. The opponents of the Forest Service bitterly complain of charges made for the use of the forests and grazing privileges, and, on the other hand, find fault with the amount of the appropriation.

Mr. SMOOT. Mr. President, before the Forestry Service took charge of the national forests, little or no opposition to its work existed. Since the Forest Service took charge of these forests, it has faced bitter and determined opposition from certain well-defined sources. The approval of the work of this service on national forests by the great body of the people, and particularly of the western people whom it most affects, has grown steadily until it is probably more general and more emphatic than the popular approval of the work of any other federal agency. The settler, the stockman, particularly the small stockman, the small men who are winning the West with their own hands and building their homes within it, stand practically as a unit for the policy and the methods followed in national-forest administration. And both in the East and in the West, forest owners and forest users, from the great railroad which faces a serious and urgent problem in safeguarding a constant supply of timber for its needs, to the farmer who wants to make the most of his wood lot, stand practically as a unit for the work of the Forest Service in teaching the people how to take care of their forests.

But year after year the Forest Service faces organized and active opposition to its policy, to its methods, and to adequate provision for the work with which it is charged. In terms more or less specific, the efficiency of forest officials on and off the national forests is constantly attacked. The national forests themselves are pictured as vast solitudes under the iron hand of tyrannical petty officers, whose chief purpose is to continue them as solitudes. And charges are not wanting against the integrity of the service and of its officers.

It is obvious that opposition so vigorous and so sustained has a cause, whether or not the cause be just. Part of it is due to honest criticism, whether well taken or mistaken, not of the general policy of national-forest administration, but of the actual methods employed by forest officers on the ground. In this regard the Forest Service does not claim, and has never claimed, that it makes no mistakes. This service has grown rapidly from small beginnings. Its administrative task is peculiarly difficult on account of the many interests involved, of

NORTHWEST MISSOURI STATE
UNIVERSITY LIBRARY
MARYVILLE, MISSOURI 64468

the wide distribution of the national forests, and of the scarcity of available funds for their protection and management. It is called upon to administer an area equal in size to the German Empire, Denmark, Switzerland, and the Netherlands combined. It is required to handle the great and varied business of the national forests through local officers, who are distributed in the proportion of one man to each 200 square miles of territory. This man is usually a forest ranger, who gets from $1,000 to $1,200 a year, out of which he provides his own horses. For such a salary the service is expected to employ men who can do business with the representatives of industries of the many kinds which use the national forests.

It is seldom that the ranger does business with such a man whose salary is not several times his own. As a whole, the efficiency of the ranger force is far higher than the Government has a right to expect, in view of what the ranger is paid. But mistakes occur now and then, and they will continue to occur until the forest force is not only fully trained, but until it is adequately paid. It is remarkable, in view of the smallness of this force and of its low pay, that so few of the charges of incompetency made against officials of the Forest Service have stood the test of investigation. Furthermore, through the resolutions of stock associations, lumber associations, and other users of national forests, and through other expressions of popular approval, there is abundant evidence that on the whole the management of the national forests is satisfactory to the people.

To sum up, it is obvious that the minor mistakes which the Forest Service may have made have not in themselves been sufficient to justify bitter opposition to its work. Most of this opposition has a wholly different cause.

The Forest Service is the first federal agency to administer a considerable area of public land in the interest of all the people. Other federal agencies have, so far as lay within their power, enforced public-land laws from Washington, but the Forest Service has enforced them on the ground. The result has been that it has interfered—and in some cases it has interfered seriously—with those who wish, under color of land laws loosely applied or without color of law at all, to benefit, to the public detriment, through the acquirement of public property. No man knows in detail what our national indifference to the dwindling of the public domain has cost this generation and the generations to come. It has been estimated that one-third of this domain has passed into wrong hands and been lost to the people to whom it rightly belonged, under cover of a public-land policy criminal in its laxity and in its obliviousness to gigantic fraud. But whether one-third or one-fourth or one-half, every man knows that the public domain has so melted away, to the public injury and to private gain, that this generation will hand down to the next but a remnant of the national legacy which it received in trust.

The national forests contain an important part of what is left. They are being administered in the interests of the whole people. Therein lies the chief cause of opposition to the policy under which they were created, to the methods employed in their management, and to their existence itself. If the true causes for much of the opposition to the Forest Service were stated, they would read as follows:

The Forest Service holds that the ranges within national forests are first of all for the use of the small man who is building up the country.

The Forest Service holds that the timber in the national forests should not pass into the hands of lumber companies, in order that they may hold their own timber, and sell it to the people at excessive prices when the Government's timber is gone. It holds that the timber on national forests should be cut conservatively, a good deal of it given away to settlers for domestic use, and what is marketed sold in small quantities to local mills, in order that the people may directly benefit thereby.

The Forest Service holds that the mining laws should not be used within national forests as a cloak for acquiring title to land which is nonmineral, but covered with valuable timber.

The Forest Service holds that inside national forests the homestead laws should not operate as a means by which the fraudulent homesteader can acquire title to valuable timber land utterly unsuited for agriculture, and sell it in turn to the great lumber company.

If the platform of the Forest Service is sustained, it will mean that the national forests will be handed down to the next generation with their resources intact and the right of the people to enjoy them inviolate. If this position is not sustained, it will as inevitably mean that the national forests will dwindle in area and in value as the public domain has dwindled, with direct benefit to great private interests and irreparable loss to the people now and to come.

This is not an hysterical forecast. That it is true as to the public domain is proved by the great land frauds of the West, which are common knowledge. That it is true as to the national forests the following cases go to prove. These cases are selected at random from many times their number. But they are sufficient to show that a part, at least, of the opposition to the national-forest policy is because it prevents fraud inside the law and theft outside the law.

A mining company by wrong use of the mining laws attempted to secure for $10,000 4,000 acres of heavily timbered land on a national forest in Montana. The timber standing on this land is worth $250,000 at a conservative estimate. The mining claims under which the company attempted to get possession of this timber were fraudulent. Upon notice that the Forest Service would fight these claims the company refused to defend them. (*a*)

Mr. FLINT. In what State did the Senator say that fraudulent transaction occurred?

Mr. SMOOT. The State of Montana; and I referred to the case here a year ago.

Mr. CARTER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Montana?

Mr. SMOOT. I prefer to get through, and then I will answer any question which any Senator may ask.

The VICE-PRESIDENT. The Senator from Utah declines to yield.

Mr. CARTER. I think it wise for him to decline.

Mr. SMOOT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield?

Mr. SMOOT. If the Senator from Montana insists upon asking a question, I will answer it if I can.

The VICE-PRESIDENT. The Senator from Utah now yields.

Mr. CARTER. I do not now insist.

Mr. SMOOT. Fourteen coal claims on a national forest in Oregon are covered with commercial timber, worth not less than $200,000. These lands were reported by the Geological Survey, after expert examination, to contain no workable coal. A hearing before a local land office in Oregon resulted in decisions adverse to eight of the claimants. Hearings involving the remainder are pending. (*b*)

A company in California, largely controlled by one man, attempted to obtain possession under the mining laws of 200,000 acres of land in a national forest, on which the timber is worth about $5,000,000.

Mr. FLINT. Had it not been for the activity of the officers of the Forestry Service every foot of that timber land would have been taken fraudulently by this combination of men in my State. By their strict examination of all these mining applications they saved this vast tract of timber land to the people of this Nation.

Mr. SMOOT. Immediately after investigation by the Forest Service the company promptly relinquished its claim to 34,000 acres, and a decision declaring many more of its locations invalid has already been made by the local land office in California and by the Commissioner of the General Land Office. (*c*)

A company in New Mexico, holding a number of mining claims, was investigated in the interest of the Forest Service by a geologist of the Geological Survey. Upon investigation, this company offered to relinquish 102 lode claims if the Forest Service would give it the right to construct a ditch across the land embraced in these claims. It would seem, therefore, that the mining laws are used to get possession of water and water power as well as of timber. (*d*)

As a result of examinations of claims in national forests during the past year over 60,000 acres of land, bearing more than 300,000,000 feet of timber, worth not less than $6,000,000, were restored to federal ownership. Every one of these claims was fraudulent in fact. It is scarcely an injustice to assume that some of them were fraudulent in intention. Three of these claims had upon them a stand of nine, ten, and eleven million feet of timber, respectively, worth, respectively, eighteen, twenty, and twenty-two thousand dollars.

Again, during the last year action was begun in the United States court in Colorado for the recovery of timber cut in trespass from public lands now included in a national forest in Wyoming by an individual and sold to a railroad company for about $390,000. (*e*) A timber trespass on a national forest in Montana, involving timber worth $360,000 is now under investigation. (*f*) Since it took charge of the national forests the prosecution of timber trespass alone on national forests by the Forest Service has yielded a total of about $169,000. More than 2,000 cases, involving fraudulent and invalid claims to lands

within national forests, are pending before the General Land Office.

It has recently been shown that about one-third of the developed water power and of the advantageous power sites in the United States are controlled by 13 companies.

These few examples go to show, and many more can be furnished if they are required, that the Forest Service is finding abundant evidence on the national forests of the intention of certain elements in certain industries to get what they can of the property of the people regardless of law and regardless of right. It is reasonable to assume that the disappointment of these gentlemen, at least in part, explains opposition to the national forest policy.

For each one of the cases cited, names and dates and localities can be given, and similar detailed information can be given for the many more cases not cited, but from the federal agencies whose duty it is to protect the public lands from fraud and theft.

(*a*) *Montana.*—United States *v.* Libby Placer Mining Company, Cabinet National Forest, involving 4,000 acres of land, heard by the local land office at Kalispell, Mont., in August and September, 1908; timber valued at $250,000.

(*b*) *Oregon.*—Eight cases, C. W. Anderson et al., involving 1,200 acres of land in the Siskiyou National Forest, on which was timber valued at over $100,000; hearing at Roseburg, Oreg., in August; decision in October, 1908.

Six coal claims for lands in the Siskiyou National Forest (C. K. Pierson et al.) are pending for hearing before the local land office at Roseburg, Oreg., involving 900 acres of land; timber valued at about $100,000.

(*c*) *California.*—United States *v.* H. H. Yard and North California Mining Company, involving 200,000 placer-mining locations in the Plumas National Forest. These locations contain over 200,000 acres of land, timber on which is valued at over $5,000,000. The North California Mining Company relinquished 34,000 acres in 1906, and hearings involving 11,0000 acres resulted in a decision of the local land office in February, 1908, and a decision of the commissioner in August, 1908, adverse to the claimants.

(*d*) *New Mexico.*—One hundred and two lode claims in the Lincoln National Forest, claimed by the Eagle Mining and Milling Company. This company offered to Geologist Hill to relinquish if the Forest Service would give it a certain right-of-way privilege to cross the land.

(*e*) *Wyoming.*—Action begun in summer of 1908 in the United States court of Colorado against John C. Teller and Union Pacific Railroad Company for $390,000 for trespass by Teller on land now in the Cheyenne National Forest, Wyoming, by cutting railroad ties, afterwards sold to the Union Pacific Railroad Company. Teller escaped criminal liability for indictment for this trespass by paying for the timber at the rate of $2.50 per acre under the act of June 3, 1878 (20 Stat., 89).

(*f*) *Montana*—The Forest Service has urged and is assisting the General Land Office to collect for a trespass alleged to have been committed by A. W. McCune and others on land in Montana, since included in the Deer Lodge National Forest.

The funds recommended are needed for the Government forest work for these main reasons:

1. The protective force on national forests has been inadequate from the beginning, and the increase in it has not kept pace with the increase in business.

2. Unless the force is greatly increased the Forest Service must do one of these two things: Turn away national forest business, or reduce a fire patrol already insufficient. This is an urgent immediate condition, not a theory.

3. It is no less necessary for the better protection and fuller use of the national forests that money is provided with which to hire men, than that money is provided with which to build trails, telephone lines, fences, and other permanent improvements. Without the men, the permanent improvements are of little use; without the permanent improvements, the efficiency of the additional men will be greatly reduced. Both are essential.

4. The fact that the protective force on national forests has carried a heavier load of current business per man during the last year than ever before, and has held the fire damage down to 1 per cent of that on private forest lands, is creditable in the highest degree. But it is unfair, as well as unsafe to the forests, to rely upon the men keeping this up. The force is at present seriously overworked, and unless it is increased the inevitable result will ensue—a serious falling off in individual efficiency.

The estimates for the ensuing fiscal year are the first estimates presented for the Forest Service which, if granted, would put it really abreast of its task. If it is necessary that the increased expenditures proposed should be met by increased returns, that can be done; if it is necessary that they should be materially exceeded by the returns, that can also be done, although neither is advisable. The growth of business on national forests can go on until the returns greatly exceed the expenditures with absolute safety to the forests themselves, provided that the growth does not get beyond the trained force available to handle it. What the Forest Service is doing now is to train up the force, get ready for the business, and take care of the increase so far as it can. When the force is once adequate in training and in number, the service can take care of all the business, which means many times that now handled, with a revenue many times as great.

Mr. President, I have studied this question for a good many years. I have seen in my own State the benefit that comes from the preservation of our forests, and I want to ask the Senate to take into consideration the work that the Forester is doing in the preservation of the great timber lands of this country, and I certainly hope and trust that all that has been asked for in the pending bill will be granted by the unanimous vote of the Senate.

The article referred to later is as follows:

[From the Denver Republican, Tuesday morning, February 9, 1909.]

FIGHT AGAINST FOREST POLICY JUST SELFISH—NEW DEFENDER OF ADMINISTRATION IN SYSTEM OF CONSERVATION—HAPPENS NOT TO BE ADMIRER OF ROOSEVELT, BUT PRAISES DEPARTMENT AS HE SEES IT—CATTLEMEN GET USE OF LAND FOR LESS THAN COST OF KEEPING IT—FOES OF RESERVES ARE MINORITY.

DENVER, *February 8.*

There are no facts to warrant the ferment which exists in this State about the forest reserves. The opposition to "Pinchotism," so called, may be summed up in one short, ugly word—"graft."

These statements are made thoughtfully and deliberately, with an expert knowledge of the situation. The writer has no connection with the Forest Service and never has had. Nor has he any ax to grind for any interest affected by the forest revenue policy of this administration. Nor does he happen to be an admirer of Mr. Roosevelt; far otherwise.

But for ten years past he has passed every summer but one on some forest reserve in the States of Colorado, Montana, and Wyoming. Some of these reserves he knows better than any ranger patrolling them. He is not a tenderfoot, and has made his home, with cattlemen, miners, sheepmen, prospectors, lumbermen, cowboys, forest rangers, squawmen, and even Indians. There is scarcely a phase of life or industrial activity in the Rocky Mountains that he is not fairly familiar with, and it is in the light of the knowledge thus gained that he reiterates the assertion that the fight now being made on the forest-reserve policy is bottomed almost entirely upon greed and dishonesty. These are strong words, but they are justified.

The forces making the fight muddle the issues, and no doubt some uninformed persons conscientiously believe that the cattlemen and others have a real grievance. It can not be doubted that minor grievances do exist, for the forest officers are not gods nor infallible. It is no doubt also true that some men dressed in a little brief authority play such fantastic tricks as make the ranchmen weep. But this does not reach the heart of the question. Because a mail clerk stupidly mishandles a letter the normal man does not go about shrieking for the abolishment of the entire postal service. Both Secretary Wilson and Forester Pinchot are honest men, each with a singularly high conception of his duty. No just cause for complaint goes long without a hearing and redress.

It is not within the scope of this short letter to go into the merits of the underlying question, viz, whether or not the forests are worth preserving. Some of the eminent and learned persons who have used your columns in this connection have contended that they were not, and that, on the contrary, their preservation was actually detrimental, in which case, as patriots, they should hasten to apply the torch to every stick now standing. Not being an expert forester, all that the writer can do is to say that the consensus of all scientific opinion is against the august authorities, any one of whom appears to be wiser than seven men who can render a reason. The Germans, their country left treeless after the Napoleonic wars, have steadfastly pursued reforesting until now about one-third of their domain is timbered, and the Prussian Government alone derives an annual net revenue of about $25,000,000 from this source. What stupid asses must they be! England, likewise, is spending enormous sums in India for reforesting, all of which is wasted, of course. New York and Minnesota are engaged in the same work, in blissful ignorance of the monumental discoveries of these disinterested Colorado savants, one of the most vociferous of whom, it is worth noting, gained his livelihood for years by the operation of an illicit sawmill on government timber. The truth is, the surface of the whole globe is dotted with object lessons which graphically picture the irreparable damage inflicted by wanton destruction of the forests. The point is one which really does not admit of debate. Opposition to government control in some minds amounts to paranoia, and only such are in need of argument, and on such all arguments are lost.

In nearly all these discussions the chief fact is lost sight of. The forests growing upon government land do not belong to any individual or to the State or county in which located, but to the whole Nation. No one has any natural or inalienable rights upon this property. The Federal Government is responsible to the whole people for its care. Congress may sell or lease any or all of it. But except in accordance with statute law no one has any more proprietary interest in these forests than he has in his neighbor's dooryard. It is only by sufferance that any cattle or other domestic animals are on the reserves. In the German state-owned forests not a hoof is ever allowed.

It is to be admitted that up to within a few years all that Uncle Sam owned was fair prey to all comers, without let or hindrance. The cattlemen overstocked the range and wrought utter ruin and desolation. The tie chopper and portable sawmill, followed nearly always by fire, denuded millions of acres, and there was no one to say them nay. Oil lands and coal lands were homesteaded. But this régime has gone, never to return. Uncle Sam no longer journeys from Jerusalem to Jericho, along the old route, anyhow. Cattle are not barred from the reserves, but overstocking is prevented. Fires have almost

ceased. The only trouble is now that restrictions are irksome to those who have for so many years used what was another's as if it were their own, or rather as they would not use it if it were theirs. This is the real bone of contention.

The frenzy into which so many have been thrown can not have, as its exciting cause, the nominal charges exacted. If this is not correct, then the hoggishness of the cattlemen, for example, is beyond all adequate description.

The charge for ranging cattle on the reserves is usually 20 cents per head per annum. As 20 acres are requisite, ordinarily, for each head, the rental charge is 1 cent per year per acre. The land on which each man ranges his cattle is allotted to him outright, and he can enforce his claim to its use as against any other. He could not afford to take this land as a gift, for he could not maintain his fences about it for the amount of his grazing fee, to say nothing of taxes. If he bought outright, he would pay at least $2.50 per acre, or $50 for 20 acres. Interest on this at only 4 per cent would be $2, or ten times what he is asked to pay by the Forest Service. And he would have to maintain fences and pay taxes besides. The case of the cattlemen is typical.

Too much emphasis can not be laid on the fact that the sole aim and purpose of the Forest Service is to prevent destruction. The prospector, the miner, the homesteader, the lumberman have on the whole no really valid or serious cause for complaint. Of recent years I have never heard from anyone a "kick" that would bear the slightest examination. Ninety-nine per cent at least of the complaints are found to be merely squeals that are emitted by people whose big or little graft has been interfered with; who have used and abused the Nation's property so long that they would have us believe that they have acquired some sort of title to it or some vested right in it.

To be sure, the old wanton destruction and swinish disregard of everything but selfish interest have been interfered with. Theft is no longer on a wholesale basis, but rather the retail, and may eventually cease altogether. But this is not an evil to the Nation or even to the people of this State, of the present generation or of any to come.

Much, if not most, of what has been said, both in print and at the conventions, by the anti-Pinchotites has been distinguished chiefly by the frugality with which the truth has been used. It is, for example, not true that homesteads may not be taken on the reserves; nor is it true that prospectors and miners are barred out. The use of timber, so far from being curtailed, is encouraged; the stumpage charges are not exorbitant and in some cases they are remitted altogether.

It is perhaps idle to say anything like this, but the Use Book, containing the rules governing the reserves, is apparently a sealed one to some of those who have had most to say.

It is not meant to reflect upon the motives of all the people living in or near the reserves. Of the total, those who oppose the reserves are vastly in the minority, and among this minority there are few indeed who really believe that they are oppressed. Nearly all the opposition comes from those who know better.

The fact is as Senator DOLLIVER, of Iowa, not long ago described it in a speech delivered in the United States Senate, on his return from a tour of investigation he had made, as a member of the Committee on Agriculture, through a number of the reserves. Speaking of what he called "this petulant atmosphere of complaint and hostility arising from one source and another," he declared that he "found it was attributable in the main part to the disappointment of gentlemen—good people, no doubt—who had enjoyed for many years an undisturbed range for sheep and cattle on these public domains, and in many cases an undisturbed opportunity to steal from the public forests whatever they needed for the comfort of their families or for the prosperity of their business."

"Now, then," said DOLLIVER, "the Government owns this land; it has a right to take care of it, to say the least." He asserted that the destruction of the American forests in the East had been a crime against mankind, and "I for one," he went on, "do not want to see that crime repeated in the Rocky Mountain region. It is proposed to lease these pasturage lands in the forest for two reasons: First, in order that they may not be overgrazed, and in the next place, that a little revenue may be derived from them to maintain the forest policy upon which we have entered."

This debate occurred in May, 1908, over the bill making appropriations for the Department of Agriculture for the year ending June 30, 1909. In that bill, Mr. Pinchot asked for $500,000, and as a result of this debate, and against the opposition of almost every Rocky Mountain Senator, the Senate, without regard to party lines, voted to give him $1,000,000, just twice what he asked for. Within the past few days it has become evident that this year's appropriation will be over $4,000,000 "To maintain the policy upon which we have entered." Congress is as fully committed to this policy as it is to the maintenance of the gold standard. The disturbances which this policy has occasioned are confined almost wholly to Colorado and Idaho, and will produce about as many tangible gains as if undertaken in behalf of 16 to 1. This cantankerousness is not only a waste of energy, but it is causing the State to appear in a light not calculated to be of value in any respect imaginable.

W. B. S.

During the delivery of Mr. SMOOT's speech,

Mr. DIXON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Montana?

Mr. SMOOT. I do.

Mr. DIXON. I merely rise to suggest that there have been two days of criticism of the Forestry Service, and at this time, when the Senator from Utah [Mr. SMOOT] has the information, I apprehend, to answer those criticisms, I think there ought to be a full Senate here to listen to it, so I make the point of no quorum, Mr. President.

The VICE-PRESIDENT. The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich	Brown	Crane	Dolliver
Bacon	Bulkeley	Cummins	du Pont
Bailey	Burkett	Curtis	Flint
Bankhead	Burnham	Depew	Foster
Borah	Carter	Dick	Frazier
Bourne	Clark, Wyo.	Dillingham	Frye
Brandegee	Clarke, Ark.	Dixon	Fulton
Gallinger	Knox	Nixon	Smith, Mich.
Gamble	La Follette	Overman	Smoot
Guggenheim	McCreary	Page	Stephenson
Hansbrough	McEnery	Penrose	Stone
Hemenway	McLaurin	Perkins	Taylor
Heyburn	Martin	Piles	Teller
Johnston	Milton	Rayner	Warner
Kean	Money	Richardson	Warren
Kittredge	Nelson	Simmons	Wetmore

The VICE-PRESIDENT. Sixty-four Senators have answered to their names. A quorum is present.

At the conclusion of Mr. SMOOT's speech,

Mr. GUGGENHEIM. Mr. President, appreciating that the Senator in charge of the bill is very anxious for a vote upon the same, I shall be very brief in my remarks. I believe I can say for the people of Colorado, whom I have the honor in part to represent, that they are not opposed to forest reserves, nor are they opposed to the conservation of the forests. They are, however, opposed to the unwise and unjust regulations imposed by the Forester and his satellites.

Mr. President, I have before me a great many complaints, which I will not have read at this time. There are, however, a few that, with the consent of the Senate, I should like to have inserted in the RECORD, with the understanding, however, that wherever the names are indicated they may be omitted, as I have not received the permission of the parties to have their names used at this time.

The VICE-PRESIDENT. Without objection, the letters referred to will be printed.

Mr. SMOOT. Does the Senator from Colorado think there would be any benefit in having the letters inserted in the RECORD without the names?

Mr. GUGGENHEIM. I think it would be beneficial, but if there is any objection I should like to have the letters read without being inserted.

Mr. SMOOT. I am not going to object, only I thought it was rather strange that the letters should be put in the RECORD without the names. If the Senator so desires and asks it, I will not object.

The VICE-PRESIDENT. Is there objection? The Chair hears none.

Mr. GUGGENHEIM. Whatever is customary I wish to live up to.

The VICE-PRESIDENT. Permission is granted.

Mr. GUGGENHEIM. I have here a letter from a forester of reputation in New York City. It came to me unsolicited, and I should like to have it read.

The VICE-PRESIDENT. Without objection, the Secretary will read as requested.

The Secretary read as follows:

JANUARY 26, 1909.

Hon. SIMON GUGGENHEIM,
United States Senator, Washington, D. C.

DEAR SIR: I notice in the morning paper that you have introduced a resolution providing for an investigation of the operations and methods of the Forest Service.

I desire to express my approval of this action on your part and to thank you for having undertaken that which, to me, has for a long time seemed desirable and necessary.

As a consulting forester, independently practicing my profession for eighteen years, entirely free from the restraints or influences of any department or organization, I have been able to see much in the administration of this service that is faulty, unwise, unjust, and in some instances reprehensible.

With a desire to see errors rectified, abuses stopped, and justice meted out, I stand ready to furnish you with what information and facts I may have bearing upon this subject.

Very truly, yours,

——— ———.

Mr. GUGGENHEIM. I have now in my hand a letter referring to the question of "Pinchotism," as they call it in the State of Colorado, which I should like to have read.

The VICE-PRESIDENT. Without objection, the Secretary will read as requested.

The Secretary read as follows:

SALIDA, COLO., *November 30, 1908.*

MY DEAR MR. EDDY: Yours of the 22d received; I have been trying to get at different parties, but have found it more difficult to reach them than I expected.

I have talked with old-time Republicans and find that many voted the Democratic ticket because our party *stood for Pinchotism and the abuses of the forestry regulations.*

Mr. David Heaton, the president of the Taft Club of Salida, says, in an interview, that he believed that fully 200 votes were lost to the Republican party by the action of the Forestry Department in *driving prospectors off from the reserve and in holding up and preventing mining men from patenting claims that were located on the reserves.*

Mr. George D. Williams, a member of the Republican central committee from Chaffee County, says that at least 100 votes were lost to the party. This, he says, is a very conservative estimate. He has talked with many mining men, homesteaders, and stockmen and has found them greatly *incensed against the rules and regulations promulgated in the Use Book, rules that are contrary to the mining laws, etc.*

I am getting some statements from others, which will be submitted later.

Respectfully, yours, ——— ———.

Mr. SMOOT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Utah?

Mr. NELSON. I submit to the Senator from Utah that it is not fair for him to interrupt the Senator from Colorado at this time.

Mr. SMOOT. I am not going to read what I hold in my hand, but I will ask the Senator if he will object to having an article from the Denver Republican, as it comes from his State and is signed by a man from Fort Collins, Colo., put in the RECORD without reading?

Mr. GUGGENHEIM. May I ask the name of the party who signs it?

Mr. SMOOT. It is signed by Walter B. Sheppard.

Mr. GUGGENHEIM. May I ask what subject he writes about?

Mr. SMOOT. It is forestry information.

Mr. GUGGENHEIM. I have no objection whatever.

Mr. SMOOT. I do not want to have the article read, but simply inserted in the RECORD.

Mr. WARREN. Inserted at the end of the Senator's speech?

Mr. SMOOT. Yes; inserted at the end of the speech.

The VICE-PRESIDENT. Without objection, permission is granted.

Mr. GUGGENHEIM. I understand it is to come at the end of my remarks.

Mr. MONEY. One moment, Mr. President; I should like to understand it, if it is not too late. What is this that is to go into the RECORD without being read?

Mr. SMOOT. It is a newspaper article written by a man in Colorado on the forestry question, and as the Senator from Colorado was putting a number of letter in the RECORD, I asked that this might go in the RECORD without reading.

Mr. MONEY. Mr. President, it is bad enough for letters to go in the RECORD, but I do not think we ought to encumber the RECORD with newspaper articles. There will be no end to it if that is done, and we will have to enlarge the RECORD to such an extent that nobody will read it. People do not read it much now.

Mr. SMOOT. This is a letter to a Denver newspaper, and it is done not every day, but every week, I was going to say. However, if there is any objection, I will not insist upon it.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Utah?

Mr. MONEY. I do not want to object, but I want to say that if this practice is so common as the Senator mentions it should be checked. Certainly it is out of order to put anything in the RECORD except what is spoken on the floor. There was a time when Jefferson's Manual prevailed, and no man was permitted to read his own speech on the floor.

Mr. SMOOT. Yesterday a whole book was put in without reading.

Mr. MONEY. I shall not make any objection.

Mr. SMOOT. If the Senator has any objection——

Mr. MONEY. No; I do not object.

Mr. BAILEY. Mr. President, I wish to suggest——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Texas?

Mr. GUGGENHEIM. Certainly.

Mr. BAILEY. I wish to suggest to the Senator from Utah that it is not gracious to insert this article at the conclusion of the speech of the Senator from Colorado, because it appears to be answering his speech with a letter of his constituent. I am sure the Senator has no objection to including this article in his own speech. I think that is fair.

Mr. SMOOT. I am perfectly willing that that shall be done.

Mr. GUGGENHEIM. I have no objection to having it inserted at the end of the speech of the Senator from Utah, but not after my remarks.

Mr. SMOOT. I am willing to have it inserted at either place.

The VICE-PRESIDENT. Without objection, permission is granted to insert the article at the conclusion of the speech of the Senator from Utah.

Mr. GUGGENHEIM. I have in my hand a letter from a very prominent citizen of Denver, who could not get any results from the department until he had applied direct to the Secretary of Agriculture, I am informed. I should like to have the letter of the Secretary of Agriculture read.

The VICE-PRESIDENT. Without objection, the Secretary will read as requested.

The Secretary read as follows:

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D. C., November 16, 1908.

DEAR SIR: Your letter of November 6 is received. Please give me the name of the settler who was notified by the forest supervisor that he must do nothing under his ditch permit until he settled his grazing trespass; also the name of the forest in which this occurred, and a copy of the letter of the forest supervisor, the original of which you have.

I shall be glad to investigate every one of the 20 other cases to which you refer if you will give me any facts upon which I can initiate an investigation. Whether the complainant is a Republican or Democrat will, of course, make absolutely no difference in the investigation or action on his case.

Very truly, yours,
JAMES WILSON,
Secretary.

Mr. GUGGENHEIM. I should like to say that the particular case has been adjudicated by Secretary Wilson. I hold in my hand a very long letter from a prominent citizen of Salida, Colo. It is not necessary to read the whole letter. The last paragraph, however, I should like to have the Secretary read.

The VICE-PRESIDENT. Without objection, the Secretary will read as requested.

The Secretary read as follows:

All the people of the State demand is a fair and impartial investigation of the hardships brought about by the forestry reserve, and they are willing to abide by the decision of a commission of disinterested parties.

Mr. GUGGENHEIM. I have received many letters of the character of those read. During the month of January I introduced a certain resolution providing for a careful inquiry and report respecting the operation and administration of the National Forestry Service. I understand that that resolution was referred to the Secretary of Agriculture, and no answer has been received. Personally if I were at the head of a large department I should not object to having that department investigate it.

Mr. DOLLIVER. I hope the Senator will allow me——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Iowa?

Mr. GUGGENHEIM. Certainly.

Mr. DOLLIVER. The resolution he refers to was referred informally to the Secretary of Agriculture, and while no formal reply was received, it was not insisted upon. The opinion of the Secretary of Agriculture was, however, that such an investigation now is not timely.

Mr. GUGGENHEIM. I believe if any Senator has any criticism to make, I believe in granting a full investigation. Inasmuch as it is said by the Senator from Iowa that there had not been sufficient time to have the resolution considered, it will be my pleasure to offer an amendment to the pending bill, which I trust may have the sanction of the Senate when we come to it.

I find in looking over the Senate committee's report that the appropriation for the Forestry Service last year was $3,896,200 and the House appropriated in their bill $4,646,200. The Senate committee recommends an appropriation of $5,146,200. I should like to see stricken out the $500,000 increase proposed by the Senate committee. I think this additional sum is not necessary, and I will take up this matter at the proper time.

The VICE-PRESIDENT. The question is upon agreeing to the amendment proposed by the Senator from Montana to the amendment of the committee.

Mr. WARREN. I understand the amendment to be that we shall cut the amount to $2,000,000.

Mr. CARTER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Wyoming yield to the Senator from Montana?

Mr. WARREN. Certainly.

Mr. CARTER. After consulting with many Senators who believe in a reduction, and further consulting the figures submitted to-day by the Senator from Utah [Mr. SMOOT], it appears to me to accord with the principles of good policy and administration to withdraw the amendment offered by me to substitute $2,000,000 for the existing sum. I do that now, and in lieu——

The VICE-PRESIDENT. The Senator from Montana withdraws the proposed amendment to the amendment.

Mr. CARTER. I propose to strike out the matter as formerly suggested in line 14 and line 15, on page 25, and in lieu of the figures in the original text and likewise the amendment proposed by the committee, to insert $3,160,000, which is about $9,000 in excess of the appropriation made in the items which were recapitulated under this heading last year. The appropriation last year was $3,151,900; and I move as an amendment to insert $3,160,000.

The VICE-PRESIDENT. The Secretary will read the amendment to the amendment.

The SECRETARY. On page 25, lines 14 and 15, strike out the committee amendment, "four million four," and also the words "hundred and eighty-six" in the text of the bill and insert "three million one hundred and sixty," so as to read: "$3,160,000."

Mr. WARREN. Mr. President, I think it will be admitted by every Senator on the floor that this matter of forestry is a great and important question to this country. I think those who have been acquainted with the western forests will admit that until we had government supervision of those forests we lost large areas in timber land, in percentages varying from fifty to ninety odd per cent of the growing timber thereon, through fires. I know that in some Territories and States they have estimated that the destruction reached some 97 per cent.

This matter of national forests and forestry commenced, as is well known, with a small appropriation in the sundry civil appropriation bill, because of the requests of western men, who were frightened at the loss of timber constantly going on.

I remember that in the city in which I live—and we are 40 miles from any considerable forest—we have had days together when the smoke was so thick that it was almost necessary to light a candle or a lamp in the rooms in the house. I have been in the city of Helena, Mont., when it was twilight—with the sun shining all the time I was there, two days—from the smoke of the burning forests. So we have no differences, I think, to settle here as to the necessity of protecting the forests.

Now, we have differences here as to the management of the forests, and I am very glad that the Senators who wish to criticise and discuss the question have had the time to discuss it freely and to register their complaints. I have been for the last five or six years the constant bearer of complaints that have come to me. A great many of them have been corrected and a great many more I hope will be corrected. I have always met with a gentlemanly mien on the part of the Forester, and I have never failed, when I could get to headquarters, to secure attention to the complaints.

But I submit that when you take a territory which covers an area equal, I should say, to about a third of the country west of the Missouri, and covering a hundred or more reservations, it is almost impossible to start in with a smooth routine. I hope it will be smoother as we proceed in preserving and improving the forests. No large business can be inaugurated and carried on from the beginning without the cogs slipping in some portion of the machinery. I hope this discussion will result in better attention, if there can be a closer attention, on the part of all who are interested in it, but I submit that to cut down this sum now will not reach the correction of the errors and the matters that are complained of. Hence matters will grow worse instead of better, as they are now doing, if we strangle the work with insufficient appropriations.

We started in not long ago with forestry possessions that amounted to perhaps a little over 100,000,000 acres. There are now 168,000,000 acres, and over 27,000,000 more are reserved which will doubtless be added in the very near future. So we have nearly 200,000,000 acres under the Forestry Service.

Perhaps we have too much; I will not discuss that; but certain it is that unless there has been great waste of money—and great waste of money has not been proven—we can not expect with the sum now proposed to properly take care of 200,000,000 acres of forest land, on, perhaps, only two-thirds as much money as we have heretofore provided to take care of 150,000,000 acres. So I say that the amendment offered by the Senator from Montana ought not to be agreed to. If such an amendment is agreed to, the machinery of handling the forest will, in my judgment, suffer to an extent that will be appreciable in every forest, and the Senator himself would be sorry that he had offered and carried such an amendment.

I hope the amendment will not be agreed to.

Mr. SMITH of Michigan. Mr. President, I had not intended to say anything upon this proposition, and I would not have done so if it had not been for the tremendous shrinkage in the attitude of the Senator from Montana [Mr. CARTER]. He has dropped eleven hundred thousand dollars in criticism of this service in the last ten minutes. I hope his last amendment will not be adopted, because I firmly believe that these national forests are to be the source of great revenue to the Government if we will pursue the policy of conservation that has been inaugurated by the Government.

Mr. President, the United States consumes from three to four times the wood every year which our forests produce, and the time is not far distant when we must become dependent upon Canada and South America for our timber supply.

The city in which I have the honor to reside is a large consumer of timber. It is the largest furniture-manufacturing city in the world and to-day has its agents searching over the globe for timber with which to manufacture products needed and desired by the people of the entire country.

I do not for one moment believe that any of this money is wasted. In fact, Mr. President, I look forward to the time when those in charge of the fiscal policy of the country may turn to these great forests for much of the money needed to carry on the Government. There is every prospect that these national forests will supply the place of much of the lost revenue that we have hitherto derived from our internal-revenue tax. The committees of the Congress charged with the responsibility of our fiscal policy are driven to their wits' ends to-day to know where they will raise the money necessary to run the Government. We have fixed and definite expenditures. Our naval programme is one to which the American people are committed, but it yields no pecuniary return. Our army calls for necessary supplies, but the only return from this source is pride and stimulated patriotism.

But, Mr. President, I firmly believe that within a decade, if the policy of the Government now being carried out is rigidly adhered to, we will augment our revenues by $25,000,000 from the sale of down, fallen, burned, and ripe timber in the forest reserves, which can be cut and sold without perceptible diminution of the supply.

And as the years go on we will add to our revenue a tremendous income over and above the expense of maintenance. All of Europe to-day depends upon South Amercia and Africa, in more or less degree, for its timber supply. Do we want to put this Government in the same position?

My State has been referred to over and over again in this debate. Twenty million dollars were lost last year in forest fires in the State of Michigan alone. We were rich in the gifts of nature in our original timber supply. Wisconsin, Minnesota, and Michigan had forests of incalculable value. Where are they to-day? Ruthlessly wasted and recklessly sacrificed until we are driven around the world seeking a timber supply for domestic purposes. Canada has learned a useful lesson from our costly experience.

Mr. President, Russia, Sweden, Hungary, and Canada are to-day supplying the wood deficit for a large part of the world, and even Sweden cut last year 106,000,000 cubic feet more than she produced. Russia, in spite of her enormous forest resources, is probably in the same situation. England is dependent upon Canada for her wood supply. And yet we haggle over the expenditure of a few million dollars, when we can see it returning a thousandfold if we will be but true to the principles and policies inaugurated by our Government with so much wisdom.

Our forests now cover 550,000,000 acres—one-quarter of the United States. The original forests covered not less than 850,000,000 acres. The national forests contain 400,000,000,000 feet of standing timber, now being cut and sold at the rate of 525,000,000 feet per year. At this rate, with Government supervision, under the guardianship of this department, it will take nearly eight hundred years to exhaust the timber now standing in the national forests. Conservation, indeed. And the work has only just begun. We shall soon be able to cut several billion feet each year for the benefit of the settler, farmer, and manufacturer, without serious sacrifice, but if there were no supervision the forests of the West would soon be depleted and the country shorn of this necessary product. It will grow; it will multiply; it will help supply our necessities; it will stand this country in good stead, and in the hour of our dependence these beautiful trees will come back to us to shade and protect our workmen in their employment and enter as an important part in the industrial condition of our country.

With clear vision, undaunted courage, and high resolve, he is intelligently doing a nation's work. Carping critics may slander him, but his work is performed in the open light of day, and his countrymen bid him godspeed, and all of the people will some day reap the benefit of his mastery and devotion.

Senators now here, if they remain as long in the public service as the Senator from Colorado [Mr. TELLER], who is about to retire, much to our regret, and the Senator from Maine [Mr. HALE], who, I hope, will never retire, will see coming back to the Government Treasury millions upon millions of dollars in return for the wise investments and the wise laws which preserve and conserve the forests of our country.

Mr. BORAH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Michigan yield to the Senator from Idaho?

Mr. SMITH of Michigan. Certainly.

Mr. BORAH. Does the Senator intend that one-third of Idaho shall remain in forest reserves for eight hundred years?

Mr. SMITH of Michigan. Oh, no; but I do think that the Government is wiser than Idaho would be; that the Government is wiser than Michigan has been, and that to throw safeguards around these tremendous forests will insure a liberal timber use and a long timber supply for many years to come.

I have heard a great deal of criticism of the Chief Forester. In my opinion there is not an officer in this Government animated by higher motives, of more sterling integrity, or one whose fidelity commands the admiration of his countrymen in higher degree than Gifford Pinchot.

Mr. CARTER. Mr. President, the Senator from Michigan [Mr. SMITH] is entitled to the thanks of the Senate for the beautiful prospect in store for us in the final fruition of this policy as he conceives it. The Senator from Michigan is courageous, because few Senators can be found ready to outline the ultimate purpose of the policy as he has bravely forecast it this afternoon.

We have been told that the streams within the States must be made subject to tribute by the Federal Government as they flow along their courses within the limits of the States. We have been informed that the coal resting under the surface of the State is to be made a subject of eternal tribute in the way of royalty to the Federal Treasury. Now, we are advised that it is not the prime purpose of this movement to conserve the forests, but to hold them within large areas within the State as a source of national income.

The State of Maine and the States of Illinois and Iowa and Missouri and Wisconsin enjoyed, through the operation of the laws that have heretofore obtained within their respective boundaries, the full benefit of the natural resources the great Creator had placed there; but these States of the Rocky Mountains and the western slope, where nature presents the hardest conditions settlers have ever faced on this continent, must conduct their local affairs subject to a tribute to the Federal Government upon the natural resources within their borders.

We, sir, in those border States pay our due tribute under the customs laws of the country. In so far as we consume imported goods we pay a higher price for domestic articles in consequence of protective duties. We pay our due proportion of the internal-revenue taxes of the country. Now, the Senator from Michigan would remove from taxation within our borders forever in some instances one-half of the area of a State, in others a third, and so on in varying degree. To compel our people to forego taxation over the area and at the same time to have that tribute on its natural product flowing into the National Treasury, I ask the Senator from Oregon or any other Senator if that would not present a glaring case of an unequal laying of burdens upon the new States wherein these forest reservations are located?

Mr. FULTON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Oregon?

Mr. CARTER. I yield.

Mr. FULTON. I wish to suggest to the Senator from Montana that I think he does the Senator from Michigan a great injustice. He charges that the Senator from Michigan contends that they will withhold these lands forever from being a part of the property of the State.

Mr. BAILEY. Only for eight hundred years.

Mr. FULTON. The Senator from Michigan only proposes to withhold them for eight hundred years. [Laughter.]

Mr. CARTER. I accept the suggestion of the Senator from Oregon. I do not desire to do the Senator from Michigan an injustice. Eight hundred years, however, is a trifling length of time. [Laughter.] It is only a temporary withdrawal.

Mr. WARREN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Wyoming?

Mr. CARTER. I do.

Mr. WARREN. After that little pleasantry, if the Senator will allow me, I presume before he finishes he will state that 25 per cent of the grazing income goes back to the locality where it is collected toward supporting schools, roads, and the government of the States in which the reserves are located.

Mr. CARTER. Mr. President, that has no reference whatever to the merits of this controversy.

Within this Chamber not long ago the contention was put forth that it was the inherent legal and constitutional right of this forest reserve organization to charge for the use of the water that fell from the heavens upon the earth within the limits of a forest reservation, and certain Senators, not fully regardful of the consequence to which that would lead, were for the moment carried away, and some yet believe that that would be a good concession to make to the Federal Government. This Government, Mr. President, as a central power, operated upon the conception which now obtains to a large degree, could never have been extended across the continent. The dual form of government, with general jurisdiction bearing lightly upon the people and local jurisdiction adjusting itself to varying conditions of climate, soil, and altitude, made it possible for this Government to become of continental sweep and jurisdiction. If, as certain Senators aver, in truth and in fact, and sometimes by indirection——

Mr. FLINT. Mr. President——

Mr. CARTER. I hope the Senator will excuse me a moment. This Government should become the great central power to which all sections must pay tribute on every local product, to which all sections must apply for every conceivable privilege. It can be readily seen—I say, if such a conception should be carried out, this Government would break down under the pressure to be brought and concentered here at Washington.

The wisest feature connected with the Federal Government arose from the jealousy of the colonies one of another. This led, sir, to an equal poise between the various States, whereby they became equal in this Chamber regardless of their size. There were certain rights reserved to the little States as well as to the big States, certain rights that are common to them without regard to where they are located, the conditions surrounding them, or the area within them. Now, a century and a quarter after the Government was formed, it is proposed that a departure shall be made whereby certain States that came into the Union on an equality with the original States are to be made subject to a certain species of taxation for eight hundred years, if you please, that never was applied to any other State, and never was intended to be applied to any State at all.

Mr. FLINT. Will the Senator allow me right there?

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from California?

Mr. CARTER. I yield to the Senator.

Mr. FLINT. Do I understand the Senator to mean that if within a forest reserve owned by the National Government a certain stream flowing through that forest reserve should drop, say, a thousand or two thousand feet, the Government of the United States should turn it over to some great power company without a dollar of compensation?

Mr. CARTER. Ah, Mr. President, this bugaboo of the great corporation is thrown in here to befog the minds of men. The question is not who shall have it, but where does the jurisdiction over the water that is purely within a State rest. It is for the State to say what shall be done with the water within its borders.

Mr. FLINT. Mr. President, there is no question that the State controls the water, and there can be no question, either, that three-fourths of the water powers in this country are now controlled by three or four corporations, and that the whole electric power in this Nation, if we do not go on with this regulation of forest reserves, will be in the hands of a monopoly, of one great corporation.

Mr. CARTER. Mr. President, I desire to ask the Senator from California if he understands that the Federal Government is the proper power to control water purely within the State?

Mr. FLINT. I say, Mr. President, the National Government is not the proper party to control water power; but I say that the National Government, having possession within certain areas of land, should, in the interest of the people, save them, so that there should not be a great power monopoly throughout this Nation.

Mr. CARTER. But, Mr. President, the answer does not meet the question. The Senator agrees with me that the State has sole and exclusive jurisdiction of waters within its borders, except to the extent that the Federal Government exercises its jurisdiction for purposes of navigation only; and the existence of a forest reserve or a military reservation, or any other kind of a government reservation, does not divest the State of its inherent, reserved, constitutional right as the controlling power in the matter of flowing waters within the State. But it was insisted that by some peculiar legerdemain we had divested the States of their right to control the waters within their borders and had transferred that right to the Forestry Bureau.

This, Mr. President, is, of course, a serious question; and let it be understood that, while denying the right of the Federal Government to exploit the resources of a State for profit, or to use the internal resources of one State for the benefit of all the States, we are still in favor of the Federal Government conserving these forests, protecting them from fire, protecting them from plunder. I believe those who have spoken upon this subject in the way of criticism will go as far as the interests of the case require to procure the necessary force to sup-

press fires and to regulate the sale and disposition of timber, but we will go no further.

With a Treasury to-day almost devoid of its surplus, with a deficiency confronting us which we must meet, I take it that a needless appropriation is an unjustifiable appropriation. The amendment which I have proposed——

Mr. FLINT. Mr. President——

Mr. CARTER. I hope the Senator will permit me to finish my sentence.

Mr. FLINT. I desire to ask the Senator a question.

Mr. CARTER. I should like to have the Senator permit me to finish my sentence.

The VICE-PRESIDENT. The Senator from Montana declines to yield.

Mr. CARTER. I will yield in a moment to the Senator, but I should like to make a connected statement.

The amendment I have proposed reduces this appropriation to about the figures of last year, to wit, $3,160,000. Last year we appropriated $3,151,900, so that the amendment contemplates an increase of about eight to nine thousand dollars over the appropriation of last year.

According to the figures set forth by the Senator from Utah [Mr. SMOOT], the working force of this bureau in the forests cost last year about $1,800,000; that is, in excess of the sum stated. Subtracting the $1,800,000 from the $3,160,000, we have left in this bill for administrative purposes or for the increase of the forestry force in active service $1,360,000. In addition to that, on the next page, Mr. President, will be found an appropriation of $600,000 for betterments, and upon a previous page will be found an item of $60,200 for the payment of the regular staff at Washington.

Mr. SMOOT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Utah?

Mr. CARTER. I wish the Senator would permit me to give these figures. I desire to have them in a connected form.

The VICE-PRESIDENT. The Senator from Montana declines to yield.

Mr. CARTER. I will yield to the Senator with much pleasure in a moment, but the table ought not to be broken up. I desire the table to appear in regular connection.

Mr. SMOOT. I merely want to say——

The VICE-PRESIDENT. The Senator from Montana declines to yield.

Mr. CARTER. I will submit to any criticism the Senator desires to make.

Mr. SMOOT. It is not a criticism, by any manner of means.

Mr. CARTER. I will state the figures again, so as to get them together, to the end that they may not be read in a disconnected form.

The amendment I propose will give $3,160,000 for this service, plus $60,200 appropriated on the preceding page for salaries of the Forest Bureau. On the next page is an item of $600,000 for improvements. Making an allowance of $1,800,000 for the payment of forest supervisors and rangers, the $600,000 for improvements, and $62,200 for salaries of the Forest Service in Washington, the amendment I have proposed leaves, in fact, for improvements and administration $2,100,000, after paying the foresters, paying the rangers, and conducting the establishment in the field, without increase; but I assume that some increase will be made, for it is inconceivable that where the pay roll of the active workers only amounts to $1,800,000 the supervision should cost over $2,100,000. I think, Mr. President, that this amendment will make an ample allowance; and I would not be one of the Senators here present to vote for less than an ample sum; but I do feel that the committee report calls upon us to vote for more than a million dollars in excess of the necessities of this service, according to the showing made by the Senator from Utah.

Mr. HEYBURN obtained the floor

Mr. WARREN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Wyoming?

Mr. HEYBURN. Yes.

Mr. WARREN. Does the Senator wish to enter into debate on this question?

Mr. HEYBURN. Yes.

Mr. WARREN. It looks to me, Mr. President, as if we might determine now whether we can conclude the consideration of this bill without a recess. It appears to me that we can not conclude, and perhaps the Senator would as soon yield to me to take a recess until 8 o'clock.

Mr. HEYBURN. I did not intend to make any extended remarks. Some statements have been made that I feel impelled to answer, and although, of course, I do not desire to inconvenience Members, perhaps it might be better that I should go on.

Mr. WARREN. The Senator knows it is nearly 6 o'clock, and if we take a recess until 8 o'clock it will require all of that time for Senators to dine and refresh themselves.

Mr. CARTER. I suggest, with the permission of the Senator from Wyoming, that he make the request that the Senate meet at 11 o'clock in the morning, and vote at 1 o'clock on the bill and all amendments.

Mr. WARREN. We can not do that.

Mr. HALE. To-morrow has been set aside for the eulogies.

Mr. CARTER. I withdraw my suggestion.

Mr. WARREN. I desire to remind the Senator from Montana that, in my judgment, it is necessary either to finish the bill to-night or let it go over until Monday; and I know the Senator does not want to put the finish of a matter of this kind so far in the future.

Mr. TELLER. Let us go on.

Mr. WARREN. I am willing to go on and complete the bill without recess, if Senators so desire.

Mr. TELLER. Why not go right on?

Mr. WARREN. I hear about me suggestions that we finish the bill to-night. I ask unanimous consent that we may sit in session and finish it. I think it can be done in a few minutes.

Mr. KEAN. In a half hour.

The VICE-PRESIDENT. The Senator from Wyoming asks unanimous consent that the Senate continue the consideration of the pending bill until its consideration is concluded. Is there objection?

Mr. CARTER. I ask the Senator if he will kindly couple with that a request that we vote at, say, 10 o'clock, the discussion to be conducted under the ten-minute rule?

Mr. WARREN. I am willing to do that, if it will be acceptable.

Mr. HEYBURN. I do not understand it has been so ordered yet.

Mr. WARREN. Mr. President——

The VICE-PRESIDENT. The Senator from Idaho has the floor. Does he yield further to the Senator from Wyoming?

Mr. HEYBURN. I do not understand that it has been so ordered as yet.

Mr. WARREN. It has not.

Mr. HEYBURN. No.

Mr. WARREN. But I wanted to complete the request.

Mr. HEYBURN. Very well.

Mr. WARREN. The Senator from Montana suggests that we vote at 10 o'clock. I do not think he desires that we should sit here four hours and a quarter before voting. I should like to fix an earlier hour than that. It seems to me probable that in a half hour or an hour the debate will be concluded.

Mr. ALDRICH. I suggest that we vote at half-past 6.

Mr. WARREN. Then, I ask unanimous consent that at half-past 6 a vote may be taken on the bill and all amendments.

Mr. HALE. On all amendments.

Mr. HEYBURN. All amendments?

Mr. WARREN. Yes.

Mr. HEYBURN. I desire to offer an amendment.

The VICE-PRESIDENT. The Senator from Wyoming asks unanimous consent that a vote upon the bill and all amendments shall be taken at half-past 6 o'clock.

Mr. HEYBURN. I know it is not debatable, but I wish to say that all amendments have not yet been offered.

Mr. WARREN. That would not make any difference.

Mr. HALE. That would not matter.

The VICE-PRESIDENT. On all amendments pending or to be offered. Is there objection?

Mr. FULTON. I shall object to that unless there is some understanding as to the length of time that any one Senator may occupy the floor.

Mr. HEYBURN. I have taken the floor for the purpose of replying only to some suggestions that have been made within the last hour.

Mr. HALE. Will not the Senator, holding the floor, for the convenience of the entire Senate, give the Senate an opportunity to make an agreement as to when a vote shall be taken? If half past 6 is not late enough, I suggest half past 7.

Mr. TELLER. The speeches to be limited to ten minutes.

Mr. KEAN. Say 7 o'clock.

Mr. HALE. I do not think the matter of a half hour is so important as it is to get it done. I will put it in this form: I ask unanimous consent that not later than half past 7 o'clock, without further debate, a vote shall be taken upon the bill and all amendments then pending. I should like to couple with that a provision that from now on the debate shall proceed under the five-minute rule or the ten-minute rule.

Mr. TELLER. The ten-minute rule.

Mr. HALE. The ten-minute rule. That gives us a little more than an hour and a half, and it will be an exceedingly good arrangement if we can dispose of the bill in that way. I ask the Senator in charge of the bill if that is agreeable to him? I do not want to interfere with him.

Mr. WARREN. I should be very glad to have that done, except that there are certain amendments which are not on the desk, and I should like to include all amendments that may be offered.

Mr. HALE. I said all amendments then pending.

The VICE-PRESIDENT. The Senator from Maine asks unanimous consent that the Senate vote upon the pending bill and all amendments then pending or to be offered not later than half past 7 o'clock this evening, and that——

Mr. ALDRICH. I suggest to the Senator from Maine that he make it 7 o'clock. I am sure we can just as well get through with the discussion by 7 o'clock.

Mr. WARREN. I shall be glad to have it made 7 o'clock.

Mr. TELLER. Make it not later than 7 o'clock.

Mr. HALE. I am willing that that be done.

The VICE-PRESIDENT. Not later than 7 o'clock, and that the debate proceed under the ten-minute rule. Is there objection?

Mr. HEYBURN. I object to the latter part, inasmuch as I have the floor and ten minutes may not be sufficient in which to express myself on an amendment that I am about to offer.

Mr. ALDRICH. Give the Senator from Idaho twenty minutes.

Mr. HEYBURN. I will not occupy a minute more than I feel impelled to use in justice to the amendment.

Mr. HALE. Does not the Senator see that we are trying to get an agreement which is for the almost universal convenience of the Senate?

Mr. ALDRICH. I suggest that the Senator from Idaho be allowed twenty minutes.

Mr. BAILEY. I suggest that the ten-minute rule be not enforced until the Senator from Idaho shall have concluded.

Mr. HALE. I will make that amendment.

The VICE-PRESIDENT. The Senator from Maine asks unanimous consent that the Senate vote not later than 7 o'clock upon the pending bill and amendments then pending or to be offered, and that after the Senator from Idaho shall have concluded his remarks the debate shall proceed under the ten-minute rule. Is there objection?

Mr. DIXON. There are some amendments to be offered besides that one.

The VICE-PRESIDENT. The request includes all amendments pending or to be offered.

Mr. WARREN. It will be included.

Mr. DIXON. With that understanding, the Senator from Idaho, judging from past experience, might not get his amendment explained before 7 o'clock. I have an amendment I think very important, which I should like to offer and have read for the benefit of the Senator from Idaho. I think it very important. I think the western Senators will agree to it. I should like to have it read.

The VICE-PRESIDENT. Is there objection to the request?

Mr. DIXON. Not on my part, if we have some time——

The VICE-PRESIDENT. Without objection, it is so ordered.

Mr. DIXON. I should like to have my amendment read.

The VICE-PRESIDENT. Does the Senator from Idaho yield now, in order that the amendment of the Senator from Montana may be read?

Mr. HEYBURN. I desire to lose no time under the circumstances. I offer an amendment, and I will read it, with the permission of the Senate; it is only a few lines in length. On page 26, after line 11, insert:

That the Secretary of Agriculture is hereby directed to eliminate from the forest reserves in the States of Idaho and Colorado all sections of public lands not timbered, and to restore such public lands to location and purchase as other public lands of the same class are open to location and purchase under the land laws of the United States; and the Secretary of Agriculture is hereby directed to report to Congress on or before the first Monday in December, 1909, the quantity of nontimbered lands within all forest reserves within the States of Idaho and Colorado, showing upon a map of such forest reserves the areas timbered and nontimbered.

I simply desire by the amendment that the Secretary of Agriculture shall confine the forest-reserve law to its original purpose, and not, under a pretense of enforcing the law, include vast areas of nontimbered land. In the State of Idaho there are 9,000,000 acres of nontimbered land in forest reserves.

Mr. President, as has been so well stated by the senior Senator from Montana [Mr. CARTER], the purpose of the forest-reserve legislation was to protect the forest, and not the prairies or the nonforested land. It was never within the contemplation of Congress that areas nonforest in character should be included within the forest reserves. The amendment I have offered is simply to eliminate that class of land by sections and restore it to the public domain, that it may be taken up for legitimate purposes by qualified locators or homesteaders upon the public domain.

The element in this matter to which we object is that which puts the Government into business in competition with the citizens of the States. That is the vice of this forest system to-day. They do not confine themselves to the protection of forests, but have gone into the business of grazing and every other pursuit that they can force upon the people.

Mr. WARREN. I do not wish to take any of the time of the Senator, but I desire to say on the part of the committee that if the Senator will make the amendment applicable to all the forest reserves and then qualify it in proper manner, or agree that we may qualify it in conference, I will accept it and let it go into conference to see what can be done about it.

Mr. HEYBURN. I should be very glad to make it applicable to all forest reserves, because I think it is a fair and just provision of law.

Mr. WARREN. The Senator understands that there must be qualifying additions, but I am willing, as I said before, to accept it for the moment, if made general, and put it in conference for consideration; and we will then consult with the Senator, the Secretary of Agriculture, the Forester, and others.

Mr. HEYBURN. Then the amendment is offered and accepted by the committee?

The VICE-PRESIDENT. The Secretary will state the amendment, which will be pending.

The SECRETARY. On page 26, after line 11, it is proposed to insert:

That the Secretary of Agriculture is hereby directed to eliminate from all forest reserves all sections of public lands not timbered, and to restore such public lands to location and purchase, as other public lands of the same class are open to location and purchase under the land laws of the United States, and the Secretary of Agriculture is hereby directed to report to Congress on or before the first Monday in December, 1909, the quantity of nontimbered lands within all forest reserves, showing upon a map of such forest reserves the areas timbered and nontimbered.

Mr. HEYBURN. It is not confined to Idaho and Colorado, under the agreement with the chairman of the committee, but is general.

Mr. WARREN. The Senator must understand that I shall undertake to get some qualification, and I shall consult not only with him, but with the Secretary of Agriculture, while the matter is in conference.

Mr. HEYBURN. Mr. President, I do not intend to go over the questions that have been so ably presented. I only desire to call attention to the fact that the contention of those who have spoken, and who think as I do, from the beginning has been that the Government should be confined to the original purpose in the creation of forest reserves—that is, the preservation of the forests—and that it should be put out of the business of grazing and letting contracts for grazing, and it should be put out of the business of selling timber. It should be put out of competition in business with the individuals within a State. That is the objection, and the great objection summed up, that we have to this class of legislation, carrying this appropriation. The sum that will remain after the amendment pending, offered by the Senator from Montana, will be more than sufficient to preserve the forests, and let us now put the Government out of business in competition with the citizens of any State. We will then have reduced this question down to the original purpose of this class of legislation.

The VICE-PRESIDENT. The Senator from Montana [Mr. DIXON] proposes an amendment, which will be stated.

The SECRETARY. On page 26, after line 24, it is proposed to insert:

That hereafter 50 per cent of all money received from each forest reserve during any fiscal year, including the year ending June 30, 1908, shall be paid at the end thereof by the Secretary of the Treasury to the State or Territory in which said reserve is situated, to be expended, as the state or territorial legislature may prescribe, for the benefit of the public schools and public roads of the county or counties in which the forest reserve is situated: *Provided*, That when any forest reserve is in more than one State or Territory or county, the distributive share to each from the proceeds of said reserve shall be proportional to its area therein.

Mr. WARREN. As I understand, the amendment leaves the law as it is, but changes the amount.

Mr. DIXON. The percentage.

Mr. WARREN. It changes it from 25 to 50 per cent.

Mr. DIXON. From 25 to 50 per cent.

Mr. WARREN. On the part of the committee, I am willing to accept the amendment.

Mr. TELLER. Mr. President, when an amendment was offered here to make it 25 per cent, not 50 per cent, I voted

against it. I want to vote against this amendment. I think we are entitled to a hundred per cent and not 50 per cent. I do not propose to be bribed to vote for what I believe to be an unfair proposition because the State may get something out of it. The State of Colorado got this year about $50,000. Every dollar of it came out of the citizens of Colorado. It did not come out of the General Government. It was our property, because the timber of the State and the land of the State belong to the State and can not be used or occupied by anybody else. The Government, when we were admitted into the Union, was the trustee of those public lands, and we are the wards of the Government to that extent. I will read the exact words the Supreme Court used sixty-four years ago. It will take only a moment. I will keep within the ten minutes. This was a case from Alabama. It is the case of Pollard's Lessee *v.* Hagan et al., reported in Third Howard. It has been a noted case and has been cited probably twenty times by the Supreme Court.

When the United States accepted the cession of the Territory they took upon themselves the trust to hold the municipal eminent domain for the new States and to invest them with it to the same extent, in all respects, that it was held by the States ceding the Territories.

It was contended in this case that Alabama had made a stipulation that took it out of the general rule, and this is what the court said. This is a case noted and has been cited, I think, oftener than almost any other case ever decided. They say as to this:

And if an express stipulation had been inserted in the agreement—

That was with Alabama—

And if an express stipulation had been inserted in the agreement granting the municipal right of sovereignty and eminent domain to the United States, such stipulation would have been void and inoperative, because the United States have no constitutional capacity to exercise municipal jurisdiction, sovereignty, or eminent domain, within the limits of a State or elsewhere, except in the cases in which it is expressly granted.

I want to make another quotation from the same case:

We therefore think the United States hold the public lands within the new States by force of the deeds of cession, and the statutes connected with them, and not by any municipal sovereignty which it may be supposed they possess, or have reserved by compact with the new States, for that particular purpose. The provision of the Constitution above referred to shows that no such power can be exercised by the United States within a State. Such a power is not only repugnant to the Constitution, but it is inconsistent with the spirit and intention of the deeds of cession.

One other word or two.

Alabama is therefore entitled to the sovereignty and jurisdiction over all the territory within her limits.

It is not within the power of Congress by law to take out of the jurisdiction of the State any of the territory that was recognized as belonging to the State of Colorado when it was admitted. I do not mean to say that the Government could not reserve this land from sale. It has the power to do so; but in doing so it violates the spirit of the law and the very spirit of the Constitution under which we came into the Union. But the jurisdiction of the State of Colorado is taken away by the forest reserves. They claim the right to punish people for offenses against the regulations, which they say have the same force as law. Those have been so small and inconsequential that they have never gotten into the Supreme Court of the United States, and perhaps they never will, for the ordinary man pestered and prosecuted and persecuted by these agents of the Government is unable to go there.

This was a question of water. I have read this case before, and I am going to read it again, because, while our friends say the Government does not pretend to hold the water, I know and I have put into the RECORD the fact that Mr. Pinchot has capitalized the water of all of the States and made an estimate of what the revenue would be on it. It is not quite as great as the Senator from Michigan expects, but upon the same principle.

Mr. President, I desire to say just one word about the suggestion of the Senator from Michigan. If he thinks that eight hundred years from now or two hundred years from now or one hundred years from now the Government will be dependent upon the revenue it receives from the timber, I want to notify him that the Government will be bankrupt long before that. The people will demand and will have this timber for use, and the Government will not be allowed to hold it. When we get 150,000,000 or 200,000,000 people, as we will have before the Senator is as old as I am, or pretty nearly by that time, do you suppose the Government can hold this timber away from the people?

Mr. President, it is absurd and cruel to think about it. Let me, in conclusion, read a word or two said by the court in this case. While I think the department has somewhat backed down, they are still practically asserting the right to the water, and they are doing it by a sort of backhanded way. The court said:

By the preceding course of reasoning we have arrived at these general conclusions: First, the shores of navigable waters, and the soils under them, were not granted by the Constitution to the United States, but were reserved to the States respectively. Second, the new States have the same rights, sovereignty, and jurisdiction over this subject as the original States. Third, the right of the United States to the public lands, and the power of Congress to make all needful rules and regulations for the sale and disposition thereof, conferred no power to grant to the plaintiffs the land in controversy in this case.

That is where the Government undertook to sell the land under the river, and the court said it was not legal. I will venture to say that the principle laid down in that case has been cited recently by the Supreme Court. In one of the latest cases, which is found in Two hundred and ninth United States Reports, the court held that the State of New Jersey could prevent any person in the State of New York or any person in the State of New Jersey from piping the water of that State into the State of New York, although it was wanted for city purposes, asserting in the most positive terms the doctrine I have been contending for—that the water belongs to the State. In one of those cases the court goes so far as to say that any contract the State might make with the Government to get rid of the water was not legal. That was in the Chicago case. The court held that no contract of that kind would be a legal contract, and that the State could not forego its right to that water and deprive the citizens of the State of the right to its use.

Mr. President, I do not know whether I am within the ten-minute rule or not. I only wanted to say that I will not vote for 50 per cent; not that I do not think we are entitled to it, but I am not going to recognize the right of the Government to tax our people in the way that this will do.

The VICE-PRESIDENT. The Senator's time has expired.

Mr. GUGGENHEIM. Mr. President, in offering the present amendment it is not done with a view of criticising either the Secretary of Agriculture or the Forester, Mr. Pinchot.

The VICE-PRESIDENT. The Senator from Colorado proposes an amendment, which will be read.

The SECRETARY. On page 26, after line 21, insert:

That a committee, consisting of three Members of the Senate and three Members of the House of Representatives of the Sixtieth Congress, to be selected by the Vice-President and the Speaker of the House of Representatives, respectively, shall be appointed to make a careful inquiry and investigation respecting the operation of the laws of the United States relating to the administration of the national forests during the recess of Congress. Said committee is hereby authorized to hold meetings in States and Territories containing national forests, for the purpose of hearing such complaints, statements, and suggestions as may be tendered by citizens affected by the national-forest administration, and shall make a report in writing to Congress not later than the first Monday in December, 1909.

For expenses of said committee, including actual expenses of each member while necessarily absent from his place of residence in the performance of his duties as such committeeman, and for the payment of necessary clerical assistance, $10,000, said appropriation to be immediately available.

Mr. WARREN. Of course all these amendments are out of order until we settle the committee amendments, but I have indicated what I would do as to two of them. I may say as to this amendment, I am inclined to think that when the time comes I shall be compelled to make a point of order. Although I should be glad that it might be done, yet it is legislation. However, we will not settle that now.

The VICE-PRESIDENT. Without objection, the amendment will lie on the table.

Mr. SIMMONS. Mr. President, on page 15, line 22, I move to strike out the word "handling," and in line 24, the same page, after the word "thereof," I move to insert the words "and carrying into effect the provisions of the law relating thereto."

Mr. WARREN. Does the Senator think that is necessary? I have no objection to it.

Mr. SIMMONS. I do not think it is absolutely necessary, yet I think it will be serviceable in referring to the law already in existence.

Mr. WARREN. I shall interpose no objection.

The amendment was agreed to.

Mr. DEPEW. On page 12, after line 3, I move to insert:

To enable the Secretary of Agriculture to lease and maintain for a period of ten years a farm at Morrisville, Madison County, State of New York, for the purpose of general agricultural and horticultural experimentation in connection with the so-called "unoccupied" or "Volusia soil" farms of the Eastern and Middle States, and to disseminate information of result of such experimentation as to the most profitable methods of utilizing such soils, $25,000.

Mr. WARREN. Would the Senator from New York like to give us some explanation of the amendment?

Mr. DEPEW. I wish to make an explanation of a few moments in regard to it.

What are known as the "Volusia soils" is not a chemical term, but it is the habit of the Agricultural Department to name

particular soils from the place where that characteristic is most observed, and it is found at a place called "Volusia," somewhere on the frontier of our State.

Mr. DOLLIVER. Mr. President, it is a matter of very considerable interest, especially to the committee, to have an accurate definition given of that word, as we are unable to locate it in any dictionary or scientific treatise of any sort.

Mr. DEPEW. I will say to the Senator from Iowa that "Volusia" is not found in the dictionary, nor is it a scientific or chemical term, but it is found in the Gazetteer of the United States. It is a small village; the surrounding country is of that character of soil, and so the Agricultural Department——

Mr. DOLLIVER. Of what character, Mr. President?

Mr. DEPEW. The character that is of no value whatever.

Mr. DOLLIVER. It seems to me that a more descriptive word could be found for it.

Mr. DEPEW. There are about 10,000 square miles of this sort of soil in New York, Ohio, and Pennsylvania, which forty years ago was as good agricultural land as anywhere in those States; but the soil has become so completely exhausted that many of the farms have been abandoned, and the average assessment value of the farms is about $7 an acre.

At Morrisville, N. Y., the State of New York has now created an experiment station. The buildings are the county buildings, the county seat having been changed, and they have been donated to the State for this purpose. The State has appropriated for it $20,000. Five hundred acres of this soil will now not yield as much as 50 acres of ordinary farm land. The Department of Agriculture believe that if they can make the proper experiments, with the means now at their disposal and the knowledge which they have, they can in the course of the few years covered by this appropriation of $25,000 be enabled to find out and then to teach how this soil can be redeemed and restored to its former agricultural value.

In these days, when the farming lands of the United States belonging to the national domain are so nearly exhausted, this is practically restoring a region of 10,000 square miles to productive farming, as it was when it was virgin soil.

The State of New York has done much to the injury of its own farmers for the benefit of the cheaper and more productive lands of the West. We built the Erie Canal, the result of which was to allow the products of the cheap lands of the West to go by our farms to New York City, and the wheat country of central New York had to change to other methods of production. We are now spending $101,000,000 for the enlargement of that canal to still further aid our western brethren to get the crops of their richer and cheaper farms to market.

So, Mr. President, I think that this appropriation is in the interest not only of New York, but of the productive power of the country, for the benefit of all the States in which are located these unproductive soils.

Mr. CLARK of Wyoming. I offer an amendment, and I desire to have it read so that it may be voted upon.

Mr. FRYE. Will the Senator allow me a moment?

Mr. CLARK of Wyoming. Certainly.

Mr. FRYE. I think if the Senate should meet to-morrow morning at 11 o'clock the river and harbor bill could be easily disposed of before the time came for the eulogies. It is important, of course, that the bill shall have early consideration, because it must go into conference.

Therefore I move that when the Senate adjourns to-day it adjourn to meet at 11 o'clock to-morrow.

The motion was agreed to.

The VICE-PRESIDENT. The Senator from Wyoming [Mr. CLARK] proposes an amendment, which will be read.

Mr. WARREN. My attention was engaged for the moment. What was done with the amendment of the Senator from New York [Mr. DEPEW]?

The VICE-PRESIDENT. It will lie on the table. Under the rule the committee amendments are to be first considered. The Senator from Wyoming proposes an amendment, which will be read.

The SECRETARY. It is proposed to add at the end of the bill the following:

That the Secretary of Agriculture is directed to furnish to the Senate on or before the first Monday of December, 1909, a full and complete copy of the pay roll of the Bureau of Forestry for the month of September, A. D. 1908, showing in detail and in full the names, occupation, and monthly salary and expenses of each employee so on said rolls or in the employment of the Forestry Service; showing also in one total the amount paid for the services and expenses of superintendents, supervisors, and rangers, and in another total the amount paid for other services and expenses of said Forestry Service.

Mr. CLARK of Wyoming. I will say to the Senator in charge of the bill that the month specified in the amendment is taken at random.

Mr. WARREN. Would not my colleague as well make it for a quarter, taking some regular quarter?

Mr. CLARK of Wyoming. For the quarter beginning July 1, 1908?

Mr. WARREN. Very well; I have no objection.

Mr. CLARK of Wyoming. I will say that it would make a great deal more work, because I ask for a duplicate pay roll of the month. Does the Senator accept it with that modification?

Mr. WARREN. When the time comes I shall do so.

The VICE-PRESIDENT. Is there any other Senator who desires to address the Senate?

Mr. WARREN. My understanding was that we should proceed to vote upon this measure not later than 7 o'clock. Therefore I conclude that a vote on the pending amendment is now due, unless some Senator wishes to discuss it.

The VICE-PRESIDENT. That is the Chair's interpretation of the agreement. Is there any other Senator who desires to address the Senate? If not, the Chair is of opinion that the Senate will proceed to vote upon the pending amendment and amendments to be offered.

Mr. HEYBURN. Mr. President, I suggest the absence of a quorum.

The VICE-PRESIDENT. The Senator from Idaho suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the followng Senators answered to their names:

Bailey	Daniel	Guggenheim	Perkins
Borah	Depew	Hemenway	Piles
Bourne	Dick	Heyburn	Richardson
Brandegee	Dixon	Johnston	Simmons
Brown	Dolliver	Kean	Smith, Mich.
Bulkeley	du Pont	Kittredge	Smoot
Burkett	Flint	La Follette	Stephenson
Burnham	Foster	McCumber	Sutherland
Carter	Frazier	Martin	Teller
Clark, Wyo.	Frye	Nelson	Warner
Clay	Fulton	Overman	Warren
Cullom	Gallinger	Page	Wetmore
Curtis	Gamble	Penrose	

The VICE-PRESIDENT. Fifty-one Senators have answered to their names. A quorum is present.

Mr. CARTER. Mr. President, I am told that many Senators have departed, understanding that the vote on the pending amendment was to be taken at 7 o'clock. While the phraseology "not later than 7 o'clock" was employed, I think the Chair properly holds that a vote might now be taken.

Mr. WARREN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Wyoming?

Mr. CARTER. Certainly.

Mr. WARREN. That was not the agreement. The agreement was that the vote should be taken not later than 7 o'clock, and as there is only a part of an hour—less than an hour—Senators could hardly expect to go downtown, get their dinners, and get back.

Mr. CULLOM. There is a quorum present, as has just been announced by the Chair.

Mr. CARTER. I do not take issue with the Senator as to the agreement. I have been informed that a number of Senators have gone to near-by hotels for their dinners and expect to be here at 7 o'clock. I do not wish to consume time needlessly nor to delay the Senate, but I think it would be proper to take a recess until 1 minute to 7.

Mr. WARREN. Mr. President, I have no idea what the effect of the absence of Senators may be, and I might say that I do not care. If we can have a quorum and vote upon the measure, I am willing to accept the verdict of those who are present, because I fear if we should take a recess or wait until 7 o'clock we might lose half of the present quorum.

Mr. CULLOM. A quorum is here now.

The VICE-PRESIDENT. Under the agreement, the Chair is of the opinion that the question is upon the amendment proposed by the Senator from Montana [Mr. CARTER].

Mr. WARREN. I ask that there may be a vote upon the amendment.

The VICE-PRESIDENT. All in favor of the amendment——

Mr. CARTER. Before the vote is taken, Mr. President, I desire to again ask the Senator from Utah [Mr. SMOOT] to state the amount necessary to pay this active working force. I think upon that point turns the whole question involved in the vote. It is not necessary for me to reassert what I have heretofore said, that it is my desire to furnish this service with all needful support. If the figures I make are correct, the amendment proposed will leave $1,800,000 for the working force in the field, $600,000 for improvements during the year, and $50,000 for a clerical force in the city of Washington, thus providing not only $1,800,000 for a working force of foresters

and rangers, but $2,000,000 for betterments and increase of the force and clerical hire. If those figures are correct, I think the provision made is ample, the amount left for clerical hire and improvements being altogether out of proportion to the amount necessary to meet the pay roll in the field.

I have no more interest in this matter than any other Senator present. If the Senate thinks that an extra $1,300,000 over the $2,100,000 which will be left should be voted to be disbursed without any direction from Congress at all, except in such general terms as allow disbursements in any way, I shall be content. My vote shall be cast for what I deem necessary, and not for any more.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Montana.

Mr. HALE. What is the amendment, Mr. President?

The VICE-PRESIDENT. The amendment will be again stated.

The SECRETARY. On page 25, lines 14 and 15, in the committee amendments, it is proposed to strike out "four million four," and to insert "three million one," and in the text of the bill, in line 15, to strike out "eighty-six" and insert "sixty," so that the total sum for the Forest Service will be $3,160,000.

Mr. CARTER. Mr. President, the statement by the Secretary of the total amount for the Forest Service does not convey a correct impression, because a previous item of $50,000 is provided, and a subsequent item of $600,000 is also provided, so that the amount will be $3,100,000 plus $650,000; that is, $3,750,000.

Mr. TELLER. I should like to have the yeas and nays on that proposition, Mr. President.

Mr. ALDRICH. Mr. President, I understand we are proceeding under a unanimous-consent agreement that committee amendments shall be first disposed of. Under that agreement I take it that the committee amendment increasing the appropriation $500,000 must be first voted on.

Mr. WARREN. This is a substitute for that amendment.

Mr. ALDRICH. I know; but that does not cover my suggestion. I think the question should be first put upon the committee amendment increasing the appropriation $500,000. It seems to me that that amendment ought to be defeated. In the present state of the Treasury I think that we certainly should not increase the appropriation above the amount carried in the bill as it came from the House. I realize that it is difficult for a person who lives as far away from the scene of this great work as I do to understand or appreciate the necessity for the increase, especially where there are such conflicting statements and ideas in regard to this work as seem to have been developed on this floor; but it does seem to me that certainly the service would not suffer if the amount proposed by the amendment of the Senate committee as an addition to the appropriation in the House bill should not be adopted. I hope that the Senate will first vote upon the proposition to add half a million dollars to the House provision.

Mr. CARTER. In order to facilitate the proceeding suggested by the Senator from Rhode Island and to prevent any confusion, I withdraw the amendment offered by me, and will later offer it in the Senate.

Mr. WARREN. I suppose the Senator has permission to withdraw it. Of course I am not going to object, but the amendment having been offered and debated, he should ask permission to withdraw it.

Mr. HALE. I hope the Senator will not make that point.

Mr. WARREN. Oh, no; I said I would not.

The VICE-PRESIDENT. The Senator from Montana withdraws his amendment. The question is on the amendment of the committee.

Mr. TELLER. The vote, then, is on the committee amendment adding $500,000 to the amount carried by the bill as it came from the House.

The VICE-PRESIDENT. That is the amendment. The Secretary will state the amendment that there may be no misunderstanding.

The SECRETARY. On page 25, line 14, after the word "elsewhere," it is proposed to strike out "three million nine" and insert "four million four."

The VICE-PRESIDENT. The question is on agreeing to the amendment.

The amendment was rejected.

The VICE-PRESIDENT. The question now is on the amendment offered by the Senator from Idaho [Mr. HEYBURN], which will be stated.

The SECRETARY. On page 26, after line 11, it is proposed to insert the following:

The Secretary of Agriculture is hereby directed to eliminate from all forest reserves all sections of public lands not timbered and to restore such public lands to location and purchase as other public lands of the same class are open to location and purchase under the land laws of the United States, and the Secretary of Agriculture is hereby directed to report to Congress on or before the first Monday in December, 1909, the quantity of nontimbered lands within all forest reserves, showing upon a map of such forest reserves the areas timbered and nontimbered.

Mr. FLINT. Mr. President, I desire to raise the point of order on that amendment that it is general legislation on an appropriation bill.

The VICE-PRESIDENT. The language of the proposed amendment is quite clear——

Mr. HEYBURN. Mr. President, before the Chair rules, I ask that the question be submitted to the Senate.

The VICE-PRESIDENT. The Chair is of the opinion that the language is quite clear, and the Chair sustains the point of order.

Mr. HEYBURN. I understood the unanimous-consent agreement was that we should vote on each amendment pending. That is a pending amendment.

The VICE-PRESIDENT. The Chair is of the opinion that under the unanimous-consent agreement every amendment may be challenged under all of the rules of the Senate, and that the raising of a point of order is entirely proper. Such has been the uniform practice of the Senate, so far as the Chair is advised. The point of order was properly interposed, and the Chair thinks that the amendment contravenes paragraph 3 of Rule XVI, and therefore sustains the point of order.

Mr. HEYBURN. Mr. President, had I known that the point of order would have been raised, there would have been no unanimous-consent agreement.

Mr. HALE. Mr. President——

Mr. HEYBURN. I have fifteen minutes to debate this question.

Mr. HALE. Yes.

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Maine?

Mr. HEYBURN. Certainly.

Mr. HALE. The order adopted was upon my suggestion, and I do not think that the Senator from Idaho ought now to indicate that under no circumstances under the rules of the Senate would he have consented to the unanimous-consent agreement unless he could have his way with regard to this amendment. We shall never do any business in the Senate, with our lack of the previous question—which I am not in favor of applying to this body—unless Senators give way to the expressed and understood will apparently of the great majority of the body.

I should have voted with the Senator on his amendment, but clearly the Chair is right in holding that any agreement of this kind is subject to all the rules of the Senate. All amendments have to be disposed of. It never occurred to me that my proposition involved a right to cut off a point of order, which is a part of the proceedings.

We shall not be able to get through this session without having unanimous-consent agreements about the disposition of great bills, and the general wish of the Senate has got to control in such things. I hope the Senator will not feel impelled, unless he can have his way upon any particular amendment, to object to unanimous consent. We can not get through this session and enact the necessary legislation without having certainly half a dozen cases that will have to be disposed of by unanimous consent.

Mr. TELLER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Colorado?

Mr. HEYBURN. Certainly.

Mr. TELLER. The difficulty in coming to a termination of debate is to get the opportunity to vote. My judgment is that when we agree to vote on the pending amendments that a vote must be taken on each amendment. The difficulty we have had, owing to the lack of a rule such as has been sometimes contended for, is that you can not conclude debate. The unanimous-consent agreement closes the debate, and then a vote is taken according to the agreement. So no trouble can arise by shutting off the debate at any time.

Mr. HEYBURN. I am not an appropriate subject——

Mr. FLINT. I have no desire to stop the debate.

Mr. HEYBURN. I desire before the hour of 7 o'clock comes at least to say a word.

I am not an appropriate subject for reproof in regard to this matter. I had more than half my time remaining for the discussion of this amendment when it was accepted by the Senator in charge of the bill. As I understood the unanimous-consent agreement a vote was to be had upon all pending amendments. That being the language of the unanimous-consent agreement, I thought, from my understanding of the rules—which I still believe is correct—that the Senator from California or any

other Senator would be called upon to state his point of order against the amendment at the time it was offered, and the Senator in charge of the bill accepted the amendment on behalf of the committee and stated that he would do his best to get it in the bill.

Acting upon that supposition, I not only consented to the unanimous-consent agreement, but I cut off my consideration of the amendment. It is the most important amendment on the bill. It restores to the public domain one-half of the forest reserves for home making and legitimate purposes, and it ought at least to have been submitted; and I say this in no spirit of criticism of the action of the Chair. I am speaking only of my own judgment in the matter. A question of this kind under the conditions and circumstances ought to have been submitted. It is more important than to cut off $3,000,000 of these appropriations. If you can restore the nontimbered land to the public domain and make it subject to the land laws under which men can make homes, it is more important ten times over than to cut out any or all of this appropriation. I would not for a minute—and I say it in no spirit of rebellion—have consented to the termination of the debate, especially to the elimination from my own time of more than half of it, had I suspected that the unanimous-consent agreement did not mean what it said it meant, and that a vote would be taken upon the amendment.

Mr. TELLER. I want to say that it does not in the slightest degree impair the efficiency of the reservations—not in the slightest possible degree.

Mr. HEYBURN. No.

Mr. HALE. Let me suggest that the Senator from California withdraw his point of order and take the expression of the Senate.

Mr. FLINT. I would not myself have consented to the unanimous-consent agreement if I had not inquired and been advised that the point of order could be made. This is a very important matter. It means to wipe out all reserves where they are used for the conservation of water.

Mr. TELLER. Nonsense.

Mr. FLINT. The forest reserves in the arid country in southern California would be wiped out by the adoption of the amendment.

Mr. TELLER. Nonsense.

Mr. FLINT. It says "any land not timbered."

Mr. WARREN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Wyoming?

Mr. HEYBURN. Certainly.

Mr. WARREN. Before you go too far, the Senator, of course, understands——

Mr. FULTON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Oregon?

Mr. HEYBURN. I have yielded to the Senator from Wyoming.

Mr. WARREN. Of course I could only accept, and I said I would accept the amendment, so far as the committee was concerned. But the amendment was not then in order. Under the rule under which we were conducting the consideration of the bill committee amendments had to be first considered. So every individual amendment offered would necessarily have to be laid aside until we had voted upon the regular committee amendments then pending.

Mr. HEYBURN. I offered the amendment before the question of the unanimous-consent agreement was taken up.

Mr. FULTON. Mr. President——

Mr. WARREN. I simply want to set the record right—that I went as far as I had the right to go. Of course, all the amendments upon the table, upon which I have expressed an opinion as to whether I would accept them or not, will have to come up again and will have to be acted upon after the committee amendments shall have been disposed of.

Mr. FULTON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Oregon?

Mr. HEYBURN. I will yield in a minute. I want to call attention to the fact——

Mr. FULTON. I desire to make a suggestion.

Mr. HEYBURN. It will have to be a very brief one, because I wish to say a word.

Mr. FULTON. My suggestion is that the Senator from California will not object to the amendment if the State of California is eliminated.

Mr. HEYBURN. I will eliminate the State of California.

Mr. FLINT. I am perfectly willing to leave it as the Senator originally had it.

Mr. TELLER. Idaho and Colorado.

Mr. HEYBURN. All right. Then we will make the amendment read the "States of Idaho and Colorado."

Mr. SMOOT. Then I object. I make the point of order it is general legislation.

The VICE-PRESIDENT. The Senator from Idaho states to the Senate that he misconceived the effect of the agreement when he assented to it. That should not be allowed to change the agreement. It must stand as made, unless modified by unanimous consent. The amendment is clearly obnoxious to the rule, yet the Chair feels that under all the circumstances he is justified in submitting the question of order to the Senate. The Chair will submit the question: Is the amendment in order?

Mr. ALDRICH. There may be a precedent established here, if we are not careful, which will be much more important than any of this legislation. I think Senators will all agree upon consideration that an ordinary or a usual agreement by unanimous consent to vote does not dispense with the rules of the Senate, whatever may be the understanding of individual Senators at the time. We are not to undertake to say that because some Senator supposed he was getting an agreement of some sort the rules are to be suspended.

The agreement included amendments which might be offered hereafter, and that would give any Senator the right to offer any amendment, however obnoxious it might be to the rules of the Senate. I certainly hope we will not establish any such precedent.

Mr. HEYBURN. Submitting the question to the Senate does not do that.

The VICE-PRESIDENT. There is no violation of the rule if the Chair in the exercise of his discretion under Rule XX submits the question of order to the Senate. The Chair thinks that it is a proper exercise of the power vested in him, under the circumstances. The question is, Is the amendment in order?

Mr. PERKINS. I will ask the Senator from Idaho to modify his amendment and exempt California.

Mr. HEYBURN. I have already done so; I have confined it to Idaho and Colorado.

Mr. FLINT. That is entirely satisfactory.

Mr. BORAH. As I understand, the point of order is still insisted upon, however, by the Senator from Utah.

The VICE-PRESIDENT. Is it still insisted upon by the Senator from Utah?

Mr. HEYBURN (to Mr. SMOOT). Submit it.

Mr. SMOOT. I did offer an objection.

The VICE-PRESIDENT. The question is whether the amendment proposed by the Senator from Idaho is in order.

Mr. HALE. Now let it be read. Let us see what it says.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 26, after line 11, it is proposed to insert:

That the Secretary of Agriculture is hereby directed to eliminate from all forest reserves in the States of Idaho and Colorado all sections of public lands not timbered and to restore such public lands to location and purchase as other public lands of the same class are open to location and purchase under the land laws of the United States.

And the Secretary of Agriculture is hereby directed to report to Congress on or before the first monday in December, 1909, the quantity of nontimbered lands within all forest reserves within the States of Idaho and Colorado, showing upon a map of such forest reserves the areas timbered and nontimbered.

Mr. TELLER. The Senator from Idaho had the amendment prepared, and at my suggestion he put in Colorado. Now, if it will help him with his amendment, I will ask him to strike out Colorado.

Mr. HEYBURN. I would not do that.

Mr. TELLER. I think I know how to get Colorado out. When I get out of the Senate I shall practice law, perhaps, and I will pay some attention to that question.

Mr. CLARK of Wyoming. I understood before the unanimous-consent agreement was made that the amendment was to apply generally. I wish to ask that the State of Wyoming be included with the States of Colorado and Idaho, unless it will embarrass the situation still further.

The VICE-PRESIDENT. The Chair will state that the hour of 7 o'clock having arrived, further debate is out of order.

Mr. WARREN. I do not wish to debate the question. I will merely say that the consent, so far as the chairman of the committee is concerned, was that it should not specify any particular State.

The VICE-PRESIDENT. The question is, Is the amendment in order?

Mr. SMITH of Michigan. A parliamentary question, Mr. President.

The VICE-PRESIDENT. The Senator from Michigan will state it.

Mr. SMITH of Michigan. I should like to know whether we are voting on the parliamentary question or on the amendment.

The VICE-PRESIDENT. It is on the parliamentary question whether the amendment is in order.

Mr. HALE. That is a question for each Senator to settle in his own mind.

The VICE-PRESIDENT. The question is, Is the amendment in order?

Mr. HEYBURN. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I announce that I am paired with the senior Senator from Massachusetts [Mr. LODGE]. If he were present I should vote "nay."

Mr. FULTON (when his name was called). I have a general pair with the junior Senator from Arkansas [Mr. DAVIS]. I inquire whether the senior Senator from Washington [Mr. ANKENY] is paired. If not, I will transfer to him my pair. I am informed he is not. I transfer my pair to the senior Senator from Washington and will vote. I vote "yea."

Mr. WARREN (when his name was called). I am paired with my colleague on the committee, the Senator from Mississippi [Mr. MONEY].

The roll call was concluded.

Mr. BAILEY. I desire to ask if the Senator from West Virginia [Mr. ELKINS] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. BAILEY. Then I withhold my vote, as I am paired with him.

Mr. CLARK of Wyoming. I am paired with the Senator from Missouri [Mr. STONE]. I voted under the impression that pairs would not be considered, but as they are being observed, and as the Senator from Missouri is absent——

Mr. KEAN. I suggest that the Senator transfer his pair to the Senator from New York [Mr. PLATT].

Mr. CLARK of Wyoming. I transfer my pair to the Senator from New York [Mr. PLATT].

Mr. FLINT (after having voted in the negative). I voted, but I was not aware of the fact that pairs were being observed. I am paired with the senior Senator from Texas [Mr. CULBERSON], and therefore withdraw my vote.

The result was announced—yeas 17, nays 35, as follows:

YEAS—17.

Borah,	Fulton	Hemenway	Piles
Bourne	Gallinger	Heyburn	Teller
Bulkeley	Guggenheim	Kean	
Carter	Hale	Kittredge	
Clark, Wyo.	Hansbrough	Perkins	

NAYS—35.

Aldrich	Daniel	La Follette	Penrose
Brandegee	Depew	McCumber	Richardson
Brown	Dick	McEnery	Smith, Mich.
Burkett	Dolliver	McLaurin	Smoot
Burnham	du Pont	Martin	Stephenson
Crane	Foster	Nelson	Sutherland
Cullom	Frazier	Newlands	Warner
Cummins	Gamble	Overman	Wetmore
Curtis	Johnston	Page	

NOT VOTING—40.

Ankeny	Culberson	Hopkins	Platt
Bacon	Davis	Knox	Rayner
Bailey	Dillingham	Lodge	Scott
Bankhead	Dixon	Long	Simmons
Beveridge	Elkins	McCreary	Smith, Md.
Briggs	Flint	Milton	Stone
Burrows	Foraker	Money	Taliaferro
Clapp	Frye	Nixon	Taylor
Clarke, Ark.	Gary	Owen	Tillman
Clay	Gore	Paynter	Warren

So the Senate decided that the amendment was not in order.

The VICE-PRESIDENT. The question is on agreeing to the amendment submitted by the Senator from Montana [Mr. DIXON], which will be stated.

The SECRETARY. It is proposed, on page 26, after line 24, to insert:

That hereafter 50 per cent of all money received from each forest reserve during any fiscal year, including the year ending June 30, 1908, shall be paid at the end thereof by the Secretary of the Treasury to the State or Territory in which said reserve is situated, to be expended as the state or territorial legislature may prescribe for the benefit of the public schools and public roads of the county or counties in which the forest reserve is situated: *Provided*, That when any forest reserve is in more than one State or Territory or county the distributive share to each from the proceeds of said reserve shall be proportional to its area therein.

Mr. DANIEL. I raise the point of order on the amendment.

The VICE-PRESIDENT. What is the point of order?

Mr. DANIEL. That it is new legislation and general legislation.

Mr. WARREN. On the point of order, it is my understanding that the amendment simply changes the amount from 25 to 50 per cent, and that the balance of the language is merely a repetition of what is already the law.

Mr. GALLINGER. It changes the amount.

The VICE-PRESIDENT. The Chair is of opinion that it is contrary to the rule, and the Chair sustains the point of order. The Secretary will read the next amendment.

Mr. DIXON. I ask that the point of order be submitted to the Senate, the same as the other was submitted.

The VICE-PRESIDENT. The Chair will state that it is in the discretion of the Chair to submit any questions of order to the Senate, and that the exercise of such discretion is not to be invoked from the floor. The Chair departed from the rule which he has generally observed in the case of the Senator from Idaho, because of the statement of the Senator that he had been misled in acceding to the unanimous-consent agreement. The Chair felt that under those peculiar circumstances he might in the interest of fairness submit the question of order to the Senate, as he had the undoubted right to do under the rule.

Mr. DIXON. I merely want to make a suggestion. The present law provides for 25 per cent. I think the Senator from Virginia, on second thought, if he understood the situation and the great amount of land withdrawn from taxation, would agree to the increase from 25 per cent, in view of the fact that it is to be paid to the common-school and road fund, and it would settle in large part this annual scrap in Congress.

Mr. GALLINGER and others. Regular order!

Mr. DANIEL. I can not withdraw the point of order.

Mr. TELLER. If the Senator from Virginia withdraws it I will renew it.

The VICE-PRESIDENT. The next amendment will be stated.

Mr. DIXON. Have I a right to appeal from the decision of the Chair?

The VICE-PRESIDENT. The Senator has that right.

Mr. DIXON. Then I appeal from the decision of the Chair on this question.

The VICE-PRESIDENT. The question is: Shall the decision of the Chair stand as the judgment of the Senate? [Putting the question.] In the opinion of the Chair, the ayes have it. The ayes have it. The Secretary will read the next amendment.

The SECRETARY. Amendment proposed by Mr. GUGGENHEIM, to insert on page 26, after line 21, the following:

That a committee consisting of three Members of the Senate and three Members of the House of Representatives of the Sixtieth Congress, to be selected by the Vice-President and Speaker of the House of Representatives, respectively, shall be appointed to make a careful inquiry and investigation respecting the operation of the laws of the United States relating to the administration of the national forests during the recess of Congress. Said committee is hereby authorized to hold meetings in States and Territories containing national forests for the purpose of hearing such complaints, statements, and suggestions as may be tendered by citizens affected by the national-forest administration, and shall make a report in writing to Congress not later than the first Monday in December, 1909.

For expenses of said committee, including actual expenses of each member while necessarily absent from his place of residence in the performance of his duties as such committeeman, and for the payment of necessary clerical assistance, $10,000, said appropriation to be immediately available.

Mr. WARREN. I make the point of order against that amendment. There is no estimate for it and it does not have the indorsement of any committee.

The VICE-PRESIDENT. The Chair is of opinion that the point of order is well taken, and sustains the point of order. The Secretary will state the next amendment.

The SECRETARY. Amendment offered by Mr. DEPEW, on page 12, after line 3, to insert:

To enable the Secretary of Agriculture to lease and maintain for a period of ten years a farm at Morrisville, Madison County, State of New York, for the purpose of general agricultural and horticultural experimentation in connection with the so-called "unoccupied" or "Volusia soil" farms of the Eastern and Middle States, and to disseminate information of result of such experimentation as to the most profitable methods of utilizing such soils, $25,000.

Mr. WARREN. I shall be compelled to make the same point of order against this amendment. It was not estimated for and has not the indorsement of any committee.

The VICE-PRESIDENT. The Chair sustains the point of order. The Secretary will read the next amendment.

The SECRETARY. Amendment by Mr. CLARK of Wyoming, to insert the following:

That the Secretary of Agriculture is directed to furnish to the Senate on or before the first Monday of December, 1909, a full and complete copy of the pay rolls of the Bureau of Forestry for the quarter year beginning July 1, A. D. 1908, showing in detail and in full the names, occupation, and monthly salary and expenses of each employee so on said rolls or in the employment of the Forestry Service; showing also in one total the amount paid for the services and expenses of superintendents, supervisors, and rangers, and in another total the amount paid for other services and expenses of said Forestry Service.

Mr. WARREN. I make no objection to that amendment.

Mr. CLAY. I thought that was the existing law and that the law now provides that an annual statement shall be made in regard to these expenditures.

The VICE-PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. HANSBROUGH. On page 7, after line 23, I move to insert:

For the acquisition of sites and the erection of buildings for the use of the Weather Bureau, and for all necessary labor, materials, and expenses, plans and specifications to be prepared by the Secretary of Agriculture, and the work done under the supervision of the Chief of the Weather Bureau, not to exceed $30,000.

Mr. WARREN. That has been estimated for. I prefer that it would go to the Senate for a vote.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from North Dakota.

The amendment was rejected.

Mr. CLAY. What became of the amendment offered by the Senator from Montana [Mr. CARTER] on page 25?

Mr. WARREN. He withdrew the amendment.

The VICE-PRESIDENT. The Senator from Montana withdrew his amendment and the Senate disagreed to the committee amendment.

Mr. CLAY. The Senate struck out the increase of $500,000?

The VICE-PRESIDENT. Leaving the bill as it came from the House in that regard.

Mr. CARTER. The amendment, let me say to the Senator from Georgia, was withdrawn with notice that it would be offered in the Senate. The purpose of withdrawal was to allow a vote on the committee amendment.

The bill was reported to the Senate as amended.

The VICE-PRESIDENT. Does any Senator desire to reserve a vote upon any specific amendment?

Mr. CARTER. I desire to offer at the proper time an amendment on page 25.

The VICE-PRESIDENT. The Senator from Montana will have that right. Are there any reservations? If not, the question is on concurring in the amendments made as in Committee of the Whole.

The amendments were concurred in.

The VICE-PRESIDENT. The Senator from Montana proposes an amendment, which he will state.

Mr. CARTER. In lines 14 and 15, on page 25, I move to amend by striking out "three million nine hundred and eighty-six thousand," before the word "thousand," and inserting in lieu thereof "three million one hundred and sixty thousand."

Mr. WARREN. I move to lay the amendment on the table.

The VICE-PRESIDENT. The Senator from Wyoming moves to lay on the table the amendment proposed by the Senator from Montana. [Putting the question.] The Chair is in doubt. All in favor of laying the amendment on the table will rise.

Mr. GALLINGER. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. CLARK of Wyoming. Mr. President, I rise to a parliamentary inquiry.

The VICE-PRESIDENT. The Senator will state his parliamentary inquiry.

Mr. CLARK of Wyoming. Upon what is the vote being taken?

The VICE-PRESIDENT. It is to be taken on the motion made by the Senator from Wyoming [Mr. WARREN] to lay the amendment of the Senator from Montana [Mr. CARTER] on the table.

Mr. CLARK of Wyoming. I thought there was a misapprehension, and that is the reason why I asked the question.

Mr. CARTER. Those in favor of the amendment I offered will vote "nay" on the motion of the Senator from Wyoming.

The VICE-PRESIDENT. The Chair will again state the question. Those in favor of the motion of the Senator from Wyoming [Mr. WARREN] to lay the amendment of the Senator from Montana [Mr. CARTER] on the table will vote "yea" as their names are called; those opposed "nay."

The Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I am paired with the senior Senator from Massachusetts [Mr. LODGE]. I am informed, however, that he now stands paired with the junior Senator from Kentucky [Mr. PAYNTER], and I will vote. I vote "nay."

Mr. FLINT (when his name was called). I am paired with the senior Senator from Texas [Mr. CULBERSON]. If he were present and voting, I would vote "yea."

Mr. FULTON (when his name was called). I have a general pair with the senior Senator from Arkansas [Mr. CLARKE], which I transfer to the senior Senator from Washington [Mr. ANKENY] and vote "nay."

Mr. PERKINS (when his name was called). I have a general pair with the junior Senator from North Carolina [Mr. OVERMAN]. As he is absent, I will transfer that pair to the junior Senator from Pennsylvania [Mr. KNOX] and vote. I vote "yea."

Mr. STONE (when Mr. TALIAFERRO's name was called). The senior Senator from Florida is generally paired with the junior Senator from West Virginia [Mr. SCOTT]. I do not know how either would vote, but I make the announcement, as the Senator from Florida is absent.

Mr. WARREN (when his name was called). While I have a pair with the senior Senator from Mississippi [Mr. MONEY], on this motion I have his permission to vote, and I vote "yea."

The roll call was concluded.

Mr. BAILEY (after having voted in the negative). I have a general pair with the Senator from West Virginia [Mr. ELKINS], but I have voted. I will therefore transfer that pair to the Senator from Oklahoma [Mr. GORE] and allow my vote to stand.

Mr. FLINT. I transfer my pair with the senior Senator from Texas [Mr. CULBERSON] to the junior Senator from Nevada [Mr. NIXON] and will vote. I vote "yea."

Mr. SIMMONS (after having voted in the affirmative). I have a general pair with the junior Senator from Minnesota [Mr. CLAPP], but by virtue of an agreement I had with him I voted. I thought it proper to make the statement.

The result was announced—yeas 32, nays 26, as follows:

YEAS—32.

Brandegee	Dick	La Follette	Perkins
Brown	Dixon	Long	Piles
Bulkeley	Dolliver	McCumber	Simmons
Burkett	Flint	McEnery	Smith, Mich.
Burnham	Foster	Milton	Smoot
Cummins	Frye	Nelson	Sutherland
Curtis	Gamble	Newlands	Warner
Depew	Hansbrough	Page	Warren

NAYS—26.

Bailey	Daniel	Heyburn	Penrose
Borah	Frazier	Johnston	Richardson
Bourne	Fulton	Kean	Stephenson
Carter	Gallinger	Kittredge	Stone
Clark, Wyo.	Guggenheim	McCreary	Teller
Clay	Hale	McLaurin	
Cullom	Hemenway	Martin	

NOT VOTING—34.

Aldrich	Crane	Hopkins	Rayner
Ankeny	Culberson	Knox	Scott
Bacon	Davis	Lodge	Smith, Md.
Bankhead	Dillingham	Money	Taliaferro
Beveridge	du Pont	Nixon	Taylor
Briggs	Elkins	Overman	Tillman
Burrows	Foraker	Owen	Wetmore
Clapp	Gary	Paynter	
Clarke, Ark.	Gore	Platt	

So Mr. CARTER's amendment was laid on the table.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. HALE submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 27523) making appropriations for the diplomatic and consular service for the fiscal year ending June 30, 1910, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 6, 7, 8, 9, 11, 12, 19, and 22.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 5, 10, 13, 14, 15, 16, 17 18, and 20, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "For two clerks to be employed by the Department of State and to be charged with the distribution of information among the diplomatic missions, one at the rate of one thousand eight hundred dollars per annum, and one at the rate of one thousand six hundred dollars per annum; in all, three thousand four hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment insert the words "and amendments thereto;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an

amendment as follows: In lieu of the matter inserted by said amendment insert the following: "For thirteen consular assistants, as provided by law, eighteen thousand three hundred dollars; twelve additional consular assistants, subject to the same provisions of law as the above thirteen, twelve thousand dollars; in all, thirty thousand three hundred dollars;" and the Senate agree to the same.

EUGENE HALE,
S. M. CULLOM,
A. S. CLAY,
Managers on the part of the Senate.
R. G. COUSINS,
C. B. LANDIS,
WM. M. HOWARD,
Managers on the part of the House.

The report was agreed to.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. GALLINGER submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 25392) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 3, 5, 7, 8, 14, 21, 23, 24, 27, 28, 29, 30, 32, 34, 41, 42, 43, 45, 46, 50, 52, 55, 60, 62, 63, 67, 69, 71, 78, 81, 83, 85, 89, 91, 93, 94, 98, 99, 100, 101, 102, 106, 108, 109, 110, 112, 113, 114, 116, 117, 118, 119, 120, 121, 123, 124, 127, 129, 131, 133, 147, 148, 150, 152, 155, 156, 158, 160, 162, 163, 164, 165, 166, 167, 168, 169, 174, 194, 195, 208, 211, 213, 214, 215, 216, 217, 227, 228, 229, 234, 235, 237, 240, 243, 254, 255, 258, 259, 261, 266, 267, 284, 288, 296, 297, 300, 304, 305, 309, 313, 319, 322, 324, 329, 330, 331, 332, 336, 338, 341, 343, 345, 346, 349, 351, 354, 355, 359, 361, 371, 372, 378, and 382.

That the House recede from its disagreement to the amendments of the Senate numbered 4, 6, 10, 11, 12, 13, 16, 17, 18, 19, 20, 31, 33, 35, 36, 37, 38, 53, 57, 64, 65, 66, 70, 79, 80, 82, 84, 86, 87, 88, 90, 95, 96, 103, 104, 105, 111, 115, 122, 125, 126, 134, 139, 140, 141, 142, 144, 145, 149, 151, 153, 157, 170, 171, 172, 173, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 197, 198, 212, 218, 219, 220, 222, 223, 224, 225, 226, 230, 231, 236, 241, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 262, 264, 265, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 285, 286, 287, 289, 290, 291, 292, 293, 294, 295, 302, 307, 310, 311, 312, 316, 317, 320, 321, 325, 328, 333, 334, 335, 347, 348, 350, 353, 356, 367, 369, 370, 374, 376, 379, 381, and 385; and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "one hundred and five thousand six hundred and fifty-four dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirty-eight thousand seven hundred and thirty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twenty-one thousand five hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert "six;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirty-four thousand three hundred and fifty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment as follows: In lieu of the matter proposed by said amendment insert the following: "municipal architect, whose duty it shall be to prepare and supervise the plans for, and superintend the construction of all municipal buildings, and the repair and improvement of all buildings belonging to the District of Columbia under the direction of the Engineer Commissioner of the District of Columbia from three thousand six hundred dollars; and all laws or parts of laws placing such duties upon the inspector of buildings of the District of Columbia are hereby repealed;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "two hundred thousand seven hundred and eighty-two dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment as follows: At the end of said amendment, after the word "dollars," insert the following: ": *Provided*, That hereafter there shall be assessed and collected an annual wheel tax on all automobiles or other motor vehicles owned and operated in the District of Columbia having seats for only two persons the sum of three dollars, and all said vehicles having seats for more than two persons an additional tax of two dollars for each additional seat;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 47, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "nine thousand four hundred and twenty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 48, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "six thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twenty-nine thousand four hundred and twenty-five dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "assistant, one thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirty-nine thousand three hundred and twenty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "purchase and maintenance of motorcycles;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 58, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$19,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$36,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$4,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment as follows: On page 22, line 11, of the bill, strike out "a permanent" and insert in lieu thereof "permanent;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$71,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 73, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$2,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 74, and agree to the same with an amendment as follows: In lieu of the sum proposed by said

amendment insert the following: "$14,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$20,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 76, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$10,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 77, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$25,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 92, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "Northwest: To widen Thirteenth street extended ten feet on the easterly side between Park road and Monroe street, and grade and improve the same, $2,500, and the Commissioners of the District are hereby required to commence immediately the work herein provided for;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 97, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$197,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 107, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$75,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 128, and agree to the same with an amendment as follows: At the end of said amendment, after the word "dollars," insert the following: "*Provided*, That the above public convenience stations be located on public space to be selected by the Commissioners of the District of Columbia, and the jurisdiction and control of such portion of any public reservation so selected as shall be required for the location of such stations and their approaches is hereby transferred from the United States official having charge of said reservation to the Commissioners of the District of Columbia, such transfer to take effect on the date of notice by the said commissioners to the said United States official of the location of the sites for said stations;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 130, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$3,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 132, and agree to the same with an amendment as follows: In lieu of the matter proposed by said amendment insert the following: "assistant electrical engineer, who shall perform the duties of the electrical engineer in the absence or disability of the latter and shall have the same qualifications as to ability and technical knowledge as is required by law of the head of the department, $1,800;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 135, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$45,295;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 136, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirteen thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 137, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "eleven thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 138, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "four thousand five hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 143, and agree to the same with an amendment as follows: At the end of said amendment, after the word "years," insert the following:

"*Provided*, That section five of an act entitled 'An act relating to the sale of gas in the District of Columbia,' approved June sixth, eighteen hundred and ninety-six, and all remedies therein provided, be, and the same are hereby, repealed, and all pending proceedings thereunder shall be vacated, and no judgment, decree, finding, permit, or valuation of any kind mentioned or intended to be mentioned in said section shall be made or ascertained.

"On and after the passage of this act every corporation engaged in the manufacture and sale of gas or electricity in the District of Columbia shall open and keep a set of books in manner and form prescribed by the Interstate Commerce Commission.

"The charter of the Washington Gaslight Company is hereby amended so as to increase the membership of its board of directors to seven;"

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 146, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "four thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 154, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "fifty-two thousand seven hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 159, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "seventeen thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 161, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "two thousand five hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 192, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "one hundred and ten thousand four hundred and twenty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 193, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "seventy-five thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 196, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "ninety-two thousand five hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 199, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "nine hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 200, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "three thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 201, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "two thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 202, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "three thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 203, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "one thousand five hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 204, and agree to the same with an amendment as follows: In lieu of the sum proposed by said

amendment insert the following: "five hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 205, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "eleven thousand three hundred and fifty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 206, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "forty-seven thousand five hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 207, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "one thousand five hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 209, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "For equipment, grading, and improving six additional school playgrounds, seven hundred and fifty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 210, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "For maintenance and repairing eighteen playgrounds now established, nine hundred dollars; in all, one thousand six hundred and fifty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 221, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "sixty thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 232, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "nine hundred and twenty-seven thousand four hundred and seventy-three dollars and fifty-two cents;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 233, and agree to the same with an amendment as follows:

After said amendment insert, as a new paragraph, the following:

"That the following-described persons in the District of Columbia are hereby declared to be vagrants:

"Idle persons who, not having visible means of support, live without lawful employment; persons wandering abroad and visiting tippling shops or houses of ill fame, or lodging in groceries, outhouses, market places, sheds, barns, or in the open air, and not giving a good account of themselves; persons wandering abroad and begging, or who go about from door to door or place themselves in the streets, highways, passages, or other public places to beg or receive alms.

"All persons leading an idle, immoral, or profligate life, who have no property to support them and who are able of body to work and do not work, including all able-bodied persons without other visible means of support who shall live in idleness upon the wages or earnings of their mother, wife, or minor child or children.

"Every person known to be a pickpocket, thief, burglar, or confidence operator, either by his own confession or by his having been convicted in the District of Columbia or elsewhere of either of such offenses, and having no visible or lawful means of support, when found loitering around in any building, park, highway, street, avenue, alley, or reservation, steamboat landing, railroad depot, station, banking institution, broker's office, place of amusement, room, store, shop, public place, or car or omnibus or other vehicle, or at any public gathering or assembly.

"Persons upon whom shall be found any instrument, tool, or other implement used for the commission of burglary or the commission of any other crime against property, or for picking locks or pockets, who shall fail to give a good account of the possession of the same, and all persons who by the common law are vagrants whether embraced in any of the aforegoing classifications or not.

"That every person in the District of Columbia who shall be convicted of vagrancy under the provisions of this act shall be required to enter into security in a sum not exceeding five hundred dollars, conditioned upon his good behavior and industry for the period of one year, and if he shall fail to give such security he shall be committed to the workhouse in the said District for a term not to exceed one year. The security herein mentioned shall be in the nature of a recognizance to the District of Columbia, with a surety or sureties to be approved by the police court of the said District, in which court all prosecutions under this act shall be conducted in the manner now provided by law for the prosecution of offenses against the laws and ordinances of the said District, but nothing contained in section forty-four of the Code of Law for the District of Columbia shall be so construed as to create or give to the accused, in prosecutions under this act, any right to trial by jury not existing by force of the Constitution of the United States."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 238, and agree to the same with an amendment as follows: At the end of said amendment, after the word "dollars," insert the following: ", or so much thereof as may be necessary;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 239, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "forty-eight thousand and eighty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 242, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirteen thousand five hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 256, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "five hundred and eight thousand two hundred and sixty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 257, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "ten thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 260, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twenty-seven thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 263, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "one hundred and nineteen thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 268, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "one hundred and eighteen thousand seven hundred and fifty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 283, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twenty-seven thousand five hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 298, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "four hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 299, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$16,950;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 301, and agree to the same with an amendment as follows: In lieu of the matter stricken out by said Senate amendment insert the following:

"Municipal court: For five judges, at $2,500 each; one judge, at the rate of $2,500; one judge, at the rate of $2,500 per annum for six months; clerk, $1,500; assistant clerk, $1,000; and janitor, $480; in all, $16,730.

"For rent of building, $1,500.

"For contingent expenses, including books, law books, books of reference, fuel, light, telephone rental, and all other necessary miscellaneous items and supplies, $750; in all, for municipal court, $18,980.

"For the following from March 1 to the end of the fiscal year 1909: One clerk, at the rate of $1,500 per annum, five hundred

dollars; one assistant clerk, at the rate of $1,000 per annum, $333.33; one janitor, at the rate of $480 per annum, $160; for rent of building, $500; for furniture and equipment of rented building, $2,500; in all, $3,993.33.

"The unexpended balance of the appropriation provided for the compensation of six justices of the peace by the District of Columbia appropriation act approved May 26, 1908, is hereby reappropriated and made available for the compensation of the judges of the municipal court from March 1 to the end of the fiscal year 1909.

"The unexpended balance of the appropriation of $400 each for justices of the peace for rent, clerical services, stationery, and other expenses, provided by the District of Columbia appropriation act approved May 26, 1908, is hereby reappropriated and made available from March 1 to the end of the fiscal year 1909 for contingent expenses of the municipal court, including books, law books, books of reference, fuel, light, telephone rental, and all other necessary miscellaneous items and supplies."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 303, and agree to the same with an amendment as follows: At the end of said amendment, after the word "dollars," insert the following: "*Provided*, That all appropriations herein made for said reformatory and workhouse are hereby made immediately available;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 306, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$720;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 308, and agree to the same with an amendment as follows: In lieu of the sum proposed in said amendment insert the following: "$15,140;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 314, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$39,336;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 315, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$60,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 318, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$22,500;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 323, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$40,992;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 326, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$7,500;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 327, and agree to the same with an amendment as follows: In lieu of the matter proposed by said amendment insert the following: "For care and treatment of indigent patients, under a contract to be made with the Sibley Hospital by the Board of Charities, $3,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 337, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "$13,775;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 339, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "seven hundred and fifty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 340, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "forty thousand and twenty-five dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 342, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "two placing officers, at eight hundred and forty dollars each;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 344, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "eight thousand five hundred and twenty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 352, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirteen thousand one hundred and ten dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 357, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "eight thousand and twenty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 358, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twelve thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 360, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twenty-three thousand and seventy dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 362, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "foreman, three hundred and sixty dollars; and night watchman for six months, at twenty-five dollars per month, one hundred and fifty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 363, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "three thousand eight hundred and fifty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 364, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "four thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 365, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "five thousand nine hundred and twenty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 366, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "two thousand five hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 368, and agree to the same with an amendment as follows: On page 85, in line 19, strike out the word "other," and add at the end of the amended paragraph the following: "The said commissioners are hereby empowered to prescribe the penalty or penalties for violation of any charge fixed by them;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 373, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "Index clerk, one thousand four hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 375, and agree to the same with an amendment as follows: In lieu of the matter proposed by said amendment insert the following: "meter computer, one thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 377, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment, insert the following: "eighty-one thousand eight hundred and sixty dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 380, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment, insert the following: "forty-one thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 383, and agree to the same with

an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "sixty-two thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 384, and agree to the same with an amendment as follows:

At the end of said amendment, after the word "Columbia," insert the following: "Hereafter the Commissioners of the District of Columbia shall not submit nor shall the Secretary of the Treasury transmit to Congress regular annual estimates for expenses of the government of the District of Columbia for any fiscal year that shall exceed in the aggregate a sum equal to twice the amount of the total estimated revenues of the District of Columbia for such fiscal year. Said estimates shall take into consideration and embrace all charges against the said revenues arising under appropriations other than the regular District of Columbia bill. Such annual estimates shall not be published in advance of their submission to Congress at the beginning of each regular session thereof;" and the Senate agree to the same.

J. H. GALLINGER,
S. B. ELKINS,
B. R. TILLMAN,
Managers on the part of the Senate.

WASHINGTON GARDNER,
MARTIN B. MADDEN,
ALBERT S. BURLESON,
Managers on the part of the House.

Mr. WARREN. I wish to ask the Senator from New Hampshire if that is a full agreement.

Mr. GALLINGER. I will say to the Senator from Wyoming that this is a full agreement, and it is signed by the conferees of both Houses.

The report was agreed to.

Mr. GALLINGER. I ask to have printed in connection with the conference report on the District of Columbia appropriation bill a brief table. I meant to submit it at the time.

The VICE-PRESIDENT. Without objection, permission is granted.

The table referred to is as follows:

DISTRICT OF COLUMBIA.

Amount of bill as passed by Senate	$12,089,872.16
Amount of bill as passed by House	9,955,049.52
Amount added by Senate	2,134,822.64
Net amount of reductions in conference	1,410,726.67
Amount of Senate amendments agreed to	724,095.97
Amount of bill as agreed upon	10,679,145.49
Amount of estimates for 1910	16,176,355.52
Amount in law for 1909	10,001,888.85

RIVER AND HARBOR APPROPRIATION BILL.

Mr. FRYE. I wish to give notice that immediately after the reading of the Journal to-morrow morning I shall move to proceed to the consideration of the river and harbor appropriation bill.

Mr. KEAN. I move that the Senate adjourn.

The motion was agreed to, and (at 7 o'clock and 30 minutes p. m.) the Senate adjourned until to-morrow, Saturday, February 27, 1909, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

FRIDAY, *February 26, 1909.*

[*Continuation of legislative day of Tuesday, February 23, 1909.*]

The recess having expired, the House, at 11 o'clock a. m., was called to order by the Speaker.

GOVERNMENT FOR HAWAII, ETC.

Mr. JENKINS. Mr. Speaker, I desire to call up the conference report on the bill H. R. 21896, entitled "An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes," and I ask unanimous consent, Mr. Speaker, that the reading of the report be dispensed with and that the statement be read in lieu of the report.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will read the statement.

The conference report (H. Rept. No. 2255) is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 21896) to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 5, and 18.

That the House recede from its disagreement to the amendments of the Senate numbered 3, 4, 6, 7, 8, 9, 11, 12, 13, 14, 15, 16, 17, 19, 20, 21, 22, 23, 24, 25, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: Line 2, strike out "seven thousand five hundred" and insert "six thousand;" and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: Line 7, strike out the word "Roscoe" and insert "Roswell;" and the Senate agree to the same.

JOHN J. JENKINS,
DE ALVA S. ALEXANDER,
HENRY D. CLAYTON,
Managers on the part of the House.

C. D. CLARK,
KNUTE NELSON,
LEE S. OVERMAN,
Managers on the part of the Senate.

The Clerk read the statement, as follows:

STATEMENT.

Statement of House conferees, accompanying report of committee of conference on H. R. 21896, under and pursuant to House Rule XXIX:

On amendments Nos. 2, 5, and 18 it is recommended that the Senate recede from the same.

Amendment No. 2 struck out the word "six" where the same appears in line 9, page 2, and inserted in lieu thereof the word "four."

Under the organic act of the Territory of Hawaii the officers mentioned held office for six years.

Amendment No. 5 struck out of line 4, page 10, the word "earned" and inserted in lieu thereof the word "received."

Amendment No. 18 struck out of lines 21, 22, and 23, page 14, the following: "*Provided, however*, That suitable rooms and accommodations are furnished for holding of said courts, free of all expenses to the Government."

It is recommended that the House recede from its disagreement to the amendments of the Senate Nos. 3, 4, 6, 7, 8, 9, 11, 12, 13, 14, 15, 16, 17, 19, 20, 21, 22, 23, 24, and 25, and agree to the same.

Amendment No. 3 added to the end of line 24, page 2, the following: "And appeals and writs of error may be taken to the Supreme Court of the United States from said district court in cases where appeals and writs of error are allowed from the district and circuit courts of the United States to the Supreme Court."

Amendment No. 4 added, at the end of line 17, page 3, the following: "*Provided*, That writs of error and appeals may also be taken from the supreme court of the Territory of Hawaii to the Supreme Court of the United States in all cases where the amount involved, exclusive of costs, exceeds the sum or value of $5,000."

Amendment No. 6 struck out all of section 11, page 12, providing for the appointment of commissioners in Alaska by the governor of the Territory, with the approval of the Attorney-General. The amendment leaves the law in force, providing for the appointment of commissioners by the district judges.

Amendments Nos. 7, 8, 9, 11, 15, 16, 17, 19, 20, 21, 24, and 25 change the numbers of the sections only.

Amendment No. 12 strikes out of lines 18, 19, 20, and 21, page 13, the following: "The said district court shall have jurisdiction and the same is hereby vested to hear, try, and determine all matters and causes that the courts of the other districts of the Territory now possess, and for such purposes."

Amendment No. 13 inserts in lines 22 and 23, page 13, the following: "within each of said districts."

Amendment No. 14 strikes out of lines 1 and 2, page 14, the following: "And grand and petit jurors shall be summoned therein, in the manner now required by law."

Amendment No. 22 strikes out of lines 13, 14, 15, 16, 17, and 18, page 16, the following: "Such salaries shall be paid out of the Treasury as the salaries of other like officers are paid; and each of said officers shall receive their expenses and subsistence when necessarily employed in the performance of their official

duties in like manner and to the same extent as are allowed to other like officers."

Amendment 23 strikes out of lines 19, 20, and 21, page 16, the following: "Such officers shall receive such salaries, respectively, and such expenses and subsistence from the time they entered upon the discharge of their duties."

It is recommended that the House recede from its disagreement to the amendment of the Senate No. 1, and agree to the same with an amendment as follows: Line 2, strike out "$7,500" and insert "$6,000;" and the Senate agree to the same.

Under the organic act of the Territory of Hawaii district judges receive an annual salary of $5,000. The Senate amendment No. 1 increased the salary to $7,500. The amendment recommended by the committee reduced the annual salary to $6,000.

It is recommended that the House recede from its disagreement to the amendment of the Senate No. 10, and agree to the same with an amendment as follows: Line 7, strike out the word "Roscoe" and insert the word "Roswell;" and the Senate agree to the same.

Amendment No. 10, pages 12 and 13, struck out all of section 15 and inserted section 14: "That the Chief Justice and his associates are hereby vested with power and authority, and they are hereby directed, to divide said Territory into seven judicial districts and make such assignments of the judges provided for in section 12 of this act as shall in their judgment be meet and proper, provided that one of said judges shall reside and hold a district court in the city of Roscoe, the word 'Roscoe' being misspelled, meaning 'Roswell.'"

JOHN J. JENKINS,
DE ALVA S. ALEXANDER,
HENRY D. CLAYTON,
Managers on the part of the House.

The SPEAKER. The question is on the adoption of the conference report.

Mr. MANN. Mr. Speaker, will the gentleman state how many new judges this creates, if any, outside of Hawaii?

Mr. JENKINS. It gives one in Alaska, but that was agreed to by both Houses, I will say to the gentleman.

Mr. MANN. It does not create any judges in the United States?

Mr. JENKINS. None whatever.

Mr. MANN. What is the salary that is finally fixed upon?

Mr. JENKINS. Six thousand dollars.

Mr. MANN. That is the present salary?

Mr. JENKINS. No, sir; the present salary is $5,000.

Mr. MANN. I mean the present salary of judges in the United States. It simply conforms——

Mr. JENKINS. That is all; conforms to the present law.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken, and the conference report was agreed to.

OCEAN MAIL SERVICE.

Mr. GOEBEL. Mr. Speaker, I am directed by the Committee on the Post-Office and Post-Roads to report favorably the bill (S. 28) to amend the act of March 3, 1901, entitled "An act to provide ocean mail service between the United States and foreign ports and to promote commerce."

The SPEAKER. The gentleman asks unanimous consent, instead of sending it through the box, to report from the committee the following bill.

The Clerk read as follows:

A bill (S. 28) to amend the act of March 3, 1891, entitled "An act to provide for ocean mail service between the United States and foreign ports and to promote commerce."

The SPEAKER. Is there objection?

Mr. MOON of Tennessee. I object, Mr. Speaker.

The SPEAKER. Objection is made. The gentleman can make the report through the box. Now, does the gentleman desire to ask unanimous consent for anything else?

Mr. GOEBEL. Then I ask unanimous consent to file the report (H. Rept. No. 2261).

Mr. MOON of Tennessee. I withdraw the objection, Mr. Speaker.

The SPEAKER. The original Senate bill does not seem to be with the report. Does the gentleman ask for any other matter of unanimous consent?

Mr. GOEBEL. I say that simply——

The SPEAKER. But the Senate bill is not with the report.

Mr. GOEBEL. I simply file the bill.

The SPEAKER. But the gentleman has no authority to file it.

Mr. GOEBEL. I understand the gentleman withdrew his objection.

The SPEAKER. But the Senate bill is not with the report, and it must accompany the report.

Mr. GOEBEL. I will then get the Senate bill and file it with the report.

Mr. MOON of Tennessee. Mr. Speaker, to avoid any trouble in the matter, I withdraw the objection.

The SPEAKER. Well, the gentleman can not withdraw the objection to reporting the Senate bill unless the Senate bill accompanies the report.

Mr. MOON of Tennessee. I understand that. I simply desire to put myself right with the gentleman from Ohio, and I do not object.

Subsequently,

Mr. GOEBEL. I have now the original Senate bill (S. 28) and submit it, and I ask unanimous consent to make a report from the Committee on the Post-Office and Post-Roads on the bill (S. 28) to amend the act of March 3, 1891, entitled "An act to provide for ocean mail service between the United States and foreign ports and to promote commerce."

Mr. MOON of Tennessee. Mr. Speaker, I ask unanimous consent that the minority of the Committee on the Post-Office and Post-Roads may have until Monday until 12 o'clock to file minority views.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that the minority of the Committee on the Post-Office and Post-Roads have until Monday next at 12 o'clock noon to file minority views on the bill. Is there objection?

There was no objection.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 9375. An act to grant certain lands to the city of Colorado Springs, Colo.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 16743) for the removal of the restrictions on alienation of lands of allottees of the Quapaw Agency, Okla., and the sale of all tribal lands, school, agency, or other buildings on any of the reservations within the jurisdiction of such agency, and for other purposes.

The message also announced that the Senate had disagreed to the amendments of the House of Representatives to the bill (S. 1617) to quiet title to certain land in Dona Ana County, N. Mex., had asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. FULTON, Mr. FLINT, and Mr. BANKHEAD as the conferees on the part of the Senate.

The message also announced that the Senate had further insisted upon its amendments to the bill (H. R. 23464) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, numbered 46, 62, 63, 64, 65, 66, 67, 68, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 209, and 210, disagreed to by the House of Representatives, had disagreed to the amendments of the House to the amendments of the Senate numbered 60 and 61, had agreed to the further conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. WARREN, Mr. HEMENWAY, and Mr. TELLER as the conferees on the part of the Senate.

The message also announced that the Senate had passed without amendment bills and joint resolution of the following titles:

H. R. 15939. An act authorizing the Secretary of Commerce and Labor to exchange property;

H. R. 27068. An act to extend the time for the completion of the Alaska Central Railway, and for other purposes; and

H. J. Res. 231. Joint resolution authorizing the Director of the Census to collect and publish additional statistics.

The message also announced that the Senate had passed the following concurrent resolution:

Senate concurrent resolution 104.

Resolved by the Senate (the House of Representatives concurring), That the Secretary of War be, and is hereby, authorized, in his discretion, to return to the State of Louisiana the original ordinance of secession that was adopted by the people of said State in convention assembled and that is now in the possession of the War Department.

SENATE BILL AND RESOLUTION REFERRED.

Under clause 2, Rule XXIV, Senate bill and concurrent resolution of the following titles were taken from the Speaker's

table and referred to their appropriate committees, as indicated below:

S. 9375. An act to grant certain lands to the city of Colorado Springs, Colo.—to the Committee on the Public Lands.

Senate concurrent resolution 104.

Resolved by the Senate (the House of Representatives concurring), That the Secretary of War be, and is hereby, authorized, in his discretion, to return to the State of Louisiana the original ordinance of secession that was adopted by the people of said State in convention assembled and that is now in the possession of the War Department—

to the Committee on Military Affairs.

ENROLLED BILLS SIGNED.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 8734. An act for the relief of Niels P. Larsen;

H. R. 27419. An act to repeal the act of June 29, 1906, granting a pension to Jackson Adkins;

H. R. 28104. An act to amend an act to authorize a bridge across the Missouri River at or near Council Bluffs, Iowa, approved February 1, 1908;

H. R. 27363. An act to provide for improving the navigable capacity of the Sabine and Neches rivers, and the canal connecting the Sabine and Neches rivers with the mouth of Taylors Bayou; and

H. R. 12499. An act for the relief of Clarence Frederick Chapman, U. S. Navy.

PRIVILEGES OF DEBATE.

Mr. TAWNEY. Mr. Speaker, I offer the following privileged resolution (H. Res. 604).

The Clerk read as follows:

Whereas the speech of the Hon. GEORGE W. COOK of Colorado, delivered in the House of Representatives on February 25, 1909, and printed in the CONGRESSIONAL RECORD on pages 3203 and 3204, contains language in violation of the privileges of debate:

Resolved, That a committee of five Members be appointed to consider the remarks aforesaid and report to the House not later than the calendar day of Monday, March 1, 1909.

Mr. FITZGERALD. Mr. Speaker, I rise the point of order that the resolution is not privileged. I wish to say that the practice that was adopted here recently is going to result in what was then predicted. I have not read the speech, but it was delivered on the floor without objection. If this practice is going to be continued, any speech by any Member can be stricken out of the RECORD. The gentleman should specify in what way the speech violated the rules of the House. I have not read it; I do not know what the gentleman said. It seems to me that it is a bad practice to establish, that a gentleman may deliver a speech and some time afterwards some one can ask to expunge it from the RECORD.

Mr. TAWNEY. The speech was delivered yesterday, during the consideration of the limitation in the sundry civil bill in respect to the Secret Service. The time was yielded to the gentleman from Colorado by myself upon representation that his remarks would relate to the subject under consideration. The first part of his remarks, which I heard in the confusion, did relate to that subject. But then the gentleman proceeded to assail the Chief Executive of the Government, or referred to him in language which, in the judgment of myself, as well as in the judgment of other Members of the House, violated the privileges of debate in the House. In view of the fact that the time used by the gentleman was time which I had given to him, I feel it is my duty to the House——

Mr. FITZGERALD. The gentleman can not raise a question of privilege because somebody abuses his confidence. If a Member in the course of his debate violated the privilege of debate by referring to the Executive in an improper manner, he should have been stopped. But the gentleman was permitted to deliver his speech. Unless the language is pointed out, it should not be treated in this way. I do not care who it was, or to whom reference was made.

Mr. MANN. The proposition to strike out something from the RECORD that was uttered in the House is certainly a matter of the highest privilege so far as a question of order is concerned.

Mr. FITZGERALD. I differ with the gentleman, unless the resolution shows on its face that it is a matter of privilege. This resolution does not show on its face that it is a matter of privilege.

The SPEAKER. What is the point that the gentleman makes?

Mr. FITZGERALD. That this matter does not appear to be a matter of privilege.

The SPEAKER. The Chair overrules the point of order.

Mr. CLARK of Missouri. Mr. Speaker——

Mr. TAWNEY. I move the previous question on the resolution.

The SPEAKER. Without objection, the previous question is ordered. Without objection, the resolution is agreed to.

Mr. CLARK of Missouri. Adopting the previous question does not adopt the resolution. We are just getting at it.

The SPEAKER. The Chair said "without objection."

Mr. CLARK of Missouri. I object to it. I would like to say a word or two on it.

The SPEAKER. The previous question having been ordered, the question is on agreeing to the resolution.

Mr. CLARK of Missouri. I would like to have just a minute or two. I do not propose to filibuster or anything like that.

The SPEAKER. The Chair has no objection; but the Chair will state that it will require unanimous consent.

Mr. TAWNEY. I ask unanimous consent that the gentleman may proceed——

Mr. CLARK of Missouri. I would like to say this——

The SPEAKER. What is the gentleman's request? To address the House for what length of time?

Mr. CLARK of Missouri. Two or three minutes.

The SPEAKER. The Chair hears no objection.

Mr. CLARK of Missouri. Now, when they performed this same operation on Mr. WILLETT I did not raise any hullabaloo about it because he happened to be a Democrat.

But it seems to me, as some one stated then, that this sort of a procedure is extremely hazardous and is setting a mighty bad example. Now, there is a way of getting at these things. If the gentleman from Colorado [Mr. COOK] was making an improper speech, then the gentleman from Minnesota or any other gentleman on the floor had a right to call him to order and have his words taken down; but this thing is establishing a sort of press censorship here.

Mr. TAWNEY. I will say to the gentleman that I did stop the gentleman from Colorado, but thereafter he continued.

Mr. CLARK of Missouri. What was the Chairman doing at that time, that he did not stop him?

Mr. TAWNEY. He was calling him to order, too.

Mr. CAPRON. The Chairman was doing everything in his power to stop him, at the request of the gentleman from Minnesota.

Mr. CLARK of Missouri. I do not know who was in the chair, and was not here myself. Now, it comes to this: Suppose a man were to make a fine speech here, an excellent speech an hour long, and through any prejudice or malice, or for any other reason, should incorporate into that speech while delivering it something that did not address itself to the good taste or the good sense of the House. Suppose it happened to be made by a man of the minority, and an overwhelming majority was against his position, and to get rid of his speech and to put a stigma on him they should come in a day or two afterwards or a week or two afterwards and move to strike out of the RECORD that whole speech. I say it is a very dangerous proceeding. I do not know what the gentleman from Colorado said. I do not know whom he was talking about, and I do not care. I am talking about this way of getting rid of speeches in this House.

Mr. MANN. I did not hear the speech, and have not read it, and do not know what it was; but while the House would undoubtedly have the power to strike a speech out of the RECORD, it is hardly to be presumed that the House would exercise that power arbitrarily, and strike out a whole speech because it contained a sentence in violation of the rules of the House. Such has never been the practice. Such are not the precedents.

Mr. CLARK of Missouri. There is no telling what a majority will do when it is angry and heated up. I am not talking about the Republican majority; I am talking about any majority, because, after all, they are very much the same kind of folks.

Mr. TAWNEY. Will the gentleman from Missouri permit me to ask him a question? I want to ask him if he does not think this is the most practical and sensible way of arriving at the question whether any part or all of the speech should or should not be excluded from the RECORD? Now, the only proposition is to have a committee appointed to go through the speech and ascertain whether it or any part of it was in violation of the rules of the House in regard to debate; and on the report of that committee to the House the House has an opportunity of determining for itself whether the judgment of that committee is right or wrong.

Mr. CLARK of Missouri. That establishes a press censorship.

Mr. TAWNEY. The House is the censor, whether you take down the words at the time, and after taking them down ask that they be expunged, or whether it adopts this course. The House passes on the question whether the words should be expunged or not. Under the former procedure it is done at the time, in the heat of debate. Here is a proposition to refer the subject to a committee to consider it deliberately and coolly, and report back to the House what the judgment of that committee is respecting the subject-matter of the speech or any part of it.

Mr. CLARK of Missouri. If that other committee had not performed in the way it did, I would not be so particular about this; but it went out here and reported that Mr. WILLETT'S entire speech ought to be stricken out of the RECORD. There must have been something in Mr. WILLETT'S speech that was not objectionable, and the only reason I did not take up the cudgels then was because a Democratic Member of the House was assailing a Republican President, and I did not propose to put this side of the House in the attitude of even indorsing that kind of a performance; but the shoe is on the other foot now, and we can debate this thing without any danger of being criticised on account of the politics of the situation.

The SPEAKER. The time of the gentleman from Missouri has expired.

Mr. COOK of Colorado. Will the gentleman from Minnesota yield to a question?

Mr. TAWNEY. I have not the floor.

The SPEAKER. The question is on agreeing to the resolution. All in favor of agreeing to the resolution will say "aye," those opposed "no." [The question was taken.] The ayes appear to have it—the ayes have it—and the resolution is agreed to.

Mr. CLARK of Missouri and others. Division!

The SPEAKER. It seems to the Chair that the gentleman is late.

Mr. CLARK of Missouri. I was not on my feet.

The SPEAKER. The Chair announces the following committee——

Mr. CLARK of Missouri. There were three or four others calling for a division.

The SPEAKER. Not until after the vote was declared. The Chair was observing. The Chair announces as the committee Mr. MANN, Mr. PERKINS, Mr. FOSTER of Vermont, Mr. CLAYTON, and Mr. HOWARD.

BOILERS ON STEAM VESSELS.

Mr. WILSON of Illinois. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 28175) to amend section 4434 of the Revised Statutes of the United States, and for other purposes.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 4434, Revised Statutes of the United States, as amended by the act of Congress approved February 28, 1895, be amended by inserting a hyphen and the word "eight" after the word "thirty" in the second line of the section, and by inserting after the word "diameter" in the ninth line of the section a comma and the words "the measurements to be taken from the center of the length of the tapered section of said flues," and by striking out, in the fifteenth and sixteenth lines of the section, the words "Secretary of the Treasury" and inserting in lieu thereof the words "Supervising Inspector-General," and by inserting after the word "thirty," in the twentieth line of the section, a hyphen and the word "eight," and after the word "the," in the twenty-third line of the section, the word "approved," so that the section as amended shall read as follows:

SEC. 4434. No externally fired boiler having its shell constructed of iron or steel plates exceeding an average thickness of thirty-eight one-hundredths of an inch shall be employed on any steam vessel navigating the Red River of the North or rivers flowing into the Gulf of Mexico or their tributaries; and no externally fired boiler employed on any such steam vessel shall have less than 3 inches space between its shell and any of its internal flues, and not less than 3 inches space between such flues when any such flues are more than 5 inches in diameter, the measurements to be taken from the center of the length of the tapered section of said flues; and every such externally fired boiler employed on any such steam vessel shall be provided with a manhole in the lower part of the front head thereof, of such dimensions as may be prescribed by the Board of Supervising Inspectors, in all cases where the distance between its internal flues is less than 3 inches. Externally fired boilers having shells constructed of iron or steel plates not exceeding an average thickness of fifty one-hundredths of an inch may, in the discretion of the Supervising Inspector-General, be authorized and employed on steam vessels navigating the Atlantic and Pacific oceans, or salt-water bays, or sounds, or the Great Lakes, or any of them, and waters flowing to and from the same, or any of them: *Provided*, That on inspection no plate that is by this act limited to a thickness of thirty-eight one-hundredths of an inch and no plate that is by this act limited to a thickness of fifty one-hundredths of an inch shall be rejected for use if found to exceed those dimensions, respectively, if the approved average thickness thereof does not exceed the limits therein specified, and the amount of steam pressure that will be permitted to be carried in boilers constructed in accordance with the requirements of this act shall be determined from measurements showing the least thickness of the plates.

SEC. 2. That all externally fired boilers constructed of iron or steel, prior to the passage of this act, and now in use on any such vessels, wherein the space between such flues is less than 3 inches, they shall be deemed lawfully constructed.

SEC. 3. That all laws or parts of laws conflicting with this act are hereby repealed.

The following committee amendment was read:

In line 18, page 3, strike out the words "such flues" and insert the words "the shell and any of its internal flues or between such flues."

The SPEAKER. Is there objection?

Mr. McDERMOTT. Mr. Speaker, reserving the right to object, I want to ask the gentleman what streams this bill applies to? Does it apply to vessels on the Potomac River?

Mr. WILSON of Illinois. Yes; on any river in the United States.

Mr. McDERMOTT. Then, I object.

Mr. WILSON of Illinois. I want to say to the gentleman that it only makes three changes in the construction of a boiler. It does not in any way affect boilers now in use. It provides only for new boilers that may be put in operation hereafter. It contemplates three changes. The space between the flues of a boiler which is now under the supervising inspector is about 2½ inches. John G. Carlisle, when a Member of Congress, had the matter up, and he thought that the distance should be 3 inches between the flues in a boiler. This provides that new boilers in construction shall have a space of 3 inches.

Mr. McDERMOTT. Has it been considered by the committee?

Mr. WILSON of Illinois. Oh, yes; and is a unanimous report.

Mr. McDERMOTT. Then, I withdraw the objection.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

ORDER OF BUSINESS.

Mr. SULLOWAY. Mr. Speaker, I ask unanimous consent that at the conclusion of the sundry civil appropriation bill, and subject to special order of February 23, 1909, private pension bills on the calendar shall be next in order.

Mr. TAWNEY. I did not hear the request.

The SPEAKER. The gentleman from New Hampshire asks unanimous consent that, subject to special orders, and, of course, privileged business, private pension bills only shall be in order at the close of the consideration of the sundry civil appropriation bill.

Mr. TAWNEY. I have no objection.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. COOK of Colorado. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. COOK of Colorado. Mr. Speaker, I rise to a question of personal privilege.

The SPEAKER. The gentleman will state it.

Mr. COOK of Colorado. Mr. Speaker, in my remarks yesterday before this honorable body as to the prosecution of citizens in my State by the present administration, I quoted in my remarks a decision by the Supreme Court of the United States, dated January 4, 1909, and the correctness of my assertion was denied by the gentleman from New York [Mr. BENNET], who, I understand, is by profession a lawyer. I desire, Mr. Speaker, to offer the Reports of the United States Supreme Court, pages 507 to 535, in proof of the assertion I made in my remarks. I also ask unanimous consent that the decision may be printed in the RECORD.

Mr. PAYNE. What is the gentleman's request?

The SPEAKER. The gentleman from Colorado asks unanimous consent that the decision to which he refers may be printed in the RECORD. Is there objection?

Mr. COOK of Colorado. Mr. Speaker, it is a decision of the Supreme Court made January 24, 1909, as taken from the opinion, and I ask to have the case, which covers pages 507 to 535, printed in the RECORD.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The matter referred to is as follows:

UNITED STATES v. BIGGS—ERROR TO THE DISTRICT COURT OF THE UNITED STATES FOR THE DISTRICT OF COLORADO.

No. 289. Argued December 16, 17, 1908.—Decided January 4, 1909.

United States *v.* Keitel (ante, p. 370) followed as to the power of this court to review judgments in criminal cases at the instance of the Government under the act of March 2, 1907. (Chap. 2546, 34 Stat., 1246.)

The timber and stone act of June 3, 1878 (Chap. 151, 20 Stat., 89), as amended by the act of August 4, 1892 (Chap. 375, Sec. 2, 27 Stat., 348),[a] while prohibiting the entryman from entering ostensibly for himself, but in reality for another, does not prohibit him from selling his claim to another after application and before final action. (Williamson *v.* United States, 207 U. S., 425.)

An indictment for conspiracy to defraud the United States by improperly obtaining title to public lands will not lie under section 5440, Revised Statutes, where the only acts charged were permissible under the land laws.

When this court, in affirming a judgment in a criminal case under the act of March 2, 1907 (Chap. 2546, 34 Stat., 1246), has decided on a broad ground that the Government can not prosecute the case, it is not necessary for it to decide the other questions involved which thereby become irrelevant.[b]

157 Fed. Rep., 264, affirmed.

The facts are stated in the opinion.

[a] For an abstract of the timber and stone act see note in Williamson *v.* United States (207 U. S., 425, 455).

[b] The point not passed on was, as stated in the syllabus of the opinion in the case below: An indictment, under Revised Statutes, section 5440, for conspiracy to defraud the United States, which sets out a number of overt acts on different dates, is either bad for duplicity, as charging more than one conspiracy, or if held to charge a single continuing conspiracy, the offense was consummated when the first overt act was committed, and from that date the statute of limitations began to run.

The Attorney-General and the Solicitor-General, with whom Mr. Edwin W. Lawrence, special assistant to the Attorney-General, was on the brief for the United States:

Here, as in the coal land cases, the argument is that the court below merely held that the facts charged in the indictment were not within the statute, and therefore the indictment and not the statute was interpreted or construed. That contention, the court in those cases held to be devoid of all merit. (United States *v.* Keitel, ante, p. 370.)

As the court below in construing the indictment really construed the law and merely applied that construction to the indictment, it seems proper for the Government to discuss the indictment in the light of its language as drawn from the law itself, notwithstanding this court held in the Keitel case that, on such a writ of error, it has not jurisdiction to consider alleged defects in the indictment or misconstruction of the indictment irrespective of construction of the statute.

"To enter" in the third section of the law refers to final proofs and payment, but "make entries" in the indictments is not to be so construed. The word "entry" often refers to the filing of the inceptive right as in the early case of Chotard *v.* Pope (12 Wheat., 586). That is the popular sense as shown by the dictionaries, but the technical meaning includes the proceedings as a whole and the complete transfer of title. (Dealy *v.* United States, 152 U. S., 539, 544, 545; Hastings, etc., R. R. *v.* Whitney, 132 U. S., 357, 363.)

"To obtain" lands signifies similarly the complete process of acquisition, and since the indictment, following the law, describes these lands as "open to entry," the charge includes the initial application. In Adams *v.* Church (193 U. S., 516), referring to the timber-culture law, the meaning attached to entry is the original application, the court using the language, "after entry and before final proof." And under this very law in Williamson *v.* United States the court uses the term in precisely the same sense, viz, "in the interim between entry and final proof." (207 U. S., 461.)

The indictments sufficiently charge a conspiracy to defraud, although the conspiracy did not embrace the making of false and fraudulent applications.

The timber and stone act restricts the quantity of timber land to be sold to 160 acres to any one person or association of persons. A corporation could not, without violating the law, step into the shoes of the various applicants and in its own name take the steps which the law requires for completion of the entries. But this is what the indictments charge that the defendants conspired to do, except that it is alleged that they planned that the applicants should complete the entries without disclosing the interest of the corporation. The applicants would be acting merely as the agents of the corporation, and in each case the sale would be made by the United States to the corporation and not to the entrymen. This is not a bona fide contract by an entryman to convey their patent. The Williamson case can be distinguished. (See United States *v.* Budd, 144 U. S., 154; United States *v.* Trinidad Coal Co., 137 U. S., 160.)

The coal-land statutes did not require the applicant to make affidavit at entry that he was purchasing solely for his own benefit; neither does the timber and stone act require such an affidavit to be made at the time the lands are purchased from the United States. Both statutes prohibit the acquisition from the United States by one person of more than a certain quantity of land. The plan carried out by the Trinidad Coal Company was held fraudulent because the company did indirectly what it could not do directly. This is exactly what the defendants in the present cases are charged. The end, fraud, being unlawful, it was unnecessary to set out in detail the indirect means contemplated by the conspiracies. (Dealy *v.* United States, 153 U. S., 539, 543; Burton *v.* United States, 202 U. S., 344; Thomas *v.* United States, 156 Fed. Rep., 897; United States *v.* Grunberg, 131 Fed. Rep., 137; Thomas *v.* People, 113 Illinois, 131; People *v.* Bird, 126 Michigan, 631.)

If there ever was a rule that the statute of limitations begins to run as soon as the first overt act in pursuance of a conspiracy has been committed and in three years thereafter the bar is complete, it has been entirely superseded by the rule that the crime consists in putting a corrupt agreement into operation, and the limitation runs from the date of the last overt act committed for the purpose of effecting the object of the conspiracy. The question is whether the conspiracy is in existence, and overt acts of individual conrpirators committed within the period of the statute are evidence of a renewal and continuance of the conspiracy. (Ware *v.* United States, 154 Fed. Rep., 577, and cases cited.) At least four cases involving this point have recently been brought before the court on petition for certiorari, and the petitions have been denied. (Lorenz *v.* United States, 196 U. S., 640; Bradford *v.* United States, 206 U. S., 563; Ware *v.* United States, 207 U. S., 588; Jones *v.* United States, this term, post.)

All that was decided in Adams *v.* Church and Williamson *v.* United States touching in the present case was that an entryman has the right to dispose of his holding acquired in good faith before the final certificate. No question was involved in either case of the acreage restriction in the timber-culture law and this law, respectively, or of the right of a purchaser to buy. It was determined that the entryman had the right to sell. An entryman's right to sell ad interim depends upon his good faith, and he is bound in good faith to disclose his principal, although it may not be criminal for him not to do so or even to swear to the contrary. A purchaser can not legally buy in the interim between application and final proof—that is, before title has been acquired from the United States—if he has already bought one tract. He is a disqualified purchaser. Entrymen who are not themselves conspirators and who are acting separately are nevertheless the agents, although unconscious and innocent, it may be, of an undisclosed principal.

The Government is not prosecuting the entrymen, but the conscious agents of the principal conspiring to violate the law and evading its prohibition by procuring from the United States indirectly through the entrymen more land than the principal could buy directly. If the Williamson case means that title vests in the entryman as soon as he makes preliminary application, and that a purchaser in the interim before final proof would be buying from him and not from the United States, just as much as after final proof and payment or after patent, then, indeed, it is conclusive against the Government here, and there is no violation of law, for the law does not mean what it seems to mean by its acreage restriction. Otherwise this scheme is a fraud, because it is sought to obtain lands from the United States indirectly in violation of law, just as much as the scheme in the Trinidad case, or in the Keitel case, or the Forrester case, which is said by the court not to be distinguishable from the Keitel case as involving a violation of the coal-land law.

Unless there is less meaning and force in the prohibition of the timber and stone law than in the prohibition of the coal-land law, and unless there is some difference which we do not perceive between the interim status of an entryman here and the status of a preference entryman in the corresponding interval under the coal-land law, this case is not distinguishable from the case of the coal preference entries (the Forrester case), and if the Williamson case does not rule that case, neither does it rule this.

Mr. Charles J. Hughes and Mr. Clyde C. Dawson for defendants in error:

This court is without jurisdiction of these writs of error, under the act of March 2, 1907:

Because neither section 5440 nor the timber and stone act were held invalid, nor were either of said statutes the subject of construction by the district court, nor can the jurisdiction of this court be sustained under the clause of the act of March 2, 1907, relating to judgments sustaining "a special plea in bar," for neither a "special plea in bar" nor a judgment sustaining a "special plea in bar" appear in the records.

No offense is charged in the indictments.

There are many "laws" of the United States under which timber lands may be entered. There is only one of those laws which indicates any policy of the Government restricting the amount of land which may be entered by any one individual or corporation. These indictments charge conspiracy to procure the entering of lands under some of these laws, but do not in any manner allege that this conspiracy was a conspiracy to procure entries under the one law which restricts the amount that can be entered. The defendants are entitled to the presumption that their combination was one to procure entries under the laws which do not so restrict the area of entry, and not under the law which does so restrict it.

And therefore these indictments do not charge any attempt to "defraud the United States in any manner for any purpose."

Under the restrictive law to which we have referred, the only thing which the Congress of the United States attempted to prevent is the making of contracts, before the making of applications to purchase, whereby the entryman binds himself to convey the title which he shall acquire from the Government to some other person.

It must be presumed that the intent of the entrymen was innocent, and that they did not conspire to make these contracts of conveyance at any time when the laws of the United States, as interpreted by its Supreme Court, prohibited such action. (Williamson *v.* United States, 207 U. S., 425.)

The only point where any representation in regard to such agreements of conveyance is required is at the making of the application; that is to say, when the first application is made to the officers of the Government.

To "defraud the United States" a false representation of some fact is necessary, and these indictments show no conspiracy to procure the making of any representations by any person whatsoever.

It is only by the most violent presumption that such conclusions can be reached from the allegations of these indictments. In the absence of such affirmative allegations the defendants are entitled to the presumption that they did not conspire to procure the making of any false representations whatsoever, or any representation at a time when the same would be false, and hence did not conspire to "defraud the United States" in any manner or for any purpose.

The making of false representations, if alleged, in violation of a Land Department regulation imposing on the entryman a condition not contained in the law, would constitute no offense. (Williamson *v.* United States, supra.)

If such regulation exists it has not been pleaded, and hence can not be relied upon. (United States *v.* Bedgood, 49 Fed. Rep., 54; United States *v.* Eaton, 144 U. S., 677, 687, 688; United States *v.* Maid, 116 Fed. Rep., 650; United States *v.* Blassingame, 116 Fed. Rep., 654; Anchor *v.* Howe, 50 Fed. Rep., 366; United States *v.* Howard, 37 Fed. Rep., 666; Hoover *v.* Salling, 110 Fed. Rep., 43; United States *v.* Manion, 44 Fed. Rep., 801; United States *v.* Hoover, 133 Fed. Rep., 950; United States *v.* Matthews, 146 Fed. Rep., 306; United States *v.* United Verde Copper Co., 196 U. S., 207; Williamson *v.* United States, 207 U. S., 425.)

Conclusions of law and of the pleader and not facts are pleaded.

References to the overt acts are necessary in order to determine definitely the conspiracy charged.

There is no certainty of allegations as to the time of the alleged offense conspired to be accomplished.

There is no allegation that the defendants conspired to defraud the United States.

The overt acts, alleged in each indictment, show on their face that no one of them was done in pursuance of the conspiracies charged nor to effect the object of the same, and hence in failing to charge an overt act to effect the object of the conspiracies the indictments fail to charge a crime.

Mr. Justice White delivered the opinion of the court.

It is adequate to an understanding of the questions which are here necessary to be decided in general terms to say that the indictment against the defendants in error charged them with conspiracy in violation of the second clause of section 5440, Revised Statutes, which makes it criminal to conspire to defraud the United States "in any manner or for any purpose." The means by which it was contemplated that the United States should be defrauded was charged in the indictment to have been the unlawful obtaining by purchase under the timber and stone act of public land of the United States in excess of the quantity authorized by law to be acquired. The timber and stone act when originally enacted in June, 1878, related solely to public lands within particular States. (20 Stats., c. 151, 89.) In 1892, however, that act was amended by striking out the designation of particular States, thus causing the act to apply to "surveyed public lands of the United States within the public-land States." (27 Stats., c. 375, 348.) As it is essential to have that act in mind we excerpt from the opinion of the court below a succinct but comprehensive and accurate statement of its provisions:

"This act in its first section specifies the qualifications of purchasers or entrymen thereunder, and limits the amount of land which each may acquire to 160 acres. The second section provides that the applicant, at the time of his application, shall file a written statement in duplicate under oath with the register, describing the land which he desires to purchase and its quality, that he has made no other application under this act, and that he does not apply to purchase the same on speculation, but in good faith to appropriate it to his own exclusive use and benefit, and that he has not, directly or indirectly, made any agreement or contract in any way or manner, with any person or persons whatsoever, by which the title which he might acquire from the Government of the United States should inure, in whole or in part, to the benefit of any person except himself.

"It then provides that if he swears falsely he shall be guilty of perjury and forfeit the money which he paid for said lands, and all right

and title to the same, and any grant or conveyance which he may have made, except in the hands of bona fide purchasers, shall be null and void. The third section provides that on the filing of the applicant's statement the register shall post a notice of the application in his office for a period of sixty days, and that the applicant shall publish the same notice in a newspaper nearest the location of the premises for a like period of time, and after the expiration of said sixty days, if no adverse claim shall have been filed, the party desiring to purchase shall furnish to the register of the land office satisfactory evidence, first, that said notice of the application prepared by the register as aforesaid was duly published in a newspaper as herein required; secondly, that the land is of the character contemplated in this act, unoccupied and without improvements, etc., and upon payment to the proper officer of the purchase money of said land, together with the fees of the register and receiver, etc., the applicant may be permitted to enter said land, and a patent shall issue thereon. It further provides that any person having a valid claim to any portion of the land may object in writing to the issuance of the patent, and evidence shall be taken thereon as to the merits of said objection."

The indictment contained one count, supported by averments of 14 overt acts.

The accused, after moving to quash on the ground of the illegality of the organization of the grand jury, demurred to the indictment on a number of technical grounds, and upon the contentions that the facts stated in the indictment were insufficient to charge an offense within any statute of the United States, and that as the indictment had not been found within three years of the commission of the acts therein alleged the right to prosecute for the same was barred by the statute of limitations. The court held the indictment stated no offense against the United States, and, sustaining the demurrer upon that ground, discharged the accused without date. It was also held that if the indictment was construed as embracing but one offense the three years' bar of the statute of limitations was controlling, but that if it were held that the indictment stated more than one offense, thus saving one of the offenses from the operation of the statute of limitations, the indictment would be void for duplicity.

The reasons which caused the court to reach the conclusions just stated were expounded in an opinion. Therein, in order to determine whether the indictment stated an offense against the United States, the court came first to construe it in the light of the provisions of the timber and stone act. In doing so the court said:

"We find that the indictment sets in where the second section of the timber and stone act leaves off. It charges that the purpose of the conspiracy was to 'hire and under agreements' with entrymen have them pay for the lands with moneys of the corporation and have them make entries. It does not charge the date on which such hiring and agreements to make entries were to be made, nor that the entrymen were hired to make applications, nor that said hiring and agreements were prior to any application. The indictment appears to attempt to challenge some acts done by the entrymen under the provisions of section 3 of said act, to wit: The hiring of and agreement with entrymen (who had made application before that under section 2 of the act) to make entries and pay for the land with moneys furnished by the corporation. * * * But it is said the indictment charges a violation of section 1 of the act in the acquisition of more land by the corporation than there limited. When it comes to that the indictment does not charge that the several entrymen were disqualified as such, nor that when they made application they had outstanding contracts to sell, or were then acting under agreements or hire for said defendants or said corporation. A compliance with the timber and stone act, by the entrymen, in both its spirit and letter, prior to and at time of application is not challenged by the indictment."

Having thus construed the indictment it was then considered whether any offense was therein stated against the United States. In deciding that no offense was stated, it was held that although it were conceded that the timber and stone act prohibited an entryman or applicant from making an application ostensibly in his own name, but in reality for and on behalf of another, that if an applicant or entryman made an application in good faith for his own exclusive use and benefit the statute contained no prohibition, express or implied, against the right of the entryman, after his application and before the final action thereon, to sell to another the claim to the land which had arisen from his application. It was therefore decided that such applicant was at liberty to contract with another to convey the land covered by the application and to perfect his entry for the purpose of fulfilling his contract to convey the land after patent. In reaching this conclusion the court was controlled by the decision in Adams *v.* Church (193 U. S., 510), giving a like construction to the timber-culture act of June 14, 1878. (Chap. 190, 20 Stat., 113.) Having thus decided that the indictment as construed charged the doing of no unlawful act, but simply the exercise of a lawful right not in any way prohibited, but on the contrary impliedly sanctioned by the statute, it was decided that under no possible construction could the acts charged constitute an unlawful conspiracy within the second clause of section 5440, Revised Statutes. And for additional reasons expressed in the opinion the conclusions of the court concerning the bar of the statute of limitations and the duplicity of the indictment, if it were so construed as to save it from the statute, were fully expressed.

This writ of error, direct from this court, is prosecuted by the United States under the authority of the act of 1907. (The act of March 2, 1907, is reproduced in full on p. 398, ante.)

Our right to review the decision below is questioned by the defendants in error on the ground, first, that the court below did not construe, but simply interpreted, section 5440, Revised Statutes, and the provisions of the timber and stone act; and, second, because, although it applied the bar of the statute of limitations, the court did not do so by way of sustaining a plea in bar, but simply incidentally passed upon that question in deciding the demurrer.

The want of merit in the first contention is established by United States *v.* Keitel, No. 286 of this term (ante, p. 370).

As therefore we have in any event jurisdiction to review the action of the trial court in construing the timber and stone act and in fixing the meaning of section 5440, Revised Statutes, in the light of that construction, we presently pass the consideration of the ruling made by the court in respect to the statute of limitations. We do this because if it be found that the court below was right in its conclusions as to the construction of the timber and stone act and of section 5440, Revised Statutes, its judgment quashing the indictment will be sustained, and its action concerning the statute of limitations will become irrelevant, and will not require examination, unless it be our duty under the act of 1907, which we shall also hereafter consider, to pass upon that question, although its decision will have become wholly unnecessary.

It is also settled by United States *v.* Keitel, supra, that the right given to the United States to obtain a direct review from this court of the rulings of the lower court on the subjects embraced within the statute of 1907 does not give authority to revise the action of the court below as to the mere construction of an indictment, and therefore in the exercise of our power to review on this record we must accept the construction of the indictment made by the lower court and test its construction of the statute in that aspect.

While not questioning this general rule, the United States insists that the case here presented is an exception to that rule, because of the contention that the construction given by the court below to the indictment was but the necessary result of the misconstruction which the court applied to the timber and stone act, and hence that a review of the construction given to the indictment is necessarily involved in the determination of the correctness of the construction given by the court to the statute. Conceding the premise for the sake of argument, the deduction by which it is sought to apply it to the case in hand is, we think, without foundation. It proceeds upon a subtle separation of particular words or phrases in the indictment from the context of that pleading and the affixing to the words thus separated a penetrating but, nevertheless, too narrow significance for the purpose of establishing the proposition relied upon. On the contrary, we think the conclusion can not be escaped that the construction given by the court below to the indictment was the result merely of the analysis which the court made of the indictment as an entirety, of its appreciation of the nature and character of the acts therein referred to and of the overt acts alleged, the whole read in the light of the elementary canons of construction applicable to criminal pleadings and elucidated, as the court expressly stated, by the entire absence of anything in the indictment tending to show that the pleader contemplated alleging the existence of any conspiracy to induce the making of applications to purchase.

Coming to consider the construction given by the court to the timber and stone act as applied to the allegations of the indictment, as interpreted by the court, the correctness of the construction given by the court below to the statute is established beyond controversy by the decision in Williamson *v.* United States (207 U. S., 425), announced since the decision below was rendered.

The Williamson case was a prosecution for a conspiracy in violation of section 5440, Revised Statutes, to procure the commission of the crime of subornation of perjury by causing certain affidavits to be made for the purpose of acquiring land under the timber and stone act. At the trial, over exceptions, affidavits as to the bona fides of a number of applicants and of the purpose of each in making his application to acquire only for himself were offered in evidence, and like affidavits which were required by the rules and regulations of the Land Department at the time of the final entry were also offered in evidence. The Government insisted that the papers were admissible because the indictment charged a conspiracy to suborn perjury, not only at the time of the application to purchase, but also in the subsequent stage of making the final entry, and that even if this were not the case the affidavits made after application were admissible for the purpose of showing the motive which existed at the time the application was made. It was decided that the indictment only charged subornation of perjury at the time of the application. Passing on the alleged contention as to motive, it was held that in view of the requirements as to an affidavit exacted by the statute to be made at the time of the application as to the bona fides of the applicant and his intention to buy for himself alone and the absence of any such requirement in the statute as to the final entry, that the prohibition of the statute applied only to the condition of things existing at the time of the application to purchase, and did not restrict an entryman after said application was made from agreeing to convey to another and perfecting his entry for the purpose after patent of transferring the land in order to perform his contract. It was therefore held that the affidavits made at the final stage of the transaction were not admissible to show motive at the time of the applications to purchase and that any requirements contained in the rules and regulations of the Land Department making an affidavit essential to show bona fides, etc., at the final stage were ultra vires and void. In passing upon the subject the ruling to the like effect concerning the timber-culture act, made in Adams *v.* Church, supra, was reiterated and approved, and declared to be applicable to the timber and stone act, despite immaterial differences in the phraseology of the two acts.

The court, after approvingly referring to Adams *v.* Church, and after reviewing the timber and stone act, and calling attention to the entire omission of all requirement that statement as to the purpose and intention of the entryman should be made at the date of the final step in the acquisition of the land, said (p. 460): "Indeed, we can not perceive how under the statute if an applicant has, in good faith, complied with the requirements of the second section of the act, and pending the publication of notice, has contracted to convey, after patent, his rights in the land, his doing so could operate to forfeit his right."

It is insisted by the Government that, however conclusive may be this ruling as to the power of the applicant to sell after application and to perfect his entry for the purpose of enabling him to perform such contract, such ruling does not conclude the contention that a conspiracy formed to induce an entryman who has made his application to purchase subsequently to agree to convey his interest in the land would be a violation of the statute. But we are constrained to say that this is a mere distinction without a difference. The effect of the ruling in the Williamson case was to hold that the prohibition of the statute only applied to the period of original application, and ceased to restrain the power of the entryman to sell to another and perfect his entry for the purpose of transferring the title after patent. This being concluded by the decision in the Williamson case, the distinction now sought to be made comes to this, that it is unlawful under the statute to conspire to have that done which the statute did not prohibit, and, on the contrary, by implication recognized could be lawfully done without prejudice or injury to the United States in any manner whatever. This also serves to demonstrate that no error was committed by the court below in holding that under section 5440, Revised Statutes, the acts charged in the indictment could not possibly have constituted a defrauding of the United States in any manner or for any purpose with the intendment of that section.

It remains only to notice the ruling of the court below as to the bar of the statute of limitations. While the act of 1907 * gives authority to come directly here to obtain a review of the construction of a statute under the circumstances which the act enumerates, and also authorizes us to review a "decision or judgment sustaining a special plea in bar, when the defendant has not been put in jeopardy," we consider that the power given is coincident with the purpose for which it was conferred—that is, to have determined in a case within the statute the question whether or not the Government is entitled to further prosecute the case,

* The act of March 2, 1907, is reproduced in full, ante, p. 398.

and therefore does not of course call upon us to decide every question of the character referred to in the statute, when by the decision of one of such questions the case is completely disposed of and the other questions have become so irrelevant as to cause it to be in our opinion unnecessary to consider and determine them. Of course, under these circumstances, we intimate no opinion whatever concerning the correctness of the construction adopted by the court below in respect to the statute of limitations.

Affirmed.

UNITED STATES v. SULLENBERGER—ERROR TO THE DISTRICT COURT OF THE UNITED STATES FOR THE DISTRICT OF COLORADO.

No. 290. Argued December 16, 17, 1908.—Decided January 4, 1909. Decided on the authority of United States *v.* Biggs, ante, p. 507.

The facts are stated in the opinion.

The Attorney-General and the Solicitor-General, with whom Mr. Edwin W. Lawrence, special assistant to the Attorney-General, for the United States.[a]

Mr. Edmund F. Richardson, with whom Mr. Horace N. Hawkins was on the brief, for defendants in error.

The indictment contains no charge of a crime, in that it charges the plan or alleged conspiracy of defendants to have been simply an agreement or plan to obtain indirectly lands for a corporation that could not, according to the indictment, have been directly purchased by the said corporation. A plan to obtain indirectly lands from the Government may or may not be a plan to defraud the Government. Whether or not it is a scheme to defraud the Government necessarily depends upon the question of whether or not the means to be adopted are criminal or unlawful.

No unlawful or criminal means are charged to have been planned or contemplated, there being no claim made in the indictment that the defendants agreed or planned to hire, employ, or induce anyone to make application to purchase lands. In other words, no claim is made anywhere in the indictment that the alleged conspiracy embraced the making of a deal or agreement with any person in advance of that person having made, in good faith, an application to purchase the land. There is, therefore, no charge of a conspiracy to defraud the United States.

The sixth amendment to the Constitution secures to the defendants, among other things, the right "to be informed of the nature and cause of the accusation." (United States *v.* Miller, 7 Pet., 1442; United States *v.* Cruikshank, 92 U. S., 542, 558; Evans *v.* United States, 153 U. S., 584.)

All the essential elements of fact required to be set forth in an indictment must be there charged in direct, positive, and explicit language. Any omission in that behalf can not be aided by implication, inference, argument, recital, or intendment. This principle has been well stated in United States *v.* Post (113 Fed. Rep., 854); Pettibone *v.* United States (148 U. S., 197); United States *v.* Hess (124 U. S., 486); United States *v.* Staats (8 How., 41, 44); In re Wolf (27 Fed. Rep., 606, 611); In re Corning (51 Fed. Rep., 205, 210).

"In an indictment nothing material shall be taken by intendment or implication." (Salla *v.* United States, 104 Fed. Rep., 544, 547; Miller *v.* United States, 133 Fed. Rep., 337; United States *v.* Hess, 124 U. S., 483; United States *v.* Walsh, 5 Dill., 58, 63; S. C., 28 Fed. Cas., No. 16636, p. 396; United States *v.* Martin, 26 Fed. Cas., No. 15728; In re Wolf, 27 Fed. Rep., 606, 611; United States *v.* Crafton, 25 Fed. Cas., No. 14881; United States *v.* Watson, 17 Fed. Rep., 145; United States *v.* Taffe, 86 Fed. Rep., 113, 115; In re Greene, 52 Fed. Rep., 104, 111, 112, 114; Evans *v.* United States, 153 U. S., 584, 587; Pettibone *v.* United States, 148 U. S., 197, 203; United States *v.* Milner, 36 Fed. Rep., 890; Conrad *v.* United States, 127 Fed. Rep., 789, 801; Stearns *v.* United States, 152 Fed. Rep., 900, 904; People *v.* Willis, 54 N. Y. Supp., 130, 137, citing other authorities.)

Mr. Justice White delivered the opinion of the court.

In this case the United States seeks the reversal of the action of the court below in quashing an indictment, the writ of error being prosecuted directly from this court upon the assumption that the case comes within the act of March 2, 1907. The indictment charged a conspiracy in violation of section 5440, Revised Statutes, to unlawfully acquire land of the United States under the timber and stone act. The court gave to the indictment the same construction which it affixed to the indictment in the case of United States *v.* Biggs et al., No. 289, which we have just decided, ante, page 507, and applied the same principles which it expounded in the opinion in that case. Disregarding mere immaterial differences in the form of the pleadings, this case is like the Biggs case, and is disposed of by the opinion which we have just announced in that case.

Affirmed.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. TAWNEY. Mr. Speaker, I move that the House now resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the sundry civil appropriation bill (H. R. 28245).

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. WATSON in the chair.

The CHAIRMAN. The Clerk will read.

Mr. GAINES of Tennessee. Mr. Chairman, before the Clerk begins to read I want to say at the conclusion of the debate last night I was inquiring whether or not the appropriation for the purchase of artificial limbs had been reduced. In private conversation after the debate closed, on inquiry I was informed by the gentleman from Illinois [Mr. MANN] that it had been reduced from $400,000 last year to the amount carried in the bill this year, $132,000, which information perfectly satisfies me.

The Clerk read as follows:

For covered way connecting the main building and the new children's ward, $10,000, one half of which sum shall be paid from the revenues of the District of Columbia and the other half from the Treasury of the United States.

[a] For argument of counsel for United States in this case, see United States *v.* Biggs et al., ante, p. 507.

Mr. TAWNEY. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 161, line 21, after the word "for," insert the words "additional repairs and for furnishing."

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

International Waterways Commission: For continuing the work of investigation and report by the International Waterways Commission, authorized by section 4 of the river and harbor act approved June 13, 1902, $20,000.

Mr. OLLIE M. JAMES. Mr. Chairman, I reserve the point of order for the purpose of making an inquiry of the chairman of the committee. A few days ago we appropriated not exceeding $50,000 for the purpose of creating a waterways commission. Does the chairman of the committee think that this additional sum of $20,000 ought to be continued in view of the fact that we have already appropriated $50,000 for the creation of another waterways commission? Is there any necessity for two waterways commissions?

Mr. TAWNEY. What paragraph is the gentleman talking about?

Mr. OLLIE M. JAMES. The International Waterways Commission, line 24, page 162. In the river and harbor bill that passed the House a few days ago we appropriated $50,000 for the purpose of creating a waterways commission.

Mr. TAWNEY. I would say to the gentleman for his information that it is not a matter within the discretion of the Committee on Appropriations to reject or approve of the estimate for that, for the reason that this International Waterways Commission is a statutory commission. Its duties are defined by statute, and the compensation allowed to the members of the commission is fixed by law. The statutory commission has been in existence for a number of years, and its duties relate primarily to the establishment of the international boundaries on the lake levels.

Mr. OLLIE M. JAMES. But, if the gentleman will permit me, the section provides for continuing the work or investigation. Now, is that necessary, in view of the fact that we created another waterways commission the other day?

Mr. TAWNEY. Yes; it is necessary and will be for several years. The committee was informed that they could not tell at this time definitely when the work of the commission would be completed, but within the course of a few years it would be completed.

Mr. OLLIE M. JAMES. What was the necessity for this other waterways commission?

Mr. TAWNEY. The work and duties of the other waterways commission have no relation whatever to the duties of this waterways commission.

Mr. OLLIE M. JAMES. The other waterways commission relates to national waterways, and this does also. It looks as if the Government is going commission mad.

Mr. TAWNEY. This is an international waterways commission.

Mr. OLLIE M. JAMES. So is that.

Mr. TAWNEY. No; it is not.

Mr. OLLIE M. JAMES. It provides that they may even go to Europe at the expense of the Government to make investigations relative to waterways.

Mr. TAWNEY. But the commission is not composed of citizens of the United States and citizens of a foreign country.

Mr. OLLIE M. JAMES. Oh, there is no use of playing upon the word "international." The purpose of it is to better the waterways of the country.

Mr. TAWNEY. Does the gentleman move to strike out the section?

Mr. OLLIE M. JAMES. Yes; I move to strike out the paragraph.

The CHAIRMAN. The question is on the amendment of the gentleman from Kentucky to strike out the paragraph.

The question was taken; and the amendment was rejected.

Mr. BOOHER. Mr. Chairman, I move to strike out the last word for the purpose of making an inquiry. I would like to ask the chairman of the committee if the commission that we provided for last night on page 147, where a part of a million dollars is appropriated, has any connection with this commission?

Mr. TAWNEY. Of course it has not.

Mr. BOOHER. Then does the commission that we provided for in the river and harbor bill——

Mr. TAWNEY. Mr. Chairman, I demand the regular order. The paragraph to which the gentleman refers has been passed.

Mr. BOOHER. But I move to strike out the last word. I want to ask the gentleman in good faith, Is the Mississippi

River Commission the same commission we provide for in the river and harbor bill?

Mr. TAWNEY. Why, of course it is not. The gentleman must know that as well as I do.

Mr. BOOHER. I beg the gentleman's pardon.

Mr. TAWNEY. Then the gentleman did not read the provision in the river and harbor bill.

Mr. BOOHER. Yes, I did. Then we have three waterways commissions?

Mr. TAWNEY. Well, we will, if that other bill becomes a law.

Mr. BOOHER. Are the members of these three commissions the same men?

Mr. TAWNEY. The authority for the appointment of one of these commissions to which the gentleman refers does not yet exist. Therefore, no one can tell who they will be. The Mississippi River Commission is a commission created by statute, and has been in existence for a long time. The personnel of that commission has no relation whatever to the personnel of the International Waterways Commission.

Mr. BOOHER. Their duties are the same?

Mr. TAWNEY. Their duties are not the same at all.

Mr. BOOHER. I am very sorry that the gentleman is becoming irritated, but I have a right to ask the question and propose to do so.

Mr. TAWNEY. The gentleman has a right to ask the question, but it would save a great deal of the time of the committee if the gentleman would read the bill.

Mr. BOOHER. I have read the bill and I want to know what it is after I have read it, and I want to say to the gentleman now that I will ask questions whenever I please, and if he does not want to answer them he need not.

The Clerk read as follows:

At the Central Branch, at Dayton, Ohio: For current expenses, namely: Pay of officers and noncommissioned officers of the home, with such exceptions as are hereinafter noted, and their clerks, weighmasters, and orderlies; also payments for chaplains, religious instruction, and entertainment for the members of the home, printers, bookbinders, librarians, musicians, telegraph and telephone operators, guards, janitors, watchmen, and fire company; for all property and materials purchased for their use, including repairs not done by the home; for necessary expenditures for articles of amusement, boats, library books, magazines, papers, pictures, and musical instruments, and for repairs not done by the home; and for stationery, advertising, legal advice, for payments due heirs of deceased members: *Provided*, That all receipts on account of the effects of deceased members during the fiscal year shall also be available for such payments; and for such other expenditures as can not properly be included under other heads of expenditure, $74,200.

Mr. DOUGLAS. Mr. Chairman, I move to strike out the last word for the purpose of asking a question of the chairman of the committee. What is meant by "receipts on account of effects of deceased members?"

Mr. TAWNEY. The law gives to the board possession of certain effects of members who die without any heirs—their personal effects.

Mr. DOUGLAS. And they sell them and turn in the money?

Mr. TAWNEY. Yes; and these are the receipts derived from the sale of that property.

Mr. DOUGLAS. Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

At the Western Branch at Leavenworth, Kans.: For current expenses, including the same objects specified under this head for the Central Branch, $60,000.

For subsistence, including the same objects specified under this head for the Central Branch, $160,000.

For household, including the same objects specified under this head for the Central Branch, $87,000.

Mr. ANTHONY. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Kansas offers an amendment, which the Clerk will report.

The Clerk read as follows:

After the word "dollars," in line 24, page 169, insert:

"*Provided*, That no part of this appropriation shall be expended for fuel oil where the use of such oil for fuel costs more than coal."

Mr. ANTHONY. Mr. Chairman, I offer this amendment in the nature of a limitation upon that expenditure. There is good reason to believe that the use of fuel oil at this branch of the National Soldiers' Home is far more expensive than the use of coal. In fact, it has been openly stated that the Government might save many thousands of dollars by the use there of coal for fuel. That home is situated in a coal mining district. Coal is sold there cheaper in proportion than the price of fuel oil, and I have investigated this situation, and I have been unable to secure from the board of managers of the home statistics as to the cost of fuel at that home, but I believe this limitation will bring about an economy to the Government of the United States.

Mr. TAWNEY. Mr. Chairman, I would like to ask the gentleman a question inasmuch as he is familiar with the facts. How long have they been using fuel oil at this home?

Mr. ANTHONY. I think about two years.

Mr. TAWNEY. Does the gentleman know how much it has cost to install the plant that is there now for the consumption of fuel oil?

Mr. ANTHONY. I think it cost from five to ten thousand dollars to install that plant. It would cost but a very few hundred dollars to reestablish the plant for coal again.

Mr. TAWNEY. Does the gentleman know the reasons that influenced the board of managers in changing the equipment from coal consumption to an equipment for oil consumption?

Mr. ANTHONY. I only know the reasons that were stated to me by the chairman of that committee this morning. He made a statement there was a combination of coal operators there to raise the price of coal. Now, I want to say there is no such combination with regard to the supply of government institutions.

The Soldiers' Home at Leavenworth is now under contract with one of the coal mines there to supply it with coal at the price of about $2 a ton. That contract runs for five years. Any other consumer but the Government would have to pay about $4 a ton there, and it is one reason why we are surprised and can not understand why the agents of the oil companies in Kansas succeeded in influencing the United States Government to change from a cheap fuel to one which we know is more expensive.

Mr. TAWNEY. Is it not a fact that while this home is located in the coal regions of Kansas, it is also true that you have there access to fuel oil as well as to coal?

Mr. ANTHONY. Fuel oil is about 150 miles away, but it is a fact the Soldiers' Home is the only consumer in our district which uses fuel oil; the other government institutions use coal.

Mr. MILLER. Will the gentleman yield for a question?

Mr. ANTHONY. Yes.

Mr. MILLER. Do I understand from the provisions of the gentleman's amendment that this would only be applied in case it will cost a less amount for the use of coal?

Mr. ANTHONY. That is all; simply to get a test to show which is the cheaper of the two.

Mr. TAWNEY. That is not the only effect of the limitation, I will say to the gentleman from Kansas. Even if within a month they ascertain that there was any difference, and that difference was in favor of the consumption of coal, then not a dollar of this money would be available for the purchase of oil or to continue the use of coal until they could get another appropriation to change the equipment from a coal-consuming equipment to an oil-consuming equipment.

Mr. ANTHONY. I want to say to the gentleman——

Mr. TAWNEY. I have no objection to the limitation if it is as the gentleman from Kansas states.

Mr. ANTHONY. I want to say that the Government now has a contract for coal on which it will be furnished with coal at half the cost that anyone else would have to pay.

Mr. MILLER. Will not the Clerk read the amendment again?

The CHAIRMAN. Without objection, the amendment will be again reported.

The amendment was again read.

Mr. DOUGLAS. I would like to ask the gentleman a question. Were the trustees and managers of this institution compelled by the Government or anyone else to use fuel oil?

Mr. ANTHONY. They were not.

Mr. TAWNEY. My information is they were compelled to change from the use of coal to the use of oil on account of a combination of the coal producers in that vicinity, and it was cheaper for them to consume oil than coal at the price this combination fixed for coal.

Mr. ANTHONY. I want to say, Mr. Chairman, I know it is a fact that the Government has a contract, to run for five years more, at a price of one-half of what any other consumer has to pay for oil, and I want to say that the agents of the Standard Oil Company were unusually active in getting this change of fuel from coal to oil. And the fact that we can get no information from the board of home managers is proof that any such a change as that on this appropriation——

Mr. DOUGLAS. What object could the managers of this institution have—that is, any legitimate object—in changing from coal to oil as fuel——

Mr. ANTHONY. To save the Government money.

Mr. DOUGLAS. Let me finish. Unless it was more economical or in some way expedient to do so?

Mr. ANTHONY. That is all, sir.

Mr. DOUGLAS. What is all?

Mr. ANTHONY. Simply to save the Government money.
Mr. DOUGLAS. Does the gentleman object to that?
Mr. ANTHONY. I do not. That is the purpose of my amendment.
Mr. DOUGLAS. The gentleman does not understand my question. What object would the managers of this institution have in changing from coal to oil unless it was more economical or expedient in some way?
Mr. ANTHONY. I might say that it may be in order to accommodate the Standard Oil Company.
Mr. BROWNLOW. Mr. Chairman, I think the gentleman from Kansas [Mr. ANTHONY] is entirely wrong in his conclusions on this proposition. As a member of the board of managers, I know that excessive prices were charged at the Leavenworth Home, and the aggregate of the amount of coal purchased there ran between fifty thousand and sixty thousand dollars. The board of managers believed, and the managers of the home believed, that they were being imposed upon; that combinations were made against them, and they determined to change this matter and use the oil in order to prevent this combination.
Mr. ANTHONY. I believe the gentleman from Tennessee [Mr. BROWNLOW] is speaking in my time, and I would like to ask him a question as a member of this board of home managers. Does he not know as a fact that the Soldiers' Home there has been receiving coal on a contract which was made over five years ago and which contract still has five years to run, and that therefore there can be no combination of coal operators to affect the supply of this institution in the face of that contract which has been in effect about five years and still has five years more to run?
Mr. BROWNLOW. My understanding is that the contract is with one coal mine.
Mr. ANTHONY. It is.
Mr. BROWNLOW. And that it was not sufficient to supply the demands of the home.
Mr. ANTHONY. It is amply sufficient to supply the demands of the home. There was a strike there two years ago of the coal miners. At that time this mine offered to store enough coal for the Government's use during the prevalence of that strike, which was general over the whole country. The stupidity of the management of the institution refused to allow the mine to store any coal there. As a result that mine had to buy coal out in the market at two or three times the contract price of the coal supplied that institution. That is the situation there.
Mr. BROWNLOW. My information is that the fuel oil, as used there, costs the home about 25 per cent less than the coal cost. The coal was exceedingly expensive in price, running up to about $60,000 to $65,000 a year.
Mr. ANTHONY. I would like to ask the gentleman, in face of the fact that this coal is bought for $2.10 a ton, which is a very low price for coal, how there can be that difference in the price between coal and oil? I know the use of the coal was very extravagant. The system of stoking there was out of date and antiquated, and perhaps that had a great deal to do with it. All I want is a fair test between coal and oil.
Mr. BROWNLOW. I do not object to the amendment the gentleman proposes, if it is only to have that effect.
Mr. ANTHONY. It will at least secure a statement from the officials of the home as to which is the cheapest fuel at the home. I can not get a statement as to which is the cheapest.
Mr. BROWNLOW. I want to say as to the amendment of the gentleman from Kansas that the first information I had on this subject was last night in a conversation with him about 11 o'clock. I told him that if he would let the matter go to the Senate that I would get the information by to-morrow, but he declined to do it.
Mr. ANTHONY. I knew it was gone if it went to the Senate.
Mr. BROWNLOW. Senator WARNER, of Missouri, is a manager of that home.
Mr. ANTHONY. I am surprised that the Senator has not already acted upon the proposition, and it has been before him.
Mr. TAWNEY. I offer the following as a substitute for the amendment offered by the gentleman from Kansas.
The Clerk read as follows:

Provided, That no part of this sum shall be used for fuel oil if it shall appear to the board of managers that coal as a fuel can be procured and used more economically.

Mr. GAINES of Tennessee. I reserve the point of order on that.
Mr. ANTHONY. I accept the substitute.
Mr. GAINES of Tennessee. Will the gentleman explain? We could not hear a word of the explanation here. Do I understand this is a limitation upon exorbitant prices?
Mr. ANTHONY. Yes.
Mr. GAINES of Tennessee. Then I withdraw the point of order and hope the gentleman will succeed in passing his amendment.
The CHAIRMAN. The question is on the substitute proposed by the gentleman from Minnesota to the amendment offered by the gentleman from Kansas.
The question was taken, and the substitute was agreed to.
The amendment as amended was agreed to.
The Clerk read as follows:

For farm, including the same objects specified under this head for the Central Branch, $13,500.

Mr. SHERWOOD. Mr. Chairman, while we are talking about soldiers' homes I desire to make a few remarks on House bill 23244, a bill that has a majority report from the Committee on Military Affairs and is now on the House Calendar, awaiting the pleasure of the Speaker.
The bill is known as the "civil war officers' annuity honor roll." As amended by the Military Committee the provisions of the bill also apply to private soldiers and noncommissioned officers, except that while the officers are to be paid at the rate of $50 per month the soldiers are to receive $25. By the provisions of this bill all officers are to be paid exactly alike, without regard to rank, and before any officer or private soldier can be entered on the honor roll he shall have served for a period of not less than one year and shall have been honorably discharged. Any officer or soldier who resigned or was discharged because of wounds or injury contracted in the service is entitled to be placed on the honor roll without reference to his length of service.
No officer or soldier is available for the honor roll until he attains the age of 70 years. Any officer holding an official position, the compensation being equal to $600 a year, will not be entitled during the time he holds such office to the benefits of this act.
I am decidedly opposed to the age limit of 70 years. It should be, if adopted at all, fixed at 63 years for privates, at least, and not more than 64 for officers. Officers of the Regular Army are retired at 64. The average age of an officer who served in the civil war is seven years older than that of a private soldier. This includes officers of all grades. Hence I propose an amendment, and will advocate it on the floor when the bill is under consideration, and insist on its adoption as a matter of justice to the men who stood behind the guns, making the age limit for a private soldier 63 years. I shall also insist that $30 per month, or $1 per day, be made the rate for the private soldier.
Hence the bill in its present form is not entirely satisfactory to the veterans of the rank and file. I have had a very voluminous correspondence with veteran soldiers from Maine to California during the past year, and have received an aggregate of probably 6,000 letters, and it is the general opinion of the men who stood behind the guns that the bill should be amended. The statistics of the civil war show that the average age of the officers of all grades of the service was about seven years older than that of the enlisted men and noncommissioned officers. So that fixing the age limit of 70 years for private soldiers is unjust to that class. I do not believe in age pensions, or in considering age in a roll of honor. I do not believe that there is any merit or virtue in age. If there were, I would be one of the most virtuous men on the floor of this House. No civilized nation around the world has ever passed an age pension for soldiers. Germany, New Zealand, and some other countries have for civilians, but it is always on a basis of industrial citizenship.
A colonel in the Regular Army whose salary is $375 a month, and who has served twenty years and is retired at the age of 64, is paid $281.25 per month during the period of his natural life. This is just two-thirds pay. Why should volunteer officers who fought the longest enduring and fiercest war of all times be compelled to wait until they are within a few days of the cemetery before they get anything in the form of annuity or pension? Only about 5 per cent of the officers of the Regular Army see any battle service, while every officer who is available for $50 a month under this bill must have rendered one year's active service in the bloodiest war of modern times.
I find a number of Congressmen who will oppose the passage of this bill because the Grand Army of the Republic in national encampment at Toledo in 1908 indorsed the report of the pension committee which resolved that no more pension legislation would be demanded during the next three years, or as Chairman Brown of the national pension committee states it, in a letter dated February 5, 1909, "for a few years." I regard this action as a grave injustice to every veteran soldier who stood behind the guns. Before the adoption of such a resolution the body of the Grand Army, represented by the Grand Army posts

throughout the country, should have been consulted. The old veterans, now bent and grizzled, and halting with the weight of years, can not afford to wait three years more before they even receive the consideration of the national encampment. Even if the national encampment should act at the expiration of three years, it would be another year before Congress would heed the appeal, and probably another year before the pension department would be ready to give favorable consideration to the old soldiers' claims under the law. By that time the most of us will be in the cemetery.

I am not attacking the pension legislation of the past. The Government of the United States has been more generous to her soldiers than any other country around the world. I have no criticisms to make of the appropriations that have been made through all the years by Congress. My criticism is directed as to the equities of the distribution of this money. Almost forty-four years have elapsed since the war closed and there never has been a law placed upon our statute books for the exclusive benefit of the men who stood behind the guns, the staunch and steady-going three-years' veterans who fought the great war to a successful finish.

Let me appeal to the representatives of the American people on both sides of this historic Chamber to give heed to the pathetic and patriotic prayers of these old veterans. They will not be with us long. I will name two vital considerations involving only equity and justice. First, the soldiers of the armies of the Union, except the first volunteers of 1861, or the first 75,000 men, were never paid in honest money.

The government bond buyers, during the war, who bought their bonds with the same depreciated money which was paid the volunteer soldiers, have all been paid in gold. By the act of 1869, known as "the act to strengthen the public credit," we put millions upon millions in the capacious pockets of the bond buyers—literally a donation by national law. But the men who loved their country better than their lives, and who risked all that God gave them, their bodies and their souls, to the cause, are still unpaid. We have declared by national legislation that money is more sacred than manhood; that lucre is more precious than patriotism; that greed shall be recognized in national legislation above and beyond the blood of martyrs shed in a sacred cause. In view of this crying injustice I propose to pass an act to strengthen, not only the public credit, but the public conscience.

Let me here present the statistics, humiliating to every patriotic American, showing just how much honest money is still honestly due the brave men who served in the war to preserve the union of these States. I have gathered these vital statistics with care and in addition employed one of the most capable and careful statisticians to aid in the preparation. I believe these statistics have never before been compiled. In order to ascertain the value of the currency paid the soldiers, the daily reports of the New York Gold Exchange were scanned day by day, throughout the three years of the war. The statistics of the amount paid the army are from official sources.

There is no means of separating the pay for the army and navy as to classes below the grade of commissioned officers and noncommissioned officers; the appropriations for the pay of the army and navy are made in bulk. From the records of the War Department appears the following as to the pay for the army and navy for the years 1863, 1864, and 1865:

	1863.	1864.	1865.
Army	$8,905,318	$9,596,538	$9,971,243
Navy	11,617,109	14,734,332	19,423,241
	20,522,427	24,330,870	29,394,484

The average currency value of the gold dollar was, in 1863, 145.2; in 1864, 203.3; in 1865, 157.3.

According to these premiums the soldiers ought to have received: In 1863, $29,757,929; in 1864, $49,392,393; in 1865, $46,150,222.

In other words, the Government paid these soldiers $51,061,805 less than they were entitled to in the standard money of the United States and the world. The soldier suffered to the extent of nearly 69 per cent by the depreciation of the currency in the years named.

The interest on this vast sum, legally due the veterans—due also as a debt of honor and justice—amounts to $137,866,873, computed for forty-five years at 6 per cent, simple interest, not compounded. This makes the aggregate amount due $188,928,678. Here is money enough, honestly due and still honestly due, due as a debt of honor, justice, and law, leaving out all patriotic consideration, to pay every surviving soldier and officer of the civil war who served one year, one dollar per day during all the remaining years of his life.

In the first session of the Forty-ninth Congress Hon. James B. Weaver, of Iowa, introduced in the House a bill (H. R. 3378) "For the relief of the soldiers and sailors who served in the army and navy of the United States for the late war for the suppression of the rebellion, and to restore to them equal rights with the holders of government bonds." This bill set forth in its preamble that the soldiers and sailors in the civil war were compelled by law to receive for their services a depreciated currency and that Congress had solemnly affirmed that all government obligations should be paid in gold or its equivalent. But this bill, as I learn, was pocketed in committee.

And here is another vital consideration. The Fifty-ninth Congress increased the pay of Members from $5,000 to $7,500 per year and increased the pay of a large number of federal officeholders, all on the ground of the increased cost of living caused by a largely inflated currency. The present (60th Congress) has also increased the salary of the President and numerous other officials for the same cause. Do the statesmen who make salaries not know that soldiers have to live like human beings? Not so well as government officials, of course, as they are mostly poor, but they have to buy in the same market with Congressmen and judges and Presidents and Cabinets. Why have not the soldiers' pensions been increased 33 per cent to make even the decreased purchasing power of the present pension, on account of the increased cost of living.

The patient and industrious hen makes the same heroic effort in laying an egg for a poor old crippled soldier on his last legs as for a plethoric millionaire Senator. Why is not the old soldier given the same quality and value of alleviating legislation that has been given so amply and extravagantly to the well-paid officials of the Government?

It has been computed by competent authority that if the bill now in discussion should be amended by fixing the age limit of enlisted men at 63 years, that about 200,000 veterans would come in under its provisions. At $25 per month the total would be $60,000,000. From this sum the amount of pensions now paid these 200,000 veterans must be deducted. According to the last report of the Commissioner of Pensions the average value of a pension under the general law applying to the civil war is $215.30. This would give for 200,000 pensioners the sum of $43,036,000. Deduct this from $60,000,000 and the balance of $16,964,000 would represent the increase of the pension roll under the law if the bill now on the House Calendar should be passed with the age limit for enlisted men fixed at 63 years. The estimate of the very capable companions of the Loyal Legion of the cost to the Government of the officers, with the age limit of 70 years, is less than $3,000,000 for the first year, making the aggregate cost of the bill, should it be made law, $19,964,000. The officials of the Pension Office estimate that this amount will decrease every year 15 per cent, and that at the end of eight years the long-term veterans will practically all have passed to the great beyond. These figures ($19,964,000) should scare no lover of justice, no patriot who believes with Abraham Lincoln that this Nation should care for those who have borne the brunt of battle. This amount is less by over $4,000,000 than the estimated cost of the two useless battle ships (fully equipped and manned) just authorized by this Congress, and is several millions less than the cost of sending our great fleet of war vessels around the world to teach the republics of the South Atlantic seas and of the South Pacific seas and the pagans of China and the Shinto worshippers of Japan that we have parted with the simple republic of the fathers and are now a great bragging military autocracy. Furthermore, none of this patriotic pension money would be wasted for powder in firing $5,000 salutes in foreign ports and imperial capitals, or in $2,000 bum banquets, or in un-American and spectacular demonstrations to awe the obnoxious Orientals, but every dollar would go into immediate circulation to stimulate business and industry among our own people.

Can it be possible that the tide has turned from democracy under a President to democracy under an emperor or a king. In Germany the aged citizen who has deported himself well through long years of honest toil receives a pension from the Government to cheer his declining footsteps to the grave. In England Parliament has passed a similar pension bill, to honor the men and women who have bred her sons for the pursuits of peace and to fill the ranks in "her far flung battle line" around the world. New Zealand and other British colonies, Canada the latest, have enacted like legislation. To-day, in sight of the aged and tottering servants of the departments,

with the badge of the Grand Army of the Republic on their breasts, who hobble about the streets of the national capital, going to and from their work, our eyes are blind and our ears are deaf to the sad drama going on around us. And not only in the national capital, but throughout the length and breadth of this great land of ours.

Instead of standing with questioning awe before the statue of Frederick the Great we need to go to Arlington and view that vast and spreading sea of graves and read with misty eyes the inscription on the massive granite block in memory of the unknown dead, of the thousands whose bleaching bones were brought up from Bull Run and the surrounding Virginia battlefields, and learn there the cost of deadening our hearts to the ancient faith of those who fought the battles of liberty and independence.

Gettysburg, Vicksburg, Atlanta, Franklin, and Nashville can speak to us no more with tongues of lurid flame. They are silent for all the coming ages; but their silence is more eloquent of national destiny than all the orators of the past, from Thermopylæ to Appomattox.

We have now a great standing army and a big navy, with more high-salaried officers than any army around the world. And it is true to-day as when that great English publicist, Thomas Carlyle, uttered it early in the nineteenth century: "A standing army means waste, depression, and moral decay. No nation can improve its morals or grow in strength when its bravest and best sons are each year devoured by the army."

The recent dedication of a statue of Frederick the Great in our national capital indicates the flavor and character of our patriotic ideals. Here let me ask what did Frederick the Great stand for, and what does this statue stand for now? Just what Alexander the Great, Peter the Great, Julius Cæsar, and Napoleon Bonaparte stood for—the crushing out of weaker peoples by the cruel sword in order to build new empires upon their ruins, resting upon bayonets.

And what did Frederick the Great achieve in his bloody career of empire building that should call for his statue in the capital of a republic? It is true he fought great battles and won great victories, but it is also true that in all the 50 battles he fought not one was for the benefit of a single human being, save the imperial head of the Hohenzollern dynasty. When the great Frederick fought the Russians at Zarndorf, in August, 1758, he slaughtered 19,000 Russians and left 11,000 Prussians dead upon that awful field. He gave the order that no quarter be given the surrendered Russians, and all were put to the sword.

It would be fitting and proper that a monument be erected to the German soldiers who fought in our wars, but here is no place for an empire builder who shed the blood of innocent thousands to perpetuate the rule of monarchial heredity.

After setting up the statue of the great Frederick we can not refuse a place to one of Russia's czars, and France should ask for a statue of Louis XVI, for he sent an army and a navy to fight our battles for us and made the birth of this Republic possible.

And surely Great Britain, owing to our recent covert alliance, has a right to demand a statue of one of her seventeenth century conquering kings. And should King Edward the Seventh select George the Third, an eighteenth century product, how would that figure look to the patriotic student of American history alongside of George Washington and Benjamin Franklin, Patrick Henry and old John Adams. And after the monarchs of the Old World have all been represented here there will be no room in the Rotunda for that plain-faced citizen, in citizen's clothes—Abraham Lincoln—now standing under the great Dome. And Thomas Jefferson will have to be pushed aside to make room for some gilded statue with a crown, standing as a silent orator of kingly heredity under the heroic figure of the Goddess of Liberty.

I hold that this National House of Representatives, the only representative body of the American people, and for the American people, should protest against the tendency, so apparent during the administration of Theodore Roosevelt, to cast aside the patriotic teachings of the fathers of the Republic and take on royal forms and symbols. This Capitol is all ours; and it should be kept as liberty's central home. It should never be desecrated with the statues of imperial conquerors or kings, or emperors, or czars; but forever consecrated to the ever-prescient spirit of democracy. We should keep the air of freedom's Capitol wholesome and pure, to illustrate and typify the heroic spirit that characterized the founders of the Republic—Washington and Jefferson and the illustrious peace-loving patriots of one hundred and thirty-seven years ago.

The lowering of our national ideals is shown in our apathy and indifference when the oppressed and persecuted heroes of the Russian revolution seek an asylum on our shores. Jan Pouren and Christian Rudovitz, victims of the terrible Black Hundred, fled from the Cossacks and the knout to our shores. They came to the United States, supposing it to be a refuge for all lovers of liberty. They engaged in honest industry and took on new hope with the courage of their convictions. Then, under an infamous treaty made secretly with Russia, they were seized, charged with common crime and murder, and thrown into prison to await extradition; the same crime perpetrated by Patrick Henry, Benjamin Franklin, and Thomas Jefferson.

Let me recall an era of more courageous patriotism. I remember in 1850, when a mere boy, I heard the great Hungarian leader, Louis Kossuth, speak to a vast multitude at Poughkeepsie, N. Y., on the historic Hudson. After a long and bloody contest the Hungarian rebellion of 1849 was crushed by the combined armies of Austria and Russia. Louis Kossuth, the leader of that revolution, took refuge in Turkey. His extradition was demanded by both Russia and Austria, but the Sultan refused to give him up. In order to save Kossuth from the vengeance of his foes the Congress of the United States, then in session, authorized the President of the United States to send a war vessel to Turkey to bring Kossuth to the United States. The President acted promptly, and sent the man-of-war *Mississippi*, Captain Long commanding, to the harbor of Smyrna, and brought General Kossuth to the United States. An official banquet was given Kossuth by both the Senate and House of Representatives—a banquet at which Daniel Webster, General Cass, and the leading statesmen of that day made notable addresses.

When we compare the range of human sympathy and the heroic fortitude of the Congress of a half century ago with the utter want of expressed sympathy and cold indifference for the exiles of liberty to-day it should bring a crimson blush of shame to the cheeks of every loyal American. I am for the democracy that stands for the man, no matter where born nor by what horrid rites his liberty may have been struck down. I am for the man and the rights of man, whether in the enjoyment of well-earned liberty and honest success or doomed to eat bitter bread salted with the tears of despair. The time is coming, and I hope it is not far off, when all this terrible record of moral cowardice and profligacy and criminal aggression will become a horrid nightmare. All this fatal hallucination over militarism and so-called "expansion" in the Orient will haunt us like a black night cloud.

Think of our fabled "Uncle Sam" as a red-mouthed bloodhound hunting for victims under our protecting flag to gratify the vengeance of the assassins of human liberty across the ocean. Continental outrages like this could not have happened in this country until a few years ago.

When I think of the virility of American patriotism a half century ago, compared to the truckling servility in high places to-day, I feel justified in quoting a couplet from our own poet, Howard S. Taylor:

> We have forgot! a Roman lust
> Profanes our ancient holy things.
> We trample justice in the dust;
> We have the rabies of the kings,
> The scarlet rage of gun and sword.
> Have mercy on thy people, Lord.

We are living in a sordid commercial time. We are fast parting with the old ideals, when justice was glorified in the simple home life and applause was showered on the soldiers of patriotism. Let us make a heroic effort to revive the old spirit and show by righteous legislation that this nation has not forgotten her vows. Let us give substantial recognition to the greatest soldiers of humanity the world has ever known and make their last days on earth comfortable and fill their hearts with an all-absorbing sense of the Nation's gratitude.

We can not recall the valiant dead who sleep in seventy national cemeteries and in every village graveyard and rehabilitate them in the robes of flesh. We can not pour out our long withheld bounty, kept in closed coffers all the weary years in the face of bitter needs. But we can do justice to the living, and give to the fast-fading remnant of the men behind the guns, who did the hardest work of war, a small portion of what is theirs by right of inheritance, and place their names on the honor roll of the Republic.

APPENDIX.

Among the mass of protests from Grand Army posts against the action of the national encampment a few are given herewith, the first signed in some instances by soldiers of my own command, who earned their honors in forty battles, or from members of posts of my own city and district, whose records are well known to me. They will serve as samples of the widespread support given the dollar-a-day bill.

Bond Post, No. 24, Grand Rapids, Ohio, a petition to the national encampment, G. A. R., to be held in Salt Lake City, Utah, August, 1909, to set aside the action of the national encampment held in Toledo.

Forsyth Post, No. 15, Toledo, Ohio, the oldest and largest post in northwest Ohio, a petition to national encampment to rescind the action of last encampment and give "support to this most just measure." Also, congratulations on the favorable report from the Military Committee, though in an amended form, and "urging General SHERWOOD to stand for a dollar-a-day and an age limit not to exceed 63 years."

Sill Post, No. 57, North Baltimore, Ohio, resolved that Sill Post unanimously condemn and repudiate the action of national pension committee and hereby fully indorse Congressman SHERWOOD in his attitude on pension legislation.

Cary Post, No. 173, Cary, Ohio, disapproving the action of the Toledo encampment; also the department encampment at Lima, Ohio, and heartily indorsing the Sherwood pension bill, now pending in Congress.

Bell Harmon Post, Warren, Ohio, resolution urging Congressman W. AUBREY THOMAS to work and vote for the Sherwood pension bill.

B. N. Turk, Past Junior Vice-Commander, Department of Oklahoma, representing a post of 125 members, indorsing the dollar-a-day bill: "What would the nation give to-day, in like circumstances, for such defenders? We have no objection to our nation building mid-waterways, Panama canals, and all the great improvements which we should have as a mighty nation. But don't forget the Grand Army boys who made the nation."

J. T. McGinley Post, Manistee, Mich., reporting the unanimous dissent with the action of national encampment at Toledo, with reference to pension legislation, and the earnest hope that the pension bill reported by the Military Committee may pass.

Post 141, Marionville, Mo., congratulating Congressman SHERWOOD on his reelection, "to continue the good work for the old soldiers who are dropping off annually by the thousands."

John A. Davis Post, No. 53, Jesup, Iowa, repudiating the action of national encampment in deferring pension legislation for years, as arbitrary and uncalled for, and against the best interests of needy comrades.

W. G. Ogden, Senior Vice-Commander, Department of Kansas, Ness City, Kans., expresses thanks for the stand taken by Congressman SHERWOOD on behalf of the veterans, and says: "I propose to have a resolution passed in encampment denouncing the action at Toledo. It was not taken by the body of delegates, for I was present, and was done by just a few members of the House of Lords. Posts all over the country are against the action."

C. G. Conn, president Ex-Soldiers and Sailors' Association, Elkhart, Ind., expressing appreciation of the Sherwood bill and inclosing petition to the Senate and House of Representatives, which says: "With one dollar a day the Soldiers' Homes would be done away with and the comrades could remain at their homes their few remaining years, among lifelong friends and neighbors and old surroundings, instead of remaining at Soldiers' Homes among strangers and strange surroundings."

Richard Lanning Post, No. 69, Coshocton, Ohio, commending Congressmen SHERWOOD and ASHBROOK as friends of the soldier and repudiating the action of the "House of Lords" at Toledo National Encampment, "granting a lease of life, peace, and plenty to the old soldier, for at least three or more years, on condition that he bow before the steam roller and agree to neither die nor supplicate."

Capt. Harrison A. Galloway, Stroud, Okla., commander of Barber Post, G. A. R., thinks the boys of the great West that came from the army with scarcely anything and broke up the prairies and made them "blossom as a rose" and were too manly to apply for pensions until the eighties or nineties, when it was almost a life job to secure evidence of every kind intended to delay justice, should be cared for now. He went from Xenia, Ohio, to the Cherokee Nation in 1883, and has seen much service, civil and territorial, as well as in founding posts of the G. A. R., and says: "I tell you it makes me sad to see the boys that are so feeble that they can not earn a living, that saved and have made this great and glorious country, with its schools and churches, so badly neglected. Let Congress pass your bill that they may pass their last days in peace and comfort. Ten years will about end the majority list.

Many complaints have come to hand from the National Soldiers' Homes of barrack discipline, deprivation of liberty, badly cooked food, or the longing for home of the solitary and sick. If the dollar-a-day bill should become a law thousands would return to their homes.

The recent official reports of Inspector-General W. I. Wood, U. S. Army, on national homes, support this view.

James T. Kent, National Home, Danville, Ill.: The very life of the veterans is crushed out by the infernal prison orders that are issued in the so-called "homes." Give us the rights of a citizen, or an employee, or give us a dollar-a-day pension. We look to Congress for relief.

Capt. L. T. Hathaway, Soldiers' and Sailors' Home, Bath, N. Y.: Why the Grand Army should attempt to dictate to Congress the kind of legislation it shall pass is preposterous. The old veterans in this home, who were on every firing line from Bull Run to Appomattox, are of the opinion that it is a wicked method of keeping them from their just dues. Thousands of veterans who served three years are getting but $6 or $8 a month.

James S. Clark, U. S. Navy, Soldiers' Home, California: The dollar-a-day bill is a bill in the right direction. That is the consensus of opinion of the veterans of this home and others. Provide for those that volunteered, without any reward other than doing their duty to their country in her time of need, and let those who kept in the background until the draft and bounties drew them out be satisfied with what they are getting.

Lieut Henry M. Trimble, National Soldiers' Home, Dayton, Ohio: Allow me to say if the Sherwood bill were a law the soldiers' homes would be almost depopulated. All self-respecting men would go, except the blind and paralytic, leaving only the "sour brewers," who drink up their all and only look for a place to eat and sleep. The Central Branch could take care of all and the other homes could be used for other purposes by the United States. The trouble is some might lose a paying office and assumed superiority.

National Soldiers' Home, Tennessee: The soldiers in this home are all so glad that you have got back to Congress, for now there will be some one to see that justice is done the old veterans who fought their country's battles.

George Whister, Mountain Branch Home, Johnson City, Tenn.: I served all through the war, was wounded at Chickamauga and Mission Ridge, and put on General Rosecrans's honor roll after the battle of Stone River. After three years I served a year in the navy. Under the new law I get $12 pension, but there are men right here in this ward that never served two years who are getting the age pension of 70 years. If this is justice, I do not know the meaning of it. Push your dollar-a-day bill.

An inmate of the National Soldiers' Home, Virginia, writing to W. W. Hunt, Maumee, Ohio: I am glad Congressman SHERWOOD is the soldier's friend, and is pushing the dollar a day pension. We are 4,000 disfranchised veterans and there is not a civil war soldier in any position of authority on the grounds. Our treatment is deplorable and to complain means to be put out of the gates.

C. W. Bridges, National Soldiers' Home, Danville, Ill: We all love you as a soldier and what you have done and are doing for the Sherwood bill. Every word for us in your speech for us was true. There are thousands who never saw a rebel in their lives who are drawing $20 a month and more pension. The homes are all right in a way but give us a dollar a day pension and we will go away and never return.

UNION VETERANS' LEGION.

John V. Barnes, 33 West Second street, Cincinnati, in forwarding the resolutions passed by the Union Veterans' Legion, referring to the bill reported by the Military Committee, House of Representatives, and now on the calendar awaiting passage, says:

I do not see any excuse for politicians dodging the officers' retirement because of any action of the irresponsible Grand Army of the Republic, as its jurisdiction is not recognized by the commissioned officers. Most of the officers belong to the Veteran and Loyal Legion. The legislation asked for is identical with that of the Congress of 1828, forty-four years after the war of the Revolution, placing the commissioned officers of the Continental Army on full pay. If the officers of the Revolutionary war, who established the nation, were thus favored, I can not imagine an argument justifying different treatment to the officers of the civil war who, after greater sacrifices, saved the nation;

Whereas the 100-day men and shorter-term men, at a state meeting of the Grand Army of the Republic at Lima, Ohio, refused to indorse a resolution favoring the Sherwood pension bill, now pending in Congress, a measure which would benefit only real soldiers of the war; and

Whereas the Union Veteran Legion was formed on the idea of a per diem service pension bill for all soldiers, according to length of service, and as the provisions of the Sherwood bill reach the mass of the veteran soldiers; therefore be it

Resolved, That we cheerfully indorse Comrade Sherwood's per diem pension bill as a proper and just measure, in that it does justice, though tardy, to the real veterans of the war, and we condemn in the strongest terms possible the factious opposition of Comrade KEIFER preventing action on the bill.

Col. D. W. Wood, Newark, Ohio, says:

You have no idea how you have cheered our old suffering comrades in your success in getting the substance of your bill out of the committee. That age limit should be 63 years instead of 70. Our brave, suffering old comrades are passing to that summerland of effulgent glory at the rate of over 50,000 a year, and but few living will ever receive any benefits waiting to grow to 70. These old comrades of ours are suffering more now than they did during the war; they were young, hopeful, and patriotic then, but now they are aged, feeble, afflicted, most of them helpless and tottering on the verge of the grave, many suffering for the very actual necessities of life, facing starvation in many cases, and this Nation should be as anxious to help the poor, weak Union soldier as readily as they do a foreign people who suffer on account of earthquakes. (Congress recently voted $800,000 to the Italian earthquake sufferers.)

Many old soldiers ask me to express their thanks for your very devoted interest in their behalf, and this sentiment is not confined to those who will be benefited by the law if passed.

The Lucas County Soldiers, Sailors and Marines' Protective Association, of Toledo, Ohio, at a recent called meeting, unanimously passed strong resolutions indorsing the Sherwood bill and denouncing the action taken by the national pension committee of the Grand Army at the encampment held in Toledo last summer. This is one of the strong and representative bodies of veterans of northwestern Ohio, composed mostly of long-service men.

I have a letter dated February 19, 1909, from the Rev. George Musson, of Medina, Ohio, a soldier who endured the agonies of Andersonville prison, the famous lecturer on Andersonville, from which I quote the following:

I was present at the Toledo encampment, when at the very last moment, when less than one hundred were present, the "House of Lords" in the encampment passed the resolution declaring that the G. A. R. would ask for no pension legislation for three years. I have not ceased since to denounce it as a great outrage, and no representation of the feelings of the general comradeship.

Comrade S. B. Yohn, of Princeton, Iowa, under date of February 27, 1909, writes:

Allow me to congratulate you on your interest taken for the old soldiers. I hope there are a few more in Congress like you.

On February 17, 1909, Comrade J. D. Henron, of Bellefontaine, Ohio, wrote:

I thoroughly agree with you in your estimate of the action of the G. A. R. encampment with regard to pension legislation. Also as to your bill for one dollar per day for veteran soldiers.

Capt. J. H. Johnson, Smiths Ferry, Pa.:

What right has the house of lords of the National G. A. R. to cut us off from pension legislation for four or five years? None whatever. We don't object to $100,000 for the President and other increases, but who made it possible for all this liberality? We old boys who wore the blue and now are only begging the crumbs.

Comrade Henry M. Hutchinson, Elkhorn, Ky.:

Your words should sink deep in the hearts of every old comrade. We should all be proud that we have such a friend as you are in the halls of Congress. I hope this bill will be amended on the age as you suggest and then be passed.

Lieut. A. M. Reed, Greenville, Pa.:

Have read your letter in the National Tribune with reference to the "Volunteer Officers' Bill." It has the right ring, is full of good, sound common sense. I hereby tender you my hearty thanks for your interest and untiring work in the interest of the veterans.

Comrade M. C. Barney, Flint, Mich.:

I believe you are right in regard to pensions. If this Government waits for enlisted men to reach 70 before the increase there will be but few left to pension. I do want to say to you my dear General, I am very thankful the rank and file have one at Washington interested in their welfare.

Comrade John Staley, Mason, Mich.:

I have read your letter published in the National Tribune of 4th instant. I hope you will succeed in getting your amendment through, as there are more old soldiers under 70 than there are over 70, so you see it would deprive more comrades of a deserving benefit. What I would like to see is a law giving us a pension according to the time we served. I know of a comrade who was never out of the State and is drawing a pension of $50 per month; another man getting $30 that never saw a fight; another getting $20 who deserted twice.

NOTE.—Hundreds of letters like this showing that real veterans of merit have been put aside and pensions given for political service in congressional campaigns.

Comrade S. H. Sloan, Ashland, Ohio:

Discharge all the costly fields of examining doctors and give all the pension money direct to the old soldiers. I just got home from Pennsylvania and I tell you this Government won't be bothered with the old boys very long. We buried two of our company lately.

Rev. Edwin C. Allard, Frostburg, Md.:

It was with great pleasure that I read your article in the National Tribune commenting on the pension bill recently reported. Let the bill be amended to 63 and I feel sure that not a single patriot will say aught against it. In all of your future life's work you have my prayers and best wishes.

Capt. A. Herriman, San Diego, Cal.:

I think it a shame and a disgrace that at the national encampment at Toledo in 1908 for any comrade to even mention any such resolution against Congress passing any more pension bills for three years. That ought to have been put before every Grand Army post in the Union and such silly resolutions would have been buried so deep that it would never be resurrected again.

Col. John W. Parks, past department commander, Dallas, Tex.:

With thousands of other old soldiers I read with much satisfaction and gratitude your explanation of the "Civil War Officers' Annuity Honor Roll," and your intention to offer the amendment you state. It is a blessed thing that the poor old veteran has some one who loves him enough and is patriotic enough to champion his cause and urge that justice be done him.

God bless you, sir, for the noble stand you are taking on this bill to secure justice for your comrades, and I know it will be the prayer of every comrade that you may be successful. I think that every post in our organization should uphold and bless you.

Martin Ridennour, of Peru, Kans., under date of February, 1909, writing on the proposed age limit of 70 years, says:

In the name of reason what good is the promise of a pension when a man is dead? True, some live beyond that age, but what good does pension legislation do unless it helps the poor old fellows while they live? The declaration of the national encampment does not represent the sentiment of the rank and file. We look upon them as the aristocrats of the G. A. R., and there are many who refuse to become members on that account. Under the present laws and rulings it is discriminating.

From far off Washington and Alaska the comrades of Major Johnson Post send a personally signed petition asking for the passage of the bill for officers and privates.

I have several hundred letters of like import received during the last three weeks, from representative veterans.

The Clerk read as follows:

In all, for National Home for Disabled Volunteer Soldiers, $4,311,050.

Mr. MACON. Mr. Chairman, I make the point of order on the words "five hundred" in line 18, page 175, and on the words "four thousand," in line 19, same page. These are increases of salary, as I am advised.

Mr. TAWNEY. I make the point of order that the point of order comes too late. We have passed that paragraph and also read the next succeeding paragraph.

Mr. MACON. I made the point of order just as soon as the Clerk finished the reading of the word "dollars."

The CHAIRMAN. The gentleman can not make two points of order at one time.

Mr. MACON. Then I will make the first one.

The CHAIRMAN. Which is that?

Mr. MACON. To the words "five hundred," in line 18, page 175.

Mr. TAWNEY. I submit that the paragraph included in lines 8 and 10, on page 176, an entirely separate paragraph from the one containing the language against which the gentleman from Arkansas makes the point of order, was read, and therefore his point of order comes too late.

Mr. MACON. I was on my feet asking the attention of the Chair.

The CHAIRMAN. Does the gentleman state that he was on his feet endeavoring to secure recognition from the Chair?

Mr. MACON. Of course I was. This is an increase of salary of $500. The present salary is $4,000, and it is sought to increase it to $4,500.

The CHAIRMAN. The Chair desires to ask the chairman of the Committee on Appropriations whether or not these salaries are fixed by law?

Mr. TAWNEY. They are not fixed by law, Mr. Chairman. They would be subject to a point of order, no matter at what rate the salary was recommended by the Committee on Appropriations. It is an increase in the salaries of these two officers.

The CHAIRMAN. An increase over the salary of last year?

Mr. TAWNEY. These are simply increases over the amount in the current law.

The CHAIRMAN. The gentleman makes the point of order on the words "five hundred," in line 18. The Chair sustains the point of order.

Mr. MACON. Then I make a point of order on the words "four thousand," in line 19. The present salary is $3,500, and it is sought to increase it to $4,000.

The CHAIRMAN. The Chair sustains the point of order. The Chair suggests to the chairman of the committee that it would be in order to move an amendment, to insert "three thousand five hundred."

Mr. TAWNEY. Was the point of order sustained?

The CHAIRMAN. Yes. The gentleman made the point of order against "four thousand," and the Chair sustains that point.

Mr. TAWNEY. Does the Chair hold that a Member can go back to a paragraph after the following paragraph has been read, to make a point of order?

Mr. MACON. I will say to the gentleman that that is not the case, and that I did not attempt and am not now trying to go back to the paragraph; I am already there.

The CHAIRMAN. The Chair desires to state to the chairman of the Committee on Appropriations that the gentleman

from Arkansas stated to the Chair that he was on his feet trying to secure the recognition of the Chair before the other paragraph was finished.

Mr. TAWNEY. Mr. Chairman, I have not the data before me now as to what the salaries in the current law are, and we will let the matter pass.

The Clerk read as follows:

In all, for National Home for Disabled Volunteer Soldiers, $4,311,050.
Provided, That no part of the foregoing appropriations shall be expended for any purpose at any branch of the National Home for Disabled Volunteers that maintains or permits to be maintained on its premises a bar, canteen, or other place where beer, wine, or other intoxicating liquors are sold.

Mr. FITZGERALD. I move to strike out the proviso.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Strike out the proviso, all of lines 11 to 16, inclusive.

Mr. BENNET of New York. Mr. Chairman, this provision that my colleague from New York moves to strike out is the following language, on page 176:

Provided, That no part of the foregoing appropriations shall be expended for any purpose at any branch of the National Home for Disabled Volunteers that maintains or permits to be maintained on its premises a bar, canteen, or other place where beer, wine, or other intoxicating liquors are sold.

I simply desire to call the attention of the committee to the fact that this is a provision which has, three years in succession, been put into this bill by a vote of the House. This year the committee, recognizing, properly I think, the views of the House on this subject, has put it into the bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. FITZGERALD].

The question was taken, and the amendment was lost.

The Clerk read as follows:

In addition to those classes of discharged soldiers and sailors now admissible to the National Home for Disabled Volunteer Soldiers, all honorably discharged soldiers and sailors who have served in the Philippines, in China, or in Alaska, who are now or who hereafter may become disabled by disease or otherwise, and by reason of such disability are incapable of earning a living, shall hereafter be admitted thereto.

Mr. MANN. Mr. Chairman, I reserve a point of order.

Mr. ASHBROOK. Mr. Chairman, I move to strike out the last word for the purpose of indorsing the remarks of my distinguished colleague who has just taken his seat, the gallant General SHERWOOD, of Ohio, and to ask unanimous consent to print certain resolutions adopted by a Grand Army post in my district. I wish to again announce my approval and indorsement of the Sherwood dollar-a-day pension bill, so called, and to express my surprise and regret that there should be any opposition to this most meritorious bill on the part of any soldier or any soldiers' organization. I do not, however, quite agree with my colleague, General SHERWOOD, as to the age law, or McCumber Act. This law has helped and is helping many a poor, dependent soldier to spend his last days enjoying at least the bare necessities of life. The Sherwood bill is a reward for service to the men who stood behind the guns, not for three months, but for three years or more; and to my mind, Mr. Chairman, every soldier who faithfully served his country during those dark days for three years or longer is justly entitled to $1 per day for the few remaining years he would enjoy it. All pension laws passed to better recognize the great debt due the old veterans who wore the blue and preserved this great Union of States are good laws, but none have more real merit than the Sherwood bill. The bill reported by the Military Committee and now on the calendar allowing $25 per month to all soldiers who are 70 years of age should be passed by this Congress; and not only should this bill have the favorable attention of the present Congress, but the widows' pension bill, which has passed the Senate and is now quietly sleeping in the House committee, removing the marriage restrictions and limitations and giving a pension of $12 per month to the widows of all honorably discharged soldiers of all wars, should be passed, and not permitted to die in the committee, to the disgrace of the Sixtieth Congress. Mr. Chairman, this Congress seems to have plenty of time for everything else, but the old soldier and his poor widow must wait, wait, until it is too late to give the help so justly due them.

Mr. Chairman, I ask unanimous consent to print in the RECORD the resolutions which I send to the Clerk's desk, adopted by the Newton Stanton Post, Grand Army of the Republic, of Warsaw, Coshocton County, Ohio, sent me by the post commander, Capt. E. Z. Hays, with request that they be published in the National Tribune, the official organ of the Grand Army of the Republic. I am not advised whether or not they appeared in the columns of that paper, but that the Members of Congress may know how at least a large per cent of the veterans in my district feel concerning the action of the Toledo national encampment and the Sherwood bill, I desire that the same be printed in the RECORD:

Whereas the question as to whether or not the Grand Army of the Republic is content to wait four years for further legislation by Congress in relation to pensions, etc., was never submitted to the consideration of the several posts of the Nation nor to the several departments of the Grand Army of the Republic; and

Whereas Gen. I. R. SHERWOOD has said through the National Tribune that Members of Congress will not vote for further pension legislation, because of a resolution adopted by the Toledo national encampment in 1908; and

Whereas we favor and urge upon Congress an amendment to the widows' pension law which will place the widows of all honorably discharged soldiers on a uniform pension, without regard to date of marriage; and

Whereas justice demands an adequate recognition of the claims of the ex-prisoners; and

Whereas we deem the "Civil war officers' annuity honor roll" (including, as it does, a provision for the private soldier) a movement in the right direction, a recognition of a just claim: Therefore

Resolved, That the action of the national encampment last summer in relation to postponing further pension legislation for four years was entirely unauthorized and should receive no consideration by Congress; that it is unjust to thousands of old veterans who will before three years be beyond the reach of any beneficial legislation whatever; that the action of the Toledo national encampment is almost universally repudiated by the rank and file of the Grand Army of the Republic; and that we see in it the shame of the Grand Army of the Republic, as it thus rings the death knell of thousands of our comrades, and deepens the sobs of their worthy windows begging for bread.

Resolved, That we solicit the aid of the newspapers of the Nation in stirring up the veterans to a full realization of the injury likely to result to our comrades by the unwise act of the Toledo encampment, and to aid us in dispelling the bad effect that unauthorized proceedings may well have upon Congress; that we recommend that our comrades everywhere take action, by posts, that every Member of Congress may fully realize where the Grand Army of the Republic really stands upon the action of the Toledo encampment; that we further recommend that our comrades make no discrimination in regard to any bills before Congress, but by united action to bring every Member of Congress to clearly and forcibly understand that further legislation is right, is just, is wanted. Do not stop to quibble as to what form legislation should take, but fix it on the minds of Congressmen that action is asked—immediate action; action for the living.

E. Z. HAYS, *Post Commander.*
J. W. STANTON, *Assistant Adjutant.*

Mr. GARRETT. Mr. Chairman, I would like to ask the gentleman in charge of the bill if Mexican soldiers are admitted to these homes under existing law?

Mr. TAWNEY. Yes.

Mr. MANN. The current appropriation provides for admitting soldiers who served in the Indian war, and I would like to ask why that is omitted?

Mr. SMITH of Iowa. That is permanent law.

Mr. MANN. When did it become permanent law?

Mr. SMITH of Iowa. Last year, the same as this will if it is passed. The question here is whether a soldier who went to China in that campaign, attended with all its perils, is not just as much entitled to a soldiers' home as any other soldier. He is not under permanent law.

Mr. MANN. I do not agree with the gentleman that this will be permanent law. The comptroller will not hold that it is permanent law if he follows his own decisions.

Mr. SMITH of Iowa. I do not think we have to pass on that question now. I am satisfied that it is permanent law if passed. The question is whether a soldier who went to China in that campaign is entitled to the benefits of the soldiers' home as much as any other soldier? We thought he was.

Mr. MANN. Every other American soldier is not entitled to the benefit of the soldiers' home.

Mr. SMITH of Iowa. Every American soldier who fought in any campaign is entitled to the benefits of the soldiers' home.

Mr. MANN. What soldiers' homes does this paragraph relate to?

Mr. SMITH of Iowa. All of the branches.

Mr. MANN. It does not relate to the Soldiers' Home that we maintain here for the benefit of the soldiers?

Mr. SMITH of Iowa. No; that maintains itself.

Mr. MANN. The gentleman means that we maintain it out of money taken from the soldiers, but we maintain it all the same. Here is a proposition that means that these soldiers' homes will be continued indefinitely. The people had supposed that in the course of time the immense expense of the civil war would cease. A part of that expense is the soldiers' homes, but the moment you propose to add an additional list of soldiers who may benefit by the homes the distinguished gentleman from Tennessee will insist that his soldiers' home shall not be stopped; other gentlemen will insist that the soldiers' home in their district shall continue, and they are hunting now for somebody to go into these soldiers' homes. It will not be long in the future before they will have to admit discredited and lame ducks from Congress in the soldiers' homes to keep them up, and that might be a benefit to me, but never to the gentleman from Iowa. [Laughter.]

Mr. SMITH of Iowa. I want to suggest to the gentleman from Illinois that he made no objection when this privilege was extended to soldiers of the Indian wars. So no matter how short a campaign a man served in the Indian war, he is entitled to the privilege of a soldiers' home, but if the Chair sustains this point of order against this paragraph, a man who spent months in the campaign in China has not that privilege. It seems to me that that is a discrimination that is grossly unjust.

Mr. MANN. And a man who spent years in the army in the United States can not get into the soldiers' home unless he spent a day in China, or a day in Alaska, or in the Philippines, regardless of any service he rendered here.

Mr. SMITH of Iowa. If he was never in a campaign at all he can not get into a soldiers' home because he was in the Regular Army. But if this amendment is adopted there will be no campaign that I know of in which he could be engaged that he would not be entitled to go to a home. He will be entitled to go to a home if he served in an Indian war, if he served in the civil war, if he served in the Mexican war, if he served in Cuba, if he served in the Philippines, if he served in China, and I can not imagine that a man could have served in any campaign that he would not be entitled to go to a home if this amendment is adopted, and if the gentleman can think of any campaign that is not covered by existing law or this section I shall be in favor of including it here.

Mr. MANN. I believe the gentleman wants to include everything he can.

Mr. SMITH of Iowa. Everything in the way of service in a campaign.

Mr. MANN. There is nothing in this in the way of service in a campaign at all. The mere fact that a soldier may at any time have served in Alaska, for ever so short a period, will entitle him to be admitted to these soldiers' homes, although he may now be admitted to the National Soldiers' Home here.

Mr. SMITH of Iowa. Well, we would not support him in but one place.

Mr. MANN. We would support two sets of soldiers' homes. There is nothing in here about volunteers, I may say. Those of the Regular Army who may have served either in the Philippines, in China, or Alaska, regardless of campaigns, regardless of the length of service there, are entitled to admission, and it simply means, if adopted, that the soldiers' homes that ought in the course of time to cease, as far as having soldiers in them is concerned, are to be kept open indefinitely, and then we will be solicited on every side to add new persons who may occupy them. We maintain a Soldiers' Home here for the benefit of the Regular Army, and this is a proposition to add additional——

Mr. SMITH of Iowa. The gentleman knows that no one can get into that home who has not served a very long time or who has not been disabled in service. I certainly think there could not be anything more unjust than the existing law, that a man who was a few days in the Indian campaign here at home is entitled to go to these soldiers' homes, but a man who went clear to China and fought in that campaign against overwhelming odds is not entitled to the same privilege.

Mr. MANN. The gentleman omits the soldiers who served in the Indian wars.

Mr. SMITH of Iowa. But that is permanent law.

Mr. MANN. It is not permanent law.

Mr. SMITH of Iowa. That is the rule on which it is omitted.

Mr. MANN. It is a wrong rule. The comptroller has constantly held that an item like the one in the last year's appropriation bill applies only to the fiscal year for which the appropriation is made.

Mr. SMITH of Iowa. The gentleman and I can not agree on that proposition at all.

Mr. STEPHENS of Texas. The gentleman might add that in an amendment, so as to place it beyond controversy.

The CHAIRMAN. Does the gentleman from Illinois make the point of order?

Mr. MANN. I make the point of order.

The CHAIRMAN. In the opinion of the Chair it is legislation. The Chair sustains the point of order.

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having resumed the chair, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed without amendment bill of the following title:

H. R. 25823. An act to amend an act entitled "An act to extend the time for the completion of the Valdez, Marshall Pass and Northern Railroad, and for other purposes," approved February 21, 1907.

The message also announced that the Senate had passed without amendment the following resolution:

House concurrent resolution 71.

Resolved by the House of Representatives (the Senate concurring), That the President be requested to return to the House of Representatives the bill (H. R. 17214) for the relief of Harry Kimmel, a commander on the retired list of the United States Navy.

The message also announced that the Senate had insisted upon its amendments to the bill (H. R. 24834) for the protection of the surface rights of entrymen, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. CLARK of Wyoming, Mr. DIXON, and Mr. BANKHEAD as the conferees on the part of the Senate.

The message also announced that the Senate had insisted upon its amendments to the bill (H. R. 27061) to provide for the appointment of an additional district judge in and for the western district of Washington, disagreed to by the House of Representatives, had asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. DEPEW, Mr. FORAKER, and Mr. OVERMAN as the conferees on the part of the Senate.

SUNDRY CIVIL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

Back pay and bounty: For payment of amounts for arrears of pay of two and three-year volunteers, for bounty to volunteers and their widows and legal heirs, for bounty under the act of July 28, 1866, and for amounts for commutation of rations to prisoners of war in rebel States, and to soldiers on furlough, that may be certified to be due by the accounting officers of the Treasury during the fiscal year 1910, $400,000.

Mr. JOHNSON of South Carolina. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 177, line 22, strike out the word "rebel" and insert after the word "States" the words "of the so-called confederacy."

Mr. TAWNEY. Mr. Chairman, I have no objection to striking out the word "rebel" to which the gentleman from South Carolina refers. I think, however, that the words "so-called" might be omitted in his amendment.

Mr. SMITH of Iowa. Oh, no. I think not. We do not recognize the confederacy as yet.

Mr. JOHNSON of South Carolina. Mr. Chairman, if it meets the approval of the chairman of the committee, I will leave out the words "so-called."

Mr. SMITH of Iowa. But it does not meet my approval. As the gentleman offered the amendment, I have no objection to it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina.

The question was taken, and the amendment was agreed to.

Mr. TAWNEY. Mr. Chairman, I now ask to return to page 66, line 24, being one of the totals passed over yesterday, and offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

On page 66, line 24, after the word "dollars," insert:
"Which shall include the amount necessary for the medical inspection of aliens, as required by section 17 of the act of Congress approved February 20, 1907, and the provision of said section of said act requiring the reimbursement by the immigration fund for said expenses is hereby repealed."

Mr. MANN. Reserving the point of order on that, what is the object in repealing it?

Mr. TAWNEY. This is consistent with the action of the House on yesterday in repealing the permanent, indefinite appropriation, known as the "head-tax fund." This is simply to make it conform to that.

Mr. MANN. Will it require an appropriation?

Mr. TAWNEY. No.

Mr. MANN. I withdraw the point of order.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota.

The question was taken, and the amendment was agreed to.

Mr. TAWNEY. Mr. Chairman, there was another item passed over last evening to which I desire to return, which was the proviso authorizing the granting of permits for the sale of certain articles at the Washington Monument.

Mr. MANN. On page 136.

Mr. TAWNEY. A point of order was pending and I desire to return to that and dispose of it at this time.

Mr. MANN. I make the point of order against the entire proviso.

The CHAIRMAN. The Chair will state that the gentleman from Pennsylvania [Mr. OLMSTED] was in the chair and has

taken occasion to examine the question, and the present occupant of the chair has not, and therefore the present occupant of the chair yields to the gentleman from Pennsylvania because he is familiar with the matter.

Mr. MANN. Mr. Chairman, I make the point of order against the entire proviso.

Mr. TAWNEY. Mr. Chairman, I concede the point of order.

The CHAIRMAN (Mr. OLMSTED). The point of order is sustained.

Mr. TAWNEY. Mr. Chairman, I now ask to return to the paragraph beginning on line 5, page 116, "for the continuation of the investigation of the structural materials both belonging to and for the use of the United States, and so forth."

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

The CHAIRMAN. The gentleman from Nebraska [Mr. NORRIS] has an amendment pending.

Mr. NORRIS. Mr. Chairman, I desire to modify——

The CHAIRMAN. Without objection, the pending amendment will be reported.

There was no objection.

The Clerk read as follows:

Page 116, line 9, strike out "seventy" and insert "one hundred and twenty-five," so that the amendment will read "one hundred and twenty-five thousand dollars."

Mr. NORRIS. Mr. Chairman, I desire to modify the amendment by changing the words "one hundred and twenty-five" to "one hundred."

Mr. TAWNEY. Mr. Chairman, with that modification I accept the amendment.

Mr. NORRIS. Mr. Chairman, the committee have agreed to make no opposition to it if that modification is made.

The CHAIRMAN. The question is on the amendment as modified.

The question was taken, and the amendment was agreed to.

Mr. DALZELL. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 116, after line 9, insert the following:

"For the continuation of the analyzing and testing of the coals, lignites, and other mineral fuel substances belonging to or for the use of the United States in order to determine their fuel value, etc., under the supervision of the Director of the United States Geological Survey, $200,000."

Mr. TAWNEY. Mr. Chairman, I make the point of order that the amendment is not in order.

Mr. DALZELL. Will the gentleman reserve his point of order?

Mr. TAWNEY. I will reserve the point of order.

Mr. DALZELL. Mr. Chairman, beginning about 1906, the United States Government commenced a series of tests, the testing of fuel, the testing of structural materials, and an examination as to the cause of mine explosions. Appropriations have been made in each succeeding year providing for the investigation that is named in the amendment which I have sent to the Clerk's desk. In 1906 it was $202,000, in 1907 it was $250,000, and the last year $250,000. Now, the purpose of this amendment is simply to continue those investigations which have been prosecuted during the years that I have mentioned, and in the prosecution of which a large amount of money has been invested, a very large amount of work done, and very good and valuable results, not only to the United States Government, but to the scientific world, have been attained. I have not heard from the gentleman what the grounds of his point of order are, and I therefore withhold a further statement until I hear from him.

Mr. TAWNEY. The gentleman requested me to reserve the point of order to give him an opportunity to make a statement, and that is the reason I have not before stated the grounds of my point of order. The point of order is, Mr. Chairman, that this is not authorized by law. The work which the gentleman's amendment provides for is not to continue, but to begin again. In the current sundry civil appropriation bill there is this paragraph:

And provided further, That all investigations hereunder commenced or undertaken shall be completed and fully reported on prior to the 1st day of July, 1909; and all investigations and work now in progress under appropriations heretofore made for the purposes mentioned in this paragraph shall also be completed and officially reported on before the close of the fiscal year 1909.

So far as this work is concerned, Congress has stipulated or required by law that it shall cease at the end of this fiscal year, and that all operations heretofore begun under prior appropriations shall also be concluded and a full and complete report made of the result of those investigations by the close of this present fiscal year.

Mr. NORRIS. Mr. Chairman——

Mr. DALZELL. Mr. Chairman——

The CHAIRMAN. The gentleman from Pennsylvania has the floor.

Mr. DALZELL. Mr. Chairman, the authorization for these tests as originally made, I take it, was in accordance with law. It was in accordance with law in 1906, 1907, and 1908. Now, assuming that to be so, then the provision that the gentleman from Minnesota [Mr. TAWNEY] has read is simply a limitation upon the appropriation made in last year's bill. The Chair will observe that the provision is that "all investigations hereunder commenced or undertaken shall be completed and fully reported on prior to the 1st day of July, 1909." But the purpose of my amendment has no relation to the investigation commenced or undertaken. It has reference to the investigation to be undertaken and to be carried on during the succeeding year. This is a limitation which imposed upon the Geological Survey the necessity of reporting to Congress what they had already done, and I understand that they have such report in preparation, and provided that what they were then engaged at should be completed on or before the 1st day of July, 1909. But my amendment has relation not to the tests that were being made, not to the tests that were to be reported upon, but to tests that are to be made in the future; and if the tests originally authorized were in accordance with law, then my resolution looking to the future is also in accordance with law; and I submit that the point of order is not well taken.

Mr. TAWNEY. Mr. Chairman, I wish to call the attention of the Chair to the fact that when the gentleman talked about these investigative coal tests having been authorized by law back in 1906, if there was any authorization for tests made it was authorization carried in an appropriation bill, and this is the second time now when Congress has provided that these coal tests shall cease. It was written in the law, the sundry civil appropriation act for the fiscal year 1906——

Mr. NORRIS. Will the gentleman yield for a question?

Mr. TAWNEY (continuing). And in the sundry civil appropriation bill for the next succeeding fiscal year the Chair held that that terminated the service and work, and that the amendment was, therefore, not in order.

Mr. NORRIS. I would like to ask the gentleman, Mr. Chairman, this question: If it were not for the proviso contained in the last sundry civil bill, which the gentleman has read, would this amendment then be in order?

Mr. TAWNEY. I do not think it would.

Mr. NORRIS. Well, then, why rely upon this particular clause, now that he says it has nothing to do with it?

Mr. TAWNEY. The other ground upon which the point of order could be sustained has been discussed so frequently that it is entirely outside, under the language of the amendment, of the organic act creating the Geological Survey, and for that reason it has been held out of order in the past.

Mr. NORRIS. But is it not true that this very identical amendment last year was held to be in order and the point of order overruled as to it?

Mr. TAWNEY. I do not know that it was identical.

Mr. NORRIS. Of course I did not draw it, either, but I think the gentleman from Pennsylvania [Mr. DALZELL] will say that it is identically the same amendment——

Mr. DALZELL. It is precisely the same.

Mr. NORRIS (continuing). That the Chair held to be in order last year, when we did not have this particular provision in the sundry civil appropriation bill. And, therefore, Mr. Chairman, we come down to this proposition: If it were not for the particular provision contained in the last year's sundry civil appropriation bill, which the gentleman has read, then this particular amendment, if it be identical, and I assume that it is, would be in order, and it would be the duty of the Chair to overrule that point of order. Now, then, in what respect, the question arises——

The CHAIRMAN. Does the gentleman from Nebraska [Mr. NORRIS] state that this amendment is identical with last year's amendment?

Mr. NORRIS. I am informed it is by the gentleman from Pennsylvania [Mr. DALZELL]. I did not draw the amendment.

Mr. DOUGLAS. It is certainly substantially identical.

The CHAIRMAN. The Chair is inclined to differ with that statement.

Mr. NORRIS. I am assuming it is the same. If it is not the same, of course it should be put in that language, and I want to make my argument on that assumption. This particular provision which the gentleman from Minnesota [Mr.

TAWNEY] has read is a proviso contained in an appropriation bill. It does not purport by its language or any construction that could be put on it to change existing law, and the amendments that would be in order under existing law would not be made out of order by an appropriation limitation that applies only to the particular appropriation bill to which it is attached. Why, we might limit in any appropriation the work on any public building or any public work and say that at the close of the fiscal year they should do such an amount of it, or complete all that that appropriation would pay for; but if that work were authorized by law, it would not prohibit us at the next Congress to provide by another appropriation for the continuation of the work.

So that this limitation, not changing existing law, can in no wise affect an amendment that under existing law would be in order; and if this amendment is not in that shape, it can of course be put in the exact language that it was heretofore. My argument is based on the assumption that it is the same or could be made the same.

Mr. DALZELL. Mr. Chairman, I move to modify my amendment by suggesting $100,000 instead of $200,000.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to strike out "two" and insert "one." Is there objection? [After a pause.] The Chair hears none.

Mr. TAWNEY. In view of that concession, Mr. Chairman, I withdraw the point of order. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania.

Mr. DRISCOLL. Mr. Chairman, I ask to be permitted to extend a few remarks on this subject in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none. Does the gentleman from Ohio desire to be recognized?

Mr. DOUGLAS. The Chair will notice that I offered an amendment.

Mr. TAWNEY. I ask that we return to the paragraph on lines 3 to 5, on page 117.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania.

The question was taken, and the amendment was agreed to.

Mr. DOUGLAS. Mr. Chairman, I would like to appeal now to the gentleman from Minnesota to consent to the amendment offered by me last night to the final clause of page 116 and at the beginning of page 117, making that appropriation $150,000 instead of $100,000.

Mr. TAWNEY. Well, Mr. Chairman, that I can not do. I happen to know a good deal about the initiation of this service, and I have no more doubt that $100,000 is all they will spend or need to spend in that service than I have about any proposition in this bill that is unanimously conceded to be correct.

The CHAIRMAN. The gentleman from Ohio has an amendment pending to that paragraph which the Clerk will report.

The Clerk read as follows:

Page 117, line 2, after the word "one," insert "fifty," so as to make it read "one hundred and fifty thousand."

Mr. FITZGERALD. What is the situation, Mr. Chairman?

The CHAIRMAN. The situation is the consideration of the amendment proposed by the gentleman from Ohio increasing the amount to $150,000 in the pending paragraph on page 117.

Mr. FITZGERALD. Is that the paragraph before the committee?

The CHAIRMAN. That is the paragraph before the committee, and the gentleman from Ohio is recognized.

Mr. DOUGLAS. Mr. Chairman, since the paragraph is brief I will read it, so as to indicate the exact character of the amendment I have offered. It is as follows:

For continuing the investigations as to the causes of mine explosions with a view to increasing safety in mining, to be immediately available, $150,000—

Instead of $100,000.

Now, Mr. Chairman, when I say that in my district—the great Hocking Valley district of Ohio—there are fourteen to fifteen thousand men who make their living by mining coal, so that there are in the neighborhood of 75,000 people in the district who are dependent upon this industry for a livelihood, I think it can be easily understood why, not only as a matter of personal interest, but a public duty, I should wish to have this appropriation adequately increased. Interest in this important matter led me abroad last summer, where I spent a couple of weeks or more in the investigation of such efforts as have been made in England, in Wales, and especially in Belgium to lessen disaster and the loss of life by mine accidents. During that investigation I spent some time at the experiment station of the Belgian Government, located at Frameries, near the city of Mons, in the Kingdom of Belgium.

Since our experiment station recently established at Pittsburg has been, in a measure, modeled upon the establishment at Frameries, I beg leave of the committee to say a few words as to what that work consists of and how it is carried on.

There are three branches of testing work done at the station at Pittsburg and at the station at Frameries: First, the testing of safety lamps; second, experiments with, and training men in the use of, life-saving or rescue apparatus which has been devised for the rescue of men overcome by gas in the mines; and the third is the testing of explosives, and experimentation with different mixtures of gas and air, and coal dust and air, or the various gases the ignition of which result in explosions.

Now, I do not intend to dwell at length upon the matter of testing lamps, except to say that these tests are made in a series of artificial galleries constructed of steel, with safety valves to prevent accident. By the use of these steel galleries different lamps can be thoroughly tested in currents of air—horizontal, vertical, and of varying force; and the result has been that a great deal has been learned with reference to the dangerous character of lamps which were at one time considered perfectly safe.

Mr. OLLIE M. JAMES. Will the gentleman allow me to ask him a question?

Mr. DOUGLAS. I will.

Mr. OLLIE M. JAMES. I should like to ask the gentleman from Ohio how much was voted last year for the purpose of making these experiments?

Mr. DOUGLAS. One hundred and fifty thousand dollars.

Mr. OLLIE M. JAMES. The gentleman's amendment is to make it a like sum this year?

Mr. DOUGLAS. Yes. I will say to the gentleman from Kentucky that meanwhile there have been in America more than 3,000 men injured and killed in mine accidents.

Mr. COCKRAN. In the last year?

Mr. DOUGLAS. In the last year. It is a horrible situation, and I submit it is one that ought to appeal, at least, to the careful attention of the members of the committee.

Mr. OLLIE M. JAMES. Did the investigation made last year result in any good?

Mr. DOUGLAS. I will say to the gentleman from Kentucky that the experiments have resulted in good, in initiating means by which the investigations can be carried on. That appropriation last year was the first appropriation made by Congress for this purpose.

Mr. EDWARDS of Georgia. I did not catch the reading of the amendment. What is the amendment?

Mr. DOUGLAS. It is simply to increase the amount appropriated from $100,000 to what it was last year, $150,000.

Mr. EDWARDS of Georgia. Then the bill now is a decrease of $50,000 from what it was last year?

Mr. DOUGLAS. Yes; and I will explain why I think it ought not to have been done, if I am given the opportunity.

Mr. EDWARDS of Georgia. Did the gentleman go before the Appropriations Committee and ask for this amount?

Mr. DOUGLAS. I did not go before the committee, because the committee have been overwhelmed with work and because I knew that the committee individually were aware of the arguments in favor of the appropriation. Furthermore, I did not appeal to them about it because I had no idea that there was any inclination on the part of the committee to reduce the appropriation below what it was last year.

Mr. OLLIE M. JAMES. The gentleman expected, I suppose, that the same amount would be appropriated this year as last?

Mr. DOUGLAS. I did. I had no thought that there would be any reduction in the amount.

Now, the second series of experiments relate to the actual saving of life. It may be known to some Members of the House, but I think it is not known to most of them, that apparatus of various sorts have been devised by which a man may put a sort of jacket upon his shoulders and helmet upon his head and safely go into a mine the fumes or gases in which would kill him in a moment without this apparatus. With it he can work freely with his hands for hours, in the presence of these deadly gases, without danger to himself, and can rescue the victims of a mine accident or ascertain the actual condition of affairs in the mine.

Mr. MACON. Why do not the mine owners organize and experiment along these lines themselves? Can they not do that?

Mr. DOUGLAS. They can.

Mr. MACON. Then why do they come to the National Government?

Mr. DOUGLAS. They do not come.

Mr. MACON. Are they not here now?

Mr. DOUGLAS. No; it is the miners themselves and the friends of humanity in the country who come to Congress asking this.

Mr. MACON. Can not the miners appeal to their employers as well as to the Congress of the United States?

Mr. DOUGLAS. They can.

Mr. MACON. Do the mine owners, then, give them no heed?

Mr. DOUGLAS. They do; they have done something in this line, but not much. The work is one which the General Government owes to this great industry.

Mr. TAWNEY. I desire to ask how much time the gentleman from Ohio [Mr. DOUGLAS] has been allowed?

The CHAIRMAN. The attention of the Chair was diverted by gentlemen who have been talking to him, and the Chair did not realize that the time of the gentleman from Ohio had overrun.

Mr. DOUGLAS. I ask unanimous consent to proceed for ten minutes.

Mr. TAWNEY. I can not consent to ten minutes. The gentleman has already spoken ten minutes. I will not object to a further extension of five minutes.

The CHAIRMAN. The Chair trusts that the gentleman from Ohio will pardon him for not notifying him when his time had expired.

Mr. DOUGLAS. The "gentleman from Ohio" very freely forgives the Chairman. [Laughter.]

This is a matter about which I feel very earnestly, and I should like to say a few words more.

Mr. TAWNEY. Just a moment before the gentleman proceeds in that line. Is the gentleman aware of the fact that the appropriation for $150,000 was made not only for the current fiscal year, but was made also to cover the then remaining portion of the fiscal year 1908?

Mr. DOUGLAS. I had forgotten that for the moment; I believe it is true, but I do not see what bearing it has.

Mr. TAWNEY. The Appropriation Committee made it $150,000 to enable them to obtain the necessary equipment, which they say have been obtained. That is the reason the appropriation is reduced. They get for the next fiscal year more than they do for the present fiscal year, as far as these tests are concerned.

Mr. DOUGLAS. I am glad the gentleman has stated that, but I hope by this amendment they will get more.

This matter of rescue work is one of the most important in this connection. I myself used one of these oxygen-producing appliances, and for some minutes I was enveloped in smoke mixed with gas from the mines lying beneath the experiment station without the slightest inconvenience. I assure the committee that this apparatus is no theoretical, experimental thing, but actual and practical. In Belgium some of the largest and oldest mines (and some of them are 200 years old) have regular crews of men equipped with this rescue apparatus.

In the third place, there are the experiments carried on at Frameries relative to explosions caused by the gases and the dust found in mines, and similar investigations are now being carried on at Pittsburg. The apparatus is simple: A covered gallery is built upon the surface of the ground. This gallery is built of wood bound with hoops of wood and steel. It is oval in shape, about 200 feet long, and about 7 feet high by 4 feet in width, and is designed to resemble as nearly as may be the actual gallery of a mine. In this gallery the explosive tests are made, the gallery being so equipped with safety valves made of paper that when the explosion occurs the gallery itself is not destroyed. Into this gallery various mixtures of dangerous gases and coal dust in varying proportions mixed with air are introduced and tested. These gases are mixed by fans playing within the gallery, and the mixture is exploded by means of a small cannon let into the wall at one end of the wooden gallery and fired by electricity. I have not time to explain the apparatus nor the experiments more in detail. Suffice it is to say that the station at Frameries, under the able administration of Mr. Victor Watteyne, one of the most remarkable scientific men of his age, and his assistants, has achieved such practical results that the mining industry of Belgium has been in many ways very greatly benefited, and the death rate in that kingdom has been reduced in recent years nearly 400 per cent; while at the same time, in this country, without any sort of governmental scientific attention to the subject, the death rate has been increased at a rate that is simply appalling.

No one can doubt who has given any careful consideration to the subject that the great mining industry of America, the conventions of miners, and the men themselves know what they are about when they appeal and appeal to the Government for this sort of research and investigation.

In conclusion, I will say that with this increased appropriation it is hoped by the officers of the Geological Survey that we can secure, probably at a low cost, some abandoned mine, which can be equipped with electricity, such as is now used for machine mining throughout the country, and that in the actual mine galleries we may carry on experiments which will lead to practical results in ameliorating the safety of mine operations. To reduce this appropriation, the object of which is to save human life and to add to the safety of the men who go down into the earth to dig our fuel, while at the same time we are spending hundreds of millions of dollars to develop and continue operations, military and naval, designed to destroy human life, would be a queer commentary upon American civilization.

I hope I need not dwell further upon this subject, and I sincerely trust that this comparatively slight increase in the appropriation, in view of the object intended, may be adopted. [Applause.]

Mr. COOPER of Pennsylvania. Mr. Chairman——

Mr. TAWNEY. Mr. Chairman, I move that all debate on this paragraph and amendments thereto be closed in ten minutes, and I have five minutes in which to reply.

The CHAIRMAN. The gentleman from Minnesota moves that all debate on the paragraph and amendments close in ten minutes, and five minutes be occupied by the gentleman himself.

Mr. TAWNEY. I will suggest that it close in fifteen minutes, and three minutes of the fifteen be occupied by myself.

The CHAIRMAN. The gentleman from Minnesota modifies his motion, and makes it fifteen minutes, three minutes to be occupied by himself.

Mr. TAWNEY. And I also suggest that the debate be limited to the amendment offered by the gentleman from Ohio. There is no use in making spread-eagle speeches about the appalling deaths in mines.

Mr. OLLIE M. JAMES. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. OLLIE M. JAMES. As I understand the parliamentary situation, the gentleman from Pennsylvania [Mr. COOPER] arose from his seat and was recognized by the Chair. Now, what I want to ask is how did the gentleman from Minnesota get the floor to move to curtail debate?

The CHAIRMAN. The gentleman from Minnesota was recognized by the Chair to make a motion. Will the gentleman from Minnesota kindly state his motion as modified?

Mr. COOPER of Pennsylvania. Mr. Chairman, I submit that I have the floor.

The CHAIRMAN. The gentleman from Pennsylvania will have the floor when this motion is disposed of.

Mr. TAWNEY. My motion was that debate on the paragraph and amendments close in fifteen minutes, and of that the gentleman from Pennsylvania [Mr. COOPER] is to have three minutes, Mr. WILSON of Pennsylvania, five minutes, and the balance of the time is to be divided between myself and the other gentleman from Pennsylvania [Mr. GRAHAM].

Mr. GAINES of West Virginia. Mr. Chairman, I renew the point of order that the gentleman from Pennsylvania [Mr. COOPER] has the floor.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. COOPER] will be recognized when this motion is disposed of.

Mr. GAINES of West Virginia. But the gentleman from Pennsylvania [Mr. COOPER] has been recognized.

Mr. UNDERWOOD. Mr. Chairman, I desire to make a motion to strike out the word "fifteen," in the motion of the gentleman from Minnesota and insert the word "thirty."

The Chairman. The question is, first, on the amendment offered by the gentleman from Alabama, to the motion of the gentleman from Minnesota, to strike out the word "fifteen" and insert the word "thirty."

The question was taken, and the amendment was agreed to.

The CHAIRMAN. The question now is on the motion of the gentleman from Minnesota as amended.

The question was taken, and the motion was agreed to.

Mr. COOPER of Pennsylvania. Mr. Chairman, I trust the amendment increasing this appropriation to $150,000 will be adopted. I think the unfortunate experience of the country in mine explosions in the last few years has demonstrated the absolute necessity that something be done; in fact, that everything be done that can be done to discover the causes of these explosions and to prevent further loss of life. Last year, I understand, something like 3,200 people lost their lives in the United States from one cause and another in and about coal mines. I think that alone is sufficient evidence to this House that ample provision should be made to discover the causes and to find remedies.

The gentleman from Minnesota speaks about the appropriation being too large. I want to call his attention to the fact that the argument was made last year that as we were only inaugurating this investigation a larger amount could not be

used. A larger sum was asked, but the officials have been able to get along this year for the reason that these investigations have been conducted upon government property, the buildings and the arsenal grounds in Pittsburg have been utilized for that purpose, thus making a great saving in inaugurating this investigation. The great mine disasters at Mononga, at Naomi, at Darr, and at Marianna, all right in that section, have demonstrated that there has been something radically wrong in the methods of operating mines. The work that is being accomplished at Pittsburg already demonstrates the value of these investigations. It was a very much discussed question at the time of the Monongo mine disaster whether coal dust would explode at all, whether or not that was the cause. Blown-out shots was another matter that was discussed. It has been demonstrated beyond peradventure that coal dust is explosive and is very dangerous. I have had occasion to visit this testing plant twice, and I am satisfied from the interest manifested there not only by coal operators, but by coal miners, superintendents, fire bosses, inspectors, and everybody, that the public interest which has been aroused in these investigations will add very much toward discovering the causes and also in discovering remedies.

There is also the use of safety lamps, the question of the use of electricity in mines, and the testing of and instruction of miners and inspectors in the use of rescue apparatus. These things, which are so important to safety in the conduct of mining operations, are being investigated. Important discoveries are being made and much valuable information gathered, which is already proving to be of great benefit in placing mines in a safe condition. The tests that are being made and demonstrations given for the instruction of those engaged in and about the coal mines have enlisted the interest and hearty approval of all and stimulated a general desire to do everything possible to improve conditions. So I say that we can not spend money more profitably and in a better cause. Fifty thousand dollars is a very small sum to quibble over when one mine explosion may blow out a dozen or a hundred lives. A failure to make proper provision for carrying on this work will be a serious mistake. The percentage of fatalities is much greater in the United States than in any other country, and has been steadily on the increase, while in Great Britain, France, and Belgium the fatalities have continually decreased. We have had experience in the last year or two which demonstrates that it is necessary that every precaution should be taken to prevent these mine disasters, and I believe the work that is being done already proves the usefulness of the investigation. The officials in charge of this work would like to have a much larger appropriation, but with the present condition of the Treasury they will be content with $150,000. Anything less than that will cripple the work which has been so auspiciously begun and carried on so successfully to the present time. [Applause.]

Mr. GRAHAM. Mr. Chairman, I am interested in this amendment and this measure on account of the vital importance to the State of Pennsylvania, as well as to the entire country; and also in the amendment that has just been inserted on motion of the gentleman from Pennsylvania [Mr. DALZELL] continuing the fuel investigation. It has been asserted, I understand, when the last appropriaton was made for fuel investigations, that this important work should cease after the expiration of the present fiscal year. Of course, I do not know with whom such an agreement or understanding could have been reached, but I find in the printed hearings before the subcommittee of the Appropriations Committee, in connection with the appropriations for the fiscal year ending June 30, 1907, that one of the officials of the Geological Survey, who appeared before that subcommittee, stated emphatically that at least ten years more would be required for these investigations. These investigations have been going on for three or four years, but in a very small and unsatisfactory manner, and it is only within the last year that they have been conducted in anything like a satisfactory way. They are now just beginning to give results and to abandon, even temporarily, this valuable equipment, which is the most complete and efficient for both general and special fuel investigations in the world, would be most unwise.

The average death rate for fifteen years in the United States is 3.11 for every 1,000 employed in coal mines, as against an average of 1.36 per 1,000 for fourteen years in Great Britain, and 1.06 for twelve years in Belgium. And the conditions in our coal mines are growing worse instead of improving. The death rate in 1897 was 2.34 per 1,000 men employed, and that for 1907 was 4.86, or over double in a decade.

The practical utility of oxygen helmets in exploring coal mines after explosions has been demonstrated by these investigations, as has also the value of certain types of resuscitating apparatus in reviving men apparently dead from the inhaling of mine gases.

Important educational work has been done in demonstrating to mine owners, operators, and inspectors the value of artificial respiratory apparatus in rescue operations after mine disasters.

The amount estimated for the expenses for this work is certainly trifling when compared with the results already attained in insuring the lives of those thousands who toil in our mines. If these investigations result in the prevention of one such horrible mine disaster as those which have occurred during the past year, I believe it would more than compensate for the entire expenditure called for.

The fuel investigations now being conducted at the Pittsburg station relate to the prevention of unnecessary waste in the mining and in the use of coal. They relate to conditions leading to more complete combustion of the fuels and the prevention of waste in the form of smoke, loss of heat, and other problems, the solution of which are of interest and importance to every person in every part of the country.

No tests or investigations at the Pittsburg fuel-testing plant are being conducted for private parties. They relate either to these general investigations or to the testing of fuels for the immediate use of the Government.

All of these investigations are supplemented or preceded by elaborate chemical investigations and analyses to insure that the most accurate results are being procured. The organization for carrying on these tests includes a corps of more than 100 civil, mechanical, mining, and electrical engineers, and 30 chemists carefully selected, trained, and experienced in the investigation of the problems involved. To stop the work now and start it again, which would most certainly be done, would mean the loss of two or more years in training new experts and a far greater loss to the Government and to the people of the whole country of the value of the results accomplished by it.

It is my opinion, Mr. Chairman, that the greater economy would be to make the appropriation provided for in this amendment and allow this important work to continue uninterrupted. And it is for the House to decide whether this money will be wisely spent and whether it will give ample return to the Government and to the people. [Applause.]

Mr. BURKE. Mr. Chairman, the appropriation for these investigations having in view the possible prevention of mine disasters and the reduction in the number of accidents and deaths resulting from mining operations, made by the last Congress for the fiscal year 1909, amounted to $150,000.

The estimates submitted for the fiscal year 1910 were for the same sum, but the committee has reported $50,000 less than this. The Appropriation Committee apparently assumed that more than $50,000 having been expended in the last year in machinery and equipment for carrying on tests of explosives at Pittsburg, the appropriation could be reduced by this amount without interfering with progress. On the contrary, but for the condition of the Federal Treasury Congress would have been asked to appropriate a considerably greater amount than $150,000, in order that these investigations might be conducted with reasonable expedition.

In his estimates for these investigations for the year 1909, the Secretary of the Interior asked for $200,000. Only $150,000 was granted by Congress. The $50,000 now asked is to be used in purchasing some of the necessary equipment provided for in the original estimates.

The estimates of the Secretary of the Interior making up the item of $150,000 for the year 1910 included an item of $20,000 for purchase of an abandoned mine and $5,000 for its equipment and operation in connection with tests on a working scale for trying out the various experiments looking to the prevention of explosions of mine gas or coal dust.

And reduction in the energy with which these investigations are being carried on, or the delay of one day in determining the fact that some explosive is dangerous or that working in some mine under certain conditions in dangerous, may mean the loss of 10 lives.

During last year over 3,200 persons were killed in coal mines in the United States. It is evident from this that the full amount of the appropriation which the department feels is necessary to carry on this work without interruption should be voted, and speedily, if Congress is not to be held responsible for the daily loss of 10 or the weekly loss of half a hundred lives.

While the appropriation was sufficient last year to permit of purchasing machinery and appliances for testing explosives to determine their safety when fired in the presence of explosive gas and dust, it was not sufficient to permit of the employment of more than three skilled mining engineers for carrying on field investigations in mines. There should be at least a dozen such men investigating conditions in the various mines

throughout the United States, especially after explosions and other disasters.

There is, moreover, urgent demand from Kentucky, from Illinois, from New Mexico, Utah, and elsewhere for the establishment by the Government of cooperative substations for mine rescue work and tests of safety lamps, and so forth. The funds available have so far permitted the establishment of only one such rescue station.

If anything is to be done toward training mine owners and miners in the use of artificial breathing helmets with which the wearers can rush into a mine after an explosion or fire, there should be available on this account alone a considerable sum in excess of the $100,000 appropriated this year.

While the results of tests of explosives are important as bearing upon their safety, it is equally important that there shall be mining engineers skilled in conducting rescue operations and equipped with the necessary paraphernalia available within a few hours' call of each of the dangerous coal-mining operations of the country.

In the work being done at Pittsburg in the laboratory in the very heart of my district, I believe there is more economy, more intelligence, and more diligence being displayed than ever characterized any new undertaking by the Government.

The proximity of the plant to the great mines of western Pennsylvania has proven of infinite value to the country during the past year. The full appropriation should be made.

Mr. CHANEY. The amendment of the gentleman from Ohio [Mr. DOUGLAS] makes the section read:

For continuing the investigations as to causes of mine explosions, with a view to increasing safety in mining, to be immediately available, $150,000—

And I am in favor of the amendment increasing this fund $50,000.

Last session $150,000 was appropriated for this purpose, a portion of which had to be used to equip a plant in which tests might be made of explosive gases, and so forth, and wherein relief systems might be tried. A plant has been equipped at Pittsburg, Pa., and was installed there last November with the money appropriated last session. The Geological Survey was fortunate in finding at Pittsburg government buildings, without building new houses, suitable for the purpose. With slight modifications of the buildings found there and some inconsiderable additions thereto the testing plant is comfortably housed and a force of men has been put to work in this service. This plant is equipped with the means and appliances to not only make tests of explosive coal dust, gases, damps, and the like, but also for the testing of effective relief work when disasters come.

At the time of the installation of this plant the Mariana disaster was yet reverberating in the mining world and rendered the interest in this installation most intense. I was at the opening of the enterprise and inspected every part of the establishment, and believe that an important start has been made.

The Geological Survey is now ready to go about the work outlined for this service. I did not go before the committee when the appropriation for this work was considered to advocate an appropriation for the coming year, understanding that the Secretary of the Interior would ask for $150,000 to carry it on, and supposing that the committee would follow his recommendation.

In the hearings, under the head "Continuations of investigations as to causes of mine explosions," Mr. Secretary Garfield said:

I have given this matter personal examination. I have been at Pittsburg, seen the character of the investigations made, and talked with mining men, experts that we have had out there going over the work of the division, and I am confident that it is of the very greatest importance to the mining industry. It is true that these same investigations might be, and in some instances have been, carried on by private enterprise. On the other hand, the field is so great, and the disasters have been so many and so terrible, that there is ample field for the work of federal, state, and private interests.

And recommended $150,000 for this work.

I believe that this sum is needed; and everyone must admit the necessity of money enough to ascertain, at the earliest practicable moment, the causes underlying the dreadful catastrophes which occur with such frequency in coal mining—catastrophes like the one mentioned at Mariana, Pennsylvania.

Director Smith, of the Geological Survey, in his testimony in the hearings before the committee, says:

At least two lives were saved by the use of the apparatus with which our inspectors are equipped; one was at Mariana, the only man who survived the disaster. If this plant had been ready for the study of preventives of mine explosions before that terrible disaster, every life in the Mariana mine might have been saved. The hope we have in this work is to prevent explosions in the future, and this work is destinued, as we believe, to accomplish this result. The Geological Survey is now planning to equip a small coal mine for this experimental work, and to engage and employ such men as will be able from their skill and study of mine conditions to discover the causes of these great disasters. To do this work and to utilize the same to the end in view will require $150,000.

The expenditure of the money appropriated last session is accounted for as follows:

Mine explosions	$20,000
Mine rescue and lighting	10,000
Explosives, tests and analyses	20,000
Building and laboratory fitting	34,000
Materials, supplies, and labor	50,000
Clerical expenses	8,000
General expenses	8,000
Total	150,000

The beginning of this beneficent work is auspicious. We look forward to the time when the coal miner does not have to take his very life into his hands when he swings into the "cage" for a day's work underneath the ground.

With assurance in his heart and his dinner bucket in his hand, he will go through the day in safety and return to his family after an eight-hour day with well-earned wages in his pocket from an honorable avocation and in complete health and strength.

When $190,000 was asked for this purpose last session, the Appropriations Committee said, "First install your plant and make ready for your investigations," and thereby cut the appropriation to $150,000. It was implied in the words of the committee that ample funds would be provided when the plant was ready to pursue the work for which it should be installed. So, when only $100,000 was found in the bill before us for this purpose we naturally want to remind the committee of the former understanding, and to ask that sufficient money be provided to carry on efficiently this important work. I trust that the amendment will prevail.

Mr. WILSON of Pennsylvania. Mr. Chairman, I believe this appropriation should be restored to the amount that was in the bill when it passed one year ago. The mining industry, like all other industries, has been going through a period of progress, and it has peculiarly affected the conditions of safety of those engaged in mining. Fifteen years ago there was less than 5 per cent of the coal mined in the United States which was mined by machinery. To-day there is approximately 35 per cent mined by machinery. Fifteen years ago, in 1893, the death rate in the mines of the United States was 2.53 per thousand persons employed. In 1907 the number killed per thousand employed was 4.86.

In my opinion, many of the difficulties that have arisen, that have created the increased dangers in mining, are due to the introduction of machinery. Under the old pick method of producing there was comparatively little dust produced in mining coal. By the introduction of machinery a vast amount of dust is produced, which accumulates on the walls and the roofs and the floors of the mines, and which is taken up in the air current, and whenever it comes in contact with a prolonged flame, such as is caused by blasting with black powder, an explosion is inevitable. One of the things which we have to determine, and which we have not yet been able to determine, is how to handle the conditions arising from the increased amount of dust created in our mines by the introduction of machinery—how to deal with the dust. We have practically been able to solve the problem of how to deal with fire damp, carbureted hydrogen, when it occurs in mines, particularly in newly developed mines.

But there is one phase of even that question that we have not been able to solve. When the coal has been worked out from under the body of the land and the roof breaks down and cracks all over the territory and fills to some extent the space that it falls into, the difficulty is to find a means of ventilation that will take the gas out of that waste territory and remove it out of the mines, so that it will not be dangerous to those employed there. The accumulation of fire damp in these wastes is the result of our inability to devise some method by which it can be taken out, and is continually a menace to those employed in the mines, and whenever there is a falling barometer, by which the air pressure against the edges of that waste space is reduced, then the gas comes out from it into the air current and is taken into where the men are at work, and again an explosion occurs. Now, the determination of a problem of that kind is one of the things that our Government ought to undertake for us. It is true that a great deal of laboratory work has already been undertaken and accomplished.

Examination of safety lamps, matters of that kind, examination of the composition and combustion of gases, examination of the nature of explosives and their effect upon gases and their effect upon dust; but as to tests and experiments of a practical nature, that never has been done and no apparatus has been provided by which practical tests can be made to deter-

mine how we are going to avoid the accidents in mines by which lives are destroyed and by which property is also destroyed which we ought to conserve.

The nature and composition of coal varies in different localities and different coal measures throughout the country. Anthracite coal having a high percentage of fixed carbon and a low percentage of volatile matter, the dust created by it is not as easily ignited and not as susceptible to explosive influences as the dust produced from other coals. The bituminous and semibituminous coals have a higher percentage of volatile matter, and even these coals vary widely in the volatility of the matter they contain, so that it frequently occurs that dust from coal having less volatile matter than another coal is more explosive because of the greater volatility of the matter which it contains.

Electricity for coal-cutting and coal-hauling machinery has been introduced into the mines extensively in recent years. As I have already stated, coal-cutting machinery produces an enormous amount of dust, and the two combined create a serious problem that undoubtedly will require a great amount of patient investigation to solve.

It is not likely that investigations of that character can be satisfactorily determined in the laboratory. What is needed is a small coal mine, or an artificial one, for experimenting with problems of this character, and I am fully convinced that the sooner an equipment of that kind is furnished the sooner we will get practical results.

Investigation into this phase of mining would be of immense benefit in protecting lives and conserving the natural resources of the mining industry. The $100,000 proposed to be appropriated by this bill is not sufficient to conduct the investigations which are absolutely necessary. One year ago the estimate made by the Interior Department asked for $195,000 to furnish the necessary equipment to proceed with this work, but the appropriation was cut down to one hundred and fifty thousand, and as a result the department has not been able to provide the equipment necessary for a complete investigation of this subject.

Even with the proportionately small amount invested in equipment the amount appropriated last year was not sufficient to carry out the experiments and investigations through the current fiscal year. That fact is recognized by the committee itself when it adds that the proposed appropriation is to be made immediately available.

With an appropriation of $100,000 to be immediately available it is to be assumed that at least one-fourth of the appropriation will be exhausted when the fiscal year commences, leaving $75,000 available during the coming fiscal year for the accomplishment of results for which an appropriation of $150,000 has been found insufficient.

The work of investigating the causes of disasters in mines in order that a remedy may be devised has not been more than started, and, in my opinion, it would be a wanton waste of lives of the future workers and an indefensible destruction of the fuel supply of coming generations to cripple these investigations at the very outstart by a failure to make the necessary appropriation to continue the work as it should be.

I desire to submit the following letter and memorandum received from the chief engineer of the Geological Survey in response to an inquiry from me for information concerning what had been done and what was being contemplated in the matter of these investigations:

DEPARTMENT OF THE INTERIOR,
UNITED STATES GEOLOGICAL SURVEY,
Washington, February 20, 1909.

Hon. WILLIAM B. WILSON,
House of Representatives.

DEAR SIR: The following information is furnished in response to your request to the director of this survey:

Amendment to sundry civil bill, page 117, line 2, after "one hundred" add "and fifty."

Last year Congress appropriated $150,000 for investigating mine accidents with a view to ascertaining their cause and possibly preventing the loss of life in the hazardous occupation of mining coal.

The estimate submitted to the Appropriations Committee this year carried an equal sum. The committee has reported $50,000 less than the estimates, and less than was appropriated last year. It has been said that at least this sum has been expended in procuring and equipping apparatus for the station in Pittsburg, and that the appropriation of $100,000 should be sufficient for the conduct of this work for the next year.

On the contrary, the estimates submitted of $150,000 are barely adequate for the work in hand. Last year the appropriation was not sufficient to establish substations for rescue work or to put a force of trained men in the field. The appropriation was only sufficient to establish the equipment at the Pittsburg station and to carry on the work there of standardizing the apparatus, and the beginning of testing explosives, safety lamps, and life-saving apparatus. Nevertheless, the mining engineers at the station responded promptly to all calls for help as soon as the apparatus had been received at the station.

The inclosed memorandum, page 5, shows the number of persons killed in mines per thousand employed from 1893 to 1907.

On pages 9 and 10 are listed the explosions which have occurred in the neighborhood of Pittsburg since the mine rescue apparatus has been available, and briefly outlines the work done by the employees of the Geological Survey toward rescuing miners, subduing fires, and opening up the mines after such disasters.

In addition to these lists there have recently been visited a second time the Zeigler mine, at Zeigler, Ill., and the Dering mine, at Benton, Ill.

Very truly, yours, H. M. WILSON, *Chief Engineer.*

Memorandum.

MINE ACCIDENTS DIVISION—RESULTS SOUGHT.

The testing of explosives purchased by the Government (other than for military purposes) to determine whether or not they may be accepted as complying with specifications; the establishment of a list of permissible explosives as safe for use in coal mines containing explosive mixtures of gas and dust; the determination of the condition surrounding gas and dust explosions in mines, etc.

The standardization of a system of reporting and classifying mine accidents.

The investigation of the probable causes of mine explosions as derived from careful examination in the mines both before and after such disasters.

The examination of safety lamps in use to determine their accuracy in testing the presence of gas and its percentage; also the testing of the efficiency of safety lamps to determine their relative safety in the presence of explosive mixtures of gas and air.

The demonstration and test of the efficiency, safety, and methods of use of mine rescue apparatus; instruction of miners and state inspectors in the use of rescue apparatus, and the organization of rescue operations at mine disasters.

Investigation and test as to the effect of electricity, electrical machinery, and electrical lighting, etc., upon the atmosphere in mines in which dust and inflammable gas are present. Also tests of the efficiency and safety of installation of electric wires and of the safety and efficiency of portable electric lamps for use in gaseous mines.

Investigations of the methods of mining and timbering; of using explosives and coal-cutting machines; and of methods of traction and hoisting to determine the effect of these in producing roof falls and other hoisting or traction accidents, and, in general, the various causes whereby the life of miners is imperiled as a result of the methods of extracting the coal, with a view to ascertaining means whereby these conditions may be made more safe.

RESULTS ACCOMPLISHED.

Tests have been made of the purchases of explosives for the Isthmian Canal Commission; of 110 cases containing over 1,000,000 caps and fuses; of nearly 700 cases containing a half million exploders, of which 21,000 were found to be below the specific requirements and were rejected; of nearly 130,000 cases containing 5,500,000 pounds of dynamite, of which over 200,000 pounds failed to meet the test requirements.

These rejections represent a very large money saving to the Government and the possible saving of life otherwise endangered by the use of defective explosives.

In the beginning of this testing contractors were penalized over $4,000 on account of explosives not being up to the specifications. The moral effect of this penalizing and rejection has been the submission of a much higher grade of explosive and one much more safe to handle, with the consequent saving which this represents to the Government in money and in the protection of life.

The tests of explosives in the presence of gas and dust in the explosives gallery at Pittsburg have demonstrated that a very large percentage of the explosives in use in mining, chiefly black blasting powder, is entirely unsafe when fired in the presence of fire damp or bituminous coal dust.

It has been demonstrated that some of the so-called "safety powders" will invariably cause explosions of gas when subjected to a blown-out shot.

The state mine inspectors from many States have been present at these tests of explosives, while a large number of coal companies have sent their foremen, superintendents, and fire bosses to witness such tests, the moral and educational value of which has already shown excellent results in the greater care now being exercised both in mine inspection and in the use of explosives in coal-mining operations.

Examinations have been made in a number of representative mines in the various coal fields to gather data relative to the character of the lighting and hauling equipment, the roof and methods of timbering, method of extracting coal by machinery, the kind of and method of using explosives. Samples of gas and dust and analyses thereof have been made. Measurements of the relative humidity in the mines, velocity and amount of air furnished for ventilation, and other kindred information of value in connection with the study of the causes of accidents in mines have been made as furnishing information relative to the methods of mining in vogue for reference when explosions or disasters occur in any of the mines visited.

Number of persons killed in coal mines per 1,000 employed in the United States, as compared with the number killed in Great Britain, Belgium, and France.

Year.	United States.	Great Britain.	Belgium.	France.
1893	2.53	1.55	----------	----------
1894	2.48	1.60	----------	----------
1895	2.67	1.49	1.40	----------
1896	2.79	1.48	1.16	----------
1897	2.34	1.34	1.03	----------
1898	2.59	1.28	1.04	----------
1899	2.98	1.26	.97	----------
1900	3.24	1.30	1.05	----------
1901	3.24	1.36	1.16	1.03
1902	3.49	1.24	1.07	.95
1903	3.14	1.27	1.04	.86
1904	3.38	1.24	.93	.89
1905	3.53	1.35	.91	.84
1906	3.40	1.29	.94	----------
1907	4.86	----------	----------	----------

Average death rate in United States for fifteen years is 3.11 for every 1,000 employed. Great Britain's average death rate for fourteen years is 1.36 for every 1,000 employed. Belgium's average death rate for twelve years is 1.06 for every 1,000 employed. France's average death rate for five years is 0.91 for every 1,000 employed.

The practical utility of oxygen helmets in the exploration of coal mines after explosions has been demonstrated, as has the efficiency of these helmets when used in subduing mine fires; the value of certain types of resuscitating apparatus in reviving men apparently dead from inhalation of mine gas has been demonstrated.

Important educational work has been done in demonstrating to mine owners, operators, and inspectors the value of artificial respiratory apparatus in rescue operations after mine disasters.

An extended series of tests of safety lamps on the market has been made, and those less and those most safe in the presence of explosive gas have been definitely ascertained.

Progress has been made in the preliminary investigations of the conditions under which electric currents of various voltage or potential may be safely employed in mine lighting, haulage, hoisting, etc., in the presence of explosive mixtures of gas.

The following is a statement of the tests made during the first half year of these investigations, to January 1, 1909:

Number of mine examinations	34
Analyses of explorers	43
Analyses of powders and dynamites	118
Analyses of gas, coal dust, and similar materials	336
Trauzl block tests	80
Flame tests	75
Explosive tests in presence of gas	262
Explosive tests in presence of dust	125
Explosive tests in presence of gas and dust	151
Humidity and other moisture-dust tests	7
Ballistic pendulum tests of explosives	118
Impact or shock tests of explosives	28
Lamp gallery tests of safe and unsafe lamps	100
Pressure-gauge tests	60
Miscellaneous tests	50
Total examinations, tests, and analyses	1,587

EQUIPMENT.

The mine-accidents investigations are housed in substantial brick buildings formerly occupied by the Quartermaster's Department of the Army at the old arsenal grounds, Pittsburg, Pa.

The technologic branch of the Geological Survey has expended in remodeling these buildings to uses of the mine-accidents investigations the sum of about $35,000, and in apparatus and equipment for testing nearly $40,000, representing a total investment in this work of nearly $75,000.

The investigations and tests of explosives are housed chiefly in building No. 17, which is a substantial stone, cement, and steel fireproof structure of about 50 feet by 50 feet.

On the first floor of this building are two Bischel pressure gauges for determining force generated by an explosive discharged under confinement, value $2,500.

An apparatus for testing the length and duration of flame of explosives, with cannon for discharge of same, and photographic equipment and dark room, value $1,200.

A calorimeter for determining the heat generated by various explosives, value $450.

Apparatus for determining the rate of detonation of explosives, $700.

Ballistic pendulum tests to determine power produced by detonation of various explosives, $500.

Cannon for use in tests in the explosives gallery, flame apparatus, ballistic pendulum, etc., $1,800.

Trauzl lead molds and small lead test to determine force and rate of detonation of explosives, $300.

Impact apparatus for test of susceptibility of explosives to shock in handling, $400.

Gallery for test of safety lamps in the presence of various mixtures of gas and air, $2,500.

Gallery No. 1, for test of the explosive effect of various powders when discharged in the presence of mixtures of gas, coal dust, and air, $4,500.

Magazines for storage of explosives, value $500.

Chemical and physical apparatus for grading powders and analysis of explosives used in tests or purchased for use of the Government, $3,000.

Piping, wiring, switchboard, and miscellaneous equipment and apparatus used in installation and operation of tests, $2,500.

Extra parts to imported testing apparatus, $1,000.

Mine rescue helmets and apparatus for use in entering dangerous mines or for rescue work after explosions, value $5,000.

Miscellaneous plumbing, heating, and lighting in explosives laboratories and buildings, electric wiring, steam connections, etc., $10,000.

NEED FOR FUTURE WORK.

The testing of explosives purchased by the Isthmian Canal Commission, Reclamation Service, etc., should be continued without intermission as a protection against possible loss of life, due to handling unsafe explosives, and to protect the Government against the purchase of inferior or dangerous material.

The investigations within mines should be continued in order that the condition and character of the workings in each mine may be definitely known from day to day and from year to year, so that causes of disasters may be more readily and intelligently ascertained.

The establishment of subrescue stations in each of the coal-mining fields should be pushed with vigor so that types and methods of use of the various rescue apparatus may be demonstrated in all of the coal mines, and that the mine owners may be encouraged to provide themselves with such necessary modern adjuncts to the protection of the lives of their miners.

Each of the stations should be equipped for the investigation and testing of the safety lamps in use in the various coal fields. These stations would furnish headquarters for the dissemination of information relative to disasters and for the instruction of miners in rescue operations and for superintendence and organization of such operations.

Investigations and tests into the conditions under which electricity may be safely used in mining should be pushed with vigor along lines already adopted.

Mine fires and explosions in which the use of rescue and artificial breathing apparatus has been demonstrated since July, 1908.

Name of mine.	State.	Remarks.
Star Junction	Pennsylvania	A fierce mine fire was sealed within fireproof walls; men overcome with gases were revived. Draeger apparatus used.
Hazel	do	A mine fire threatening the destruction of the mine was successfully subdued, using the Draeger apparatus, by applying water; 1 mine official badly overcome by the gases was revived.
Rend City	Illinois	The Draeger rescue apparatus was used effectively in the exploration of the mine after an explosion which killed 4 men and which set on fire a part of the mine.
Zeigler	do	The Draeger apparatus was used effectively by the station's trained men in opening up the shaft mine which was on fire. Samples of mine air were obtained and analyzed on the ground. A severe practical test was made of the apparatus in descending a deep shaft mine full of deadly poisonous gases.
Benton	do	Resuscitating apparatus was used in reviving a man who had been overcome in a mine explosion and who apparently was beyond recovery when taken out of the mine.
Victoria	West Virginia	This mine had been on fire for 6 weeks, and to attempt to open it by ordinary methods would have endangered the lives of the workmen. With the apparatus the mine was successfully opened, and the workmen experienced no ill effects.
Marianna	Pennsylvania	After the mine had exploded the Draeger apparatus was hurried to the scene and was on the ground before entrance had been effected to the mine. With the apparatus the entire mine was explored and several fires extinguished. The only living man was rescued from the mine by work effected through the use of the rescue apparatus.
Lick Branch	West Virginia	The Draeger apparatus was exhibited at this mine, it having arrived too late to be of service in the rescue of persons killed by an explosion within the mine.
Boswell	Pennsylvania	Artificial respiratory apparatus arrived 24 hours after disaster and was used in exploring the mine to determine its safety for workers unprotected with such apparatus.

I quote the following from the Report on the Mineral Resources of the United States for the year 1907, showing the great loss of life incident to mining coal:

In the 21 States and Territories from which returns were received in 1906 the total number of men killed was 2,092, while 4,800 men were injured. In the 18 States and Territories from which reports were received in 1907 there were 3,125 men killed and 5,316 injured. The death rate per 1,000 employees increased from 3.31 in 1906 to 4.86 in 1907, and the number of tons mined for each life lost decreased from 194,950 to 145,471. The State in which the lowest record in the death rate per 1,000 was made, in 1907, was Missouri, whose rate per thousand employees was 0.95, and there were 499,742 tons mined for each life lost. Michigan was second on the roll of honor as far as the death rate per thousand was concerned, and Kentucky was second in the number of tons mined for each life lost. The death rate in Michigan was 1.76 men killed per thousand employees. In Kentucky the death rate was 1.89, while Kentucky mined 336,035 tons for each life lost, and Michigan 290,837 tons. Arkansas reported a death rate of 1.97 in 1907, with 133,522 tons mined for each life lost, while Utah, with a death rate of 2.72, mined 324,601 tons for each life lost. West Virginia reported the largest death rate in 1907—12.35 per thousand, and the lowest production for each life lost, 65,969. New Mexico was second in this regard, with a death rate of 11.45 and 77,322 tons for each life lost. Alabama was third, with a death rate of 7.2 per thousand and 92,535 tons for each life lost.

Fatal and nonfatal accidents in coal mines of the United States in 1907, by States and Territories.

State or Territory.	Number of men killed.	Number of men injured.	Death rate per 1,000 employees.	Number of tons mined for each life lost.

[a] Six months only.

These statistics demonstrate conclusively the necessity for investigations of this character being pushed with vigor. The appropriation proposed is entirely inadequate, and I sincerely hope that the House will agree to the amendment offered by the gentleman from Ohio [Mr. DOUGLAS], increasing the appropriation to $150,000.

The men who go into our mines to work are compelled by the force of circumstances, in order to procure a livelihood for themselves and families, to take the chances incident to an extremely dangerous occupation. The fuel which they produce generates the motive power that has made our modern civilization possible.

The glow of the furnace and the hum of the mill are but slight tributes to the hard work, patient endurance, skillful application, and unsurpassed courage of the coal miner. When we see the locomotive plodding up the hillsides or rushing through the valleys, carrying with it its magnificent palaces for passengers and its mighty burdens of freight, eliminating time and reducing space as if by the magic wand of a Merlin, so that the products of any part of our country, however perishable they may be, can be secured untarnished by the taint of time in other parts of the land; that brings the balmy breezes of the South and the invigorating atmosphere of the North within a few hours' travel of each other, and makes the Plymouth Rock a near-by neighbor to the Golden Gate; when we look with pride upon the floating palace, like a great sea bird of grace and beauty, skimming across the seas, laden with its mountains of commerce and its myriads of men; when you sit cozily by your fireside at night, in the pleasure of your happy home, building castles in the air as you gaze into the embers of the hearth, remember that all these things are made possible by the hard work and self-sacrifice of the men who dig coal.

Surely we can afford to make a paltry appropriation of $150,000 out of the billion dollars we annually expend in an effort to find some way by which the lives of these men can be made more comfortable and more safe. [Applause.]

Mr. CAMPBELL. Mr. Chairman, I am one of those who took an interest in securing a sufficient appropriation to establish the testing station a year ago. I am sorry the appropriation for continuing the investigations this year is not the axact amount that was asked for by those in charge of that experimental station. This Government has never undertaken a work of this kind of greater importance than finding the causes of mine explosions that occur in the mines of this country. The death rate from mine accidents, as has been just stated by the gentleman from Pennsylvania [Mr. WILSON], is growing, and is simply appalling. There is some cause for this that ought to be within the power of scientists to discover, and the question of $50,000 or $100,000 ought not to stand in the way when a problem of so great importance is at stake. I have been told by members of the Committee on Appropriations that it is impossible to expend more than $100,000 judiciously and to the purpose. If this is true, the committee is justified in limiting the amount to $100,000, but I feel sure that if a sufficient amount of money were appropriated that more men could be employed, and that their work could be extended into all the mining districts throughout the country. It would not be necessary then to confine the experiments within any State.

Mr. TAWNEY. Will the gentleman permit an interruption there?

Mr. CAMPBELL. Yes.

Mr. TAWNEY. Does the gentleman think that the value of the results of these investigative tests depends upon the number of men engaged in making the investigations, or does not the value of these results depend more upon the character and ability of the men who are employed to make them?

Mr. CAMPBELL. True; but the character and the ability of all the men employed ought to be of the very highest grade——

Mr. TAWNEY. That is true.

Mr. CAMPBELL. And a sufficient number employed in experimenting in different fields, in different lines, ought to be able to discover the causes of these explosions. The experiments that are now going on are confined to Pittsburg, Pa.——

Mr. TAWNEY. Oh, no.

Mr. CAMPBELL. There are——

Mr. TAWNEY. Oh, no; it covers the entire United States.

Mr. CAMPBELL. Well, I happen to live in the center of one of the largest coal fields in the country, and I have heard absolutely nothing of any work being done there.

Mr. TAWNEY. That may be, that the gentleman has not heard of it. It may be they are not in Kansas, but I do say they are covering the entire coal fields of the United States for the purpose of ascertaining the conditions in all these different lines, and then the tests are made at Pittsburg.

Mr. CAMPBELL. It may be that the tests that are being made at Pittsburg will be valuable in Kansas and in Oklahoma and in Iowa and in other States, but the conditions differ in all these coal fields.

Mr. COOPER of Pennsylvania. I call the gentleman's attention to the fact they send all over the United States and investigate the mines of almost every State and Territory.

Mr. GAINES of Tennessee. Will the gentleman yield for a question?

Mr. CAMPBELL. I have only a limited time.

Mr. GAINES of Tennessee. Have they experimented in the coal mines on the public lands?

Mr. CAMPBELL. I have not had any information on that subject, but am informed that they have.

Mr. GAINES of Tennessee. There they have complete jurisdiction, the gentleman knows.

Mr. CAMPBELL. What I contend is this, that the experiments ought not to be limited to a few men, and that there ought to be enough men at work upon different views, upon different lines, in different fields to make discoveries of the causes of accidents in mines.

The CHAIRMAN. The time of the gentleman has expired.

Mr. McHENRY. Mr. Chairman, some day the people who do things—those who produce the wealth of the country, like the farmer and the miner—will demand of Congress that their interests shall be given more consideration from the vast appropriations made by Congress than heretofore has been the custom. Especially is this true of the mining industry. When we think of the wonderful wealth production of the mining industry of this country and that our National Government has never yet given this industry direct recognition until the last Congress, the palpable neglect of our Government in this connection is strikingly apparent. And when we see the annual figures showing a higher rate of mortality among our miners, as compared with the mine operators of Europe, it can only be described as a crying shame upon the part of our Government. The records show an average of 10 deaths by accident in American coal mines every day.

While we are discussing this measure there is somewhere in the coal mines of this great country at least 10 men with mangled bodies and their lives crushed out. To-morrow there will be 10 more, and the next day 10 more, and so it goes on without interruption. As to the cause of these accidents experts differ. That they grow more frequent during winter months is a well-known fact. This greater frequency of accidents during a season of the year when the walls are dry is attributed by experts to a greater amount of dust. While a mine may be worked for years and every chamber familiarly known to every workingman and provided with every modern equipment, yet the next blast or stroke of the pick may uncover an unknown gas and make the mine dangerous or bring about an accident before the new danger is discovered.

The very least the National Government should do is to maintain a bureau of mines and supply it with sufficient means to carry on scientific investigations. The appropriation for which we are now asking is only $150,000. Yet, in spite of this small amount, as compared with the aggregate of our total appropriations, and considering the vast importance of the mining industry toward the development and prosperity of our country, we find Republican leaders fighting this measure, forgetful of the fact that but a few months ago, through their platform and in the columns of the press, they were begging for the miners' votes and assuring them of their undying support. If this amendment passes, it will be by a unanimous vote on this side of the House, with the help of those few on the opposite side of the Chamber who do not always respond to the party whip.

But, Mr. Chairman, even with this little appropriation, our duty toward the mine workers of America is by no means fulfilled. Last winter I had the honor to present a bill providing for the levying of a tax of 1 cent per ton on all coal mined in the United States for the alleviation of suffering of the injured miners and their families. In spite of all precautions we can use and scientific equipment we can apply to modern mining, accidents will continue to occur; less frequently, perhaps, than in former years, but it is a most hazardous calling and our mines will never be free from accidents even under the most favorable conditions.

I attended the recent Mine Owners' Convention held at Pittsburg, and while there inspected the government experimental station. No one can visit that station and witness the scientific tests and experiments being worked out and fail to be impressed with the very righteousness of such a work, to say nothing of its economic value. It seemed to be the hand of fate that just on the eve of the Pittsburg convention the country should be horrified by the terrible disaster which occurred at Marianna, Pa., killing 147 miners. I offered a resolution there asking these mine owners to go on record as advocating this humanitarian and economic principle of protecting the widows and children of helpless miners who have been killed in accident by levying a tax not exceeding 1½ cents per ton on anthracite coal and three-fourths of a cent per ton on bituminous coal. This resolution was referred to a committee, and, like most legislation resolutions which has to do with the men who toil, it dies in the committee.

It has been argued that a tax of this kind was a function exclusively for the State and not one for the National Government. I have been waiting and indulging the hope that the grand old State of Pennsylvania, which I have the honor to represent, would set the example to other States and enact such a law during its present session of the legislature. I am told that such a measure is now under consideration, and I simply desire at this time to again call the attention of Congress and the country at large to this plain duty which we owe to our people.

When the miner leaves his home in the morning and goes down into the bowels of the earth to dig out the coal which keeps our firesides warm and furnishes the power to move the wheels of our mills, railroads, and factories, he takes his life in his hands and knows not when he will return. The fact that the majority of mine workers are foreigners is all the greater reason why we should give them our protection while pursuing this hazardous employment. They trust to our laws and to our judgment, and when we compare the mine mortality statements of Europe with America, it is frightfully plain that we have not proven faithful to our trust and are trifling with the miners' lives in a reckless manner.

Why is it, Mr. Chairman, when the miner or the farmer or the workingman lays his plea before Congress for the betterment of his condition that his prayers are pushed aside unheeded? But upon the other hand, if a great railroad or a mine or timber owner or trust magnate wants special legislation, the lobby machinery is all set in harmonious motion and, usually, they get what they want.

I did not expect to speak on this subject to-day, and I do not care to take up the time of the committee any further than to voice my approval of this appropriation and to express the hope that it will pass.

But last week I received notice of a petition from Marianna soliciting collections for the widows and children of the victims of that terrible disaster. The mine owners in their convention at Pittsburg were content with a mere resolution of condolence, and it is a matter of record to the shame of those men, representing untold millions of wealth, that they should so far forget the cry of the widow and the orphans as to neglect to give them material assistance.

But these people should not be objects of charity. Let there be a national law providing for their welfare from our vast national wealth. A word from these mine owners to the Members of Congress and state legislators would bring about more favorable conditions, and as long as Congress and the state legislatures of the coal-mining States are controlled by these "divine-right" coal and railroad interests the cry of the widows and children of Marianna and other similar calamities will go unheeded.

We have been busy here spending a billion dollars of the people's money at this session of Congress, while out of this amount the committee has appropriated $100,000 for the Mining Bureau. An amendment is now offered asking an increase of $50,000 to carry on the work of this bureau. We spend days here over the most trivial things, and now when a matter is brought before the House for consideration with reference to the great mining industry of the country but thirty minutes' time can be allowed for its consideration. We are asked to give money for foreign missionaries; we are asked to give large sums for various expositions and commissions; and yet when a measure comes before the House for the conservation of the properties and lives of our mines and mine workers, must it be said that we were without heart or conscience or intelligence?

The National Bureau of Mines can collect data and devise means of economical mining, can prevent wasteful methods in mining, and eventually will discover how to increase the number of heat units per ton of coal; and in addition to all this, if the lives of a few miners can be saved the money will have been well expended.

It is urged by speakers on the opposite side that this is purely a matter of sentiment. It is needless to argue that statement in reply. I hope, Mr. Chairman, that in this mad money mania which has overtaken the American people that the minds and hearts of legislators may not become so hardened as not to heed the cry of the helpless.

So far as I am personally concerned, and while I have the honor to represent my people in this great legislative body, I shall be guided in all things by the Constitution and my own conscience; and should these at any time seem to conflict, I shall be guided by that degree of conscience which responds to the best thought of the people whom I represent. I shall vote for this amendment and sincerely hope it will pass. [Loud applause.]

Mr. TAWNEY. Mr. Chairman, I realize very fully that when there is an opportunity for Members of this House to appeal to sentiment in the interest of increasing an appropria-

tion it is almost impossible to prevent such increase. But I think as Representatives it is our duty to look at questions of this kind from a practical standpoint. There is no man who sympathizes more than I do with the unfortunate people who are exposed to these dangers. I said a year ago, when I proposed the appropriation of $150,000 instead of $190,000, which had been estimated, that I was in full sympathy with the proposition of establishing or authorizing these investigative scientific tests for the purpose of determining, if possible, the causes of mine accidents. What I did oppose in the last session of Congress was the establishment of a bureau that would take over, or attempt to take over, the control and the management of the mining industry of this country.

Now, Mr. Chairman, I am as much in favor of these scientific investigative tests as any man on this floor, but I am satisfied that no man on this floor who has spoken in favor of increasing this appropriation has been induced to do so from any other motive than that of his sympathy with the people who are exposed to these dangers, and because also the department estimated that it could expend $150,000 in these tests.

Why, the gentleman from Kansas [Mr. CAMPBELL] imagines that in order to make this service effective and reduce the death rate occasioned by accidents in mines we ought to appropriate an endless amount of money for the employment of all the scientists of the world, to put a corps of them in every mine in the United States. I call attention to the fact, Mr. Chairman, in support of the recommendation of the committee, that a year ago, for one full fiscal year and three months in another fiscal year, the department estimated that they would need $190,000. They were finally induced to accept $150,000, and out of that $150,000 they estimated that they would require for personal services $80,000. The balance of that $150,000 was to be expended in obtaining an equipment for the purpose of carrying on these investigative tests. Now, they have bought the equipment. The detailed statement of the expenditure of money for this fiscal year contained in the hearing shows that they have expended over $20,000 of the $150,000 for particular lines of equipment.

Now, Mr. Chairman, in view of the fact that this particular service is equipped with the necessary mechanical appliances, with the necessary buildings, with the necessary apparatus to continue the scientific investigative tests as to the causes of mine explosions during the next fiscal year, I submit that we ought not to appropriate money simply upon the ground of sentiment, regardless as to the amount actually necessary for the purpose of carrying on an efficient test into the cause of these mine explosions.

I yield to the gentleman from Ohio [Mr. DOUGLAS].

The CHAIRMAN. The time of the gentleman has expired.

Mr. TAWNEY. I trust, therefore, the amendment will not prevail, for $100,000 is all they can spend.

Mr. DOUGLAS. I ask unanimous consent that the gentleman may have two minutes more in which to answer the question.

Mr. MANN. I object.

Mr. CHANEY. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD on this question.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. STANLEY. Mr. Chairman, I make the same request.

Mr. GAINES of Tennessee. Mr. Chairman, I ask unanimous consent that all gentlemen who have spoken on this question be allowed to extend their remarks in the RECORD.

The CHAIRMAN. That can not be done in Committee of the Whole.

Mr. GAINES of Tennessee. It is done.

Mr. TAWNEY. It is not done.

Mr. GAINES of Tennessee. I say it is done.

Mr. TAWNEY. Any gentleman can get his remarks extended, but you can not get general leave to print.

Mr. GAINES of Tennessee. I am asking that that very thing be allowed, and I know I am right, and it is the practice here daily.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. BURKE] makes the same request. The Chair hears no objection.

Mr. STURGISS. I make the same request.

The CHAIRMAN. The Chair hears no objection.

Mr. COOPER of Pennsylvania. I make the same request.

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio.

The question was taken, and the Chairman announced that the ayes appeared to have it.

Mr. TAWNEY. Division, Mr. Chairman.

The committee divided; and there were—ayes 68, noes 21.

Mr. TAWNEY. I ask for tellers, Mr. Chairman.

The question was taken on ordering tellers.

The CHAIRMAN. Seventeen gentlemen have arisen; not a sufficient number; tellers are refused; the ayes have it, and the amendment is agreed to.

Mr. COOPER of Pennsylvania. I call attention to the fact that there will have to be a change made in the totals.

The CHAIRMAN. Without objection, the totals will be corrected.

Mr. TAWNEY. I ask unanimous consent to change the totals in the paragraph.

The CHAIRMAN. Without objection, the totals will be changed.

The Clerk read as follows:

Traveling and miscellaneous expenses: For traveling and other miscellaneous and emergency expenses authorized and approved by the Attorney-General, to be expended at his discretion, the provisions of the first paragraph of section 3648, Revised Statutes, to the contrary notwithstanding, $8,500.

Mr. GAINES of Tennessee. I would like to ask the chairman of the committee what significance attaches to these words, "to the contrary notwithstanding," on page 180, line 18?—

The provisions of the first paragraph of section 3648, Revised Statutes, to the contrary notwithstanding.

Mr. TAWNEY. The statute forbids the advances of any money and this is to allow the advances the statutes say shall not be made, and says "to the contrary notwithstanding."

Mr. GAINES of Tennessee. In other words, you override the statutes?

The Clerk read as follows:

Defense of suits before Spanish Treaty Claims Commission: For salaries and expenses in defense of claims before the Spanish Treaty Claims Commission, including salaries of assistant attorneys and necessary employees in Washington, D. C., or elsewhere, to be selected and their compensation fixed by the Attorney-General, to be expended under his direction, so much of the provisions of the act of March 2, 1901, providing for the Spanish Treaty Claims Commission, as are in conflict herewith notwithstanding, $60,000, of which not exceeding $200 may be expended for law books and books of reference.

Mr. MANN. Mr. Chairman, I move to strike out the last word. I would like to ask a little about this ancient history. My recollection is that a few years ago we passed a provision in this bill requiring the Spanish Claims Commission to be wound up several years ago. I may be mistaken. It may have been merely idle talk. What are the prospects of the business of that commission being wound up now?

Mr. SMITH of Iowa. There were some efforts made to close up that commission, and I have great pleasure in informing the gentleman that while heretofore this appropriation has run from $75,000 to $112,000 a year and there has been an amount appropriated for taking testimony in foreign lands—in Spain and Cuba—no appropriation is asked to take testimony abroad this year, and the estimates for attorneys' fees is reduced to $60,000. The reason for that is that the 1st day of next July will see the taking of the testimony in all the cases substantially completed.

Mr. MANN. Does not this cover the salaries of the commissioners, too?

Mr. SMITH of Iowa. No; this is for the attorneys who are to defend the cases. If these attorneys were dropped that would stop the trying of the cases in the court, but the court has a permanent appropriation.

Mr. MANN. The court has a permanent appropriation?

Mr. SMITH of Iowa. Yes, sir.

Mr. MANN. But the gentleman put in an amendment some years ago with reference to the taking of the testimony which the gentleman then thought would cause the dismissal of a large number of cases. May I ask what has been the result of that provision?

Mr. SMITH of Iowa. The statute has been highly beneficial and has resulted in good, in my judgment, although it is a new illustration of the adage, "You may write the law if I construe it." This Spanish Claims Commission proceeded to so construe the law as in a measure to destroy it.

Mr. MANN. In other words—well, I will not say what I was going to say.

Mr. CAMPBELL. I will—a nice, easy snap.

Mr. MANN. Is there any prospect in sight of the work of this Spanish Claims Commission being completed even in a reasonable time?

Mr. SMITH of Iowa. I shall be a great deal surprised and grossly deceived if it is not absolutely through in the main in the ensuing fiscal year.

Mr. MANN. The gentleman talks very much like the gentleman who first proposed it in the beginning of my service.

Mr. PERKINS. Does the gentleman honestly believe that

the work of the commission will be completed until we cease to make an appropriation?

Mr. SMITH of Iowa. The work is very nearly practically completed. The testimony has nearly all been taken in Cuba and Spain, and under the permanent appropriation carried in the organic act there is little testimony now to be taken. But they evidenced their good faith in saying that the evidence will substantially be completed by the next 1st of July, and have asked for no appropriation for the taking of testimony for the ensuing fiscal year.

Mr. PERKINS. When are they going to make their decisions?

Mr. SMITH of Iowa. But after the testimony is taken these cases have to be argued, and the Government has to pay its counsel for arguing them. This appropriation, about half of what was formerly appropriated per annum, is to carry the compensation of counsel for the Government during about half of the next fiscal year. I have no question that every particle of this business will be wound up by a year from July 1, and I shall be greatly deceived and misled if that is not true.

Mr. MANN. Will the gentleman yield for a question?

Mr. SMITH of Iowa. Certainly.

Mr. MANN. This commission at one time performed a great service for the country, in my opinion, by rendering an opinion which required some nerve as well as judicial knowledge, and which opinion has been bitterly assaulted by the claim attorneys and the claim agents and the claimants. Is that opinion still standing?

Mr. SMITH of Iowa. That opinion is still standing and is still followed.

Mr. MANN. Then I am willing to vote something further to the support of this commission.

Mr. SMITH of Iowa. Judge DIEKEMA, a former member of the commission, is here now and can make a statement about it.

Mr. DIEKEMA. Mr. Chairman, I can easily understand why a misunderstanding should have arisen in this House as to the time necessarily taken by this commission. In the first place, there was no adequate provision made by Congress for taking the testimony outside of this country. This omission was supplied by a subsequent Congress. Again, nearly all the testimony had to be taken outside of this country. Practically all of the testimony for the Government was either in Cuba or in Spain. The relations between Spain and this Government at that time were very much strained. The commission tried to get some working arrangement with Spain, because the documents were in Spain. It was easy enough for a man in Cuba to testify that a certain Spanish captain, colonel, or general did come on a certain day and loot his farm; but the records of the War Department which our Government needed in defense were in Spain. Spain refused absolutely at first to give us any inspection of her war records.

She refused to let any of her officers testify unless the commission would first agree that they would believe every word that those officers testified to; and it then became necessary, through the good offices of the Secretary of State, to get a working arrangement with Spain, and in accordance with the good old Spanish proverb, which, translated into English is, "Never do to-day what you can put off until to-morrow," it took us three years, in spite of the earnest efforts of a brilliant Secretary of State, to get any working arrangement with Spain. After Spain gave her consent I have this to say, that she lived up to it nobly and gave us every assistance in the securing of that testimony.

Now, this testimony being abroad as it was, it became necessary and just to the claimants to lay down, as the gentleman from Illinois [Mr. MANN] has well said, certain fundamental principles of law which the commission would adhere to in adjudicating the claims. The announcement of these principles disposed of many cases, and saved both the claimants and the Government large amounts of money. In some cases the testimony fills several volumes of over a thousand pages each.

The commission laid down these principles by which we would be governed, because Congress had said that these claims had to be adjudicated according to the principles of law and equity. The statute provided for regular pleadings as in a court of law. Every one of those principles, although laid down by a majority of only one of the commission, has been strictly adhered to from that day until this, and an average of only about 2 per cent of over $50,000,000 of claims heard by the commission has been allowed under these principles. Yet I believe that every dollar to which claimants were justly entitled under the treaty and statute has been allowed. While the interests of the Government have been zealously guarded, no just and legal claim has, I believe, been turned down.

Where the commission determined, among other things, that the insurrection in Cuba had gone beyond the control of the parent (Spanish) government, and that, consequently, the Government of Spain was entitled to use war measures and was exempt from liability, as in case of war, that moment the claimants came to Congress, and they have come year after year, pressing Congress for a review of these legal principles by the Supreme Court or asking for a change of tribunal; and while in ordinary courts the claimants are constantly clamoring for a speedy hearing of their cases, in this court, on the contrary, the commission was constantly urging the claimants to hurry along their cases and to present them.

Now, this is the situation: Out of over 504 cases presented, only 37 remain undisposed of. Of the more than $60,000,000 of claims, over $50,000,000 have been adjudicated up to the present time. No testimony will be taken, I believe, after July, and I can say this for Mr. J. P. Wood, of Ohio, the distinguished president of the commission, that he remains at the head of it in spite of great financial loss, because he feels a patriotic duty to complete the work with credit to himself and to his country, as well as with justice to the claimants; and what I have said of him applies to his colleagues; and while the other Spanish Claims Commission, that adjudicated the claims growing out of the Ten Years' war, sat for eleven years to determine only 140 cases, involving less than half the amount presented to the present commission, the work of the present commission, which began in 1901, will, I believe, be completed within the year to the entire satisfaction of Congress and the people of the country. [Applause.]

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and Mr. HUFF having taken the chair as Speaker pro tempore, a message from the President of the United States was communicated to the House of Representatives by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had approved and signed bills of the following titles:

On February 25, 1909:

H. R. 10752. An act to complete the military record of Adolphus Erwin Wells;

H. R. 12678. An act for the widening of Twentieth street NW., District of Columbia;

H. R. 16747. An act to amend an act approved March 2, 1907, entitled "An act for the opening of Mills avenue NE. from Rhode Island avenue to Twenty-fourth street;"

H. R. 23473. An act extending the time for final entry of mineral claims within the Shoshone or Wind River Reservation, in Wyoming;

H. R. 23864. An act authorizing the widening and extension of Minnesota avenue SE. from its present terminus near Pennsylvania avenue SE. to the Sheriff road;

H. R. 24152. An act for the widening and extension of Massachusetts avenue SE. from its present terminus near Fortieth street SE. to Bowen road;

H. R. 25139. An act to amend an act entitled "An act to ratify, approve, and confirm an act duly enacted by the legislature of the Territory of Hawaii, to authorize and provide for the construction, maintenance, and operation of a telephone system on the island of Oahu, Territory of Hawaii," approved June 20, 1906;

H. R. 25149. An act to authorize certain changes in the permanent system of highways, District of Columbia;

H. R. 26466. An act to amend an act authorizing the construction of a bridge across the Mississippi River at Burlington, Iowa;

H. R. 26472. An act to provide for the extension of Rittenhouse street, in the District of Columbia, and for other purposes;

H. R. 26482. An act to authorize the construction of two bridges across Rock River, State of Illinois;

H. R. 26829. An act to amend an act entitled "An act to authorize the Fayette Bridge Company to construct a bridge over the Monongahela River, Pennsylvania, from a point in the borough of Brownsville, Fayette County, to a point in the borough of West Brownsville, Washington County," approved April 23, 1906;

H. R. 26838. An act to authorize Behn Brothers, of San Juan, P. R., to construct a bridge across a portion of the Condado Bay, at the eastern extremity of San Juan Island, Porto Rico; and

H. R. 27864. An act granting a right of way over a strip of land along the eastern boundary of the Fort McPherson Military Reservation to the commissioners of Fulton County, Ga., for road purposes.

SUNDRY CIVIL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

Enforcement of antitrust laws: That the balance of the appropriation of $250,000, entitled "Enforcement of antitrust laws, 1909," contained in the sundry civil appropriation act approved May 27, 1908, shall be available during the fiscal year 1910, and an additional appropriation of $100,000 is hereby made for the same purpose.

Mr. BARTLETT of Georgia. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk.

The Clerk read as follows:

Insert at the end of line 23, page 181, the following:

"For the prosecution of the United States Steel Corporation for the violation of the antitrust laws and absorption of the Tennessee Coal and Iron Company, the sum of $50,000, or so much thereof as may be necessary, which prosecution the Attorney-General is directed to institute."

Mr. TAWNEY. I make a point of order against the amendment.

Mr. BARTLETT of Georgia. I want to be heard on the point of order.

Mr. TAWNEY. The Chair has ruled during the consideration of this bill that it is not proper for Congress to appropriate for specific salaries involved in a carrying on of some general purpose, but may appropriate generally in a lump sum. That ruling, in my judgment, applies as forcibly to this proposition as to the one on which the same ruling was made.

Mr. BARTLETT of Georgia. Mr. Chairman, I did not quite understand the gentleman from Minnesota, whether he made the point of order or reserved it.

Mr. TAWNEY. I made the point of order.

Mr. BARTLETT of Georgia. I would like to know what the point of order is.

The CHAIRMAN. The Chair understands the point of order to be that the amendment involves new legislation.

Mr. TAWNEY. Not authorized by law.

Mr. BARTLETT of Georgia. That has just been stated.

Mr. TAWNEY. I stated at the beginning that the same question was raised against it, and the ruling was that it was not within the power of Congress to appropriate specifically for salaries involved in the carrying on of some general purpose.

Mr. MANN. I make the point of order that it changes existing law.

Mr. BARTLETT of Georgia. I make the point of order that all points of order must be made at the same time, and that they can not be made in detail.

Mr. MANN. Oh, yes; you can make what point of order you please.

The CHAIRMAN. The Chair will hear the gentleman from Georgia if he desires.

Mr. BARTLETT of Georgia. Now, Mr. Chairman, this is not in violation of Rule XXI, and I want to call the attention of the Chair to some precedents which have been decided by Chairmen of this House, some of them being Chairman who are yet Members of the House and who have served long years here, notably the gentleman from New York [Mr. PAYNE] and the gentleman from Iowa [Mr. HULL].

We have here a section providing for the enforcement of the antitrust law. Those who were here in December, 1902, are familiar with the history of this section. The section was put upon the legislative, judicial, and executive appropriation bill on the 20th of December, 1902, by an amendment offered by myself, making provision for it; and at that time no gentleman on the other side—although the Appropriation Committee of the House was headed by the present Speaker—had the hardihood or the nerve to make a point of order against it. But election time is a long way off and they can be bolder now than they were then. [Laughter.]

Now, Mr. Chairman, this provision carries an appropriation of $100,000, in addition to the appropriation which has not been used. According to the testimony of the Attorney-General before the committee, they have on hand a balance of $146,426.84 for the present year, and he thinks with $100,000 they can get along with the work that was then anticipated.

We all understand that this greatest of monopolies and corporate combinations in the country has openly violated the antitrust law. We know that it has been stated in the press that this was accomplished by express consent of the Chief Executive. I do not think, if suit was instituted for a violation of the criminal statutes of the United States, the direction of the Executive could be pleaded in bar, nor do I think that any court would for a minute heed such a plea. That is all, Mr. Chairman, I care to say about that, except that something should be done to punish this most flagrant admitted violation of the antitrust law.

Now, with reference to the point of order, I desire to direct the attention of the Chair to cases which I am going to read. It is fair to say, Mr. Chairman, that in looking up these questions it is not denied by the very learned gentleman who compiled the precedents that these are precedents, but it is suggested that they are not precedents which should be now followed, because they have been since modified or overruled; but they are precedents made by Republican chairmen of the Committee of the Whole House on the state of the Union.

The first decision which I intend to read was by the gentleman from New York [Mr. PAYNE], the leader of the Republican side, and the other decision was by Mr. HULL, the chairman of the Committee on Military Affairs, both of which gentlemen have been Members of this House for a great number of years.

I read from the Parliamentary Precedents, section 514:

The Postmaster-General having general authority to transport the mails, an appropriation for a specific method of transportation was held to be a limitation.

Now, we have provided by the act of 1890 for the prosecution of the violators of the antitrust law. We have in the legislative, judicial, and executive appropriation bill directed that the Attorney-General should proceed to prosecute all violators of the antitrust law and of the interstate-commerce law, and we appropriated and have appropriated from year to year, in pursuance of the act of 1890 and in pursuance of the interstate-commerce act and various amendments thereto, various sums of money, $500,000, $250,000, and in this very bill we appropriate so much more for that purpose. The point is made that this appropriation is not provided for by existing law. The existing law requires the prosecution of the violators of the antitrust law. The point, then, is made that it is violative of Rule XXI, section 2, and also because it provides for the prosecution of a specific violation of the antitrust law, and the case I cite to the Chair upon that point is absolutely in point. I read:

The Postmaster-General having general authority to transport the mails, an appropriation for a specific method of transportation was held to be a limitation.

That decision was made on March 18, 1898. I read:

The paragraph having been read,

For transportation of mail by pneumatic tube or other similar devices, by purchase or otherwise, $225,000.

Mr. JOHN A. MOON, of Tennessee, made a point of order that there was no law authorizing such an appropriation.

After debate the Chairman, Mr. SERENO E. PAYNE, of New York, who is now chairman of the Committee on Ways and Means and the floor leader of the Republican party, said:

The Chair understands that the Postmaster-General is given authority generally to transport the mail. If the Chair recollects correctly, a similar point of order was made against a clause in the bill authorizing an appropriation for bicycles.

The Chair is right about the general statute authorizing the Postmaster-General to transport the mail, and the Chair thinks that this limits the appropriation to a particular way of transporting the mail, and that the clause is in order, and the Chair therefore overrules the point of order.

Now, Mr. Chairman, here is one decided by Mr. HULL of Iowa:

An amendment providing that no part of an appropriation for a certain service should be expended for service beyond that for which contracts had already been made was held to be a limitation.

On March 18, 1898, the paragraph under consideration being one making appropriations for the pneumatic-tube service for carrying mails, Mr. WILLIAM P. HEPBURN, of Iowa, proposed this amendment:

"*Provided*, That no part of this appropriation shall be used in extending such pneumatic service beyond the service for which contracts are already entered into."

Mr. MUDD, of Maryland, made a point of order against the amendment.

The Chairman ruled, and the Chairman was Mr. JOHN A. T. HULL, of Iowa:

The Chair will overrule that point of order. This is a limitation simply on what the appropriation is for.

Mr. Chairman, there are other decisions which I might cite, but I do not care to detain the House or the committee at this time. But here is a decision exactly on the point made by the gentleman from Minnesota [Mr. TAWNEY], that it is not a violation of the rule, because it directs that the existing law shall be enforced in a particular way or against a particular offender. Here was a provision for the transmission of the mails through pneumatic tubes, and in a particular way, for which no provision of law had been made other than the provision that the Postmaster-General had authority to transport the mails under a general authority of law. Now, if that was not a violation of the rule, a provision providing for the transmission of mails through pneumatic tubes—and that was upheld as not violative of the rule—how can it be violative of the rule to provide money for the carrying out of the law in the prosecution of a certain-named violator of the law, which violation is open and notorious to the world? That is all I want to say on the point of order.

Mr. MANN. Mr. Chairman, the amendment, I think, is clearly subject to the point of order. The gentleman from Georgia [Mr. BARTLETT], himself one of the best parliamentarians in

this House, would, if anyone else had offered the amendment, have quickly seen that it is subject to a point of order. The gentleman refers for precedents to two cases where amendments were proposed as limitations.

Mr. BARTLETT of Georgia. I would interrupt the gentleman to say that I had the fairness to state to the Chair that upon consulting the authority who compiled these precedents that gentleman had stated that these were bad precedents. I do not think so, but I want to give the Chair the benefit of all my investigations, and that the more recent decisions were contrary.

Mr. MANN. Mr. Chairman, I have always found that the gentleman endeavored to be fair to everybody in discussion or in any other place. Now, the gentleman does not offer his amendment in the form of a limitation as the precedent would have provided. It is not a limitation of the appropriation even in form, and if it were it still would not be a limitation. As a matter of fact, here is a positive direction, an appropriation for a specific purpose, and that of itself constitutes an amendment obnoxious to the rule. It requires the Attorney-General to do something which he may now be authorized to do, but is not required to do.

Mr. BARTLETT of Georgia. Mr. Chairman, I will say that I drew my amendment in the exact language of the authorities to which I referred, except that I added the requirement.

The CHAIRMAN. The Chair is ready to rule. The Chair will call attention to the familiar rule, the second paragraph of Rule XXI, which reads as follows:

No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law, unless in continuation of appropriation for public works and objects as are already in progress; nor shall any provision changing existing law be in order in any general appropriation bill or in any amendment thereto.

The gentleman from Georgia frankly states that the precedents to which he referred have been questioned, if not overruled, in later rulings, but, in any event, the Chair does not think that they rule this case. The Attorney-General of the United States is by law vested with a wide discretion, and may exercise his judgment as to the necessity or propriety of bringing suits or instituting proceedings. This amendment, if enacted into law, would clearly control the discretion which is now vested by law in the Attorney-General by directing him to proceed against a certain specified corporation, although such action may be contrary to his judgment and his discretion, and in that particular at least change existing law. It is therefore obnoxious to the rule. The Chair sustains the point of order.

Mr. BARTLETT of Georgia. Now, Mr. Chairman, I offer the amendment striking out the words "which the Attorney-General is hereby directed to do."

The CHAIRMAN. The gentleman from Georgia offers another amendment, which the Clerk will report.

The Clerk read as follows:

For the prosecution of the United States Steel Corporation for violation of the antitrust law in the absorption of the Tennessee Coal and Iron Company, the sum of $50,000, or so much thereof as may be necessary.

Mr. MANN. Mr. Chairman, I make the point of order against the paragraph. It is absolutely a matter of special legislation. If we put that item in there, you could put in a thousand items for the prosecution of any offense which gentlemen might desire to enumerate. It is absolutely contrary and obnoxious to the rule. We might have a string of amendments here a mile long proposing an expenditure of money for any offense. If the Attorney-General is now authorized by law to make these prosecutions, then he is authorized to do it under his general appropriation; but to make a specific appropriation——

Mr. FITZGERALD. That does not prohibit the House from specifically appropriating for that purpose under the rule.

Mr. MANN. It does prohibit the House, exactly upon the same principle as it decided yesterday, where we make an appropriation for the maintenance of a biological station, and——

Mr. FITZGERALD. There is a very clear distinction.

Mr. HUGHES of New Jersey. If the gentleman will permit, I presume that the gentleman's objection is that the amendment offered is in conflict with the clause of Rule XXI which says that—

No provision changing existing law shall be in order in any general appropriation bill or in any amendment thereto.

If that is so, what existing law does this amendment change?

Mr. MANN. Oh, this is for a purpose not authorized by law. The gentleman did not read the entire rule, and did not quote the balance of it.

Mr. TAWNEY. It takes away the discretion of the Attorney-General, with which the law clothes him.

Mr. MANN. It constitutes a positive direction.

Mr. FITZGERALD. It does not.

Mr. MANN. Oh, yes; it does. Where Congress makes a specific appropriation for a particular purpose it constitutes a positive direction, which you can not put upon an appropriation bill, in my opinion. I do not care whether the steel trust is prosecuted or not——

Mr. FITZGERALD. This does not direct or compel the Attorney-General to do anything, but it puts at his disposal an appropriation to carry out the work which he is authorized to do.

Mr. GAINES of Tennessee. Mr. Chairman, I want to be heard on the point of order for a moment.

The CHAIRMAN. The Chair will hear the gentleman from Tennessee briefly.

Mr. GAINES of Tennessee. The paragraph in the bill being subject to the point of order, but by general consent having been left in the bill, it is subject to a germane amendment. Now, the amendment is perfectly germane and completes and elaborates the meaning of the law that we have just permitted to go into the bill by consent. The point of order was made by the gentleman from Pennsylvania [Mr. BINGHAM] when the gentleman from Georgia [Mr. BARTLETT] in 1902 offered the original $250,000 to execute this law.

Mr. MANN. He may have kindly waived it, but it did not make any difference.

Mr. GAINES of Tennessee. Everybody laid down when the gentleman from Georgia offered that amendment, which came like a clap of thunder.

Again, Mr. Chairman, this is a "continuing work and object." And Mr. Speaker Carlisle considered the words "continuing object" as a more elaborate proposition or additional term than "continuing work." Prosecuting trusts is a "continuing object" or understanding of the Congress and Department of Justice.

Now, Mr. Chairman, I think I read possibly from one of the decisions that the Chair himself made:

The present chairman said he would feel no hesitation in sustaining the point of order, but that the paragraph to which the amendment is offered itself being out of order—

As I have just stated the paragraph in the bill—

Is subject to a point of order, being new legislation—

As I have just stated—

the amendment proposed is germane to the paragraph. "It has been often ruled that a paragraph out of order, having been permitted by unanimous consent to remain in the bill, may be perfected by germane amendments." That is this case. Chairman CRUMPACKER in making a similar ruling said: "The Chair construes this amendment to mean an elaboration of the proposition."

An "elaboration" of the proposed proposition, Mr. Chairman, is what the amendment does.

Mr. Chairman, I refer the Chair, on the question of discretion, to the Cleveland post-office proposition "limestone or granite," where Chairman SHERMAN sustained the point of order, that it controlled the discretion of the department as between granite and limestone. The House overruled the Chairman and held we had a right to control this "discretion" to that extent.

The CHAIRMAN. The Chair is ready to rule. It seems to the Chair that the amendment, if enacted into law in its present form, would have to be construed by the Attorney-General as controlling and limiting the discretion vested in him by the existing law. It therefore changes existing law, which is not permitted upon a general appropriation bill, being expressly prohibited by the second paragraph of Rule XXI. On that point the Chair does not have to go very far back for a precedent. It may be found in the RECORD of February 24, the day before yesterday. An amendment had been offered as follows:

Ambrose Channel, New York: For the purchase of buoys and equipment, $40,000.

A point of order was made by the gentleman from Illinois, the same point that was made here, substantially, and the occupant of the chair at that time made quite an elaborate ruling, from which the Chair quotes now only as follows:

It seems that general appropriations have been held in order, but that specific appropriations for specific purposes, even though coming under the general authorization and following the same line, have been held not in order.

So, following the precedent, the Chair sustains the point of order.

Mr. BARTLETT of Georgia. Then the ruling that the Chair now makes and follows reverses the precedent which I have cited to the Chair; in other words, the Chair does not hold these rulings as being in conformity with the law?

The CHAIRMAN. The Chair finds a distinction between the gentleman's amendment and the amendment involved in the ruling to which he refers. The Chair will state to the gen-

tleman that the post-office precedent which he cited called for the transportation of mail by a pneumatic tube or other similar device. It was general. It did not specify any particular city or any particular place. It simply appropriated for general purposes. This particular amendment which the gentleman offers to-day is for a specific purpose, and in the opinion of the Chair would control the discretion of the Attorney-General, which is not now controlled by law. The ruling cited by the gentleman from Georgia has not been strictly adhered to in later rulings, as the gentleman frankly concedes. But in any event, it does not rule this case.

Mr. HITCHCOCK. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Nebraska [Mr. HITCHCOCK] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 181, line 23, after the word "purposes," insert:
"*Provided*, That not more than $50,000 of said additional $100,000 herein appropriated shall be used for prosecutions under the antitrust laws other than the prosecution of the United States Steel Company and its officers for the violation of said laws by the purchase of the stock of the Tennessee Coal and Iron Company."

Mr. TAWNEY. I make a point of order against that amendment on the same ground.

Mr. HITCHCOCK. Mr. Chairman, I have drawn this amendment so as to avoid the objection under the rules just stated by the Chair. This is not a direction to the Attorney-General to use $50,000 in the prosecution of the steel trust for its illegal merger. It is a limitation on the expenditure of the $100,000, and prohibits the Attorney-General from using more than $50,000 of that $100,000 in any other prosecution except the prosecution of the steel trust. It does not legislate so as to require him to prosecute the steel trust.

Mr. TAWNEY. That is only another way of stating the proposition. I think it is the same proposition in another form.

Mr. HITCHCOCK. Well, Mr. Chairman, I have a right to state it in another form, provided I can state it under the rules of the House; and if it can be done in the form of a limitation and accomplish my object, that is strictly in order. This amendment is strictly a limitation upon the expenditure of that $100,000.

Mr. KEIFER. If the gentleman will allow me to interrupt him?

Mr. HITCHCOCK. Yes.

Mr. KEIFER. I do not know of any precedent of the kind that you state. I think you err in the distinction in this, that when a limitation is put upon an expenditure it is a condition, and without that condition be complied with the money will not be expended at all. But your amendment is a direction as to how it shall be used——

Mr. HITCHCOCK. No, sir.

Mr. KEIFER (continuing). Which makes it a new provision and subject to the point of order.

Mr. HITCHCOCK. This provision does not direct the Attorney-General how he shall expend the $100,000, except it prohibits him from expending more than $50,000 of it for certain other purposes than the prosecution of the steel trust. It does not direct him to expend $50,000 in the prosecution of the steel trust, but prohibits him from expending more than $50,000 for other purposes. I admit this may accomplish indirectly what could not be accomplished by the amendment offered by the gentleman from Georgia; but we have a right under the rules to place these restrictions on administrative officers in the expenditures of appropriations made here.

Mr. SHERLEY. Mr. Chairman, under the existing law it is within the province of the Attorney-General to prosecute any violators of the antitrust law; yet it is also within the province of Congress to give whatever sum of money it sees fit to enable the Attorney-General to carry out that law; and in giving that money it has the right to limit its expenditure. This does not command the Attorney-General to perform his duty in prosecuting the steel trust, but simply authorizes him to use not to exceed $50,000 in other prosecutions. Some years ago an amendment exactly similar to this provision was held in order with reference to the marine hospitals, offered by myself, wherein the amount of money that could be expended by the Secretary of the Treasury in maintenance of marine hospitals was limited by a sum that would have been expended if certain hospitals were not closed.

Mr. FITZGERALD. It would be in order to provide that no part of the fund should be expended by the Attorney-General until he shall have commenced suit against the steel trust. It is in order to provide that he shall not expend more than a certain amount of the appropriation in a specified way. It is in order to provide that money shall not be paid to recipients or beneficiaries of appropriations unless they have certain qualifications. This amendment does not impose any duty on the Attorney-General. If he commence a certain action, it makes the entire amount available; if he does not bring an action of a certain character, it makes available for the purpose set forth in the language of the paragraph only a specified amount. It is clearly a limitation under the rules.

Mr. SHERLEY. Mr. Chairman, I again suggest that this does not give the Attorney-General any wider power than he has now, and does not change the law at all. The Attorney-General now has power to institute proceedings against the steel trust if he sees fit. All that it does is to limit his expenditure in other cases.

The CHAIRMAN. The Chair desires to ask if the gentleman from Minnesota wishes to be heard.

Mr. TAWNEY. I do not know, Mr. Chairman. I think the proposition presented by the gentleman from Nebraska comes identically within the ruling which the Chair announced a few moments ago in ruling upon the amendment offered by the gentleman from Georgia. The gentleman from Nebraska admits that this is the same proposition; that it accomplishes exactly the same result.

Mr. HITCHCOCK. The gentleman is mistaken in that.

Mr. TAWNEY. The gentleman from Nebraska admitted that it accomplishes the same result and was intended to accomplish the same result.

Mr. SHERLEY. Will the gentleman yield?

Mr. TAWNEY. I can not see how a Member of the House can by indirection accomplish that which would not be permitted under the rules to be accomplished by direction.

Mr. SHERLEY. I simply suggest to the gentleman that the Chair must judge by the language and not the motive of the gentleman offering the proviso; and the gentleman knows we do it every day. The gentleman has repeatedly accomplished by a limitation that which he could not do directly.

Mr. TAWNEY. Never when the rule was invoked.

Mr. SHERLEY. The gentleman did it in the case of the canteen. It has been repeatedly done.

Mr. GAINES of Tennessee. And limitations like this are in this bill now.

The CHAIRMAN. The Chair is ready to rule.

The amendments to this paragraph, against which points of order have already been made and sustained, provided additional appropriations for a specific purpose in such language as seemed to the Chair to change existing law by controlling the discretion vested by existing law in the Attorney-General.

The amendment now offered, against which the pending point of order is made, is not entirely in the same order. The paragraph as it now stands in the bill, and to which this amendment is offered, makes available the balance of a former appropriation of $250,000 for the enforcement of the antitrust laws, and declares that "an additional appropriation of $100,000 is hereby made for the same purposes." This amendment does not add to that for any specific purpose, nor for any purpose whatever; on the contrary, it withholds part of that $100,000 by providing that not more than $50,000 of the said additional $100,000 carried in the bill as it now stands shall be used for prosecutions under the antitrust laws other than the prosecution of the United States Steel Company and its officers for alleged violations of that law, and so forth. Now, it seems to the Chair that that does not control the discretion of the Attorney-General.

It does not require him to proceed against the United States Steel Company unless, in his discretion, his duty requires him to do so under existing law. It simply withholds $50,000 for the general purposes covered by the bill as it now stands. It is a limitation upon the $100,000 appropriation made by the bill, a mere withholding of $50,000. It has frequently been held that it is within the power of the House, under the rule, to so limit appropriations. It can appropriate or not appropriate. In this instance the amendment practically says that no more than $50,000 shall be appropriated for the enforcement of the antitrust laws unless the Attorney-General shall find it his duty to use it in the manner indicated in the amendment. But there is no attempt to define or declare his duty in that regard. The Chair is unable to hold that it changes existing law and therefore overrules the point of order.

Mr. TAWNEY. I ask that the amendment be reported.

The CHAIRMAN. Without objection, the amendment will be again reported.

The Clerk read as follows:

Page 181, line 23, after the word "purposes," insert:
"*Provided*, That not more than $50,000 of said additional $100,000 herein appropriated shall be used for prosecutions under the antitrust laws other than the prosecution of the United States Steel Company and its officers for the violation of said laws by the purchase of the stock of the Tennessee Coal and Iron Company."

Mr. HITCHCOCK. Mr. Chairman, if the antitrust laws of the United States are to be enforced at all, it becomes peculiarly important for the officers of the Government to proceed against this gigantic merger, spectacular and far-reaching in its character, which practically accomplishes the evil purpose of creating a monopoly in the steel interests of the United States. I am at a loss to see how the chairman of the Committee on Appropriations or any other gentleman on this floor can justify any objection to an effort to direct attention to this trust and to bring about the prosecution of this act of merger. There may be differences of opinion as to whether the act of the steel trust in acquiring $30,000,000 of the Tennessee Coal and Iron Company was a violation of the antitrust laws of the United States, but there can be no possible differences of opinion among honest men who want to see the antitrust laws of the United States vindicated, on the proposition that the question shall be investigated in court; and the only way it can be investigated in court is by a prosecution by the United States Attorney-General under the antitrust law.

Now, Mr. Chairman, at the other end of the Capitol there have already been during this present session extensive investigations of the question involved in the act of the administration in giving practical assent to this merger. Those investigations have shown that the circumstances of the panic offered no justification for a stretch of administrative authority. The investigations before the committee of the Senate at the other end of this Capitol indicate that this panic was not stayed by the proceeding under which the great American Steel Company gobbled the entire $30,000,000 of stock of what was practically its only rival in the country.

Those investigations show that the syndicate holding Tennessee Coal and Iron stock was embarrassed, but that syndicate was only embarrassed because the banks known as the "Morgan group" of banks were forcing the syndicate to pay their notes secured by Tennessee Coal and Iron stock. The men behind those banks and the men behind the steel trust were largely identical. In one capacity they squeezed the syndicate and intensified the panic. In another they brought influence to bear to induce the administration at Washington to consent to this merger so as to stay the panic.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HITCHCOCK. I ask unanimous consent for one minute more.

The CHAIRMAN. Unanimous consent is asked that the gentleman from Nebraska may proceed for one minute. Is there objection?

There was no objection.

Mr. PARSONS. I ask that the gentleman from Nebraska have five minutes more for the purpose of answering some inquiries.

Mr. TAWNEY. I object.

Mr. HITCHCOCK. So that I say, even if staying a panic would have been sufficient justification for the administration to violate the law, that justification does not appear from the evidence taken at the other end of the Capitol. It appears that it saved no bank and no important house from ruin. It appears that it was only used as an excuse to permit the powerful men behind the national steel trust to acquire its rival, and it seems to me, therefore, doubly important—a branch of this Government having been involved and probably tricked and deceived into assent to this act—it seems to me doubly important that above all prosecutions in the country this prosecution should take precedence over all others. [Applause.]

Mr. TAWNEY. Mr. Chairman, I move that all debate on this paragraph and amendments thereto close in five minutes, and that the gentleman from Illinois [Mr. MANN] be recognized to close the debate.

Mr. SHERLEY. I suggest that the gentleman does not want to close debate. I am a member of the committee, and I may want to discuss the matter.

Mr. TAWNEY. Does the gentleman from Kentucky want to discuss it?

Mr. SHERLEY. I do.

Mr. TAWNEY. The gentleman said he might want to.

Mr. SHERLEY. I say I do want to.

Mr. TAWNEY. I move that all debate close in ten minutes.

Mr. CLARK of Missouri. Mr. Chairman, I would like to make a suggestion to my friend from Minnesota. He and I have been here a long time, and he knows that it will save time to give these gentlemen what time they want.

Mr. TAWNEY. I know that unless we conclude the consideration of this bill very soon it will be impossible for us to get it to the Senate in time to be presented for the approval of the President before the 4th of March.

Mr. CLARK of Missouri. Nobody is trying to consume time; we want to argue the question.

Mr. TAWNEY. But you are consuming time.

Mr. CLARK of Missouri. Of course we are consuming time, and we have a right to.

Mr. TAWNEY. Unless we close debate on the paragraph we will have to adopt some other measure of getting the bill through.

Mr. BARTLETT of Georgia. Mr. Chairman, I desire to ask the gentleman from Minnesota if he will not make it fifteen minutes.

Mr. TAWNEY. Yes, Mr. Chairman; I will modify the request and make it fifteen minutes and yield five minutes to the gentleman from Georgia with the understanding that the gentleman from Illinois is to close the debate.

The CHAIRMAN. The gentleman from Minnesota modifies his motion to close debate on the paragraph and amendments thereto in fifteen minutes.

The question was taken, and the motion was agreed to.

Mr. TAWNEY. Now, Mr. Chairman, I yield five minutes to the gentleman from Georgia [Mr. BARTLETT].

[Mr. BARTLETT of Georgia addressed the committee. See Appendix.]

Mr. SHERLEY. Mr. Chairman, a parliamentary inquiry. Are not the proponents of a proposition entitled to close debate?

Mr. TAWNEY. Mr. Chairman, by unanimous consent the gentleman from Illinois [Mr. MANN] was given the right to close debate.

Mr. GAINES of Tennessee. We proposed the amendment on this side.

The CHAIRMAN. The Chair would state that on an amendment, under the five-minute rule, in Committee of the Whole the rule strictly enforced allows only two arguments, one in favor of the amendment and the other against it, but by unanimous consent that time has been extended, and naturally the gentleman from Minnesota, the chairman of the Appropriations Committee, would have the right to make the argument in opposition to the amendment. In fact, it was so understood when unanimous consent was granted.

Mr. GAINES of Tennessee. That is, to conclude the debate?

The CHAIRMAN. The rule strictly enforced permits only two arguments, the first one by the gentleman who makes the amendment and the other by one gentleman in opposition. The Chair will recognize the gentleman from Kentucky [Mr. SHERLEY].

Mr. SHERLEY. Mr. Chairman, it seems to me that my distinguished friend, the chairman of the Committee on Appropriations, gave utterance to an unfortunate remark when he objected to a discussion of this matter on the ground that it was political speech making. Mr. Chairman, I have not been noted in this House either for the baiting of corporations or for partisan speeches, but if there be any politics in this proposition, the politics got into it by virtue of the action of an Executive without warrant of law. When the President of the United States assumed that his office authorized him to give promise of immunity to the Steel Corporation for absorbing the Tennessee Coal and Iron Company, he raised a question which ought not to be political, but which ought to be moral, and which, if the gentleman wants to make it political, I am willing to meet him on that plane. In my judgment, the antitrust law must either be enforced against all or against none of its violators. If it be a bad law, we owe it to ourselves to repeal it or to amend it. If it be a good law, we ought to enforce it impartially; and if there is one indictment that lies against the Government of America, it is that the laws are not enforced impartially against all violators.

In my judgment, the evidence that has been adduced in this case shows that so far as a panic was to be averted by permitting this merger, that panic itself was threatened in order to effect the merger, and the men and the banks of New York that were tottering, and that were made the excuse for asking the President to permit the doing of this, had been put into that proposition by stronger financial men and institutions for the purpose of bringing about a condition where they might get the President to give them what they believed to be an immunity for violation of the law. Whether his action was done in good faith or bad faith, it was done without right, and the facts as now developed do not show that his action was a wise one, and the proposition confronting us here is whether we will have the law enforced against all violators or against some. Now, this is a crude legislative way of getting at it. It is not the way we would like to legislate, but the fault lies not with us. The point of order was made to a direct amendment to the bill by the gentleman from Illinois [Mr. MANN]. This

proviso, if carried, at least will express the opinion of Congress as to the duty of the Attorney-General; and if the next Attorney-General be amenable to the sentiment of Congress and to the plain letter of the law, this prosecution will be instituted. If the law has not been violated, these men need not fear it. If it has been, they should be punished the same as any other violator of the law.

Now, if this be politics, if this be a political or partisan speech, make the most of it. The fault lies with you and not with us. We have heard a great deal of the square deal and we have seen less of it, and in this instance I insist that Congress show that it proposes that while the antitrust law is on the statute books it shall be enforced against all violators or against none. I hope the amendment will prevail.

Mr. MANN. Mr. Chairman, I do not have and do not propose to express, therefore, any opinion as to whether there was a violation of the antitrust law by the steel company in its so-called "merger" with the Tennessee Coal and Iron Company. I have not paid attention either to the discussions in the Senate or in the press upon the subject. I do not know whether there ought to be a prosecution or whether there ought not to be a prosecution, but I have a very firm opinion with reference to the question now before the House, which is to withhold $50,000 of the amount we propose to appropriate for the enforcement of the antitrust law and prohibit its use except upon special terms.

Mr. SHERLEY. Mr. Chairman——

The CHAIRMAN. Does the gentleman yield?

Mr. MANN. Not at present. If the Attorney-General of the United States under his oath of office concludes that he should commence this prosecution, then he has the power to use the money which is appropriated here, and if he should conclude not to use the money for that purpose, then he has taken out of his hands $50,000 which he might use to enforce prosecutions against some one else, so that in the final analysis the amendment of the gentleman is to simply take away from the appropriation $50,000 now proposed for the enforcement of the antitrust law, and the gentlemen over there who are claiming that we ought to enforce the antitrust law propose to deprive us of $50,000 for that purpose.

Mr. SHERLEY. Will the gentleman now yield?

The CHAIRMAN. The gentleman has declined to yield.

Mr. SHERLEY. The gentleman declined to yield at that time. Will the gentleman now yield?

Mr. MANN. I will yield for a short question.

Mr. SHERLEY. Can not we cure the gentleman's objection, if that is the point the gentleman makes, by increasing the appropriation by $50,000?

Mr. MANN. If they need that amount of money, if that is the amount of money they ought to have, then we ought to appropriate it, but to say in the end that we restrict them to the extent of $50,000 will not be cured by any amount. The Attorney-General has the power under the law to commence prosecutions. Do gentlemen think they can force the Attorney-General to do this against his conscience?

Mr. BARTLETT of Georgia. May I interrupt the gentleman?

Mr. MANN. No; not now. I did not interrupt the gentleman. Now, Mr. Chairman, I do not know whether the President was right in his actions or not. I know this: That no man in this country so has the confidence of the people of the country as to the enforcement of the antitrust laws and other laws equally against the rich and the poor as President Roosevelt has. [Applause.] The present Department of Justice has not been endeavoring to enforce the laws against the poor and not against the rich, and I have no doubt that if the next Attorney-General, when he comes to examine the facts in this case, believes that the law has been violated, he, under his oath of office and his power, will commence the prosecution which the gentlemen now for political reasons, in the expiring days of the administration, seek to use in an effort to kick the lion who is departing. [Loud applause.]

The CHAIRMAN. The question is upon the amendment offered by the gentleman from Nebraska.

The question was taken, and the Chair announced the noes seemed to have it.

On a division (demanded by Mr. BARTLETT of Georgia) there were—ayes 72, noes 97.

Mr. HITCHCOCK. Mr. Chairman, did the Chair count one vote on the Republican side?

The CHAIRMAN. The Chair counted all gentlemen standing on either side.

Mr. BARTLETT of Georgia. Tellers, Mr. Chairman.

Tellers were ordered.

The committee again divided; and the tellers (Mr. TAWNEY and Mr. BARTLETT of Georgia) reported that there were—ayes 81, noes 113.

So the amendment was rejected.

Mr. GAINES of Tennessee. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Tennessee offers an amendment, which the Clerk will report.

The Clerk read as follows:

Provided, That it is the sense of the House of Representatives of the United States of America, the grand inquest of the Nation, that the merger made about November, 1907, by and between the United States Steel Corporation and the Tennessee Coal and Iron Company, both with headquarters in the city and State of New York, was and is, and the subsequent operations of said corporation and company in interstate and foreign commerce are, of supreme public importance and are acts more than probably done in violation of an act entitled "An act to protect trade and commerce against unlawful restraints and monopolies," approved July 2, 1890.

Provided further, That the United States district judge in and for the southern district of the State of New York, holding court in the city of New York, be, and he is hereby, respectfully requested by this House to fully charge, at an early day, the grand jury to fully investigate said merger and the subsequent operations of said corporation and company in interstate and foreign commerce and trade, and that the United States district attorney in and for said district in the city and State of New York be, and he is hereby, directed to submit to said grand jury all information and evidence he possesses or can by due industry and careful research procure, which tend to show probable cause to believe said corporation and company by said merger or their subsequent operations aforesaid have violated said act, and otherwise in this proceeding aid said court and jury to see the law faithfully executed.

Mr. TAWNEY. Mr. Chairman, I make the point of order against that amendment that it is new legislation.

The CHAIRMAN. The amendment is plainly in violation of paragraph 2 of Rule XXI, which concludes with these words:

Nor shall any provision changing existing law be in order in any general appropriation bill.

This is a general appropriation bill. The amendment has no relation to any appropriation. It is full of proposed new legislation and if enacted into law would, of course, change existing law. The point or order is sustained.

The Clerk will read.

Mr. GAINES of Tennessee. I desire for a moment to discuss the point of order.

The CHAIRMAN. The Chair does not desire to hear further discussion; the amendment is so manifestly in violation of the rule.

Mr. GAINES of Tennessee. It is manifestly germane, and shows what Congress means by this antitrust fund and law, and directs the officer to execute the law. It is entirely germane.

The CHAIRMAN. The point of order was not addressed to the germaneness of the amendment.

The Clerk read as follows:

Suits to set aside conveyances of allotted lands: For the payment of necessary expenses incident to any suits brought at the request of the Secretary of the Interior in the eastern judicial district of Oklahoma, to be expended under the direction of the Attorney-General, to be immediately available, $50,000: *Provided*, That the sum of $10,000 of the above amount, or so much thereof as may be necessary, may be expended in the prosecution of cases in the western judicial district of Oklahoma.

Mr. CARTER. I make a point of order against that provision.

The CHAIRMAN. Will the gentleman state his point of order?

Mr. CARTER. The point is that it appropriates money to be used for a purpose not authorized by existing law.

Mr. FITZGERALD. These suits are brought in pursuance of the law.

Mr. CARTER. The suits are not brought in accordance with law, as I will show the gentleman if he will give me his attention.

These suits are brought under section 6 of the act of May 27, 1908, commonly known as the "restriction bill," which provides as follows:

And at the request of any allottee having restricted land, he shall, without charge, except the necessary court and recording fees and expenses, if any, in the name of the allottee, take such steps as may be necessary, including the bringing of any suit or suits and the prosecution and appeal thereof, to cancel and annul any deed, conveyance, mortgage, lease, contract to sell, power of attorney, or any other incumbrance of any kind or character, made or attempted to be made or executed in violation of this act or any other act of Congress, and to take all steps necessary to assist said allottees in acquiring and retaining possession of their restricted lands.

Now, Mr. Chairman, I have a telegram from the Attorney-General, which states that——

The CHAIRMAN. The Chair desires to hear the gentleman on the point of order.

Mr. CARTER. I am addressing myself, I will state, to the point of order. If the Chair will permit me to read this telegram from the Attorney-General, that will explain my point. He says:

DEPARTMENT OF JUSTICE, *February 20, 1909.*

Hon. C. D. CARTER,
House of Representatives:

Answering telegram: Some 23,000 defendants grouped in a few suits in cases of sales of nonalienable lands; dismissed as to some 2,000; tracts involved estimated 35,000; see from size from 10 acres up. Suits brought by Government as complainant, not in name of Indians.

CHARLES J. BONAPARTE,
Attorney-General.

Now, you will observe that these suits have not been brought in the name of the allottee, as the law directs, but in the name of the United States. They have been brought on land on which restrictions did not exist, as can be proven. They have not been brought at the request of the allottee at all, but, on the contrary, without the permission or consent of the allottee, and in many instances over what would have been his protest had he been consulted.

As proof of this, I will state my own case.

I have felt all along that I was a most unfortunate and neglected individual, for, from the best information obtainable, I have stood as the one lone person who ever made a land trade in the eastern judicial district of Oklahoma against whom some kind of legal proceedings have not been instituted. Every other individual who ever made a trade has been sued, gotten his name in the papers, and has been advertised generally. Yet me and my transaction have not been considered of sufficient importance to merit notice. I really resent this seeming slight, and had begun to experience some little trepidation for fear my constituents, nearly all of whom have been sued, might grow suspicious and accuse me of standing in with the powers that be in order to be exempted from this litigation, but on yesterday my anxiety was relieved to some extent. An attorney called at my office during my absence and told my secretary that suit had been brought to cancel a mortgage which I gave to a loan company represented by him. No action has been brought against me, it is true, and I still stand somewhat in awe of the suspicion of my folks at home; but the suit, as I am informed, was instituted to cancel a mortgage given to an insidious loan company, who had committed the heinous crime of imposing upon my ignorance and incompetency to the extent of loaning me money at a rate of interest 2 per cent less than I was able to secure any other place.

There is no question but that the application of these funds has been diverted from the purpose for which they were appropriated. The purpose for which this money was appropriated was for paying the court costs and investigating conditions in the eastern district of Oklahoma in order that suits might be brought with some degree of intelligence, thereby obviating the very unfortunate procedure which has transpired—that of instituting proceedings against everybody and every transaction, no matter how legitimate the trade may have been.

Since the suits are brought in the name of the United States, it certainly should not be necessary to pay court costs. The federal court certainly should not demand court costs in a case instituted in the name of the Federal Government. That would be like taking money from one pocket and putting it in the other. As to the investigation, no examination whatever was made prior to the bringing of the suits. The transactions were not looked into to see whether the grantor had a legal right to convey the property before suit was brought. My information is that only the court records were examined and suit brought upon every conveyance that had been recorded, regardless who the conveyor was and regardless even whether he was a tribal allottee or not.

Suits have been brought to cancel deeds given by men of admitted intelligence and financial ability, many of them who are not on the rolls and never claimed any interest in the tribal estates. Many others who are on the rolls, not on account of any Indian blood, but by reason of their marriage to ladies of the infinitesimal amount of 1-256 part Indian blood, and still others, Mr. Chairman, who are not Indians at all, but negroes who had the good fortune to have had former masters who had the generosity to divide their patrimony with their erstwhile slaves.

I am extremely anxious for the protection of our Indians. I want to see a thorough investigation of every transaction upon restricted land, and I stand ready and willing at all times, now and in the future as I have in the past, to assist any department, any society, or any individual, either on the floor of this House or any other place, in protecting the incompetent Indian and in bringing his plunderer to justice; but it is easy enough to distinguish from the departmental records, and this is the only way it can be determined, just what allottees are not restricted and just what transactions are legal and valid.

It is not necessary to incur the difficulty and expense of calling into court a single one of the parties to the transaction, for as a matter of fact such evidence would not be competent under the law. The records of the Dawes Commission at Muskogee show conclusively just what Indians have a right to make conveyances and on just what dates each one assumed such right. Under the present law the right of an allottee to convey his allotment depends, in most cases, entirely upon his degree of blood. The rolls of the Five Civilized Tribes are made conclusive evidence as to the age and quantum of blood of these allottees. So that if these records had been examined before suit was brought it could have been determined beyond the peradventure of a doubt whether or not the allottee had the right to alienate his land at the time the deed was made.

These tribal rolls are alphabetically indexed, many thousand copies having been published in book form.

It can not be justly claimed that any pressure for time was responsible for the careless manner in which these suits have been brought. The fact that the authority to do this work only existed sixty days before removal of restrictions became effective has nothing to do with the case.

It would take not to exceed one minute to the name to refer to these rolls and determine the restricted allottee from the unrestricted allottee before suit was brought. Examination of at least 50 of these names could be made per hour. At this rate, counting eight hours as a working day, 400 investigations could be made per day; counting twenty-five working days for a month, 10,000 could have been thoroughly investigated by one clerk before the suits were brought. Two clerks, then, at the salary of, say, not to exceed $125 per month, could have investigated this entire list of 23,000 defendants between the dates of May 27 and July 27, 1908, and still had almost half their time left.

But it was not necessary for these suits to be brought before the restriction bill became effective. There was no time limit and could have been no laches, but if it was necessary to bring these suits prior to the time the restriction bill became effective, then the thing necessary was not done and the thing unnecessary was done, because not one of these suits was instituted until after July 27, 1908, the date upon which the law became effective.

While the harm done legitimate business interests of our country is beyond the power of description by words, I hope that this committee may be able to imagine the stagnation created by such a course as has been pursued in Oklahoma.

Let us see what has been the effect of this wholesale bringing of suits. A suit brought on every deed recorded, every land sale litigated, and every party to the sale, whether white man, Indian, or negro, brought into court at an enormous expense, both to the Government and litigant. This, you understand, involves almost every person in the eastern judicial district of the State with energy sufficient to try to get a home. Many purchasers not having sufficient money to make full payment on the land gave mortgages to procure money for the final payments. Suit has been brought against the whole shooting match, and every legitimate investor has simply withdrawn his money from these transactions and refused absolutely to either buy land or loan money on same, for the very sufficient reason that no matter how good his title may be, no matter how plain the law may be upon the subject, he feels sure that suit will be brought to cancel the transaction, thereby entailing unknown expense and trouble.

I will read to you from the letter of Hon. Lee Cruce, president of the Ardmore National Bank, one of the largest financial institutions in our State. This will give some idea of the conditions that prevail.

Mr. Cruce is a tribal citizen of the Choctaw-Chickasaw tribe. His letter follows:

To show with what absolute carelessness and recklessness these suits are being filed, I will instance two cases: L. W. Cruce bought a piece of land from an allottee and afterwards transferred the land to John Carlock and Carlock procured a loan on it. Several weeks ago suit was filed against L. W. Cruce to cancel the conveyance made from the original allottee to him. He went to Muskogee, gave them the proofs they required, and the suit was dismissed. Since that time suit has been filed against Mr. Carlock to cancel the conveyance of the same land sold to him by L. W. Cruce, neither of whom is an Indian nor an allottee.

Now, here is a case in which no Indian or allottee is interested, the suit, so far as the interest of the allottee was concerned, having been dismissed prior to the bringing of the suit to cancel the transaction between these two white men, neither of whom make any pretensions to Indian citizenship and neither

of whom can be considered, by any distortion of the very worst paternalism, a ward of the Federal Government.

I presume when this suit against Mr. Carlock is dismissed another suit will be brought to cancel the mortgage given to the loan company; and if the loan company has rediscounted the note, a suit will be in order to cancel that transaction, and so it will go on interminably, when as a truth the only cause in which an action would lie was disposed of in the dismissal of the first suit.

Another case called to my attention is that of Cutch Smith. Cutch Smith has, I should judge, about one thirty-second Chickasaw blood. He is an intelligent man of affairs, light complected, blonde hair, and blue eyes; and if I were to introduce him to you as an Indian you would suspect my veracity. He sold a part of his allotment to his father, Jordon Smith, an intermarried citizen with no Indian blood whatever, for which his father gave him $1,300. Cutch invested the money in cattle. His father, who is getting very old, who is a good business man and reasonably well fixed financially, decided to give back the land to Cutch, and made a deed conveying the same from Jordon Smith, the white father, to Cutch Smith, the blonde Indian son. Now, suit has been brought against Cutch Smith, the man to whom the land was originally allotted, to force him to redeed the land to his father who bought it in the first place.

An attorney bought a piece of land from a Creek allottee, paying part cash and giving a mortgage on the land for the unpaid balance. Suit has been brought to cancel the mortgage which the white man has given the Indian to secure payment of the money to the Indian. Mr. Chairman, these are not isolated cases, but give a fair insight of what is taking place in the eastern part of the State.

Thus you will see that business has been completely paralyzed in that part of the State on account of these suits. These suits have intimidated and prevented the honest investor and homeseeker entering the market and paying a legitimate price for these lands, and enabled the unscrupulous adventurer to get title and possession for a merely nominal consideration, for the reason that he had no competition. They have prevented legitimate dealing in land, prevented permanent improvements on land, prevented home building, and have left the Indian who has land for sale at the mercy of the land grafter who buys the land for a song, for he is the only man that understands the intricacies of the transactions and is willing to take chances on perfecting his title in court.

Now, for the remedy. I have shown you how this investigation can be made for less than $500. I have explained why no court costs should be necessary, since the suits are brought in the federal courts in the name of the United States. Now, we have three prosecuting attorneys in that district and only one federal judge to try the cases. It seems to me that these three attorneys should be able to take care of all the business that can be attended to by one federal judge, especially when a part of the time of that federal judge is consumed in other civil matters in which these attorneys are not concerned.

The Attorney-General in his statement before the Committee on Appropriations admitted that an unexpended balance of the appropriation made for the current year exceeded $24,000. This would be $23,000 more than enough for the consummation of these suits. So that if this item goes out he would still have left 23 times as much money as is necessary for the conclusion of these matters.

We know of the large deficit confronting us in the Treasury, and it does seem to me that this House should wake up to the fact that such unnecessary expenses as these must be curtailed.

I presume, Mr. Chairman, the complicated parliamentary procedure by which this House does business serves some good purpose, but to a new Member, in the innocence of his first term, I submit that the complex rules of the House are a clouded and uncertain nightmare.

There is one thing, however, about this intricate procedure which I think I am beginning to understand in a vague and indefinite sort of way, and that is this: that it is the duty of the House, the duty of this committee, and the duty of the Chair to administer these rules in strict accordance with the plain letter of the well-defined established law. This rule should apply with equal force with relation to unauthorized appropriations on general supply bills, for it is claimed that there is an avenue by which such matters may be brought to consideration otherwise than on appropriation bills.

Mr. MANN. Will the gentleman yield for a question?

Mr. CARTER. I will.

Mr. MANN. Does the gentleman think that because the law officers may violate the law, or violate the gentleman's conception of the law, that makes the appropriation in the bill subject to a point of order?

Mr. CARTER. Well, Mr. Chairman, when all is said that can be said for that contention, it must be admitted in the last analysis at the most this is a moot question. At the very greatest, it can not be claimed that the legal right to bring and maintain these suits in the manner in which they have been brought is res judicata. Therefore, I insist that if this item is permitted to remain in this appropriation bill it provides an appropriation to be used for a purpose unauthorized by any established existing law.

If these suits were confined to those on restricted land, you would hear no protest from me; but when suits are brought to cancel deeds given to land on which no restrictions existed at the time of the passing of the deeds, when suits are brought to cancel deeds given by one white man to another, neither of whom were upon any tribal rolls or claim the right to be there, and who therefore can not be considered in any sense a ward of the Federal Government, I think it is high time somebody called a halt.

The CHAIRMAN. The Chair is ready to rule. The Attorney-General of the United States has a very wide discretion and jurisdiction to bring suits in the eastern judicial district of Oklahoma or anywhere else, either upon the request of the Secretary of the Interior or upon his own motion. Now, the Chair can not assume that this money which is appropriated in the bill, apparently to be used in the wisdom of the Attorney-General, will be used by him in the prosecution of any suits not authorized by law. The Chair must therefore overrule the point of order.

Mr. CARTER. Mr. Chairman, I offer the following amendment, which I send to the desk and which I think is in accordance with the law.

The CHAIRMAN. The gentleman from Oklahoma [Mr. CARTER] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Beginning with line 24, page 181, strike out all down to and including the word "dollars" in line 2, page 182, and insert in lieu thereof the following:

"Suits to remove cloud from titles: For the payment of necessary expenses incident to any suits brought at the request of the Secretary of the Interior in the eastern judicial district of Oklahoma in pursuance of existing law, to be expended under the direction of the Attorney-General, to be immediately available, $20,000; but no suits shall be brought or maintained in cases where the allottee has had his restrictions removed."

Mr. MANN. I make the point of order against the amendment.

The CHAIRMAN. The point of order is sustained. It manifestly changes existing law.

Mr. FERRIS. Mr. Chairman, I offer the following amendment:

The Clerk read as follows:

Insert after line 8, on page 182:

"*Provided*, That no part of this appropriation shall be used in the bringing or maintaining any suit involving title to lands upon which restrictions have been heretofore removed."

Mr. FERRIS. Mr. Chairman, I think this amendment ought to be adopted by this House; first, on its merits; second, because I do not believe a point of order lies against it.

The CHAIRMAN. No point of order has been made against it.

Mr. FERRIS. I desire to speak to the merits of the amendment. This amendment does not seek to abridge the right of the Attorney-General to bring suits when necessary; but it does place a limitation upon that department in the bringing of suits that, in my judgment, and in the judgment of citizens most intimately acquainted with the facts, well know that they are unnecessary. In the eastern half of the State in which I live the Secretary of the Interior and the Attorney-General have instituted about 32,000 suits, involving numerous tracts of land and numerous citizens in useless litigation. The result, as was suggested by my colleague, is disastrous and, indeed, a very great hardship upon the State and a hardship upon the Indian citizens as well. Two thousand of those suits have, on the motion of the Attorney-General himself, been dismissed, admitting himself that they were wholly unwarranted. Last May Congress passed an act removing the restriction from certain citizens in Oklahoma to the amount of about 10,000,000 acres. The Interior Department, in the face of that act, and in face of the positive provisions of that act of Congress, brought suits indiscriminately to cancel conveyances, cancel mortgages; most all, if not all, brought without the request, consent, or consultation of the allottee of the land.

Now, gentlemen of this House, I cite as a glaring example of what has been done by that department in the State of Oklahoma the fact that a suit was recently instituted against my colleague [Mr. CARTER], seeking to cancel a mortgage that he had executed since his restrictions had been removed. These suits were not brought with his consent, not in his name, not at

his request. I hope the amendment will be adopted, in the interest of my State and in the interest of the people that reside there.

The act of May 27, 1908, removes all restrictions of whatsoever kind or character, and the bringing of 32,000 suits, indiscriminately and ill-advisedly, as I believe, is a menace to the welfare of the State, is a menace to the Indian citizen. It destroys values; it drives away capital; it retards the growth and development of the State.

The amendment offered provides that the fund shall only be used with reference to lands which are now restricted, letting alone the lands and citizens upon which restrictions have been removed.

I submit these lands and citizens should be let alone to enjoy their property, as other unrestricted lands and citizens are entitled to do.

I certainly have no objections to suits against conveyances where lands are restricted, but, on the contrary, am bitterly opposed to suits being brought against lands and citizens which are by legislation released from restrictions.

Mr. SMITH of Iowa. Mr. Chairman, this amendment ought not to be adopted for several reasons. First, that it provides that no suit shall be instituted to set aside conveyances or transfers in the State of Oklahoma where the restriction has been removed, and it does not make any provision for cases in which conveyances were made before the restrictions were removed; but independent of that it is absurd for the Congress of the United States to sit here and, in appropriating money for the Department of Justice to enforce the laws of the United States, attempt to settle in this Chamber just which suits ought to be brought and which suits ought not be brought. All such matters must of necessity be left to the law officers of the Government.

Mr. FERRIS. I hope the gentleman will yield for a question.

Mr. SMITH of Iowa. I do not know that I care to yield, although I do not like to be discourteous. I was about to ask for a vote.

Mr. FERRIS. I hope the gentleman will yield, because I feel sure the membership of this House does not care to inflict an appropriation on the citizens of any State that is obnoxious to their citizenship. I will ask the gentleman from Iowa if, in his judgment as a Member of Congress and as a member of the Committee on Appropriations, he thinks Congress ought to appropriate money for the Attorney-General's office to bring suits against lands and citizens, in the absence of their request or consent, in Oklahoma, upon whom the restrictions have been heretofore absolutely removed by act of Congress?

Mr. SMITH of Iowa. I do not think there should be any prohibition as to bringing suits to recover lands conveyed by those whose restrictions have been removed, if these conveyances were made before the removal of restrictions.

The CHAIRMAN. The question is on the amendment of the gentleman from Oklahoma.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. FERRIS. Division!

The committee divided; and there were—ayes 44, noes 82.

Mr. FERRIS. Tellers, Mr. Chairman.

Tellers were ordered.

The CHAIRMAN. The gentleman from Oklahoma, Mr. FERRIS, and the gentleman from Iowa, Mr. SMITH, will take their places as tellers.

The committee again divided; and the tellers reported—ayes 47, noes 92.

So the amendment was rejected.

Mr. SMITH of Iowa. Mr. Chairman, I move that all debate upon this paragraph and all amendments thereto be now closed.

The question was taken, and the motion was agreed to.

Mr. CARTER. Mr. Chairman, I move to amend by striking out the words "fifty thousand," in line 4, page 182, and inserting in lieu thereof "twenty thousand."

The Clerk read as follows:

Page 182, line 4, strike out "fifty thousand" and insert "twenty thousand."

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was rejected.

Mr. FERRIS. I offer the following amendment:

The Clerk read as follows:

Insert after "Oklahoma" in line 8, on page 182:

"*Provided*, That no part of this appropriation shall be used in bringing or maintaining any suit that has been instituted without the consent or request of the allottee of the land involved."

The CHAIRMAN. The question is on the amendment.

Mr. FERRIS. Mr. Chairman——

The CHAIRMAN. All debate is closed.

The question being taken, the amendment was rejected.

The Clerk read as follows:

JUDICIAL.

UNITED STATES COURTS.

Expenses of the United States courts: For defraying the expenses of the Supreme Court; of the circuit and district courts of the United States, including the district court in the Territory of Hawaii; of the supreme court and court of appeals of the District of Columbia; of the district court of Alaska; of the circuit courts of appeals; of suits and preparations for or in defense of suits in which the United States is interested; of the prosecution of offenses committed against the United States; and in the enforcement of the laws of the United States, specifically the expenses stated under the following appropriations, namely:

Mr. WILLIAMS. Mr. Chairman, I move to strike out the last word. I ask the attention of the committee in order that I may read, as pertinent to the motion, a little production in verse which I hold in my hand. It comes from the Baltimore Sun and is entitled:

ONLY ONE MORE.

Hang the big stick in the closet,
Put the megaphone away;
Twine the Ananias members
With the olive and the bay;
Over all the happy country
Swells the tide of coming rest;
Let the weary cease from troubling,
North and South and East and West.

Be the strenuous life forgotten,
Blistering epithets put by;
Tear "mendacious" from the language,
Let no varlet whisper "lie."
Pack "my policies" for shipment,
Take a long breath once again,
While the land gets back its reason,
And the wild bear seeks its den.

Take vacation, tired typewriters!
Special messages no more
Burn the air along the highway
Ere they reach the Senate door;
Put the horses in the stable,
Peace is dawning, sweet and grand;
Only one more week of Teddy—
Hail, Columbia, happy land!

[Laughter.]

The Clerk read as follows:

For payment of salaries, fees, and expenses of United States marshals and their deputies, $1,350,000, to include payment for services rendered in behalf of the United States or otherwise. Advances to United States marshals, in accordance with existing law, may be made from the proper appropriations, as herein provided, immediately upon the passage of this act; but no disbursement shall be made prior to July 1, 1909, by said disbursing officers from the funds thus advanced, and no disbursements shall be made therefrom to liquidate expenses for the fiscal year 1908 or prior years.

Mr. SMITH of Iowa. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

The Clerk read as follows:

On page 183, line 8, strike out the word "eight" and insert in lieu thereof the word "nine."

Mr. SMITH of Iowa. This is merely to correct a clerical error.

The amendment was agreed to.

Mr. CARTER. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

There was no objection.

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having resumed the chair, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 25392) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1910, and for other purposes.

SUNDRY CIVIL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

Provided, That from and after July 1, 1909, each field deputy marshal shall, as his compensation, receive the gross fees, including mileage as provided by law, earned by him, not to exceed $1,500 per fiscal year, or at that rate for any part of fiscal year; and in addition shall be allowed his actual necessary expenses not exceeding $2 per day while endeavoring to arrest under process a person charged with or convicted of crime: *Provided*, That a field deputy may elect to receive actual expenses on any trip in lieu of mileage: *Provided*, That in special cases where, in his judgment, justice requires, the Attorney-General may make an additional allowance, not in any case to make the aggregate annual compensation of a field deputy in excess of $2,500, or more than the gross fees earned by such deputy.

Mr. MACON. I make the point of order against the paragraph just read.

Mr. SMITH of Iowa. The point of order is well taken.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

In all, $47,620.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word, for the purpose of making an inquiry of the chairman of the committee in charge of the bill with regard to a section passed yesterday, on page 97, "Expenses of regulating immigration." The proviso which appears on page 98 sets forth—

That on and after July 1, 1909, all head tax collected pursuant to the provisions of section 1 of the said act of February 20, 1907, together with all fines, rentals collected, and moneys received from other sources under the laws regulating the immigration of aliens into the United States, shall be covered into the Treasury to the credit of miscellaneous receipts.

I desire to ask the Chairman whether the committee in the consideration of this proviso passed upon the question of the availability of such appropriations out of the immigrant fund, which this provision proposes to abolish, as have already been made and not yet used.

Mr. TAWNEY. I will answer the question of the gentleman as far as I can by saying that when we were considering the provision carried in this bill and which the gentleman read, we took into consideration the amount of money in this fund, unexpended but allotted to certain purposes, which Congress has previously directed to be paid out of the immigration fund. Whether those allotments that we were informed were made are sufficient to meet the expenditure authorized, I do not know.

My colleague on the committee [Mr. SMITH of Iowa] had a recent conversation with the disbursing officer of the department and can give perhaps more specific information regarding the subject.

Mr. SMITH of Iowa. I am not able to give a final answer, because the matter has been broached so recently that great consideration has not been possible. It is clear to me, however, that if the contracts are let before the 1st of July there is no doubt whatever about their being payable out of the head tax. If the contracts are let after that date, there is great doubt.

Mr. MOORE of Pennsylvania. I call the gentleman's attention to the report of the Commissioner-General of Immigration, which states that there are some amounts which are presumed to have been reserved out of the immigration fund, but your provision clearly appears to do away with the fund as a separate account and brings the money directly into the Treasury of the United States. Inasmuch as in good faith certain laws were enacted providing appropriations out of the immigration fund, which may not have been used, I desire to know whether the specific amounts thus appropriated will hold after the 1st of July. Of course, I did not know whether the gentleman could answer me or not.

Mr. SMITH of Iowa. It is not possible to give an absolute final answer as to what will be the effect if no contract is let until after the beginning of the next fiscal year.

Mr. MOORE of Pennsylvania. It is the opinion of the gentleman that the appropriations previously made would hold intact up to the 1st of July?

Mr. SMITH of Iowa. I have no doubt on that subject.

The Clerk read as follows:

Payment to the Catholic Church in Porto Rico: To give effect on the part of the United States to the basis of settlement of all matters in dispute between the Roman Catholic Church in Porto Rico on the one part and the United States and the people of Porto Rico on the other part, signed at San Juan, P. R., on August 12, 1908, by commissioners for the United States, the Roman Catholic Church of Porto Rico, and the people of Porto Rico, respectively, the Secretary of the Treasury is hereby authorized to pay to the bishop of Porto Rico, as the representative and trustee of the Roman Catholic Church in that island, and for the exclusive benefit of the Roman Catholic Church in Porto Rico, the sum of $120,000, in full satisfaction of all claims of every nature whatsoever relative to the properties claimed by the Roman Catholic Church in Porto Rico which are now in the possession of the United States, to wit, the building known as the Santo Domingo Barracks, and the land pertaining thereto, and the site of the building formerly known as the Ballaja Brarracks, now known as the Infantry Barracks, both properties in the city of San Juan, P. R.: *Provided*, That the Roman Catholic Church shall guarantee the title to, and shall relinquish all rights and actions regarding said properties, and that the said properties shall belong exclusively to the United States: *And provided further*, That upon the acceptance of this sum the Roman Catholic Church shall relinquish all claims of any kind whatsoever against the United States arising in Porto Rico prior to the approval of this act.

Mr. GARRETT. Mr. Chairman, to that I make a point of order, or reserve it.

Mr. SMITH of Iowa. What is the point of order?

Mr. GARRETT. That it is not authorized by existing law.

Mr. SMITH of Iowa. We shall insist that it is authorized by existing law.

Mr. GARRETT. That makes the issue, then.

Mr. SMITH of Iowa. I deny that the point of order is well taken. Does the gentleman from Tennessee want to be heard on his point of order?

Mr. GARRETT. I make the point of order that there is no existing law; that it is new legislation and obnoxious to the second section of Rule XXI.

The CHAIRMAN. The Chair will hear the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Chairman, in Porto Rico, prior to its annexation to the United States, there was a union of church and state. Upon the annexation of Porto Rico to the United States there arose an issue, difficult to determine, to whom the property belonged which was controlled by the Roman Catholic Church and which had been acquired in large measure by public taxation. A portion of the property of the Catholic Church was taken possession of by the Government of the United States for military uses—for barracks and quarters—and a portion was taken possession of by the territorial government of Porto Rico.

Subsequently a suit was brought to test the right to this property, and between the government of the people of Porto Rico and the Roman Catholic Church that case was carried to the Supreme Court of the United States, and it was held that the property belonged to the Roman Catholic Church and not to the people of Porto Rico. The United States Government was not a party to that action.

Mr. MADISON. Will the gentleman yield for a question?

Mr. SMITH of Iowa. I do not want to be questioned now until after I have finished.

Mr. MADISON. The gentleman is making a mistake, and he wants to correct it.

Mr. SMITH of Iowa. When I get through I will gladly yield to the gentleman, as I always do. When the case was determined by the United States Supreme Court, it was not an adjudication between the United States and the Roman Catholic Church, because of the fact that the United States was not a party or privy to that proceeding.

Subsequently to this decision, the United States being in possession of certain of these lands for military purposes, negotiations were entered into between the State Department, represented by Robert Bacon, and the Bureau of Insular Affairs in the War Department, and the Bishop of Porto Rico and the government of the people of Porto Rico, whereby all of these matters were settled and adjusted, and it was agreed that the United States should take and hold permanently the site of certain barracks at Santo Domingo and adjacent land for military purposes and pay therefor the sum of $120,000 in full, and that the government of Porto Rico should pay $180,000 in three annual payments of $60,000 each for the portion of the property of the Catholic Church which was being taken by the people of Porto Rico. This stipulation was followed with a request that the $120,000 necessary to comply with this contract upon the part of the United States be appropriated. Now, it must be borne in mind not only that this contract has been thus made for the purchase of this land and the settlement of this controversy, but that this land is being bought for military-post purposes, a thing strictly within the jurisdiction of the Committee on Appropriations in the sundry civil bill.

Mr. JONES of Virginia. I would like to ask the gentleman a question.

The CHAIRMAN. Does the gentleman yield?

Mr. SMITH of Iowa. Mr. Chairman, having thus briefly stated the circumstances, I will yield first, begging the pardon of the gentleman from Virginia [Mr. JONES], to the gentleman from Kansas [Mr. MADISON], if he desires to ask me a question.

Mr. MADISON. Mr. Chairman, I wanted merely to make this correction which the gentleman wants made, and that is that this case never was decided by the Supreme Court of the United States. It was decided by the supreme court of Porto Rico and appealed to the Supreme Court of the United States, but before the case was tried in the Supreme Court of the United States it was compromised and settled. That is the reason I interrupted the gentleman.

Mr. FITZGERALD. That is right.

Mr. SMITH of Iowa. My recollection is otherwise, but as that is not of vital importance, I defer to the recollection of the gentleman from Kansas.

Mr. PARSONS. Mr. Chairman, I will state to the gentleman that there was a case which came to the Supreme Court of the United States and that decided that the church property of Porto Rico belonged to the Roman Catholic Church and not to the municipalities, although the municipalities had in the past, under the union of church and state, contributed large amounts to their support, so that there is no doubt but what these properties belonged to the Roman Catholic Church.

Mr. SMITH of Iowa. That has been decided by the Supreme Court of the United States.

Mr. GARRETT. Mr. Chairman, this particular case is now pending in the Supreme Court of the United States.

Mr. SMITH of Iowa. Oh, I did not intend to announce that any adjudication was made by the Supreme Court of the United States that was binding upon the United States, but expressly disclaimed it; but the Supreme Court of the United States has passed upon the proposition that this property, all of it, as I understand, without having jurisdiction as to this part, belonged to the Roman Catholic Church and not to the people of Porto Rico.

Mr. JONES of Virginia. Oh, no——

Mr. SMITH of Iowa. All this class of property, perhaps I ought to say.

Mr. JONES of Virginia. I would suggest to the gentleman that the case before the court of Porto Rico involved the title to the property that Porto Rico holds and not that held by the United States. The United States was not a party to that suit.

Mr. SMITH of Iowa. I fully understand that.

Mr. JONES of Virginia. And that was the case which was appealed to the Supreme Court of the United States. It never has been tried and disposed of. The Supreme Court has never decided that case.

Mr. WASHBURN. Mr. Chairman, I rise to a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. WASHBURN. Mr. Chairman, I would inquire if the Chair is hearing an argument on the question of a point of order or listening to a discussion on the merits?

The CHAIRMAN. The Chair was endeavoring to hear a discussion on the point of order, but was unable to hear it.

Mr. SMITH of Iowa. Mr. Chairman, all these suggestions amount to nothing with reference to the vital point before the Chair. While it may be that gentlemen may differ in their method of statement, as a matter of fact these decisions are just as I have always understood them. That is to say, in the case pending before both the supreme court of Porto Rico and the Supreme Court of the United States, it was held that this class of property belonged not to the municipalities, but to the Roman Catholic Church.

Mr. JONES of Virginia. The case has never been heard in the Supreme Court of the United States.

Mr. SMITH of Iowa. One of the cases of a similar character has.

Mr. JONES of Virginia. Oh, no.

Mr. LARRINAGA. Yes; the case of the municipality, although not similar, was decided in the way the gentleman from Iowa states.

The CHAIRMAN. The Chair will state that in a discussion of a point of order it is hardly worth while to discuss the merits of the proposition.

Mr. SMITH of Iowa. Mr. Chairman, we are purchasing this just as we are spending money in this bill to buy land for military posts, and that power has been exercised every year for many years in this identical bill, to appropriate money for the acquisition of lands for military posts, and the mere fact that an agreed price was here made by compact does not destroy the power to purchase this property.

The CHAIRMAN. The Chair will ask the gentleman from Iowa if he insists that we could appropriate in this bill for new military posts?

Mr. SMITH of Iowa. This is not a new military post, but an old military post, long established, for about ten years.

Mr. JONES of Virginia. About seventy years. Since 1838.

The CHAIRMAN. The Chair will ask if it is not new so far as this Government is concerned?

Mr. FITZGERALD. No; it is not.

Mr. SMITH of Iowa. It is old so far as this Government is concerned. This Government took possession and has been maintaining a military post there ever since the Spanish war, and we are now buying the balance of the title to the land on which the military post stands.

Mr. JONES of Virginia. Mr. Chairman, on that point there is a difference of opinion, and I would like to be heard as to the facts involved.

Mr. SMITH of Iowa. If there is any difference of opinion, of course the gentleman will state his; but that is the ground upon which I claim this is in order, that we have occupied this existing military post for ten years past, and more.

The CHAIRMAN. The Chair would ask the gentleman from Iowa if he thinks it would be in order under the rule in a general appropriation bill to appropriate without specific authority for the purchase of an old post which had been taken possession of by the Government?

Mr. SMITH of Iowa. I should say that if we had possession of a post under color of title and we exercised control over it and exclusive possession, and it was proposed to remove a cloud upon the title, a dispute as to the title, that the perfection of the title of the United States to this ownership of the military post, the acquisition of what remains of the title, is just as much in order upon a general appropriation bill as the acquisition of an additional tract of land where we held an old military post.

The CHAIRMAN. The Chair would like to ask the gentleman from Iowa, Suppose a section of the army in Iowa, for instance, should settle upon a tract of land of 10,000 or 15,000 acres and camp there, would that constitute such authority of law for its purchase as to support an item in the next general appropriation bill making an appropriation to pay for that land?

Mr. SMITH of Iowa. I am glad the Chair asked that question, because it enables me to point out very conclusively the distinction between that case and the case before the committee now. The United States went to Porto Rico and conquered this post and took it as the property of Spain. We seized it as an act of war, a thing impossible in the suggested case in Iowa. Now we come at the ownership of these titles, these tracts being exclusively to the title of Spain, but that title is now in dispute; it has not been adjudicated, but we have been in possession for ten years or more under our claim of conquest and of right, and now in order to clear away the cloud upon the title we buy that cloud upon the title, and it can not bear any relation to the Iowa case suggested by the Chair for that reason.

The CHAIRMAN. The Chair will hear the gentleman from Massachusetts [Mr. PETERS].

Mr. PETERS. Mr. Chairman, I desire to call the attention of the Chair to two paragraphs in the report of Mr. Robert Bacon, which I think have a bearing on the point at issue in support of the appropriation. Mr. Bacon was appointed to confer with the Roman Catholic Church and the people of Porto Rico relative to these claims in Porto Rico, and in his report says:

> Under the terms of this memorandum the United States is to pay the Roman Catholic Church in Porto Rico the sum of $120,000, in full settlement of all claims of every nature whatsoever relative to the property claimed by the church which are now in possession of the United States. These properties are:
>
> First. The site now occupied by the Ballaja Barracks, or as the building is now known the "infantry barracks," in San Juan, and the Santo Domingo Barracks and the land pertaining thereto. Both of these are on the lands reserved for military purposes in the city of San Juan.

I think that disposes of that fact.

Mr. GARRETT. Mr. Chairman, having made the point of order, I should like to be heard on the point of order.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. GARRETT. The point of order was made, not as a shot in the dark, but with knowledge of this case. This matter has been before the committee of which I am a member, the Committee on Insular Affairs. I think there has been another bill of precisely the same character before the Committee on War Claims, though I am not sure as to that, but I know it has been before our committee, and it is a matter we discussed a good deal in committee, and on which we have never reached a vote. I do not concur in the conclusions of the gentleman from Iowa as to the ownership of the property.

Mr. HARRISON. Will the gentleman yield for a question?

Mr. GARRETT. Certainly.

Mr. HARRISON. Will not the gentleman admit that the concordat between the Pope and the Queen of Spain confirmed the title of all land from which the friars had been formerly dispossessed and restored title to the church except as to those church properties for which the Government of Spain gave 3 per cent bonds, and that being so, will not the gentleman admit that such bonds were not given for any of this church property in Porto Rico?

Mr. GARRETT. Well, I will say to the gentleman that his statement is in accord with my understanding of the facts, but I think it is very significant that the Government of Spain never did issue its bonds to the churches in Porto Rico. It complied with the terms of the concordat. And I think it is very significant that they did not issue the bonds and give them to the church for properties in Porto Rico.

Mr. HARRISON. If the gentleman will permit me, did not that leave the title to those properties in the church?

Mr. GARRETT. The concordat did not mention these specific properties.

Mr. HARRISON. It referred to these properties as well as to all others.

Mr. GARRETT. It referred in general terms. Now, these properties originally belonged to the Dominican and Franciscan friars. In 1838 those orders seem to have been abolished by the Spanish Government, and the Spanish Government took over the property. Now, the Spanish Government was in uninterrupted possession of this property from 1838 until the time of its cession to the United States.

Mr. FORNES. Will the gentleman yield for a question?

Mr. GARRETT. I will in a moment, but first let me keep my promise and yield to the gentleman from Massachusetts [Mr. WASHBURN].

Mr. WASHBURN. I would like to ask my friend from Tennessee if it is not a fact that the supreme court of Porto Rico decided that the title to the identical property, concerning which we are now engaged in discussing, was in the Roman Catholic Church?

Mr. GARRETT. Well, we differ about that. There was an opinion——

Mr. WASHBURN. I have the opinion in my hand.

Mr. GARRETT. I have the opinion also, and I have examined it, I will say to the gentleman, and am familiar with it.

Mr. BURLESON. They expressly state that the United States was not a party.

Mr. GARRETT. As to this property—the gentleman does not intend to say that this property was involved?

Mr. BURLESON. Yes; that is what he says.

Mr. COCKRAN. Is the gentleman familiar with the case of Ponce *v.* the Roman Catholic Apostolic Church, 210 United States, pages 316, 317?

Mr. GARRETT. I am not so familiar with that as I am with the case here involved.

Mr. COCKRAN. Let me ask the gentleman if he does not recognize this language as that used by Chief Justice Fuller, of the Supreme Court, and whether it does not cover the Roman Catholic Church and all the rest:

The title of the Roman Catholic Church in Porto Rico to temples erected and dedicated to religious uses is not affected by the fact that some of the funds for building or repairing the churches were public funds, appropriated for that purpose by the municipality of Ponce, where such appropriations were made without reservation or restriction.

Mr. GARRETT. No; I will say to the gentleman that I do not think that principle applies in this case at all. This is not that case.

Mr. COCKRAN. What is the distinction?

Mr. GARRETT. In this case the Spanish Government had uninterrupted and undisputed possession of this property from 1838 until the time that it ceded to the Government of the United States.

The CHAIRMAN. The Chair is ready to rule. In passing upon the point of order the Chair is not permitted to consider the merits of the proposition involved, but must rule on the point of order only.

Now, the second paragraph of Rule XXI of the House reads as follows:

No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law, unless in continuation of appropriations for such public works and objects as are already in progress; nor shall any provision changing existing law be in order in any appropriation bill or in any amendment thereto.

That applies only to general appropriation bills. It would be quite competent, undoubtedly, for the proper committee—say the Committee on Insular Affairs—to bring in a bill which would carry not only the authority for the purchase, but the authorization for the appropriation also.

Mr. SMITH of Iowa. May I ask whether the Chair means to hold that the purchases of army post sites in the insular possessions is a matter within the jurisdiction of the Insular Committee? Is that the meaning of what the Chair has just stated?

The CHAIRMAN. It might be proper for the Military Committee, if it is to be used for a military post. Certainly one of the committees—the Committee on Insular Affairs or the Committee on Military Affairs—could bring in a bill which would authorize an appropriation.

The gentleman from Iowa [Mr. SMITH] suggests that the Government of the United States has already seized this property as the property of Spain, that its title is clouded, and that this is to remove the cloud.

To remove the cloud requires legislation which is not permitted on a general appropriation bill. The attention of the Chair has not been pointed to any such authority for this purchase as would justify providing for it in a general appropriation bill such as this is. But, further than that, this paragraph contains two provisos:

Provided, That the Roman Catholic Church shall guarantee the title to, and shall relinquish all rights and actions regarding said properties, and that the said properties shall belong exclusively to the United States: *And provided further*, That upon the acceptance of this sum the Roman Catholic Church shall relinquish all claims of any kind whatsoever against the United States arising in Porto Rico prior to the approval of this act.

It not only appropriates without the previous authority of law required by the rule to make it in order upon this kind of a bill, but also comes in contact with the rule by changing existing law in several particulars.

The Chair is therefore compelled to sustain the point of order.

The Clerk read as follows:

Wreck of the battle ship Maine: The President is authorized, with the consent of the Republic of Cuba, to invite proposals for removing the wreck of the battle ship Maine from the harbor of Habana, and to communicate to Congress as soon as may be practicable estimates, based on proposals received hereunder, for the expenses of such removal.

Mr. DOUGLAS. Mr. Chairman, I reserve the point of order on that.

Mr. SULZER. Mr. Chairman——

Mr. TAWNEY. Mr. Chairman, I hope the gentleman will make the point of order and save time.

Mr. DOUGLAS. I think "the gentleman" has the right to reserve the point of order for the purpose of making a speech on this item.

The CHAIRMAN. The gentleman can only do that by unanimous consent.

Mr. TAWNEY. Regular order!

Mr. DOUGLAS. Mr. Chairman, I make the point of order.

Mr. TAWNEY. I concede it.

The CHAIRMAN. The gentleman from Minnesota concedes the point of order, and the Chair sustains it.

Mr. SULZER. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. SULZER. I rise for the purpose of asking the gentleman from Ohio to withdraw his point of order.

The CHAIRMAN. The point of order has been sustained. The Clerk will read.

Mr. SULZER. I trust the gentleman from Ohio will withdraw the point of order. This is a very important matter. The *Maine* should be raised; and I hope the provision in this bill to do it will not be stricken out on a point of order.

Mr. DOUGLAS. I will not withdraw it; I will reserve it.

Mr. SULZER. I want to be heard on this proposition.

The Clerk read as follows:

House of Representatives Office Building: For maintenance, including miscellaneous items, and for all necessary services, $31,600.

Mr. SULZER. Mr. Chairman, it is a matter of much regret to me, and I know it will be to thousands and thousands of others throughout the country, that the provision in this bill to raise the wreck of the *Maine* has been stricken out on a point of order made by the gentleman from Ohio [Mr. DOUGLAS].

I am at a loss to understand the motive of the gentleman, and I sincerely hoped he would withdraw the objection when I appealed to him to do so. The patriotic people of the land have insisted for years, and now demand more vigorously than ever, that the *Maine* be raised. Congress should heed this demand. Our dereliction in this matter is humiliating and little less than a national disgrace.

The honor of the country demands that the *Maine* be raised. Public sentiment has been aroused and will not be appeased until the wreck of the *Maine* is raised; the truth of her destruction told; the derelict removed from menacing commerce; and the bodies of the brave sailors who sacrificed their lives on the altar of their devotion to country recovered and brought home and decently interred in the national cemetery. The records in the Navy Department show that at least 63 bodies were never recovered or accounted for, and are now entombed in the wreck of the *Maine*. For some inexplicable reason the *Maine* has never been raised and these bodies of the Nation's heroic dead recovered and brought home for burial. Our neglect to recover these remains is a big black blot on our boasted gratitude and patriotism, and our refusal to raise the wreck for fear it may appear the *Maine* was destroyed by an internal explosion is too cowardly to contemplate. No true American is afraid of the truth. We can afford to say we were mistaken. We can not afford to have it said we are afraid of the truth.

Governor Magoon voiced this idea in a statement he made just before leaving Cuba, in which he said that our neglect to remove the wreck is attributed by many, especially the large Spanish contingent in Cuba, to the fear that its removal will disclose the fallacy of the popular belief that the *Maine* was destroyed by a torpedo or mine. So generally does this opinion prevail, says the governor, that the Cuban Government has been deterred from removing the wreck as an obstruction to navigation. And only last month the President, in response to this suggestion and the patriotic demands from all over the country, sent a special message to the Congress, in which he said, in substance, that the wreck of the *Maine* should be removed from Habana Harbor and that he hoped the Congress would see the wisdom of passing appropriate legislation for its speedy accomplishment. But nothing is done, and every day's delay is deepening the blush of national shame on the face of every patriotic American.

Mr. Chairman, my conscience is clear. The fault is not mine. I have done, and I am trying to do, my duty in the premises. Long, long ago I introduced a bill to raise the wreck of the *Maine* from the slime and mud of Habana Harbor. The bill speaks for itself, and I now send it to the Clerk's desk and ask to have it read in my time.

The Clerk read as follows:

A bill (H. R. 21176) to raise the wreck of the U. S. battle ship Maine in Habana Harbor, and remove the bodies therein to Arlington Cemetery for interment.

Be it enacted, etc., That the Secretary of the Navy be, and he hereby is, authorized and directed to forthwith prepare and publish proposals requesting bids for the removal of the wreck of the U. S. battle ship Maine, now sunk in Habana Harbor, and have the bodies therein brought to Washington for interment in the national cemetery at Arlington; and that the contract or contracts for the purposes herein specified shall be let to the lowest responsible bidder.

SEC. 2. That the President be, and he hereby is, authorized and directed to make the necessary arrangements, if any be necessary, for the purposes herein designated, with the Republic of Cuba.

SEC. 3. That any money now at the disposal of the Navy Department is hereby made applicable for the purposes herein specified, and if the same be not sufficient to carry out the purposes herein specified, then such sum of money as may be necessary to meet all the requirements of this act is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to carry out the provisions of this act.

SEC. 4. That this act shall take effect immediately.

Mr. SULZER. Mr. Chairman, that bill of mine is now slumbering in the Committee on Naval Affairs, where it has been pigeonholed ever since I introduced it. I have done everything in my power to get it reported, but thus far without success. I say, now, it should be speedly reported and passed ere this session of Congress adjourns. The House should have an opportunity to vote on the bill, and if this right were granted, I know the bill would pass by an overwhelming majority. This bill will accomplish the object desired, and it meets with the approval of the patriotic people of this country. The failure of the Committee on Naval Affairs to act on this bill has been disappointing to the friends of the *Maine's* heroic dead; but I am not disheartened. In season and out of season I shall keep working for this legislation until the *Maine* is raised and the bodies of our dead sailors are brought home for interment. The Naval Affairs Committee of this House has been recreant in this matter. The members of this committee are to blame for the disgraceful neglect and delay. The veterans of the Spanish-American war, from one end of the country to the other, are very much in favor of my bill, and nearly every camp has passed resolutions urging its speedy enactment into law. Our neglect of the dead sailors buried in the wreck of the *Maine* is a shame and a disgrace. The wreck of the *Maine* must be raised. The bodies of our gallant seamen must be brought home and interred with their ill-fated comrades in the national cemetery. Every sentiment of gratitude and every prompting of patriotism should impel us to do this. I shall keep up the fight until it is done. Sooner or later the Congress must do its duty. We must find out if the *Maine* was destroyed by an explosion from within or without. Let the truth be known to all the world, and forever dissipate doubt—forever clear the sky of history. [Applause.]

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. SULZER. Mr. Chairman, I regret my time is so limited. However, I now ask unanimous consent to extend my remarks by printing in the RECORD some recent data in my possession bearing directly on the subject under discussion.

The CHAIRMAN. The gentleman from New York asks unanimous consent to extend his remarks as indicated. Is there objection? [After a pause.] The Chair hears none, and the request is granted.

The matter referred to follows:

RED OAK, IOWA, *February 22, 1909.*

Hon. WILLIAM SULZER, *Washington, D. C.*

DEAR SIR: You truly said February 16, 1909, "The delay has been disappointing to the friends of the *Maine* heroes, deceased," and that you will persist in your efforts until the *Maine* is raised, and the bodies of the dead sailors are brought home for burial.

My son, Darwin Merritt, an assistant engineer, is entombed in the wreck. My affection for him prompted me to thank you for your laudable efforts. Two other sons, one a member of the Roosevelt Rough Riders and the other a member of the Fifty-first Iowa Volunteers, who served in the Philippines, and thousands of others are deeply interested in the matter.

I am not unmindful of the feelings of the friends and relatives of the other 62 who died in the performance of duty; a word from you to the general public not reached by the CONGRESSIONAL RECORD would enable our people through our Congressmen and Senators to remind them of their plain duty. I have not seen any allusion to the subject in the newspapers of my own State.

Yours is a familiar name in nearly every household, and the writer, being a former resident of your State (Potsdam) emboldens me to address you and to say that I am,

Respectfully yours, W. W. MERRITT.

RAISE THE "MAINE."

Raise the *Maine* from Cuban waters
For Columbia's sons and daughters
To the surface of the ocean
With a glorious emotion!

Raise the *Maine*, renowned in story,
And with everlasting glory
Let her sail from sea to sea,
Grand emblem of our liberty!

Raise the *Maine* and let us save
The wreck of glory from its grave,
To teach the people, far and wide,
That Freedom is our hope and pride!

Raise the *Maine* for noble heroes
Who have whipped the Spanish Neroes
From this Western Hemisphere,
And nevermore to reappear!

"Raise the *Maine*," brave SULZER utters,
And in Congress no one mutters
Argument in opposition
To this bill and its grand mission!

Raise the *Maine*, for God and honor,
When again our glorious banner
Shall go shining round the world
From the *Maine* mast, flashed, unfurled!

JOHN A. JOYCE.

WASHINGTON, D. C.

Moorfield Storey, president; David Greene Haskins, jr., treasurer; and Erving Winslow, secretary. Executive committee: Albert S. Parsons, chairman; Charles Gordon Ames, James H. Bowditch, Gamaliel Bradford, Frederick Brooks, Charles Fleischer, William Lloyd Garrison, Edwin Ginn, Albion A. Perry, A. A. Putnam, Josiah Quincy, John Ritchie, Frank B. Sanborn, Charles Warren, and Fiske Warren, president, treasurer, and secretary ex officio.

THE ANTI-IMPERIALIST LEAGUE,
20 CENTRAL STREET,
Boston, February 19, 1909.

Hon. WILLIAM SULZER.

DEAR SIR: Will you kindly let me know the exact position of your renewed effort for raising the *Maine?* I have collected a quantity of evidence which seems to prove that it was destroyed by an internal explosion, and my own belief is that the President's recommendation for raising the wreck at this late date is attributable to the fact that it has been ascertained that the action of the water upon the wreck has been such that nothing can be determined now by its removal. You are aware, I presume, that Gen. W. J. Palmer, of Colorado, offered, through us, to pay half a million dollars for raising the wreck at a period when its condition would have probably afforded the necessary evidence.

I am, your obedient servant, ERVING WINSLOW,
Secretary.

[Editorial from the Evening Star, Washington, Saturday, February 20, 1909.]

RAISE THE "MAINE."

Far better than merely authorizing the Secretary of the Navy to ask for bids for the removal of the *Maine's* wreck from Habana Harbor, as proposed by the House Appropriations Committee in the new sundry civil bill, will be a direct authorization to remove the hulk without further delay. The lapse of eleven years since the ship was sunk without effort to raise it is discreditable to the United States. Further procrastination is calculated to increase the criticism which is now directed against this Government, even though the naval administration may be going through the motions of learning the cost.

Nearly a year ago Representative SULZER, of New York, introduced a bill authorizing and directing the removal of the wreck in order that the bodies of the 63 sailors now entombed within the twisted steel plates of the ill-fated ship might be given decent burial. This bill, for some reason not plain, has lain in committee without action. Meanwhile Congress has been repeatedly importuned to act, and especially of late in connection with the evacuation of the island by American troops and since then in connection with the anniversary of the disaster. These requests and demands for action have come from patriotic organizations, from newspapers voicing public sentiment, and from individuals. The paragraph in the sundry civil bill may be the answer vouchsafed. But it does not go far enough.

The Secretary of the Navy has already reported that he does not know how much the work of removal will cost. Congress should not be particular. The hulk should be raised, the dead removed and buried, and the so-called "mystery" of the disaster forever revealed, whatever the expense may be. In all likelihood this contract will not call for many thousands of dollars—10, 15, 20, or perhaps 25. Though the expense ran to $50,000, or even to $100,000, this Government should willingly bear it, as the price of a peremptory duty. The Government is not so poor that it must hesitate and count the dollars and know the cost to a penny before it proceeds to give the final word. The Secretary of the Navy can be intrusted with the commission under a lump-sum appropriation.

In his remarks before the House on the 16th of this month on this subject Mr. SULZER thus eloquently stated the national responsibility in this matter:

"During the Spanish-American war our battle cry was, 'Remember the *Maine!*' Have we forgotten that? Have we, forsooth, so soon forgotten the *Maine?* Should not every prompting of patriotism impel us not only to remember the *Maine*, but to raise the *Maine?* The veterans of the Spanish-American war, from one end of the country to the other, are very much in favor of action along the lines of my bill, and nearly every camp has passed resolutions favoring its speedy enactment into law. Our neglect of the dead sailors buried in the wreck of the *Maine* is a shame and a disgrace. The wreck of the *Maine* must be raised. The bodies of our gallant seamen must be brought home and interred with their ill-fated comrades in the national cemetery. Let us do our duty. Let us enact this law. Let us raise

the *Maine*. Let us find out for all time if the *Maine* was destroyed by an explosion from within or without. Let the truth be known to all the world. I am not afraid of the truth. No true American is afraid of the truth. The raising of the *Maine* will forever dissipate doubt—forever clear the sky of history—forever be a credit to our heart and our courage and our manhood and our patriotism and our gratitude to our heroic dead."

The House should grasp its present opportunity and add to the paragraph in the sundry civil bill the language necessary to carry the project into immediate execution.

[Editorial from the Marine Journal June 13, 1908.]

OUR DEAD IN HABANA HARBOR.

[From the New York Sun.]

When Representative SULZER made his appeal in the House recently adjourned for an appropriation to raise the wreck of the *Maine*, he obtained consent to print in the CONGRESSIONAL RECORD the following letter from Rear-Admiral F. E. Chadwick, now on the retired list:

"Admiral Luce has sent me your letter to him in regard to raising the *Maine*. He suggests that, as a member of the board of inquiry upon the cause of her loss, I give you my views in the matter.

"I have always held that the ship should be raised and the work be done in a way to allow a thorough examination of her condition as she lies. This would, of course, require the building of a cofferdam which could be pumped out. It should have been done at once after the war. While absolutely sure that the conditions will be found such as described in our report, the question of result should have no bearing in the matter. The board did its duty according to its lights, and I am sure that I can answer for the other surviving members, as well as for myself, in saying that we should welcome any new light which exposing the wreck might bring.

"Our failure to raise the wreck has undoubtedly given an impression to many of a want of openness and straightforwardness on the part of the Government. It is our duty to remove this. We can afford to say we were mistaken; we can not afford the imputation of fearing the truth."

We would remind Congress, which will adjourn in a few days, that not only the surviving members of the *Maine* board of inquiry, but the veterans of the Spanish war, as the resolutions of many of their posts attest, maintain it to be the duty of the Government to raise the wreck of the *Maine* and give sepulture in American soil to the bodies of the American sailors that were never recovered. Theirs would have to be a common grave, because Congress for ten recurring years has failed to execute a purpose to which it should have been moved by humanity as well as by patriotism. The place for that grave is the national cemetery at Arlington.

[Editorial from New York Sun, May 19, 1908.]

OUR DEAD IN HABANA HARBOR.

When Representative SULZER made his appeal in the House last week for an appropriation to raise the wreck of the *Maine* he obtained consent to print in the CONGRESSIONAL RECORD the following letter from Rear-Admiral F. E. Chadwick, now on the retired list:

"Admiral Luce has sent me your letter to him in regard to raising the *Maine*. He suggests that as a member of the board of inquiry upon the cause of her loss I give you my views in the matter.

"I have always held that the ship should be raised and the work be done in a way to allow a thorough examination of her condition as she lies. This would of course require the building of a cofferdam which could be pumped out. It should have been done at once after the war. While absolutely sure that the conditions will be found such as described in our report, the question of result should have no bearing in the matter. The board did its duty according to its lights, and I am sure that I can answer for the other surviving members as well as for myself in saying that we would welcome any new light which exposing the wreck might bring.

"Our failure to raise the wreck has undoubtedly given an impression to many of a want of openness and straightforwardness on the part of the Government. It is our duty to remove this. We can afford to say we were mistaken; we can not afford the imputation of fearing the truth."

We would remind Congress, which will adjourn in a few days, that not only the surviving members of the *Maine* board of inquiry, but the veterans of the Spanish war, as the resolutions of many of their posts attest, maintain it to be the duty of the Government to raise the wreck of the *Maine* and give sepulture in American soil to the bodies of the American sailors that were never recovered. Theirs would have to be a common grave, because Congress for ten recurring years has failed to execute a purpose to which it should have been moved by humanity as well as by patriotism. The place for that grave is the national cemetery at Arlington.

Twice every year—on the anniversary of the day when 231 American seamen sank to their death in the shattered hull of the *Maine* and again on Memorial Day—the neglected wreck in Habana Harbor is decorated with appropriate ceremonies. Shall it always be the shroud of the dead forgotten by Congress?

As long as the poor relics of a once gallant crew are abandoned to the offices of the sea the American flag waving over the spot will be a reminder of the reproach, not the glory, of a nation. Ten minutes of the time of the House would remove that reproach. We are sure that the Representatives agree with the board of inquiry, with the Spanish war veterans, with the American people, that the wreck of the *Maine* ought to be raised, reveal what it may. Mr. SULZER challenged any Member of the House to stand up and object, and not a man spoke.

We urge Mr. SULZER to make one more appeal to his fellow-Representatives before they return to their homes to take part in the beautifull Memorial-Day ceremonies—one more appeal in behalf of the unburied dead that lie in the ooze of Habana Harbor.

[Editorial from New York Evening Sun, February 20, 1909.]

PAYING THE PRICE OF NEGLECT.

The latest development in the matter of raising the *Maine* from the mud and slime of Habana Harbor, where it entombs the mortal remains of some three-score of the bluejackets and marines who went down with the battle ship, is that inquiry will be made to determine the feasibility as well as the cost of the project. What question of feasibility is there, what question can there be, when national honor and duty, too long unheeded, make the raising of the *Maine* imperative?

As for the question of cost, it is to be hoped that there is no suggestion in the proposed inquiry implying the provision of an excuse to Congress for not doing at all that which should have been done long ago. Of course the price may, in the opinion of hard-headed Congressmen, who have so much use for Government expenditure in their own districts, be regarded as a pretty stiff one to pay for a lot of dead sailors of our navy—there were 63, were there not, whose bodies were never recovered from the wreck?—and for the shattered hulk of the battle ship whose destruction precipitated one of our wars. It would have been easier to raise the *Maine* then than it is now, and it would not have cost so much had Congress provided for this discharge of a plain duty, this fulfillment of a patriotic obligation when it was first urged upon its attention some years since, and the greater cost of the task now will be a memorial to congressional neglect.

Still, whatever the price of neglect, it looks as though the country would demand that it be paid, for recognition of the fact that the *Maine* ought to be raised is fast becoming the categorical imperative—"Raise it!"

[Editorial from Rutherford American, February 25, 1909.]

COMMENT BY THE WAY.

The wreck of the battle ship *Maine* in Habana Harbor should be raised. Surely time enough has elapsed since the Spanish-American war for this work to be done, and the demand of 100,000 Union and Confederate veterans and Spanish-American war soldiers should not be ignored. A little paragraph from a letter of Rear-Admiral Chadwick, retired, seems to us to fit the case exactly: "Our failure to raise the wreck has undoubtedly given an impression to many of a want of openness and straightforwardness on the part of the Government. It is our duty to remove this. We can afford to say we were mistaken; we cannot afford the imputation of fearing the truth."

[From Newark News, February 23, 1909.]

A NATIONAL REPROACH.

ARLINGTON, *February 22, 1909.*

To the Editor of the News:

SIR: No degree of heartless indifference and unconcern for a nation's dead and the honors due "the last full measure of devotion" to service under the flag of any civilized nation can be compared to that which is openly and justly charged against the General Government of the United States in its treatment of the wreck of the battle ship *Maine* and the dead which it has entombed since her terrible taking off in 1898.

Individual and associate survivors of the Union armies are perhaps more impressed, or sensible to, the immediate demoralizing effect of this flagrant national indifference upon those who would identify themselves with service in our army and navy, and the work of enlistments generally, which is now almost in a state of alarm in its search for desirable recruits. What can we say against the worst that has been charged to the administration at Washington when Governor Magoon deliberately reports in reference to the famous wreck lying in Habana Harbor as follows? "Thousands of Americans and other thousands of other nationalities, annually enter the harbor of Habana, and probably not one omits to express regret and censure for the deplorable spectacle. It has become a national reproach and an international scandal."

Yours, truly,

ALFRED KING.

[Editorial from New York Sun, February 21, 1909.]

WHY NOT PASS THE SULZER BILL?

We observe that the sundry civil appropriation bill as reported to the House on Friday contains a provision authorizing the President to invite proposals for removing the wreck of the *Maine* from the harbor of Habana and to furnish Congress with the estimates.

As about eight working days of the session remain, and the call for bids and the responses would apparently consume more time, the good faith of the House in this matter is not strongly in evidence, especially as legislation would be required if the wreck of the *Maine* is to be removed, and the House has not had an opportunity to vote on Representative SULZER'S bill, which directed the Secretary of the Navy to invite bids, accept the lowest, and have the wreck removed and the bodies of the dead buried at Arlington. The necessary arrangements with the Government of Cuba were provided for in Mr. SULZER'S bill, as well as the cost of the undertaking if in excess of a fund already available.

It is gratifying to see the House, so long inert under majority leadership, take any step that promises, however vaguely, the consummation so earnestly desired by the American people; but the easiest way, the most practical and fairest, if the Hon. WILLIAM SULZER is to have the credit that belongs to him for faithful and patriotic endeavor, is to pass his bill and send it to the President before March 4.

It is not too late to do this.

[From the New York World, Monday, February 22, 1909.]

ARBUCKLE ASKS UNITED STATES TO LET HIM RAISE THE "MAINE"—BROOKLYN MILLIONAIRE WHO FLOATED THE CRUISER "YANKEE" ANNOUNCES THAT NEGOTIATIONS ARE UNDER WAY—CONFIDENT HE CAN LIFT THE SUNKEN BATTLE SHIP—DECLARES THAT WORK SHOULD BE DONE TO SETTLE FOREVER THE CAUSE OF EXPLOSION.

John Arbuckle, who floated the cruiser *Yankee* from Spindle Rock after others had abandoned the task as hopeless, announced last night that he was in negotiation with the Government to raise the *Maine*. He declared with the utmost confidence that he can bring the battle ship to the surface and tow her to a dry dock with less difficulty than he had in floating the *Yankee*.

If he can obtain a reasonable appropriation and permission to make the attempt to float the battle ship, Mr. Arbuckle declares that he will surely be able to settle for all time the question whether the United States was justified in going to war with Spain because of the blowing up of the vessel in Habana Harbor in 1898.

Hundreds of thousands of words have been written which purported to show conclusively just what happened to the *Maine;* voluminous reports have been made by experts and amateurs as to whether the vessel blew herself up or struck a sunken mine. Not long ago a circumstantial story was published giving the details of the supposed plot, and how an American, to save his life, was compelled to touch off the mine.

NONE KNOWS WHAT HAPPENED.

But, in the most guarded way, it has for a long time been admitted by the government officials that nobody really knows to the last certainty just what actually happened.

"It is true that there have been negotiations between me and government officials in Washington," Mr. Arbuckle said last night at his

home in Brooklyn, "but anything to be said regarding the details of the negotiations should come from Washington.

"I would like nothing better than to undertake to raise the *Maine*, aside from all money considerations," he added. "It would be a patriotic act which somebody ought to undertake. I am deeply interested in the invention of compressed-air devices for raising vessels, and I am so thoroughly convinced that I have a device which would surely float the *Maine* that I am most impatient to get at the work.

"It is sincerely to be hoped that Congress will act favorably upon the proposed legislation looking to an appropriation to lift the battle ship. I realize that the experts have said it could not be done, but they said the same thing before the *Yankee* was raised.

DIVERS EXAMINE WRECK.

"I have had divers make as close an examination as possible of the sunken *Maine*, and the conditions involved in the undertaking. Informal plans, the length of time the work will probably require, and an approximate estimate of the cost have all been carefully figured out and laid before the proper authorities. Even the special compressed-air device that would be used has been planned, and I am all ready to go to work as soon as the proper authority is granted by the Government.

"The experts have overestimated the difficulties to be overcome. Conditions in Habana Harbor are much more favorable for such an undertaking than were the conditions we met with in floating the *Yankee*. In Habana Harbor the rise and fall of the tide are slight, and there never is a heavy sea. I should like to begin the work at once, but of course it will be necessary to wait until all possible complications are removed and an appropriation is granted by Congress. That may be soon or never, but, regardless of whether I have anything to do with the work, I thoroughly believe somebody ought to undertake the work. We have already waited too long, and in justice to ourselves, if not to Spain, there ought no longer to be any doubt as to just what happened to the *Maine*.

Mr. DOUGLAS. Mr. Chairman, I am sorry to run counter to the sentiment of my friend from New York [Mr. SULZER], for whom I have a warm esteem; but if this proposition be founded upon commercial reasons, then I say, let the Republic of Cuba remove the wreck of the *Maine*.

Mr. SULZER. You will not give Cuba permission to do it.

Mr. DOUGLAS. Excuse me. I can not be interrupted. I have but two minutes, and I did not interrupt the gentleman. In the second place, if it be a matter of justice, let the Kingdom of Spain remove the wreck.

Mr. SULZER. That would be a beautiful display of patriotism on our part, would it not?

Mr. DOUGLAS. As far as sentiment is concerned, there are no bodies left in the *Maine*. The bodies of the poor fellows who went down with the *Maine* have long since become food for fishes. To bring their ghastly remnants home would be simply to reopen the wounds in the hearts of their families and friends, which now, thank God, are measurably healed.

But, above all, it would reopen the old question as to how the *Maine* was sunk. We have a new *Maine* now in our navy, and I see no good reason, founded either in sentiment or anything else, why we should undertake the expense of raising the wreck from the harbor of Habana. The sinking of the *Maine* was not only a most dramatic event, but it marked an era in the history of this Republic and of the world. But eleven years have now elapsed; the Spanish war, with all of its tremendous results, so far as they have developed, are matters of history; and for my own part I believe that it is time to put aside the old war cry, "Remember the *Maine*," as a war cry, and to remember her only in connection with the triumphs of our soldiers and sailors and the great events to which the tragic destruction of that great ship was indeed the opening door.

Mr. GOULDEN. Mr. Chairman, I desire to compliment the committee on the excellent bill (H. R. 28245), with the accompanying report (No. 2205), now under consideration.

I am especially interested in this paragraph, page 196, which provides for the preliminary steps for the raising of the ill-fated battle ship *Maine*, a matter already too long delayed.

The item is as follows:

WRECK OF THE BATTLE SHIP "MAINE."

The President is authorized, with the consent of the Republic of Cuba, to invite proposals for the removal of the wreck of battle ship Maine from the harbor of Habana, and to communicate to Congress as soon as may be practicable estimates, based on proposals received hereunder, for the expense of such removal.

Monday, the 15th of this month, occurred the eleventh anniversary of the sinking of the *Maine*. On that day I introduced H. R. 28138, which I shall print in the RECORD as a part of my remarks.

Two other bills had previously been introduced by my colleagues from New York [Mr. SULZER and Mr. CALDER]. My bill was referred to the Committee on Appropriations. I at once followed this up with letters to each of the distinguished members of that committee, urging immediate action.

It is a matter of pride to every American citizen that the committee acted so patriotically in this matter and included the above item in the bill now being considered.

The press of the country—the New York Herald of the 14th instant and the Philadelphia Press of the 19th instant especially—had articles on this subject. In both cases these usually well-informed newspapers were in error. The strictures of the Herald writer are not applicable to the Committee on Appropriations, and that of the Press is evidently written without a knowledge of the provision in this bill.

With the consent of the committee, I shall publish both articles, and simply add that I trust that the provision will pass and that this shame on the Republic will be removed:

A bill (H. R. 28138) providing for the raising and removal of the wreck of the U. S. battle ship Maine, in Habana Harbor, and have the remains found therein brought to Washington for interment in the national cemetery at Arlington, Va.

Be it enacted, etc., That the President be, and he is hereby, authorized and directed to arrange for the raising and removal of the wreck of the U. S. battle ship Maine from the harbor of Habana, Cuba, and have the remains found therein brought to the city of Washington, D. C., for interment in the national cemetery at Arlington, Va.

SEC. 2. That such sum of money as may be necessary to meet all the requirements of this act is hereby appropriated, out of any money in the Treasury not otherwise appropriated, and the same is hereby made immediately available.

This was the bill introduced by me.

FORGET THE "MAINE!"

[By Rupert Hughes.]

[Copyright, 1909, by New York Herald Company. All rights reserved.]

"Forget the *Maine!*" That seems to be the revised watchword of our Navy Department. On February 15 flowers were placed on the ship whose stark and unburied bones had projected obscenely from the waters of Habana Harbor for ten years. This is the eleventh anniversary of the sinking of the historic cruiser.

The war brought on by the disaster has been fought and forgotten, and the cry "Remember the *Maine!*" has ceased to be even a topic for vaudeville punsters. The harbor in which the derelict lies, too low for beauty and too high for oblivion has been under our control for ten years.

The retirement of Governor Magoon on January 28 marks the second evacuation of Cuba by the United States. Many valuable properties have been brought away, but the *Maine* is left in the mud. This is not for any lack of efforts to induce those in authority to give her a decent burial. Even a dime-museum showman tried to buy her and bring her home. Even he was refused.

Why is the *Maine* not raised?

Echo answers, Why? Patriotism answers, Why?

Suspicion sneers, Why?

The day after the ship was sunk you could hardly have found an American who did not believe that she had been foully done to death by a treacherous enemy. To-day you can hardly find an American who believes Spain had anything to do with it. On the grounds of the most cynical common sense this feeling finds its strongest basis.

Such an act of perfidy would have been insanity at a time when Spain, unable to conquer the rebellious Cubans, was confronted with the menace of a stupendous ally, whom she was doing more than her historic pride permitted to appease. A Spanish man-of-war was most active in rescuing the wounded, and Spanish officers immediatey visited the wreck with offers of help, sympathy, and regret, and their behavior, as Captain Sigsbee himself recorded, was marked with "exquisite tact." The first bodies recovered were buried with military honors in a plat donated by the Spanish Government.

Almost before the war was started the belief that Spaniards sank the *Maine* was discarded for elaborate and complicated theories to the effect that the Cubans sank her in order to drive the United States to action. These theories are a little too ingenious to be convincing.

The Spanish and the Americans sent commissions and divers to examine the wreck. The Spanish commission reported that she was sunk by an internal explosion. Such an explosion has occurred on many war ships in our and other navies. It was only recently that the Japanese had such a disaster in the case of the cruiser *Matsushima*, which sank herself by internal explosion, with a loss of 107 lives.

The American board of inquiry, which was given every freedom and facility by the Spanish officers, came to the conclusion—

"That the ship was destroyed by the explosion of a submarine mine, which caused the explosion of two or more of her forward magazines;" and "that no evidence has been obtainable fixing the responsibility for the destruction of the *Maine* upon any person or persons."

This finding, admitting, as it did, that part of the damage was done by the *Maine's* own magazines, was accepted as sufficient in this country in spite of Spanish protests and the incredulity of foreign naval experts. President McKinley ordered Spain to get out of Cuba at once.

There is a story that an important dispatch from Spain was withheld, as an important dispatch from France was garbled by Bismarck on the eve of the Franco-Prussian conflict. In any case, war was declared April 25 and post dated April 21, 1898.

This was eleven years ago, and the *Maine* still lies in the ooze in a foreign harbor, an eyesore, a heartache, a blot on the escutcheon. Most of the bodies of the sailors were brought home to their native soil after some agitation. But 63 bodies were left in the wreck and have remained to add the last touch of impiety and shame to the scandal. Every conceivable reason urges that the ship also should be given honorable burial. Efforts were made to raise and bring home some of the Spanish wrecks after the naval massacre of Santiago. But no step has been taken to bring the carcass of the *Maine* to the light of day. Every crusade in this behalf has been squelched by the authorities. People are growing impatient, patriots indignant, skeptics intolerable, and the reiterated Why? Why? Why? is beginning to have the weight of an argument.

More people than would confess it have come quietly to this belief: "They will not raise the *Maine*, because they are afraid to. There are facts which only the muddy harbor of Habana can conceal."

Is this true?

If it is, there is the more reason for raising the ship.

Is the Nation itself to play the hypocrite, the coward, and the liar?

Shall Uncle Sam both fear and conceal the truth?

The *Maine* must be raised from the mud.

God said "Let there be light."

[From the Philadelphia Press.]

CONGRESS AND THE MAINE.

The only recognition which the eleventh anniversary of the sinking of the *Maine* in Habana Harbor secured in Congress is the introduction of a bill by Representative GOULDEN, of New York, for the raising and removal of the wreck from Habana Harbor. This bill does not stand the ghost of a show at this stage of the session. It might be incorporated as an item in some one of the appropriation bills still unacted upon, but apparently there is no such intention.

The sundry civil bill at the present time contains a provision for the creation of a commission to inquire into the question of raising the wreck of the *Maine*. This is better than nothing, but it postpones the raising of the *Maine* indefinitely, and even leaves the ultimate fate of that vessel in doubt. That wrecked American battle ship should be removed. This country owes that much to Cuba, as the wreck is an obstruction in Habana Harbor and a menace to navigation there. It operates, too, to shoal the harbor at that point. But there are more potent reasons why this country should act. The neglected wreck of an American battle ship in a foreign harbor is an unpleasant spectacle. National pride should prompt us to remove it. The bodies of 63 American seamen are supposed to be held in that wreck. The Goulden bill provides for their interment in Arlington Cemetery.

The proposal to raise the *Maine* is approved and strongly indorsed by practically the entire newspaper press of the country. It is hard to understand the indifference of Congress to this matter. The American fleet is coming home after a triumphant voyage around the world. The national pride in this fleet and its great achievement is naturally just now very strong. It is a good time to remember the fleet of 1898 and make an honorable and suitable provision for the first and only great sacrifice in our conflict with Spain and give honorable burial to the American seamen whose bodies are imprisoned in the sunken battle ship in Habana Harbor.

I regret more than words can express the fact that the item has gone out on a point of order. It may be new legislation, and therefore not properly on an appropriation bill. The Committee on Naval Affairs, before which the bill of my colleague [Mr. SULZER] has been for several years, should take this matter up and report out a bill to raise the *Maine*. This is a duty devolving upon this Government, and Congress should insist upon its being done.

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having resumed the chair, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 27523) making appropriations for the diplomatic and consular service for the fiscal year ending June 30, 1910.

SUNDRY CIVIL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

Office of the Deputy Public Printer: Deputy Public Printer, $4,500; inspector of paper and material, $2,000; 1 clerk of class 4; 2 clerks of class 1; 1 clerk, $900; 1 chemist, $1,400; 1 messenger, $840; 1 messenger boy, $420; in all, $14,260.

Mr. MANN. I ask unanimous consent——

Mr. PERKINS. I make a point of order, which I am entirely willing to reserve until the gentleman from Illinois [Mr. MANN] has said what he wishes to say.

Mr. MANN. I wish to ask unanimous consent to return to line 3 on that page and strike out the words "of Representatives," so that it will read: "House Office Building."

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to return to line 3, page 198, and to strike out the words "of Representatives." Is there objection?

There was no objection.

The amendment was agreed to.

The CHAIRMAN. Will the gentleman from New York now state his point of order?

Mr. PERKINS. I make a point of order against the following words, in lines 9 and 10, page 199:

Inspector of paper and material, $2,000.

There is no such office. If this bill passes in the form in which it is drawn, it will create a new office, and therefore is subject to a point of order. I think the committee probably intended to make an appropriation for an officer created by statute, who is not an inspector of paper and material, but who is officially created to represent the Joint Committee on Printing, to act in various particulars, to examine material and other articles received by the Printing Office, to see whether they correspond with the requirements of contracts. That, I imagine, is the official whom the Committee on Appropriations had in view. If the gentlemen of the committee will allow me to offer an amendment designating this official properly, I will withdraw the point of order.

Mr. SMITH of Iowa. What is the proposed amendment?

Mr. PERKINS. The proposed amendment is to insert, after the word "material," in line 10, page 199, the words:

As provided for in section 20 of an act to provide for the public printing and binding, approved January 12, 1895.

I think that is what the committee had in view, but the designation given here is not a proper one, as it does not describe all his duties.

Mr. TAWNEY. We accept the amendment.

The CHAIRMAN. The Chair understands the gentleman from New York to withdraw his point of order and to offer an amendment, which the Clerk will report.

Mr. TAWNEY. It is the same man the gentleman is talking about.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 199, line 10, after the word "material," insert the words "as provided for in section 20 of an act to provide for the public printing and binding, approved January 12, 1895."

The amendment was agreed to.

The Clerk read as follows:

Except the appropriations for salaries in the office of the superintendent of documents, and for stores and general expense for the office of the superintendent of documents, all appropriations made herein under "Government Printing Office" shall be considered in apportioning the allotments for printing and binding to the several executive departments, bureaus, and independent offices of the Government: *And provided further*, That no other fund appropriated by this act, or any other act, shall be used for services or other purposes in the Government Printing Office, or in the office of the superintendent of documents, of the character specified in the foregoing paragraphs, except in cases of emergency arising after the passage of this act, and then only on the written order of the Public Printer; and the aggregate of all salaries or other expenses thus paid, in addition to those specifically appropriated for above, shall be reported to Congress each year in connection with the annual estimates.

Mr. PERKINS. Mr. Chairman, I make a point of order against the provision beginning on page 202, line 10, down to the word "Government" in line 17, on the ground that it is new legislation.

Mr. TAWNEY. I submit that the point of order comes too late, we have passed that paragraph.

Mr. PERKINS. Oh, no; this is just at the close of the paragraph just read. There are two provisos contained in the paragraph and the point of order is as to the first proviso.

Mr. TAWNEY. I desire to ask the gentleman from New York, who has had a very wide experience on the Committee on Printing, what objection he has to requiring that the expenses of the office of the Public Printer, the amounts appropriated for holidays and half holidays, the amount appropriated for annual leaves, and the amount appropriated for the Deputy Public Printer's office be included in the aggregate cost of the public printing or the maintenance of our public-printing establishment—this provision excepts from the cost only the expense of the superintendent of documents—and whether he does not think that the exception should be made from the expense of maintaining the institution?

Mr. PERKINS. In reply to the question put by the gentleman from Minnesota, I will say that I make the point of order because I think it furnishes an instance of the evil of attempting legislation on appropriation bills.

Mr. SMITH of Iowa. May I ask the gentleman just what it is that his point of order runs to? I can not understand from his reference to the first proviso.

Mr. PERKINS. It includes line 10 and all the lines down to the word "Government," in line 17. It is not a restrictive proviso, it is a regulation; I beg the gentleman's pardon.

There has been a great deal of trouble, as is known to Members of the Printing Committee, and perhaps to some extent to some others in the House, with reference to the method in which the departments should be charged for the work done. Under the law as it now is the department is charged for the work out of the appropriation which is allowed that department. For instance, if a department was allowed $100,000, the work done is charged up by the Public Printer, and when that amount is exhausted its right to public printing is exhausted.

That matter, as it stands now, is in the hands of the Public Printer, and during the changes of Public Printers—during the last few years several extreme and unfortunate changes have been made—the departments have complained, and I think with some justice, that it was impossible for them to make estimates of the amount that they should reasonably ask, because, beginning first with an estimate of printing at a certain price, before the appropriation had run out they have been met with estimates of a very much larger price, and they are entirely helpless in the hands of the Public Printer.

Now, the Joint Committee on Printing, which has been endeavoring and has succeeded in largely increasing their actual superintendence over the printing department, believing it to be in the interest of economy and good government that that control should be still further increased, have reported a bill which is now on the calendar, but which can not be considered in the

few days left of this session. In that we have adopted, after a good deal of care, a system of fixed prices that should be charged for the various work that is done, and giving the superintendence, where I think it should be given, to the Joint Committee on Printing, so that if there is any trouble or controversy between the department and the Public Printer that committee will have the final decision.

The adoption of the legislation contained in this bill, although I doubt not the provision was put in with the best intentions, is one making a temporary change that would be of no value. The point of order is not made with the intent that there shall be no legislation on the subject, for the committee has prepared with great care a bill, and as soon as it can will bring before the House for action a carefully regulated system; and for this reason I feel bound, on behalf of the committee, at this time to make a point of order against the provision contained in the bill.

The CHAIRMAN. The paragraph against which the point of order is made seems clearly to involve legislation changing existing law upon a general appropriation bill—contrary to the rule. The point of order is therefore sustained.

Mr. TAWNEY. Mr. Chairman, I offer the following amendment in place of the matter stricken out. It is a limitation on the appropriation not subject to the objection of the gentleman from New York.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

In expending the sums herein, under the Government Printing Office, there shall be included in determining the cost of printing and binding all such sums except those for and under the office of the superintendent of documents.

Mr. PERKINS. Mr. Chairman, I beg to save the point of order on that. It is plainly legislation and limiting the authority of the Public Printer.

Mr. TAWNEY. Mr. Chairman, it does not limit the discretion of the Public Printer in the least, and I think the amendment is clearly in line with the decision of the Chair on the point of order made against the amendment of the gentleman from Nebraska. This, Mr. Chairman, limits the expenditure of this appropriation which is made for the public printing of all branches of the Government, including congressional printing. It does not in any way change or affect any existing law, and it is providing that of the amount thus appropriated and expended the expenditures on account of the office of superintendent of documents shall not be charged against the appropriation for public printing and binding.

Mr. PERKINS. Mr. Chairman, I wish to direct the attention of the Chair to the law:

That when any department shall require printing or binding to be done, the Public Printer shall furnish an estimate of the cost of the principal items for such printing and binding, so called upon, after which requisitions shall be made by him upon the department, and he shall place the cost thereof to the debit of such department.

The CHAIRMAN. The Chair is prepared to rule. It seems to the Chair that this amendment is legislation. It does not limit the purpose for which the sums may be appropriated, but directs the manner in which the cost of printing and binding shall be determined. The Chair sustains the point of order.

Mr. HEPBURN. Mr. Chairman, I move to strike out the last word. I do so for the purpose of asking the chairman if he can inform the committee of the total cost of the Government Printing Establishment.

Mr. TAWNEY. Does the gentleman mean the total annual cost?

Mr. HEPBURN. Yes.

Mr. TAWNEY. The appropriation for the current fiscal year is $5,690,790, and the amount carried in this bill is $5,682,290.

Mr. HEPBURN. Does that include all of the printing of the various departments?

Mr. TAWNEY. Yes.

Mr. HEPBURN. As well as the congressional printing?

Mr. TAWNEY. Yes.

Mr. HEPBURN. Does that sum include the sum of $200,000, or so much as may be necessary, to pay for holidays?

Mr. TAWNEY. Yes.

Mr. HEPBURN. Does it also include the sum of $325,000, or so much as may be necessary, to pay for services of annual leaves?

Mr. TAWNEY. Yes. Let me state also to the gentleman that the Committee on Printing want to exclude that cost of $525,000 from the cost of printing for the various departments, and pay it out of the Treasury.

Mr. HEPBURN. Will the gentleman now kindly answer another question? I think that some of these employees are paid by the day and some of them by the piece and some of them by the hour. How are their services estimated, valued, for the purpose of the half holidays and the purpose of the annual leaves?

Mr. TAWNEY. They are estimated on the basis of the average product of their labor while engaged in the service of the Printing Office, just the same as they are in the office of the Bureau of Printing and Engraving, where per diem men are allowed pay. The average price for the time employed during their service determines the amount of compensation they shall receive for doing nothing.

Mr. HEPBURN. Then a man would get part payment for three hundred and sixty-four days for the one day of extraordinary labor that he happened to perform.

Mr. TAWNEY. Yes; when he was not in the institution. Mr. Chairman, for the purpose of making a statement which has been suggested by the inquiry of the gentleman from Iowa, I shall move to strike out the two last words. I do not think this House or the country has any idea of the amount of money paid out by the Government of the United States to the employees here in the District of Columbia annually for holidays, half holidays, and for annual leaves. For that purpose, or for the purpose of getting this information before the House and the country, I interrogated the Public Printer and ascertained how much was expended on account of half holidays by Executive order and how much on account of whole holidays and how much on account of annual leaves, and for the first time these several amounts are specifically appropriated for in this bill.

The total number of employees in the Government Printing Office is 4,000. That, we will assume, represents one-seventh of the total number of employees in the District of Columbia. The total amount appropriated and expended by the Government to the employees of the Printing Office for annual leaves, whole holidays, and half holidays being $525,000 a year, would be one-seventh of the total amount required to meet the amount paid for holidays and for annual leave for all the clerks in the government service here in Washington, which amount is in the neighborhood of $4,000,000 annually, and that amount is exclusive of the annual sick leave.

Mr. COX of Indiana. Mr. Chairman, I beg the gentleman's pardon, but I could not understand what the gentleman said. I did my best to understand the gentleman, but could not do so, and I desire to ask the gentleman for some information. Can the gentleman inform the committee about how much the total salaries amount to that are paid out in the District of Columbia in the various bureaus here?

Mr. TAWNEY. The total salaries—I can not. I was talking about the total amount paid for half holidays, whole holidays, and annual leave, exclusive of annual sick leave, one-seventh of which is the amount carried in this bill $525,000.

Mr. COX of Indiana. I found in the hearings, I think, a statement that there was a loss to the Government on account of leaves of absence amounting to something like three and a half million dollars a year.

The Clerk read as follows:

For printing and binding for Congress, including the proceedings and debates, and for rents, $1,141,232. And printing and binding for Congress chargeable to this appropriation, when recommended to be done by the Committee on Printing of either House, shall be so recommended in a report containing an approximate estimate of the cost thereof, together with a statement from the Public Printer of estimated approximate cost of work previously ordered by Congress, within the fiscal year for which this appropriation is made.

Mr. SULZER. Mr. Chairman, I desire to ask the gentleman from Minnesota if this appropriation for the Public Printer will be sufficient to print all the proceedings incident to the taking of the next census if the bill to take the next census should require it to be done by the Government Printing Office?

Mr. TAWNEY. No; we do not carry in this bill at all for the printing incident to the taking of the next census.

Mr. LIVINGSTON. There is no law authorizing any appropriation whatever.

Mr. SULZER. Oh, I know that. The census bill will be passed in the extraordinary session of the next Congress, and I am in favor of the census printing being done by the Government Printing Office instead of being done by private concerns. That is all, and the gentleman from Minnesota has answered my inquiry.

The Clerk read as follows:

For printing and binding the annual report of the director, monographs, professional papers, bulletins, water-supply papers, and the report on mineral resources, $140,000; and said amount shall cover all printing and binding on account of said publications of the Geological Survey.

Mr. PERKINS. Mr. Chairman, I make the point of order against lines 3 to 8, inclusive, on page 207, on the ground it is an authorization contrary to the provisions of law.

The CHAIRMAN. The Chair will hear the gentleman from Minnesota.

Mr. TAWNEY. I will say, Mr. Chairman, that there is a statute expressly providing for specific appropriations for printing and binding for the Geological Survey.

Mr. PERKINS. Yes; but the point of order is not made on that. The statute of 1907, Mr. Chairman, approved March 30, 1906, provides, with all documents originating from any department, which includes the Geological Survey, where a certain portion of the documents are taken by the department and a certain portion by Congress, after the initial cost of typesetting, that the further cost of printing and binding shall be divided between the department and Congress in proportion to the amounts that are allotted to those respective bodies.

The act as it is reported here complies with that provision of law with reference to appropriations made for the various departments except in reference to the Geological Survey. Here, as the Chairman will see, is an appropriation of $140,000, and it violates the law by covering all the printing and binding on account of publications of the Geological Survey. In other words, Mr. Chairman, the provision here is in the same form of last year, and it is by reason of the inconvenience that arose last year that I make the point of order. When it comes to the publications of the Geological Survey, the Public Printer, instead of dividing the cost between the department and the Congress, as he does in reference to all other appropriations where there is a publication that is sent partly to Congress for distribution and partly to the department for distribution, can make no such division under his clause, because it says that the $140,000 is the entire amount on account of publications of the survey. There is therefore no possibility of a division, and the practical results have been this: The last appropriation was $175,000 altogether, the same as is in the present appropriation bill, $35,000 of which, under the first clause, is for bulletins, and so forth; $140,000 for other publications; in all, $175,000.

Now, under the distribution as provided by law, if Congress had taken the portion of the publication to which it was entitled there would have been charged against the Congress $89,000 and the $175,000 would have been charged, $86,000 to the department and $89,000 to the Congress, but as a result of the provisions directed by the Joint Committee on Printing, which have become part of the law, the entire publication authorized is not now printed by the Public Printer. He is directed by the Joint Committee on Printing, if, for instance, 10,000 copies are authorized, to print only, we will say, 5,000, and if the 5,000 are exhausted then he is directed to print a further edition. If, as is often the case, the second edition equals the supply, then the further editions are never printed. The result was that in the last year, of the $89,000 of publications of the Geological Survey which the Congress was entitled to take, it did take only $52,000 for its share. The balance, to be called for by Members of Congress, was never allotted to the Congress.

Now, as a result of the provision being in the same form as it is now, there is not a saving of $37,000, which there would have been if the provision in reference to the Geological Survey had been drawn in compliance with the requisites of the law. The Geological Survey is unable to say what amount of money it can actually draw, because no man can say how much the Congress will take. It was entitled to take $89,000 last year, but only took $52,000. Whether it would take the full $89,000, or whether it would take $52,000, no man could say in advance. The Public Printer had no right to allow the $37,000, and for this reason, Mr. Chairman, because this provision is contrary to the provision of the law, I feel bound to make the point of order against it, because it works both unfortunately and expensively.

The CHAIRMAN (Mr. MANN in the chair). Does the gentleman from New York make the point of order on the entire paragraph? Will the gentleman from New York state whether he makes the point of order on the ground that the printing and binding of these reports is not authorized at all?

Mr. PERKINS. I do not.

The CHAIRMAN. Or on the ground that it is authorized to be done in another manner?

Mr. PERKINS. The ground is on the statement that "said amount shall cover all printing and binding on account of said publications of the Geological Survey;" shall be charged in part to the congressional allotment and in part to the Geological Survey.

The CHAIRMAN. The Chair will hear from the gentleman from Minnesota [Mr. TAWNEY].

Mr. TAWNEY. Mr. Chairman, the gentleman from New York concedes that the publication of all the reports of the director, the monographs, professional papers, bulletins, water-supply papers, and the report on mineral resources are all authorized by law in the appropriation for the printing of all these provisions. Now, in accordance with his interpretation of the law, there should be an apportionment of this appropriation. The law does not specifically require the appropriation act to make this apportionment. If the law specifically directs an apportionment of the appropriation, the provision authorizing or making the appropriation is not necessarily out of order or in violation of the law which authorizes the appropriation to be made for this printing. This is the provision that has been carried in this appropriation for many years, and it is there in pursuance of an express provision of the statute. Now, if the gentleman's interpretation of the law is correct, that we should in submitting the appropriation apportion that appropriation, then the point of order might be good, but I submit that inasmuch as he concedes the authority for the appropriation the manner in which the appropriation is made does not make this appropriation obnoxious to the rule.

The CHAIRMAN. Does the gentleman from New York [Mr. PERKINS] make the point of order on the entire paragraph or on the last clause?

Mr. PERKINS. I suppose that is objectionable, except that if the last clause goes out there should be a modification in the amount. I would suggest to the gentleman from Minnesota——

Mr. TAWNEY. The last clause is the limitation as to the cost of all printing.

Mr. PERKINS. I suppose that makes the whole paragraph objectionable.

The CHAIRMAN. The Chair is prepared to rule. The paragraph provides for the printing and binding of certain publications of the Geological Survey, making an appropriation of $140,000, and contains this clause:

And said amount shall cover all printing and binding on account of the publications of the Geological Survey.

Without that clause no more money than the $140,000 could be expended unless the law now provides for the publication in some other manner and directs publication. If the law now provides for the publication of the report so that the expense will be over $140,000, or even if there is no provision of law, this in the one case would change the existing law and in the other case would create new law, so that it is obnoxious to the rule. The Chair, therefore, sustains the point of order.

Mr. PERKINS. Mr. Chairman, I offer the amendment which I send to the desk.

The Clerk read as follows:

On page 206, after line 22, strike out all up to and including line 8, on page 207, and insert in lieu thereof the following:
"For printing and binding the annual report of the director, monograph, professional papers, bulletins, water-supply papers, and the report on mineral resources, and including not exceeding $35,000 for engravings and illustrations necessary therefor, $135,000; and said amount shall cover all printing and binding and engraving on account of said publications for the Geological Survey."

The CHAIRMAN. Does the gentleman ask unanimous consent to return to the paragraph for the purpose of offering the amendment?

Mr. PERKINS. Yes; I do.

Mr. TAWNEY. I object.

The CHAIRMAN. The gentleman from New York asks unanimous consent to return to page 206 for the purpose of offering an amendment. Is there objection?

Mr. TAWNEY. I object.

Mr. PERKINS. I offer a new paragraph.

The Clerk read as follows:

Insert in lieu of the paragraph stricken out:
"For printing and binding the annual report of the director, monograph, professional papers, bulletins, water-supply papers, and the report on mineral resources, $100,000; and said amount shall cover all printing and binding and engraving on account of said publications for the Geological Survey."

Mr. TAWNEY. Mr. Chairman, I make the point of order against that.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman.

Mr. SMITH of Iowa. The point of order was made against the amendment offered by the gentleman from New York.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

For the Department of Agriculture, including not to exceed $25,000 for the Weather Bureau, and including the Annual Report of the Secretary of Agriculture, as required by the act approved January 12, 1895, and in pursuance of the provisions of public resolution No. 13 of the first session Fifty-ninth Congress, and also including not to exceed $125,000 for farmers' bulletins, which shall be adapted to the interests of the people of the different sections of the country, an equal proportion of four-fifths of which shall be delivered to or sent out under the addressed franks furnished by Senators, Representatives, and Delegates in Congress, as they shall direct, $460,000.

Mr. McHENRY. Mr. Chairman, I move to strike out, on line 20, page 207, the word "twenty" and insert in its place the word "seventy."

The Clerk read as follows:

Page 207, line 20, strike out "twenty" and insert "seventy."

Mr. McHENRY. Mr. Chairman, every farmer in the United States and every other person interested in the farmer or in agriculture should have free access to the valuable information collected by the Department of Agriculture. But under the limited appropriation you prevent this by not providing the Secretary with sufficient funds for the publication of bulletins, reports, and so forth, and the general dissemination of information resulting from this national department for scientific research.

Agriculture represents the most important wealth-producing industry in the world. The farmer is the man who keeps the wheels of industry moving. During our recent panic it was the farmer alone, through the selling of his products in foreign markets, who saved the trade balance in our favor. The farming industry is the one industry which has saved the finances of the country from absolute ruin during the past eighteen months of panic. The farmer bears the greater share of the burden of taxation and receives less recognition, less protection, and less return from the National Government than any other class of men.

In this amendment which I have offered, asking for a wider distribution of farm literature by the Agricultural Department, I am not asking any special favor for the farmer. I am simply asking that this department shall be made of direct and material assistance to the great industry which it represents. The farmer is paying for this information. Why should he not have it? If the Agricultural Department is doing good work (and of this there can be no doubt), let the farmers know about it. If the Agricultural Department makes a new discovery or propounds a new scientific theory of practical value, then our 6,000,000 American farmers should be immediately advised of the departmental finding in order that they may try out these experiments in a practical way on their farms.

There has been much discussion with reference to the conservation of our natural resources. To conserve the soil, to increase its fertility, to produce greater crops from the same number of acres of land and the same amount of labor presents the true principle of practical economics and the true and most valued source of natural resource conservation. The American farmer owes a duty to posterity. The old farm homestead should be handed down to the future generation in a higher state of production and greater fertility than when received by the present generation from their ancestors. But we find, on the contrary, an alarming decline in soil fertility. I know of abandoned farms in my State. They are to be found all throughout the East and South. I know of farms being offered for sale at prices but little above the actual cost of the farm buildings.

The abandonment of the soil is an infallible danger signal of national decline. We see our farm boys by the hundreds of thousands leaving the old farm homes for the seemingly more alluring employment of the factory and mill. This is caused in many cases by sheer necessity. In others by isolation and smaller remuneration. To keep the boys on the farm, farm life must be made both attractive and profitable, and in this particular the National Bureau of Agriculture can render great services.

We spend hundreds of millions of dollars on the navy and army and forestry reservation, but give grudgingly of our support to the one industry most important to national welfare.

Now, is it not better for the country to restore and maintain the fertility of these lands than to spend untold millions of dollars in the national irrigation and land-reclamation schemes, which are of doubtful merit and uncertain results? The time is coming when every inch of available soil must be made productive. The time is coming, and that, too, within a period of twenty-five years, when we shall have to import foreign wheat to feed the American Nation; and when that time comes, Mr. Chairman, may God pity the workingman who has to buy bread for his family.

Mr. Chairman, I am proud of my State and of my district. The Pennsylvania farmer ranks second to none anywhere. He lives like a prince. He is giving to the world its finest specimens of manhood and womanhood. He is a business man. He is a student. He knows that there are greater possibilities in his soil than he has yet produced.

He appreciates the cooperation of the Government and he wants to know what the Agricultural Department is doing, which is his right and privilege.

Under the present method of distribution of farm bulletins and documents each Member of Congress is allotted 10,000 copies. Mr. Chairman, I have 10,000 farmers in my district. The department has issued during the past year 10 different bulletins which would be of interest to the Pennsylvania farmer. Every farmer should have not only one of these bulletins but all of them. If they are not of value they should not be published. If they are of value, then every farmer or every man who has a garden should be entitled to receive the bulletins if they want them.

During the last year I have distributed over 50,000 bulletins in addition to my congressional allotment. I have done this at my own expense. Our farming industry represents about 40 per cent of the entire population of the country. The farmer, as I have said, pays the greater portion of both direct and indirect taxes. Now let us see how he fares at the hands of the National Government in the matter of appropriations. We have appropriated $200,000,000 for war purposes. We have appropriated $32,000,000 available for a secret service spy system. We have appropriated $10,000,000 for the Indians. In the limited time I have I can not enumerate the various appropriations.

The sundry civil bill, which we now have under consideration, carries an appropriation of $137,000,000, of which for the purpose of agriculture we appropriate $12,000,000, and of this amount allow $125,000 for the placing of this information in the hands of the farmers.

Mr. Chairman, I think the American farmer is at least entitled to as much consideration as the Indian. We give to the Indians the very best lands in the United States. We build and maintain for them free schools and colleges. I am not finding any fault with the Indian appropriation; but I do think that if the common or high school education is good enough for the American farmer boy, it ought to be good enough for the Indian; and if it is the purpose of this National Government to continue its policy of building and maintaining colleges and seminaries for the Indians, then it is time that we take under consideration the building of agricultural high schools and colleges for the boys and girls of the American farmers and American workingmen.

We are not asking this now; we simply want the Department of Agriculture to be put upon a business basis and contribute real service to the farmer. We are not increasing the cost of the department. Our fixed charges there each year are practically the same; but if the country is to get an adequate return for the annual expenditure of $12,000,000 for the maintenance of the Agricultural Bureau, this return will have to come, like nearly everything else, from the direct energies of the farmers.

There are thousands of farmers in the United States to-day who do not know that an Agricultural Department exists at Washington. At this session of Congress we appropriated the enormous total of $1,000,000,000. Of this amount, 1 per cent is applied to the farming industry, while, according to the recent published interview of our able chairman of the Appropriation Committee, 70 per cent of our total appropriations are applied for the purposes of war. One per cent for production, 70 per cent for destruction. Maintain this ratio of governmental expenditures for a few years longer and our experimental Republic will be but a repetition of the history of fallen nations of the world.

We wonder why in the midst of a panic the prices of the farm products have continued at a high level. In this connection I ask permission to insert in the RECORD an editorial which I read this morning in the Washington Post:

Mr. James J. Hill, one of the most powerful intellects and one of the clearest minds in the country, a business man second to none in achievement, as well as in capacity, thinks the tariff a problem trivial compared with the graver matter of soil depletion and thriftless farming seen all over the country from ocean to ocean.

Mr. Hill declares that agricultural production has not kept pace with foreign immigration; and unless our farmers are taught how to enhance the fertility of their soil and at the same time increase the yield of their area, the whole thing will go to pot, or words of that import.

The tendency of immigrants to congregate in cities and industrial centers increases the burden upon the farmer in feeding the country. The disparity between production and consumption grows greater daily, in spite of the increase in farm products.

The French Canadians drove American artisans out of the mills and shops of New England and have themselves been driven out by Italians, who are being driven out by Slavs. Ninety per cent of our glass operatives are foreigners who know no English. The employees of the steel trust are 80 per cent foreign born. Of the school children of New York City, more than 20 per cent are foreign born, and more than 80 per cent are of foreign parentage. In Chicago the percentage is even more adverse to the native.

Thus it is that our urban population is above 50 per cent of the total. Is it any wonder that the American farmer is unequal to the occasion and unable longer to afford the American citizen that advantage of advantages—cheap food?

There can be no true prosperity which does not bring prosperity to all the people. If the cost of living equals or exceeds

the income of the workingman, it matter not what his wages may be; if it takes all his wages to live, he is not receiving his share of the general fruits of prosperity. With the decreasing fertility of the soil and the increasing population of our country, it follows inevitably that food products will become constantly dearer. We frequently say that the farmer is the backbone of the country, but we rarely stop to analyze this statement. The future of our country depends absolutely upon the farmer, and our National Agricultural Department has a work before it of great importance not only to the people of this country, but to all the world, and Congress should be broad enough and liberal enough to provide sufficient funds for carrying on this great work, and I trust the amendment which I have offered will pass the House.

In Pennsylvania we have a splendid state agricultural department and a splendid state college. But the National Bureau has an advantage over the state departments in the dissemination of information through the medium of free access to the mails. The National Agricultural Bureau should be a great national clearing house of agricultural development. In any event, the people have the right to know how the $12,000,000 annual expenditure of the National Bureau is being used. Through the mediums of these monthly reports and educational papers the people can determine for themselves. I am told there are over 2,000,000 volumes of various public documents which have accumulated during the recent years in the various departments. Various efforts upon the part of Members to secure them have been of no avail.

The Government Printing Office and our Educational Bureau should be discontinued if the result of their work, for which the taxpayers' money has been so lavishly used, is not placed in the home libraries of American citizens. Any effort upon the part of the National Government to encourage agriculture or to elevate the condition of the farmer and increase the productive capacity of the soil is worthy of our united support, and in this the people as a whole agree. The time is here for us to get back to the soil, to live simpler and more natural lives, and it is time for Congressmen to get back to the Constitution and spend the people's money in a manner which will bring about the greatest good to the greatest number. [Great applause.]

Mr. CHAIRMAN. The question is upon the amendment.

Mr. COX of Indiana. Mr. Chairman, may we hear the amendment reported again?

The amendment was again read.

The question being taken, on a division (demanded by Mr. MCHENRY) there were—ayes 52; noes 74.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I have an amendment which I wish to offer.

Mr. TAWNEY. I ask unanimous consent that all debate on the paragraph and amendments be now closed.

Mr. HUMPHREYS of Mississippi. I object, Mr. Chairman. I have an amendment.

Mr. TAWNEY. I move that all debate——

The CHAIRMAN. The gentleman from Mississippi is recognized for the purpose of offering his amendment, which the Clerk will report.

The Clerk read as follows:

After the word "direct," in line 2, page 208, add:

"*Provided*, That all such bulletins not ordered distributed prior to April 30, 1910, shall revert to the Secretary of Agriculture for miscellaneous distribution and for making up quotas for the next fiscal year."

Mr. SHERLEY. I make a point of order on that.

The CHAIRMAN. The Chair sustains the point of order.

Mr. HUMPHREYS of Mississippi. I move to strike out the last word.

Mr. TAWNEY. Now, I move that all debate on the paragraph and amendments be now closed.

The motion was agreed to.

The Clerk read as follows:

For the Department of Agriculture, including not to exceed $25,000 for the Weather Bureau, and including the Annual Report of the Secretary of Agriculture, as required by the act approved January 12, 1895, and in pursuance of the provisions of public resolution No. 13 of the first session Fifty-ninth Congress, and also including not to exceed $125,000 for farmers' bulletins, which shall be adapted to the interests of the people of the different sections of the country, an equal proportion of four-fifths of which shall be delivered to or sent out under the addressed franks furnished by Senators, Representatives, and Delegates in Congress, as they shall direct, $460,000.

For the Department of Commerce and Labor, including the Coast and Geodetic Survey, $375,000: *Provided*, That no part of this allotment shall be expended for printing and binding for the Bureau of the Census.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I move to strike out the last word. I have a letter here from the Agricultural Department, which I wish to print in the RECORD. I went to see the gentleman from Minnesota and tried to explain the matter to him——

Mr. TAWNEY. I have no objection to the gentleman printing the letter, but I make the point of order that he is not discussing the amendment.

Mr. HUMPHREYS of Mississippi. I should like to make a statement. If the gentleman will permit me to do that——

Mr. TAWNEY. I can not do it, Mr. Chairman.

The CHAIRMAN. The gentleman from Minnesota makes the point that the gentleman from Mississippi is not speaking to his amendment.

Mr. HUMPHREYS of Mississippi. That is entirely true, but I will only take a few moments. I tried to explain this matter to the gentleman from Minnesota here on the floor, and he declined to extend to me the courtesy of listening to me.

The CHAIRMAN. The gentleman desires unanimous consent to proceed for how long?

Mr. HUMPHREYS of Mississippi. Two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I have a letter here from the Chief of the Division of Publications in the Department of Agriculture, in explanation of the amendment which I have just offered. He says that the law was changed inadvertently, and that there are now, as a result of that change, 2,000,000 farmers' bulletins in the Department of Agriculture, carried over from last year, which are not available for general distribution; and he further says unless he is given the permission provided for in this amendment, an appropriation will be necessary to provide storage room, or else he will need authority to destroy them. They are accumulating there at the rate of 2,000,000 a year. This amendment simply provides that they may be distributed to the people for whom they are supposed to have been published. That is the purpose of my amendment, and I wanted to explain it to the House in the hope that the point of order would not be insisted on. I ask now to print this letter of the department in the RECORD in the hope that the reasons there set out so clearly may eventually appeal to the judgment of the Committee on Appropriations.

The CHAIRMAN. Is there objection?

There was no objection.

The letter is as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE,
DIVISION OF PUBLICATIONS,
Washington, D. C., February 23, 1909.

Memoranda for Mr. HUMPHREYS:

Provision for the printing for the United States Department of Agriculture for the fiscal year ending June 30, 1910, is contained in the sundry civil bill, H. R. 28425, page 207, as follows:

"For the Department of Agriculture, including not to exceed $25,000 for the Weather Bureau, and including the Annual Report of the Secretary of Agriculture, as required by the act approved January 12, 1895, and in pursuance of the provisions of public resolution No. 13 of the first session Fifty-ninth Congress, and also including not to exceed $125,000 for farmers' bulletins, which shall be adapted to the interests of the people of the different sections of the country, an equal proportion of four-fifths of which shall be delivered or sent out under the addressed franks furnished by Senators, Representatives, and Delegates in Congress, as they shall direct, $460,000."

The provision for the reversion of undistributed quotas of farmers' bulletins, which was inadvertently omitted two years ago when the provision for printing farmers' bulletins was taken out of the agricultural appropriation bill and included in the appropriation for general printing and binding for the department, where it now occurs, was as follows:

"*Provided*, That all such bulletins not ordered distributed prior to April 30, 1910, shall revert to the Secretary of Agriculture for miscellaneous distribution and for making up quotas for the next fiscal year."

If inserted, it would come in properly after the word "direct," in line 2, page 208.

On July 1, 1908, there remained to the credit of Senators, Representatives, and Delegates 2,071,563 Farmers' Bulletins to be carried over to their account for the fiscal year ending June 30, 1909. It is likely that a considerable number will not be called for this year, and will likewise have to be carried over after June 30, 1909. The disadvantage in this arrangement is that the bulletins are tied up and can not be used, while at the same time there are urgent requests for them which we are unable to supply; and, in the second place, our storage facilities are inadequate for the continued housing of uncalled-for bulletins. The insertion of the reversion clause would make them available for distribution April 30, both by the Secretary and by Senators, Representatives, and Delegates, to whom he could assign additional allotments. In other words, the bulletins could and would be distributed to the people for whose information they are printed.

JOS. A. ARNOLD.

The Clerk read as follows:

For the Supreme Court of the United States, $10,000; and the printing for the Supreme Court shall be done by the printer it may employ, unless it shall otherwise order.

Mr. FITZGERALD. I wish to ask the chairman of the committee an explanation of the paragraph that has just been read.

Mr. TAWNEY. I can answer in a word, Mr. Chairman. My colleague on the committee was absent when this provision went into the bill. That is the reason he is inquiring now.

The Clerk read as follows:

For the Library of Congress, including the copyright office, and the publication of the Catalogue of Title Entries of the copyright office, and binding, rebinding, and repairing of library books, and for building and grounds, Library of Congress, $202,000.

Mr. SULZER. Mr. Chairman, I move to amend by inserting, in line 19, page 208, after the words "two hundred and," the word "twenty."

The Clerk read as follows:

Line 19, page 208, after the words "two hundred and," insert the word "twenty."

Mr. SULZER. Mr. Chairman, just a few words in favor of my amendment. The copyright division is the most important bureau in the Library of Congress. The work being done there is a most important work along comprehensive lines. It is necessary for the chief of that division, in order to do the work pressing on him more and more every day, to have additional assistance, and this increased appropriation is necessary so that the work can be done properly and expeditiously. Mr. Solberg, the efficient head of this copyright bureau, is doing a most commendable work, and I am glad to know his labors are thoroughly appreciated by the people of this and other countries. He deserves well of the Congress, and he should have all the clerical help he requires to keep this bureau up to the highest standard of efficiency. I trust the amendment offered by me will be agreed to, so that this bureau of copyrights shall not be in any way hampered or impeded.

The question was taken, and the amendment was lost.

The Clerk read as follows:

The Public Printer may hereafter, in his discretion, pay printer-linotype operators and printer-monotype keyboard operators at a rate not exceeding 60 cents per hour: *Provided*, That when the exigencies of the service require that work be performed on Sunday the Public Printer may, in his discretion, pay to employees not receiving annual salaries not exceeding 50 per cent in addition to the regular rate paid for such work.

Mr. MACON. Mr. Chairman, I reserve a point of order against that paragraph for an explanation from the chairman as to its merits.

Mr. TAWNEY. The law governing the compensation of printers in the Government Printing Office does not include linotype or monotype operators. Therefore there is no fixed compensation for these men, while the compensation of all the other operatives in the Printing Office is fixed by statute. This is the rate now paid. It is a rate, however, below the rate paid in the large printing establishments in the large cities of this country. It is sometimes embarrassing to the Public Printer because of the pressure brought for increased compensation which he can not give without creating friction between these particular operatives and others outside who are receiving different compensation for like work. The necessity for this grows out of the fact that when the law was passed there was no thought of the Government ever employing a linotype or monotype operative. This is the rate they are now receiving.

Mr. MACON. You are simply trying to fix it by law?

Mr. TAWNEY. Yes.

Mr. MACON. What is the necessity for the law?

Mr. LIVINGSTON. So that it can not be increased.

Mr. MACON. Well, now as to the other provision:

Provided, That when the exigencies of the service require that work be performed on Sunday the Public Printer may, in his discretion, pay to employees not receiving annual salaries not exceeding 50 per cent in addition to the regular rate paid for that work.

Mr. TAWNEY. Until the 1st of January, or in the month of January, 1909, the operators or employees in the Government Printing Office who are employed on Sunday always received time and half time. In January the Comptroller of the Treasury ruled that this extra payment for Sunday work was not authorized by law.

Now, the practice in printing offices or establishments outside of the District of Columbia is to allow double time for Sunday work, while the Government Printing Office allows time and half time, and this is to legalize what has been the practice of the Government Printing Office for a great many years.

Mr. MACON. I want to say that I do not believe in legalizing a violation of the Sunday law or a desecration of the Sabbath.

Mr. TAWNEY. But the gentleman does not want to increase the cost of operating the Government Printing Office, which he will do if we are not able to pay time and half time, because, as I say, in other establishments outside of the city they pay double time.

Mr. MACON. Why is there any necessity for laboring on the Sabbath in the Printing Office?

Mr. TAWNEY. During the sessions of Congress, as the gentleman knows very well, there has to be a corps of printers employed there all the time.

Mr. MACON. I am opposed to Congress sitting on the Sabbath and opposed to other employees of the Government working on that day.

Mr. TAWNEY. So am I; and I am opposed to sitting nights, but we have to do it. [Laughter.] We make it necessary for the Printing Office to employ people on Sunday in order to have our work done in time.

Mr. MACON. I am opposed to the Members of the National Congress setting a bad example for the people. Sitting here at night does not violate any law of God and violates no commandment.

Mr. TAWNEY. I do not think the gentleman from Arkansas ought to place himself in the attitude of increasing the cost of the Government Printing Office.

Mr. MACON. I do not think a defeat of this provision would increase the expenses of that office.

Mr. TAWNEY. We shall have to have the work done just the same. If we do not conform to the custom which has obtained in the office for many years in allowing time and half time, then we shall have to pay double time.

Mr. ROBERTS. We shall have to pay commercial prices.

Mr. HUGHES of New Jersey. I want to suggest to the gentleman that time and half time is the most effective way of preventing work being done on Sunday, because, naturally, the Government Printer is interested in keeping down expenses in his establishment, and this will cause him to try to have the work cleaned up before Sunday, because he knows that he must pay the penalty by having it done on Sunday. That has been the uniform experience of manufacturers.

Mr. MACON. I would like to ask the gentleman from New Jersey if he knows any officer or employee in this Government that is interested in cutting down the expenses of his department or bureau? If so, I wish he would give the House the benefit of his name. I am sure all of us would like to know it.

The CHAIRMAN. The time of the gentleman from Arkansas has expired. Does the Chair understand that the gentleman withdraws his point of order?

Mr. MACON. Yes; I withdraw the point of order.

Mr. HUMPHREY of Washington. Mr. Chairman, I move to strike out the last word in order that I may make a statement that will save the time of the committee. On page 13, after line 19, there was an amendment, which I offered, appropriating money for a public building at Everett, and which was passed without prejudice and is still pending. I have found out since then that the Treasury Department has money on hand for that purpose, and I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Without objection, the amendment will be withdrawn. [After a pause.] The Chair hears none.

Mr. HUMPHREY of Washington. I ask unanimous consent also to print in the RECORD two letters which I have here respecting the same.

I was moved to offer the amendment by the statement in the letter to the Speaker, quoted in my letter to the Supervising Architect. But further inquiry shows that the department has on hand not only sufficient money to purchase the site, but also $23,000 to be used in the construction of the building, if necessary. All that can be used before another appropriation bill will be passed. Further, it is doubtful if the building will be commenced within the next year.

Under these circumstances, there being no necessity for an appropriation, I withdraw it.

The CHAIRMAN. Is there objection?

There was no objection.

The letters are as follows:

FEBRUARY 24, 1909.

Mr. JAMES K. TAYLOR,
Supervising Architect, Treasury Department,
Washington, D. C.

DEAR SIR: When the sundry civil appropriation bill was reported I discovered that no provision was made for the construction of a building at Everett, Wash. I was told by the committee that this was because the site had not yet been selected. I immediately called up Mr. Beekman Winthrop, Assistant Secretary of the Treasury Department, and was informed by him that this was an error, that the site had been selected. He also kindly offered to bring this fact to the attention of the committee. In pursuance of that promise, as I presume, a letter was, at his suggestion, I suppose, written to the Speaker of the House of Representatives. I received a copy of this letter from Mr. Winthrop, which was as follows:

FEBRUARY 20, 1909.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES,
Washington, D. C.

SIR: Referring to act approved May 30, 1908, which authorized the purchase of a site and erection of a building at Everett, Wash., at a cost of $135,000, I have the honor to state that a site has been acquired, and in order that work on the building may be commenced in the near future an appropriation of $40,000 is necessary.

I have therefore earnestly to recommend that the following item be included in some appropriation bill of the present Congress:

"Everett, Wash., post-office and custom-house: For prosecution of work under present limit, $40,000."

Respectfully,

J. B. REYNOLDS,
Acting Secretary.

To-day, when I read this communication to the committee, which was at that time considering the sundry civil bill, Hon. JAMES A. TAWNEY, chairman of the Committee on Appropriations, stated that you had appeared before the committee and stated that there was no necessity for an appropriation at this Congress, for if it was made, it could not be used within the next fiscal year, and that there was already $35,000 now available for the purchase of a site and also to apply on the construction of a building. I will be delighted to have you harmonize this statement, if you made it, with a statement made in the letter referred to by the Hon. J. B. Reynolds, Acting Secretary.

I would appreciate an immediate answer in writing to this communication, and hope that therein you will set forth the facts fully so that there can be no misunderstanding as to what the real condition is.

Yours, truly,

W. E. HUMPHREY, M. C.

TREASURY DEPARTMENT,
Washington, February 25, 1909.

MY DEAR MR. HUMPHREY: There has been, apparently, some confusion with regard to the appropriation for a building at Everett. Through some error the department, on January 15, reported that a site for the building at Walla Walla had been chosen. As a matter of fact, the site in that city has not yet been selected, while a site for a post-office in Everett was selected shortly after the preparation of the report submitted to the Committee on Public Buildings and Grounds by the Secretary of the Treasury on January 15.

In accordance with your recent telephone request, I directed that a letter be prepared, setting forth these facts, and requesting that an appropriation be included in the sundry civil bill for the commencement of the work at Everett. When this letter was sent, I had forgotten that the sum of $35,000 had already been appropriated, and of this amount but $12,000 had been expended for a site, leaving a balance of $23,000 available to begin work upon the building.

Inasmuch as in the regular order of business there are a number of buildings for which plans will have to be prepared before those for the Everett post-office can be taken up, I am inclined to believe that this sum of $23,000 will be sufficient for all work that can be done before the end of the next legislative session.

It will, therefore, in my opinion, be unnecessary to make any provision for Everett in the pending sundry civil bill.

Sincerely, yours,

BEEKMAN WINTHROP.

Hon. W. E. HUMPHREY,
House of Representatives.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

THE ISTHMIAN CANAL.

To continue the construction of the Isthmian Canal, to be expended under the direction of the President in accordance with an act entitled "An act to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans," approved June 28, 1902.

Mr. MANN. Mr. Chairman, I offer the following formal amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Insert in line 3, page 210, after the word "two," the words "and acts amendatory thereof or supplementary thereto."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

First. For salaries of officers and employees of the Isthmian Canal Commission, including assistant purchasing and shipping agents, and all other employees in the United States, $150,000.

Mr. FITZGERALD. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 210, line 7, after the word "dollars," add:

"*Provided*, That not more than $5,000 of this appropriation shall be paid as compensation to the secretary of the commission."

Mr. FITZGERALD. Mr. Chairman, some years ago I was instrumental in discovering that the Isthmian Canal Commission had in the city of Washington a secretary to whom was paid a salary of $10,000 a year. As the result of the agitation at that time, the secretary was ordered to the Isthmus in the belief that his services might be so much more valuable there that he would earn the compensation fixed. In the hearings before the Committee on Appropriations this year it was ascertained that the effect of sending the secretary to the Isthmus was to provide him not only with a salary of $10,000, but with a furnished house that cost $11,000, a horse and wagon, and a coachman. The commissioner who testified before the committee was asked to state the duties of the secretary of the commission, and he submitted for the information of the committee a statement prepared by the secretary himself. His duties as secretary, as stated by himself, are as follows:

The duties of the secretary of the commission are to reply to letters requesting information in regard to all phases of canal work, to receive visitors seeking such information and to supply it to them, to edit the Canal Record, and, under the direction of the chairman, to hear and investigate grievances of employees and make reports and recommendations on the same to the chairman.

Mr. Chairman, it seems to me that the type of man required to perform these duties does not deserve or can not earn $10,000 a year, even on the Isthmus. The particular portion of his duties that appeal to me with some force was that which stated that his duty was to receive visitors on the Isthmus seeking information and to supply the information. This may account for the fact that there is so much misinformation about what is being done on the canal, or it may account for the impossibility of those desiring information to obtain accurate information. At all events, it seems to me, considering all the information at the hands of the committee and considering the duties, that a fair and reasonable compensation for this officer is $5,000 per year.

I do not desire to deprive him of any reasonable compensation. I prefer to err upon the side of generosity, but so far as I have been able to ascertain, his services can not be worth at the utmost more than $5,000 a year, and it seems to me that commencing on the 1st of next July it would be proper to limit his compensation to $5,000.

The CHAIRMAN. The question is on the amendment of the gentleman from New York.

Mr. ESCH rose.

The question was taken, and the Chairman announced that the ayes had it and that the amendment was agreed to.

Mr. TAWNEY. Mr. Chairman, I ask for a division.

Mr. EDWARDS of Georgia. It is too late to demand a division.

The CHAIRMAN. The Chair is unable to hear the gentleman from Minnesota.

Mr. TAWNEY. I ask for a division.

The CHAIRMAN. A division is demanded.

Mr. FITZGERALD. It is too late.

The CHAIRMAN. The Chair understands the gentleman was on his feet.

Mr. FITZGERALD. I beg the Chair's pardon, but the gentleman was not on his feet at all until after the Chair announced the result of the vote.

The CHAIRMAN. The gentleman in the rear of the hall, the gentleman from Wisconsin [Mr. ESCH], was upon his feet.

Mr. TAWNEY. Mr. Chairman, I will state that the gentleman from Wisconsin [Mr. ESCH] desired to address the Chair on the amendment. I did not think that the vote was going to be taken. I called for a division, however, after the result was announced. The gentleman from Wisconsin, however, was seeking recognition before the Chair put the question to the committee.

Mr. SHERLEY. But he did not obtain recognition, and the Chair decided and announced the vote.

The CHAIRMAN. The Chair saw the gentleman rise, but was unable to hear for what purpose the gentleman rose.

Mr. ESCH. Mr. Chairman, I rose simply to make reply to the remarks made by the gentleman from New York.

Mr. FITZGERALD. Mr. Chairman, so far as I am concerned I have no objections to permitting the gentleman to make reply, and then to take the vote over.

Mr. BONYNGE. Mr. Chairman, I ask unanimous consent that the gentleman from Wisconsin be permitted to proceed for five minutes.

The CHAIRMAN. The gentleman from Colorado asks unanimous consent that the gentleman from Wisconsin be permitted to proceed for five minutes.

Mr. GAINES of West Virginia. Mr. Chairman, a parliamentary inquiry. I have no objection to hearing the gentleman from Wisconsin on this subject or any other, but does that request carry with it also vacating the action of the House on this vote? In that case I should object.

The CHAIRMAN. Objection is heard.

The committee informally rose, and the Speaker resumed the chair.

LEAVE TO PRINT.

Mr. CHANEY. Mr. Speaker, I offer a petition and ask unanimous consent that it be printed.

Mr. MANN. Mr. Speaker, I object.

The SPEAKER. The gentleman from Illinois objects.

SUNDRY CIVIL BILL.

The committee resumed its session.

The Clerk read as follows:

Sixth. To continue the equipment and construction of the Panama Railroad, to be disbursed directly under the Isthmian Canal Commission, $700,000; no part of said sum shall be expended until the obligation of the Panama Railroad Company for the full amount thereof, and drawing 4 per cent interest, payable to the United States, shall have been delivered to the Secretary of the Treasury of the United States, and by him accepted.

Mr. HARDY. Mr. Chairman, I offer an amendment to the sixth section. That section reads:

To continue the equipment and construction of the Panama Railroad, to be disbursed directly under the Isthmian Canal Commission, $700,000.

It seems to me that if the phraseology be perfected it should read to be disbursed directly—not under that commission, but under the supervision and authorization of the commission. I move, therefore, to amend that section in that manner.

Mr. MANN. Will the gentleman permit a question?

Mr. HARDY. In just a moment.

Mr. MANN. I desire to ask the gentleman if he is personally familiar with the matter?

Mr. HARDY. I do not know that I am.

Mr. MANN. Then, will the gentleman permit me to say this work is done directly by the Isthmian Canal Commission?

Mr. HARDY. You mean under its direction, I suppose.

Mr. FITZGERALD. It is really done by the commission, as I understand.

Mr. MANN. To be disbursed directly under the Isthmian Canal Commission.

Mr. HARDY. Under their authorization; but we are proposing——

The CHAIRMAN. The Chair would suggest that the gentleman send his amendment to be reported from the Clerk's desk before he speaks to his amendment.

Mr. HARDY. I can read it so the Clerk can readily get it. After the word "the," in line 25, page 211, insert the words "supervision and authorization of" the Isthmian Canal Commission.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 211, at the end of line 25, insert "supervision and authorization of."

The CHAIRMAN. Does the gentleman from Texas desire to be heard? If not, the question is on the amendment.

The question was taken, and the amendment was rejected.

Mr. HARDY. Mr. Chairman, I wish now to offer an amendment to strike out all that portion of section 6 which follows the words "seven hundred thousand dollars."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 212, strike out all in paragraph 6 after the word "dollars," in line 2.

Mr. HARDY. Now, on that amendment, Mr. Chairman, I wish to be heard for just a moment. This section provides that when the Isthmian Canal Commission disburses $700,000 it shall first take the bonds of the Panama Railway Company, payable to the United States, to bear 4 per cent interest on the disbursement. That seems to me to be a work of supererogation, the Panama Canal Company being indirectly the United States, and the United States is issuing bonds to itself for $700,000 for this improvement of its own property. The purpose of my amendment is to expose the fiction of the Panama Railway Company and bring out the fact that there is absolutely no Panama Railway Company on the Isthmus of Panama, and that the so-called "Panama Railway Company" is a pure fiction, if not a fraud.

I understand it to be a fact that the United States owns every dollar of the bonds and stock of that so-called "company" now, and this section proposes that it shall issue to its owner more bonds. Why? The Lord only knows why there should nominally be an isthmian railway or Panama Railway Company in existence, unless it be to provide certain salaries for certain men who are given temporarily the trusteeship of certain stocks of that road. It seems to me that this railroad property, belonging to the Government, should be administered simply as government property, and not under the fiction of a corporation existing in New York State, I believe. What is the purpose of that corporation? Is this road governed by any of the laws of the State of New York? Is there any reason on earth for the perpetuation of the existence of the Panama Railway Company—a fiction; in fact, a nonexisting thing? Every dollar of the property belongs to the United States, and yet that company is asked to issue bonds bearing 4 per cent interest, payable to the United States.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HARDY. I submit that that ought to be stricken out.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. HARDY].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. HARDY. Division, Mr. Chairman.

The committee divided; and there were—ayes 52, noes 79.

So the amendment was rejected.

Mr. MADDEN. Mr. Chairman, I desire to ask unanimous consent to extend remarks in connection with the Panama Canal in the RECORD.

The CHAIRMAN. Is there objection?

Mr. GAINES of Tennessee. I object.

The Clerk read as follows:

Seventh. For miscellaneous expenditures, cable and telegraph service, stationery and printing, local railway transportation, special trains, including pay-train service; transportation of currency to the Isthmus, recruiting and transporting laborers, transporting employees from the United States, repatriating laborers and employees, actual necessary traveling expenses while on the Isthmus on official business; and all other incidental and contingent expenses not otherwise provided for, for the departments of construction and engineering, quartermaster's, subsistence, disbursements and examination of accounts, and labor, quarters and subsistence, $1,000,000.

Mr. GAINES of Tennessee. Mr. Chairman, I desire to withdraw the objection that I made to the gentleman from Illinois [Mr. MADDEN] extending his remarks in the RECORD.

Mr. MADDEN. Mr. Chairman, I ask unanimous consent to extend my remarks on the Panama Canal in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SABATH. Mr. Chairman, I move to strike out the last three words, "$1,000,000," in section 7.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 212, line 19, strike out "$1,000,000."

Mr. SABATH. Mr. Chairman, I desire to send to the Clerk's desk an article pertaining to this section and, in fact, to the expenditure, the same to be read in my time.

The CHAIRMAN. Without objection, it will be read in the time of the gentleman from Illinois.

There was no objection.

The Clerk read as follows:

Inasmuch as the Treasury will be $130,000,000 shy by the end of the fiscal year, it seems to us that Congress might do a little pruning on the Panama Canal expenditures. A sensible man, if he found himself running behind, would postpone outlays on matters not immediate and essential. Why should not Congress temporarily cut down the big appropriations for the canal?

The cost of the canal work at present is enormous. The operations are carried on as though the Treasury were apoplectic and needed bleeding. Records are broken frequently, and the efforts of the diggers seem to increase in intensity, in spite of the fact that the canal plans are subject to change. No one pretends to know what the total cost will be; or, if anyone knows, he will not take the public into his confidence.

The Post does not have the hardihood to declare that the canal will not work wonders when it is completed. Experts, both military and commercial, have convinced the country that the canal will revolutionize traffic, increase the efficiency of the fleets, and so forth, and the people thus far have cheerfully approved of the colossal expenditures. We do venture the suggestion, however, that the canal is not an immediate necessity of commerce or defense. The country can get along, somehow, even if the opening of the canal is delayed a few years. And if the Treasury is already short, with a prospect of still greater deficiencies resulting from tariff reduction and shrinkage of internal revenue, why should not this costly work at Panama be curtailed?

Pending the adjustment of the national finances, including the all-important question of tariff legislation, it would be wise, in our opinion, to cut down the force at Panama.

Mr. SABATH. Mr. Chairman, in addition, I ask unanimous consent to insert the following article, pertaining to the Panama Canal, in the RECORD, not wishing to take up the time of the House.

The CHAIRMAN. Is there objection?

Mr. DOUGLAS. Mr. Chairman, I object.

Mr. GAINES of Tennessee. Gentlemen, I am not going to agree to any more unanimous consents on that side. I have just withdrawn one objection by request.

Mr. SABATH. Mr. Chairman, I sent it to the Clerk's desk to be read. I did not wish to take up all the time I had, namely, the five minutes.

During the reading,

The CHAIRMAN. The time of the gentleman has expired.

Mr. SABATH. Mr. Chairman, I again ask unanimous consent to insert the article in the RECORD.

The CHAIRMAN. Is there objection?

Mr. GAINES of West Virginia. I think we have gone too far in inserting newspaper articles in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

The article is as follows:

CANAL PLANS AGAIN—THE LOGIC OF THE SITUATION SAID TO REQUIRE A SEA LEVEL CANAL.

To the Editor of The Tribune.

SIR: The remarks made by Mr. Taft on the eve of sailing for the Isthmus, as quoted in the Tribune of January 28, show that the canal problem now appears in its true light. Mr. Taft apparently realizes that the sea-level plan has in its favor the elements of time

and cost, and appreciates the fact that the Gatun dam is but one of the many questions whose satisfactory answer is found only in a sea-level canal. He also realizes that the actual results attained by Goethals, Sibert, Slifer, and their able allies and faithful subalterns of more than three times the estimated million yards per month makes the sea-level canal, the canal without danger question of risk, the logical type.

I do not intend to quote the long list of horrors, destruction of property, and loss of life that have resulted from dam failures from the time of the bursting of the Johnstown dam up to date, nor to ask space for the long list of wrecked dams that the best engineering talent judged to have an ample factor of safety, but I may at least remind you of two items of news which appeared on a single day, last Saturday. One, from Merida, Yucatan, told us that a series of earthquake shocks have started fissures in the foundation of the water-supply reservoirs of several large towns, and the towns are threatened with serious suffering as a result of the loss of their water supply. The other, from Johannesburg, South Africa, reported that by the bursting of a dam the Witwatersrand gold mine, in the southwestern part of the Transvaal, was flooded and 10 white men and 150 natives were drowned. The water from this dam also flooded the the lower section of the town of Elsburg, where a number of houses were swept away and 13 persons perished.

Although the majority of the first board of consulting engineers at Panama favored a sea-level canal, the board which now accompanies Mr. Taft was nominated at the suggestion of one of the lock members of the old board. Two others are men of national fame as experts in dam construction. The other two are in the service of the Government and can be expected to make a mathematical demonstration in favor of the lock system that will be convincing to any who may, through lack of consideration, already favor the lock type. To be of value, the report of the engineers who accompany Mr. Taft must cover the following points:

1. Is it true that the present average rate of excavation is over 3,000,000 yards a month, whereas the original estimate was 1,000,000?
2. Is it true that this rate of excavation is susceptible of increase in the daytime, and also that night work is perfectly practicable, thereby doubling the rate and halving the time of completion?
3. Is it true that the present rate of excavation would complete a sea-level canal of a minimum width of 200 feet, as originally planned, in far less time than that now estimated for a lock canal?
4. Is it true that at the present rate of excavation a sea-level canal of a minimum bottom width of 300 feet can be opened in the same time as now estimated for a lock canal?
5. Is it true that impact rock-shattering methods have been shown in the London conference to excavate submarine rock for less than one-fifth the estimated cost at Panama?
6. Is it true that a sea-level canal of 300 feet minimum can be navigated more quickly than a lock canal?
7. Is it true that it would be impossible to block traffic in such a sea-level canal for over two weeks, and that only by sinking a vessel?
8. Is it true that the foundations of the proposed Gatun dam are not all that could be desired?
9. Is it true that in dry weather the filtration of the water under pressure in the proposed Gatun Lake might possibly exceed the inflow?
10. Is it true that during a drought the passage of a single vessel through the locks would consume four hours' flow of all the streams into the lake?
11. Is it true that in dry weather traffic through a lock canal would have to be suspended?
12. Is it true that Panama is in an earthquake region?
13. Is it true that from 1901 to 1905 there were at Panama seven tremors and four light shocks, some of such severity that people ran out of their houses?
14. Is it true that a slight quake might cause a fissure that would result in the cutting out of the entire lake or the ruin of the locks?
15. Is it true that experience on the Manchester Canal and the "Soo" demonstrates the mathematical certainty of accidents to the locks proposed at Panama?
16. Is it true that an accident to the locks would probably mean the draining of the lake to such an extent as would require about a year to refill for navigation?
17. Is it true that submarine and aerial navigation has reached such a stage that a hostile force could destroy the locks despite fortification?
18. Is it true that tropical winds and fogs would be more serious for navigation in a lock canal than in a sea-level canal?
19. Is it true that the chief engineer and also the builder of the Manchester Canal are on record in favor of a sea-level canal at Panama for reasons in their own experience?
20. Is it true that the Masters and Pilots' Association and the shipping interests are a unit in favor of sea level at Panama?
21. Is it true that insurance rates would be higher through a lock canal?
22. Is it true that cost of operating a sea-level canal would be but a fraction of that of operating a lock canal?
23. Is it true that with millions of people on the Pacific coast dependent on the traffic through the canal for their livelihood a serious suspension of traffic would cause widespread suffering and financial disaster?
24. Is it true that the decision in favor of a lock canal was made in good faith, and that a change to sea level now, in view of the splendid achievements of the United States Army engineers, implies censure to no one?
25. Is it true that we, as a nation, can not afford to have any canal at Panama but the best possible type for continuous practical service?

If the study of the present advisory board of engineers covers these points, their recommendation must be for a sea-level canal at Panama. Otherwise, however wide their reputation, they will simply demonstrate an adherence to their favorite construction, irrespective of the requirements of the situation, and render a report that will be void of influence, for the indisputable logic of the situation requires that the Panama Canal be at sea level.

HENRY G. GRANGER,
Member American Institute of Mining Engineers.

NEW YORK, *January 30, 1909.*

The Clerk read as follows:

Eighth. For pay of the member of the commission in charge, of officers and employees other than skilled and unskilled labor, including foremen, subforemen, watchmen, messengers, and storekeepers, of the department of civil administration, including those necessarily and temporarily detailed for duty away from the Isthmus, $470,000.

Mr. HARRISON. Mr. Chairman, against that paragraph I make the point of order that it is not authorized by existing law, and that it is obnoxious to the second paragraph of Rule XXI of the House. Does the Chair desire to hear me on the point of order?

The CHAIRMAN. The Chair will first hear the gentleman from Minnesota [Mr. TAWNEY] or the gentleman from Iowa [Mr. SMITH] as to the question of fact, whether there is authority for the pay of these officers.

Mr. SMITH of Iowa. He is the member of the commission in charge.

Mr. TAWNEY. He is a member of the commission, and the commission is certainly authorized by law. He is the member of the commission in charge of the officers and employees.

The CHAIRMAN. The Chair will hear the gentleman from New York [Mr. HARRISON] briefly.

Mr. HARRISON. Mr. Chairman, this subject has been discussed by me in the House before, and I will not now detain the committee nor try to make an extended speech upon this matter. I shall merely submit a brief legal argument for the Chair's consideration on the point of order.

The authority of law under which the President was governing the Panama Canal Zone was given to him in the Fifty-eighth Congress. We made to him a delegation of our authority to make laws governing the Panama Canal Zone, but by the second section of that law we limited that right to the end of the life of the Fifty-eighth Congress. It is a well-established precedent and rule of law that when a legislative body delegates its authority that delegation is to be strictly construed. Therefore the Chair must strictly construe that delegation in this instance, and must conclude that the right given the President to make laws on the Panama Canal Zone expired with the life of the Fifty-eighth Congress.

Now, in the first session of this Congress a resolution passed this House calling upon the President to explain by what right or authority he was continuing to exercise the right to make laws upon the Panama Canal Zone subsequent to the termination of the life of the Fifty-eighth Congress. In response to that resolution the President sent a message to the House in which he explained what he considered to be his authority for so doing. I have once before answered the President's message, and for the information of the Chair I shall briefly do so again.

The CHAIRMAN. The Chair does not care to hear further argument on the point of order. He is ready to rule.

Mr. HARRISON. Will the Chair permit me, if he does not care to hear an argument upon that point, to make a statement for his consideration as to another side of the point of order, which I should have submitted had I been in the House last year at the time the original point of order was made? The Chair overruled the point of order at that time, and the reason that he gave for so doing is found in the limitation of this second clause of paragraph 21 of the rules.

The paragraph reads:

No appropriations shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law, unless in continuation of appropriations for such public works and objects as are already in progress; nor shall any provision changing existing law be in order in any general appropriation bill or in any amendment thereto.

The point that the Chair relied on, as I understood it, was that this was a "continuation of a public work or object already in progress." I submit for the consideration of the Chair that in the precedents in the House theretofore it was uniformly held that the limitation applied only to physical, tangible matters, such as the construction of public buildings or a canal or a dam site, and did not refer to the payment of salaries to officers, even if those officers—which is not the case in the present instance—had been appointed under a previously existing law. A case in point is cited in Hinds's Precedents. I will read from the index on page 110:

Appropriations to continue the duties of the commission are held not to be a continuation of a public work.

Which case I find in volume 4, section 3720. I therefore submit to the Chair that this being only one of a long series of precedents bearing upon this point, the limitation does not apply to the case under consideration. There is, therefore, no reason for overruling the point of order. Should the Chair care to indulge me, I would be glad to submit to his consideration my reasons why the appropriations in this paragraph have no authority under existing law. But I understand the Chair to say that he does not care to hear any argument on that point.

The CHAIRMAN (Mr. OLMSTED). The Chair would, under ordinary circumstances, be glad to hear the gentleman from New York at length; but in view of the present condition of the business of the House and of the committee, and in view of the fact that the present occupant of the chair fully considered this

matter and ruled upon it last year, the Chair must decline the pleasure of hearing the gentleman further.

The same point of order was made one year ago to this same paragraph in the sundry civil appropriation bill for the current year. The present occupant of the chair ruled upon it then. Without stopping to read it, the Chair adopts and adheres to that ruling, which may be found in the CONGRESSIONAL RECORD for May 7, 1908. It contains a discussion of this whole subject. The Chair will call the attention of the gentleman from New York to the fact that it did not rest upon the proposition that the appropriation was for the continuation of a government work in progress, but said, after ruling that there was authority for that appropriation, that "if there were any doubt upon that point, there would still remain the fact that an appropriation in continuation of appropriations for a government work or object already in progress requires no previous authority of law, but is excepted out of the rule." The Chair overrules the point of order now for the same reasons as it did then.

Mr. HARRISON. I beg the Chair's indulgence for a moment. Did I understand the Chair to reiterate his ruling that this is a "continuation of a public work?"

The CHAIRMAN. The ruling that was made a year ago was not rested upon that single proposition. The Chair overrules the point of order upon the same ground as that on which the point of order was overruled a year ago.

The Clerk read as follows:

Eleventh. For pay of the member of the commission in charge of officers and employees other than skilled and unskilled labor, including hospital dispensers, internes, nurses, attendants, messengers, office boys, foremen, subforemen, watchmen, and stewards, of the department of sanitation on the Isthmus, including those temporarily detailed for duty away from the Isthmus, $725,000.

Mr. DOUGLAS. Mr. Chairman, I move to strike out the last word for the purpose of asking a question. How does it happen that both paragraph 11 and paragraph 8 seem to contain the same provision?

For pay of the member of the commission in charge of officers and employees other than skilled and unskilled labor—

And so forth.

Mr. TAWNEY. Because they are in charge of different departments. The organization is divided into different departments, and one commissioner is at the head of one department and another at the head of another.

Mr. DOUGLAS. It seems curious that the bill does not say that in some way.

The Clerk read as follows:

In all, $33,638,000, the same to be available until expended: *Provided*, That all expenditures from the appropriation herein and hereinafter made for the Isthmian Canal shall be paid from, or reimbursed to the Treasury of the United States out of, the proceeds of the sale of bonds authorized in section 8 of the said act approved June 28, 1902, and the amount of bonds authorized by said section is hereby increased to $160,000,000.

Mr. FITZGERALD. I wish to reserve a point of order on the language in lines 15, 16, and 17.

And the amount of bonds authorized by said section is hereby increased to $160,000,000.

Mr. Chairman, with the indulgence of the committee, I wish to make just a brief statement on this matter.

Under the Spooner Act the bond issue authorized in case the Panama route was selected was $130,000,000. In addition to the authorization of bonds up to $130,000,000, $50,000,000 were appropriated. At that time the belief existed that the cost of the canal would be about $185,000,000. It appears now that the canal will cost, including sanitation and other features, about $375,000,000. It is an important question to determine, and to determine definitely, how much of the cost of the canal shall be paid from the current expenses of the Government and how much shall be provided from the proceeds of bonds.

Up to the present time there have been expended, including the $50,000,000 appropriated to pay the canal company and the Republic of Panama, about $170,000,000. Out of the authorization of $130,000,000 bonds there have been issued about $84,000,000. So that to-day there is available for the purpose of raising money for the canal authorizations about $46,000,000 in bonds. At this time there is in the Treasury an available cash balance of $140,000,000. Up to the present time there is a deficit in the Treasury (that is the expenditures exceed the receipts for the present fiscal year) of about $84,000,000. At the rate at which we are expending, and considering our income, the deficit this year will reach not $114,000,000, as predicted by the Secretary of the Treasury, but $150,000,000, as predicted by myself on the 30th of May last.

I wish, with the permission of the House, to insert in the RECORD at this place the figures to demonstrate that the deficit this year will be $150,000,000.

Revenues estimated by Secretary of Treasury for 1909, $788,796,956; expenditures, $902,796,956; deficit, $114,000,000. In addition $19,000,000 will be carried in the general deficiency act and $800,000 was appropriated in the urgent deficiency act. As the deficit on February 20 was over $84,000,000 for the twelve months ending June 30, 1909, instead of $114,000,000, as estimated by the Secretary, the deficit will be about $130,000,000; plus $20,000,000 of deficiencies brings the deficit to $150,000,000, as predicted by me on May 30, 1909.

Considering the financial condition of the country, it is highly important that bond issues should not be authorized in a haphazard manner. Forty-six million dollars more can be realized for the canal by the issuance of bonds, and before an additional $30,000,000 are authorized some definite plan should be agreed upon. It seems to me that instead of adding from year to year as we appropriate money authorizations to issue bonds for practically the amount of our appropriations, and so in fact making the complete cost of the canal be paid from bond issues, Congress should, after careful consideration, determine what per cent should be paid from the current revenues and what per cent from the proceeds of bonds.

Mr. UNDERWOOD. I would like to ask the gentleman from New York whether or not the proposed issue of bonds is necessary at this time, to take care of the expenditures on the canal or the deficit in the Public Treasury due to the fact that the revenues are not sufficient to meet the expenditures.

Mr. FITZGERALD. A present it is not necessary to issue bonds to obtain the money, nor to authorize the additional bond issue to obtain the money appropriated in this bill for the canal. There is a margin of $46,000,000 in the authorized bond issue—$46,000,000 still can be issued. This bill carries about $33,000,000 for the canal, so that there is a margin of about $13,000,000.

Mr. UNDERWOOD. Above the expenditures for this year?

Mr. FITZGERALD. Above the expenditures for this year. I want to call the attention of the committee to this fact, that the bonded indebtedness of the country at this time is $897,000,000——

Mr. SMITH of Iowa. I think the gentleman's attention ought to be called to the fact that the authorized expenditure of $135,000,000 bond issue is only $130,000,000.

Mr. FITZGERALD. The gentleman is correct.

Mr. MANN. Will the gentleman yield for a question? It has been suggested before our committee and before the Senate Committee on Interoceanic Canals that there be a law passed largely increasing the amount of bonds authorized. I will say frankly to the gentleman that, as far as my judgment is concerned, it seems to me more desirable to leave that matter in the hands of the Committee on Appropriations to authorize the bond issue, as they make the appropriations, rather than to encourage the idea that there was a large bond issue which could be made by bringing in a bill and passing it and increasing the bond limit to a very large degree.

Does not the gentleman from New York believe that it is a little safer to authorize the bonds as we go along with the recommendation of the appropriations rather than to force the committee having legislative jurisdiction of the subject to bring in a bill authorizing a large increase in the number and amount of bonds and thereby encourage the idea that all the money should be paid out of a bond issue?

Mr. FITZGERALD. I think not. It would make little difference. This administration in the past year, unable to issue bonds in order to provide the currency required for certain purposes, resorted to the issue of $14,000,000 of certificates of indebtedness, bearing 3 per cent interest.

Mr. MANN. Oh, if the gentleman is going to discuss the matter in a partisan way——

Mr. FITZGERALD. I want to make a brief statement in regard to some other matters, but I do not wish to cut off the inquiry of the gentleman from Illinois. My intention is not to make a partisan speech at this time, but to call the attention of the committee with some seriousness to some of these things which I think important.

The bonded indebtedness of the country is $897,503,000, and on the 30th of June last year $711,000,000 of this issue, in addition to other bonds, were deposited in the Treasury as security for circulation. Now, it seems to me, and the one objection I have to adding to the authorization year by year is that inevitably as we authorize appropriations we would authorize an equal amount of bonds, and eventually outside of the money appropriated—the $50,000,000—the entire cost of the canal will be paid from the proceeds of bonds.

Mr. MANN. I venture to say that the gentleman's position is extravagant in the end.

Mr. FITZGERALD. I think not.

Mr. MANN. I know the gentleman thinks not, because the gentleman never desires to be extravagant.

Mr. FITZGERALD. I want to say that the statement of the gentleman from Illinois that my position is an extravagant one is hardly justified by the facts.

Mr. MANN. That is only my opinion about the results.

Mr. FITZGERALD. My purpose is not to help extravagance; it is to prevent it.

Mr. MANN. I understand the gentleman's position.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. SMITH of Iowa. Does the gentleman from New York intend to insist upon the point of order?

Mr. FITZGERALD. I intend, after the statement of the gentleman from Iowa, to insist upon the point of order.

Mr. SMITH of Iowa. Then, I shall make no statement.

The CHAIRMAN. Does the gentleman insist upon his point of order?

Mr. FITZGERALD. I do.

The CHAIRMAN. Does the gentleman from Iowa desire to be heard on the point of order?

Mr. SMITH of Iowa. No.

The CHAIRMAN. The Chair sustains the point of order. It is clearly legislation on an appropriation bill. The Clerk will read.

The Clerk read as follows:

No part of the foregoing appropriations for the Isthmian Canal shall be applied to the payment of allowances for longevity service or layover days other than such as may have accumulated under existing orders of the commission, prior to July 1, 1909.

Mr. BOUTELL. Mr. Chairman, against that paragraph I make the point of order.

The CHAIRMAN. The gentleman will state his point of order.

Mr. BOUTELL. I will reserve the point of order, if it is desired.

Mr. SMITH of Iowa. The gentleman better make it. I insist that it is not well to make it.

Mr. HUGHES of New Jersey. I make the point of order.

Mr. BOUTELL. Mr. Chairman, I insist upon my point of order, on the ground that this paragraph is new legislation.

Mr. SULZER. And I think it changes existing law, or what amounts to the same thing.

Mr. BOUTELL. It was not carried in the appropriation bill of last year, or in any previous appropriation bill.

Mr. FITZGERALD. It is a limitation on the appropriation.

Mr. HUGHES of New Jersey. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. HUGHES of New Jersey. To discuss the point of order. I want to call the attention of the Chair to the fact that this longevity pay attempted to be done away with by this paragraph is provided for in what is the law on the Isthmus and in the construction of the Isthmian Canal. It is provided for in an order of Secretary of War Taft, promulgated by him under the direction and with the authority of the President of the United States, who is the chief ruler and source of law on the Isthmus, if there is any law there.

Mr. SULZER. Mr. Chairman, just a word. This matter was thoroughly discussed in the last session of Congress, and at the request of the then Secretary of War——

Mr. TAWNEY. I beg the gentleman's pardon. It was not discussed at that time.

Mr. SULZER (continuing). Who is now the President-elect of the United States, it was agreed that these mechanics on the Isthmus of Panama should get this longevity pay, and it is a shame that an attempt is now to be made to violate the promise.

Mr. TAWNEY. Oh, that question was never discussed in this House at all.

Mr. SULZER. Well, Mr. Chairman, I beg the gentleman's pardon. I discussed it myself.

Mr. BOUTELL. Mr. Chairman, I insist that this is new legislation, and the language is such as not to bring it within the general provisions of a limitation, and even if it should be considered a limitation, the language certainly must be construed over and beyond the limitation as authorizing this longevity pay after the 1st of July, 1909; and so in any view you may take it, whether as merely new legislation or as a limitation, still there is in the limitation itself the implied legislation that longevity pay should be allowed after July 1, 1909. So that it seems to me there is no escape from holding it is new legislation. It is not a simple limitation.

The CHAIRMAN. It seems to the Chair that this does not impose any new duties or conditions except that it withholds the appropriations made in this act for the payment of allowances in certain directions. It seems to the Chair to be a limitation upon the appropriations made under the act, and the Chair overrules the point of order.

Mr. BOUTELL. I move to strike out the paragraph.

Mr. SULZER. And I trust that motion will prevail.

The CHAIRMAN. The Clerk will report the amendment of the gentleman from Illinois.

The Clerk read as follows:

Page 215, strike out lines 1, 2, 3, 4, and 5.

The CHAIRMAN. Does the gentleman from Illinois desire to be heard?

Mr. BOUTELL. Mr. Chairman, on that I desire to be heard very briefly. On page 13 of Senate Document 539, Sixtieth Congress, second session, being a message of the President of the United States transmitting the report of the special commission appointed to investigate the conditions of labor and the housing of government employees on the Isthmus of Panama, is this paragraph:

LONGEVITY PAY.

Longevity increase should apply to all American employees receiving less than $5,000 a year salary. Longevity pay, as we understand, is offered to induce those who have become acclimated to continue in the service. If this be the principle, then civil engineers, foremen, bookkeepers, and others who have become acclimated and who have familiarized themselves with the work on the Isthmus are entitled to longevity increase, equally with shop mechanics, engineers, and those employed on repair and excavation work.

The provisions of the longevity order issued May 1, 1907, by Mr. Taft, the Secretary of War, make liberal and appropriate increase in the wages of various classes of workmen as follows:

(a) All employees not native to the Tropics who occupy the positions herein designated shall be granted the following increases in pay for length of continuous service on the Isthmus: Five per cent on the basic or class rate for the second year, with a cumulative addition of 3 per cent on the basic rate for each subsequent year, provided, however, that such cumulative increase shall not exceed a total of 25 per cent of the basic rate.

That order, issued by the Secretary of War on the 1st of May, 1907, was under the full powers vested in him by law, and is the present law to-day concerning the longevity pay of the workmen mentioned on the canal.

Mr. WILSON of Pennsylvania. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Illinois yield?

Mr. BOUTELL. With pleasure.

Mr. WILSON of Pennsylvania. If this clause is enacted into law, will it not result in a reduction in wages to a certain class of workmen now engaged on the Panama Canal?

Mr. BOUTELL. It certainly will at some time or other, with this limitation.

Mr. TAWNEY. If the gentleman will permit me to state, it does not affect the compensation of any man who is now getting longevity pay or the man who gets it at any time between now and next July.

Mr. WILSON of Pennsylvania. It does affect those who would be entitled to it after the 1st of July?

Mr. SULZER. That is correct.

Mr. TAWNEY. Those who are obtaining longevity pay now under existing orders will continue to receive longevity pay. It was not intended to extend to the entire service——

Mr. WILSON of Illinois. Oh, no——

Mr. TAWNEY. Well, the administration of this law means, unless this is suspended, an increase in the cost of the canal by some five or six million dollars.

Mr. BOUTELL. The chairman of the Committee on Appropriations states the effect of this limitation exactly as I understand it, and it is precisely on account of that effect that I submit, in all candor, this paragraph should be stricken out. What it does is simply this: It gives to those who have already earned longevity status under Secretary Taft's order lonegvity pay, but deprives those who have been working down there for the longevity status from the right to the increased pay. That is all there is in it. It makes a discrimination between those who have been there a certain length of time and earned their longevity status and those who have not been there long enough to earn their longevity status, and I submit in all fairness and in all justice to the men who have gone down there that no discrimination should be made among these workmen.

It is hard enough to get the right class of workmen to go to the canal and stay there, and we ought not to put any impediment in the way of getting the best men and keeping them there. This discrimination should go out of the bill. [Applause.]

Mr. SULZER. Mr. Chairman, I concur in all my friend from Illinois [Mr. BOUTELL] has said in regard to this matter. He is right about it, and this paragraph should be stricken out. I hope it will be stricken out in justice to our mechanics in the Panama Canal Zone who are doing the greatest work of the centuries.

Now, Mr. Chairman, I ask unanimous consent to print in the RECORD on this longevity-pay question a letter from Mr. T. J. Dolan, the general secretary and treasurer of the steam shovel and dredge men.

The CHAIRMAN. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection? [After a pause.] The Chair hears none.

INTERNATIONAL BROTHERHOOD OF
STEAM SHOVEL AND DREDGE MEN,
Chicago, Ill., February 23, 1909.

Hon. WILLIAM SULZER,
House of Representatives, Washington, D. C.

DEAR MR. SULZER: I wired you to-day as follows:

"Item sundry civil appropriation bill, page 215, lines 1 to 5, affects our men at Panama and should be defeated, as it will be a breach of faith in promises made to skilled American labor at Panama. Please get our friends to help you on this matter."

I also sent the following telegram to Congressman TAWNEY to-day:

"Item sundry civil appropriation bill, page 215, lines 1 to 5, is breach of faith, according to my understanding, with skilled American mechanics at Panama. As I understand the matter, when Mr. Taft was Secretary of War he made the agreement with the men at Panama in reference to the longevity. I believe that good faith should be kept in the matter. Hope you will agree to cut the item out."

As I understand the proposition, when Mr. Taft made the agreement at Panama in the spring of 1907 with the skilled mechanics down there, it was understood that they were to participate in the longevity during the construction of the canal.

If this item goes through on page 215, lines 1 to 5, sundry civil appropriation bill, it simply means that the men who have been getting an increase of wages there each year for excellent work and competent service will be cut off, and, according to my understanding of the matter, they will be placed back on the old scale of wages. This will mean a reduction of wages to a great many skilled mechanics there, if the proposition is as I surmise it is.

For instance, a shovel engineer who would now be making $230 or $240 per month would be cut down to $210 per month after this bill went into effect the 1st of July, as the minimum standard scale of wages at Panama for shovel engineers is $210 per month. This rule, as I understand it, would apply to all skilled American mechanics on the canal in every department, which would include all the railroad men, shovel men, machinists, and, in fact, every skilled American who is in the operating or construction department on the Panama Canal work.

I believe that there are enough honorable Members in Congress to defeat this item, as it will certainly cause a great deal of dissatisfaction among the men employed at Panama if this provision is adopted. I do not believe that Congress can afford to go on record at the present time in favor of cutting wages on the Isthmian Canal; and, according to my surmise of the matter, it means that it will cut the wages back to the minimum standard, if this item is adopted.

I hope and trust that this item will be buried so deep that it will never be heard of again.

Wishing you success in the matter, and extending you the thanks of our entire organization for helping us to defeat this item, I remain,

Yours, very truly,

T. J. DOLAN,
General Secretary-Treasurer.

Mr. SMITH of Iowa. Mr. Chairman, this longevity and overtime pay already costs the Government of the United States $400,000 a year on the canal. It is not necessary to pay it to get men to go there, because they do not get it when they go there. It is a thing in the distant future, a reward for staying there a long time. The price that brings them there includes no such pay. Now the head of the Panama Canal Commission says it is impractical to go on discriminating between these men by mere executive action; that all classes of men are clamoring to have this system of longevity and overtime pay extended to them that are not covered at all by the order here referred to, and if this pay is thus extended the cost of this canal would be vastly increased beyond the $400,000 a year that the system is now costing us. This proposition is not to cut off those who have earned this pay nor to cut off those who earn it in the early months to come, but to provide that it shall not be paid to any except such as may have accumulated this right under existing orders of the commission before the 1st day of next July. If this amendment to the law is defeated, it means that this House to-night deliberately votes more than $5,000,000 of the people's money in payment for this canal beyond what is needed. I think this amendment ought to be defeated and I hope it will be, and I call for a vote.

Mr. BOUTELL. Will the gentleman yield for a question?

Mr. HUGHES of New Jersey. Mr. Chairman——

The CHAIRMAN. Will the gentleman from Iowa [Mr. SMITH] yield to the gentleman from Illinois [Mr. BOUTELL]?

Mr. SMITH of Iowa. I will yield to the gentleman from Illinois for a question.

Mr. BOUTELL. I thought the gentleman would. I would like to ask the gentleman from Iowa whether this provision and limitation in the pending bill, if he knows, meets with the approval of Secretary Taft, who issued this longevity pay order?

Mr. SMITH of Iowa. I am not able to say, because, as the gentleman well knows, during no portion of the compilation of this bill has the President-elect been appearing before committees, but I do know that that man who is now at the head of the construction of this canal and its completion does believe in it. I refer to Colonel Goethals, the president of the commission, and I have no reason to believe that anybody else differs from him.

Mr. BOUTELL. Colonel Goethals is not the man who issued the longevity order.

Mr. SMITH of Iowa. The longevity order was issued when it was difficult to get men, but now it is not difficult to get them; and under the rules of the House, as I understand it, this amendment is only subject to debate for five minutes on a side without unanimous consent, and therefore I call for a vote.

Mr. WILSON of Illinois. Mr. Chairman——

Mr. HUGHES of New Jersey. Mr. Chairman——

The CHAIRMAN. Under the rules of the House but one speech is in order on a side—one by the maker of the amendment for five minutes and one by the opposition for the same length of time.

Mr. HUGHES of New Jersey. Mr. Chairman, I move a substitute.

Mr. SMITH of Iowa. Mr. Chairman, I move that all debate on the paragraph and amendments thereto be now closed.

Mr. WILSON of Illinois. Mr. Chairman——

The CHAIRMAN. The gentleman from Iowa moves that the debate on the paragraph and amendments thereto be now closed.

Mr. WILSON of Illinois. Mr. Chairman, I would like to ask the gentleman from Iowa if he will yield for a question?

Mr. SMITH of Iowa. If I have any time remaining, I will yield for a question; but I insist on the motion.

Mr. WILSON of Illinois. The gentleman has stated here that the extra expense under this means $400,000 a year.

Mr. SMITH of Iowa. For those now.

Mr. WILSON of Illinois. I understand from the pamphlet which I have here, submitted by the House Committee on Appropriations, page 42, that when Colonel Goethals was asked about this very provision he said:

There is included in the estimate an expense account for longevity of $162,000; overtime, $377,000; and adjustment of salaries, $243,000.

Mr. SMITH of Iowa. Without the last item, the increased expense on that basis would be over $500,000. The longevity and overtime are referred to in the section. But adjustment of salaries is not referred to in the paragraph under consideration.

Mr. WILSON of Illinois. As a matter of fact, the longevity proposition does not make $400,000 difference.

The CHAIRMAN. The gentleman from Iowa [Mr. SMITH] moves that all debate on the paragraph and amendments thereto be now closed.

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. HUGHES of New Jersey. Division, Mr. Chairman.

The committee divided; and there were—ayes 89, noes 18.

So the motion was agreed to.

Mr. DRISCOLL. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from New York rise?

Mr. SMITH of Iowa. Question, Mr. Chairman.

The CHAIRMAN. The question is on the amendment of the gentleman from Illinois, to strike out the paragraph.

Mr. SULZER. Division, Mr. Chairman. I would ask all the friends of honest workingmen to stand up.

The committee divided; and there were—ayes 49, noes 86.

So the amendment was rejected.

The Clerk read as follows:

SEC. 7. That all sums appropriated by this act for salaries of officers and employees of the Government shall be in full for such salaries for the fiscal year 1910, and all laws or parts of laws in conflict with the provisions of this act be, and the same are hereby, repealed.

SEC. 8. Immediately upon the receipt of the regular annual estimates of appropriations needed for the various branches of the Government it shall be the duty of the Secretary of the Treasury to estimate as nearly as may be the revenues of the Government for the ensuing fiscal year, and if the estimates for appropriations, including the estimated amount necessary to meet all continuing and permanent appropriations, shall exceed the estimated revenues the Secretary of the Treasury shall at once transmit a detailed statement of all of said estimates to the President, to the end that he may, in giving Congress information of the state of the Union and in recommending to their consideration such measures as he may judge necessary, advise the Congress how in his judgment the estimated appropriations could with least injury to the public service be reduced so as to bring the appropriations within the estimated revenues, or, if such reduction be not in his judgment practicable without undue injury to the public service, that he may recommend to Congress such loans or new taxes as may be necessary to cover the deficiency.

Mr. FINLEY. Mr. Chairman, I reserve the point of order as to section 8. That is new legislation.

Mr. SMITH of Iowa. I hope the gentleman will not make the point of order. This was previously offered as an amendment to the legislative appropriation bill, but it went out on a point of order. But every gentleman who criticised it then has since examined it and become satisfied that this is of great importance in the matter of preventing future deficits in the Treasury.

Mr. FINLEY. What as to this point: The President of the United States then would pass on such of the estimated appropriations as in his judgment should be cut?

Mr. SMITH of Iowa. The object of this is simply to put upon the President of the United States, who is the head of all the departments, a measure of responsibility to see that the estimates are cut within the revenues, or else call upon him to propose a bond issue or new taxes covering the deficiency, and thereby take the odium that it would bring to his administration.

Mr. FINLEY. Does not the gentleman think that it is the business of Congress to cut the appropriations to fit the revenues?

Mr. SMITH of Iowa. It is important that we should have Congress, as well as the Executive, to state where the cut ought to be made. It is possible for Congress to do much in that direction; but the President, being the head of all the departments, can greatly aid in pointing out where these reductions can be made with the least injury to the public service.

Mr. FINLEY. There is nothing to hinder the President of the United States now from making any effort in that direction he wishes.

Mr. SMITH of Iowa. There is no estimate coming from the President.

Mr. FINLEY. I understand they come from the heads of the various departments.

Mr. SMITH of Iowa. Through the Treasury Department.

Mr. FINLEY. Yes.

Mr. SMITH of Iowa. Now, this proposition is, when these subordinates have first made their estimates for the next fiscal year, and they reach the Secretary of the Treasury, and it there appears that these estimates exceed the estimated revenues, the President is called upon by Congress—we can not command him—to see where, in his judgment, these estimated appropriations can best be reduced to bring them within the estimated revenues, or what tax should be imposed upon the people, or what bonds should the people issue to cover the deficiency. Then Congress as well has the power it has now; but it has placed upon the Chief Executive the burden and the responsibility for the action of his subordinates in that particular. [Applause.] I hope the gentleman will withdraw his opposition.

Mr. FINLEY. Is not the chief value of this section that the President, when the revenues are insufficient to meet the expenditures, will then be called upon to make recommendations as to raising such taxes to meet the deficiency as is necessary?

Mr. SHERLEY. If the gentleman will permit a suggestion. To my mind the great value of this lies in two propositions: First, it places upon the party in power the responsibility for unnecessary expenditures. Second, it secures such a statement of all the estimates of the departments and the revenues with which to meet them presented to Members of Congress, so that they can see what relation the revenues bear to the expenditures. If we could have sent to Congress a statement of that kind, showing, for instance, that there would be nearly 70 per cent of the expenditures that would go for war purposes and for pensions, Members would have a chance to discuss in a broad sense the expenses of government; and it is to bring about such a statement as would permit a real discussion of a budget in the true sense that this provision is proposed.

Mr. FINLEY. Does the gentleman think that with this section enacted into law the President would make a cut in his recommendations for the support of the War Department?

Mr. SHERLEY. I do not care very much whether he recommended any or not. If we can get the statement made by the party in power that shows what these expenditures are to be for, then we can have a full debate upon the budget such as has never been known in the Congress of the United States for a generation.

Mr. FINLEY. Then, I take it that the rules of the House will necessarily be changed. I withdraw the point of order.

Mr. GAINES of West Virginia. A parliamentary inquiry. Was the point of order withdrawn?

Mr. MANN. I reserve the point of order.

The CHAIRMAN. The gentleman from South Carolina withdrew the point of order.

Mr. MANN. I reserve the point of order.

Mr. Chairman, I will be perfectly frank. I do not intend to insist upon the point of order. The gentleman from Iowa has just stated that all of those who formerly had objected to this had changed their minds. I have not changed my mind on the subject. I think I am a little more set than I was before. The gentleman from Iowa, a most valuable Member of the House and of the Committee on Appropriations, has given a great deal of attention to this subject. This matter being somewhat in the nature of an experiment, I am willing to defer to his judgment, although I think in the end he will be exceedingly sorry if it is enacted into permanent law. I therefore withdraw the point of order.

The Clerk read as follows:

SEC. 10. After June 30, 1909, where the salary or compensation of any officer, agent, clerk, or employee in the service of the United States is at an annual or monthly rate the following rules shall be followed in computing the amount due: An annual salary or compensation shall be devided into twelve equal installments, one of which shall be the pay for each calendar month; and in making payment for a fractional part of any calendar month there shall be paid such proportion of one of such installments, or of the amount of the monthly salary or compensation, as the number of days in the fractional part of that month bears to the actual number of days in that month.

Mr. ROBERTS. Mr. Chairman, a point of order.

Mr. DRISCOLL. I make a point of order against that paragraph.

Mr. BENNET of New York. I make a point of order.

Mr. TAWNEY. The point of order is conceded.

The CHAIRMAN. The Chair understands the gentleman from Minnesota to concede the point of order. The point of order is sustained.

Mr. TAWNEY. Now, Mr. Chairman, I offer as a separate section the amendment which the Clerk has, and which I ask him to read.

The Clerk read as follows:

Insert as section 10:

"That hereafter no part of the public moneys, or of any appropriation heretofore or hereafter made by Congress, shall be used for the payment of compensation or expenses of any commission, council, board, or other similar body, or any members thereof, or for expenses in connection with any work or the results of any work or action of any commission, council, board, or other similar body, unless the creation of the same shall be or shall have been authorized by law; nor shall there be employed by detail hereafter or heretofore made, or otherwise, personal services from any executive department or other government establishment in connection with any such commission, council, board, or other similar body."

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

Mr. TAWNEY. Mr. Chairman, I move that the committee do now rise and report the bill with the amendments to the House with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. OLMSTED, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 28245) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, and had directed him to report the same to the House with sundry amendments, and with the recommendation that as amended the bill do pass.

Mr. TAWNEY. Mr. Speaker, I move the adoption of the amendments and the passage of the bill, and on that I demand the previous question.

Mr. WILLIAMS. There is a right, I take it, to call for a separate vote upon amendments.

Mr. TAWNEY. After the motion is made to do that, it will be time enough——

The SPEAKER. One moment. Will the gentleman withhold his motion temporarily?

Mr. TAWNEY. I will withhold the motion temporarily.

MODIFICATION OF RULE XXVIII.

Mr. DALZELL. Mr. Speaker, I submit the following privileged report (H. Rept. No. 2273) from the Committee on Rules.

Mr. WILLIAMS. Mr. Speaker, a parliamentary inquiry. What has become of the sundry civil bill?

The SPEAKER. The sundry civil bill is reported to the House from the Committee of the Whole House on the state of the Union, and is pending; and this is a privileged report that comes in ahead of that.

Mr. WILLIAMS. Now, Mr. Speaker, the question I propounded was with this intent: I do not want to lose the opportunity to ask for a separate vote on the Alaskan game amendment reported from the Committee of the Whole House on the state of the Union.

The SPEAKER. The gentleman will be given, of course, under the rules of the House, any privilege that it is the sense of the majority under the rule he should have. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 597.

Resolved, That during the remainder of this session Rule XXVIII shall be, and hereby is, modified in the following particular:

"The vote on agreeing to the motion shall in all cases be by majority instead of by two-thirds; and upon the demand of any Member opposed to the motion, a second shall be considered as ordered."

Mr. DALZELL. Mr. Speaker, the propriety of adopting this rule must be apparent to everyone. This is Friday night preceding the Thursday on which the Congress must adjourn. There are a great many bills necessary to be considered——

Mr. WILLIAMS. Will the gentleman yield for a question?

Mr. DALZELL. I would rather finish my sentence, but I will.

Mr. WILLIAMS. The question I wish to ask is this, Whether the gentleman, representing the majority of the House, is going to give to the members of the Committee on Rules who represent the minority any opportunity to debate this or not.

Mr. DALZELL. I propose, after making a few remarks, to call for the previous question; and I call for the previous question now.

The question was taken; and on a division (demanded by Mr. UNDERWOOD) there were—ayes 130, noes 65.

Mr. UNDERWOOD. The yeas and nays, Mr. Speaker.

The yeas and nays were ordered.

The question was taken; and there were—yeas 108, nays 91, answered "present" 4, not voting 183, as follows:

YEAS—108.

Maynard	Prince	Sparkman	Wilson, Pa.
Moon, Pa.	Pujo	Sperry	Wolf
Moore, Pa.	Randell, Tex.	Stafford	Young
Moore, Tex.	Rauch	Steenerson	

So the previous question was ordered.

The following pairs were announced:

For the session:

Mr. McMORRAN with Mr. PUJO.

Mr. WANGER with Mr. ADAMSON.

Mr. BRADLEY with Mr. GOULDEN.

Until further notice:

Mr. FASSETT with Mr. ANSBERRY.

Mr. COOK of Pennsylvania with Mr. RICHARDSON.

Mr. ACHESON with Mr. HILL of Mississippi.

Mr. McGAVIN with Mr. PRATT.

Mr. ADDISON D. JAMES with Mr. LAMAR of Florida.

Mr. CARY with Mr. WEISSE.

Mr. DAWES with Mr. LASSITER.

Mr. CALDERHEAD with Mr. CLARK of Florida.

Mr. BIRDSALL with Mr. BOWERS.

Mr. COUDREY with Mr. CALDWELL.

Mr. MALBY with Mr. CRAIG.

Mr. AMES with Mr. CLAYTON.

Mr. ELLIS of Missouri with Mr. SMITH of Missouri.

Mr. JACKSON with Mr. WOLF.

Mr. MANN with Mr. FITZGERALD.

Mr. FAIRCHILD with Mr. RIORDAN.

Mr. MUDD with Mr. TALBOTT.

Mr. LOUD with Mr. PADGETT.

Mr. DRAPER with Mr. HACKNEY.

Mr. DENBY with Mr. HACKETT.

Mr. DAVIDSON with Mr. GOLDFOGLE.

Mr. DARRAGH with Mr. GODWIN.

Mr. COOPER of Wisconsin with Mr. GLASS.

Mr. COOPER of Pennsylvania with Mr. GILL.

Mr. CONNER with Mr. FORNES.

Mr. CASSEL with Mr. FLOYD.

Mr. BURTON of Ohio with Mr. FAVROT.

Mr. BURLEIGH with Mr. ESTOPINAL.

Mr. BURKE with Mr. EDWARDS of Georgia.

Mr. BATES with Mr. CRAVENS.

Mr. BARCHFELD with Mr. CRAWFORD.

Mr. BANNON with Mr. BRODHEAD.

Mr. ANTHONY with Mr. BARTLETT of Nevada.

Mr. ALEXANDER of New York with Mr. BARNHART.

Mr. HAMILTON of Michigan with Mr. KIPP.

Mr. GRAHAM with Mr. JOHNSON of Kentucky.

Mr. GOEBEL with Mr. HUGHES of New Jersey.

Mr. GILLETT with Mr. HUMPHREYS of Mississippi.

Mr. FOULKROD with Mr. HITCHCOCK.

Mr. FOSTER of Vermont with Mr. HENRY of Texas.

Mr. FOELKER with Mr. HEFLIN.

Mr. ESCH with Mr. HAMMOND.

Mr. DUREY with Mr. HAMILL.

Mr. HUGHES of West Virginia with Mr. LENAHAN.

Mr. HOWELL of New Jersey with Mr. LEGARE.

Mr. HEPBURN with Mr. LEAKE.

Mr. HILL of Connecticut with Mr. LEE.

Mr. HASKINS with Mr. FLOOD.

Mr. HARDING with Mr. LAMAR of Missouri.

Mr. HAGGOTT with Mr. KITCHIN.

Mr. LANDIS with Mr. LIVINGSTON.

Mr. McCALL with Mr. MAYNARD.

Mr. LOWDEN with Mr. McLAIN.

Mr. LOVERING with Mr. McDERMOTT.

Mr. McKINLAY of California with Mr. MOORE of Texas.

Mr. McKINLEY of Illinois with Mr. MURPHY.

Mr. McLAUGHLIN of Michigan with Mr. PAGE.

Mr. McMILLAN with Mr. NICHOLLS.

Mr. MOON of Pennsylvania with Mr. RANDELL of Texas.

Mr. HULL of Iowa with Mr. LEWIS.

Mr. KAHN with Mr. LINDSAY.

Mr. WHEELER with Mr. TAYLOR of Alabama.

Mr. LORIMER with Mr. WATKINS.

Mr. LONGWORTH with Mr. WEBB.

Mr. LAWRENCE with Mr. WILSON of Pennsylvania.

Mr. STERLING with Mr. SMALL.

Mr. SLEMP with Mr. SAUNDERS.
Mr. PRINCE with Mr. RYAN.
Mr. HALE with Mr. ROBINSON.
Mr. PEARRE with Mr. RHINOCK.
Mr. NEEDHAM with Mr. REID.
Mr. MOORE of Pennsylvania with Mr. RAUCH.
Mr. WATSON with Mr. SMITH of Texas.
Mr. DIEKEMA with Mr. SPARKMAN.
Mr. CURRIER with Mr. ELLERBE.

Mr. LANGLEY. Mr. Speaker, I came in immediately after my name was called, and I desire to announce myself as present.

The result of the vote was then announced as above recorded.

Mr. WILLIAMS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WILLIAMS. I did not hear the announcement. Was there a quorum present disclosed by the vote?

The SPEAKER. Yes; 202 members were present.

Mr. DALZELL. I suggest, Mr. Speaker, there is no debate on this proposition.

Mr. GARDNER of Massachusetts. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. GARDNER of Massachusetts. I rise for the purpose of inquiring whether there has been debate on the main proposition. Is not there twenty minutes on a side?

The SPEAKER. There was debate on the main proposition.

Mr. WILLIAMS. The gentleman from Pennsylvania debated it by saying he was in favor of it. [Laughter.]

Mr. DALZELL. The gentleman from Mississippi would not allow me to go further.

The question was taken, and the Chair announced the ayes seemed to have it.

On a division (demanded by Mr. WILLIAMS) there were—ayes 80, noes 75.

Mr. DALZELL. Mr. Speaker, I make the point that no quorum is present.

Mr. WILLIAMS. Mr. Speaker, I make the point that no quorum is present.

The SPEAKER. There is no quorum present. The Doorkeeper will close the doors, the Sergeant-at-Arms will notify absent Members; as many as favor agreeing to the resolution will, as their names are called, answer "aye," as many as are opposed will answer "no," those not voting will answer "present," and the Clerk will call the roll.

The question was taken; and there were—yeas 103, nays 98, answered "present" 7, not voting 178, as follows:

YEAS—103.

Allen	Ellis, Oreg.	Jones, Wash.	Reynolds

Denby	Jackson	Morse	Young
Denver	James, Addison D.	Mouser	
Diekema	Johnson, S. C.	Mudd	

So the resolution was agreed to.

The Clerk announced the following additional pairs:

Until further notice:

Mr. BEDE with Mr. BURGESS.
Mr. BURTON of Delaware with Mr. BURNETT.
Mr. COOK of Colorado with Mr. COCKRAN.
Mr. COUSINS with Mr. DENVER.
Mr. CRUMPACKER with Mr. GAINES of Tennessee.
Mr. DOUGLAS with Mr. GARRETT.
Mr. GRONNA with Mr. HELM.
Mr. HINSHAW with Mr. JOHNSON of South Carolina.
Mr. HULL of Iowa with Mr. LIVINGSTON.
Mr. MADISON with Mr. PETERS.
Mr. PARSONS with Mr. SABATH.
Mr. PORTER with Mr. SHACKLEFORD.
Mr. LAWRENCE with Mr. SHERLEY.
Mr. LANING with Mr. SIMS.
Mr. SMITH of Michigan with Mr. WILLETT.

Mr. GOLDFOGLE. Mr. Speaker, I will ask if my colleague [Mr. CALDER] has voted?

The SPEAKER. He has not.

Mr. GOLDFOGLE. I stand paired with him. Otherwise I would vote "no." I desire to be recorded.

The SPEAKER. The Clerk will call the gentleman's name.

The Clerk called the name of Mr. GOLDFOGLE, and he answered "Present."

The SPEAKER. Upon this vote the ayes are 103, noes 98, present 7—a quorum. The Doorkeeper will open the doors. The ayes have it, and the resolution is agreed to.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. TAWNEY. Mr. Speaker, I move to suspend the rules, agree to the amendments to the sundry civil appropriation bill (H. R. 28245), and pass the bill.

The SPEAKER. The question is on the motion of the gentleman from Minnesota to suspend the rules, agree to the amendments to the sundry civil appropriation bill, pass the bill.

Mr. WILLIAMS. Mr. Speaker, a parliamentary inquiry. Is it in order to call for a separate vote on either of the amendments?

The SPEAKER. Not under a motion to suspend the rules.

Mr. WILLIAMS. Mr. Speaker, under the rule that has just come in and been passed, then the power of the House to pass separately upon an amendment to appropriation bills has been parted with.

The SPEAKER. The power of the House to work its will by a majority has not been parted with.

Mr. WILLIAMS. The power of the House by a majority to prevent a majority of the House from voting separately on amendments has been parted with.

Mr. TAWNEY. Mr. Speaker, I call for the regular order.

Mr. CLARK of Missouri. Mr. Speaker, I demand a second. I understand that that gives twenty minutes' debate on a side.

The SPEAKER. Absolutely. A second will be considered as ordered. The gentleman from Missouri is entitled to twenty minutes and the gentleman from Minnesota to twenty minutes.

Mr. TAWNEY. Mr. Speaker, I have no desire to occupy any more time on the sundry civil bill and its amendments than has been occupied by the House the last three or four days and nights. I reserve the balance of my time.

Mr. CLARK of Missouri. Mr. Speaker, I yield five minutes to the gentleman from Alabama [Mr. UNDERWOOD].

Mr. UNDERWOOD. Mr. Speaker, the proposition before the House is to suspend the rules and pass the greatest appropriation bill that comes before this House. I recognize the necessity of passing this bill at an early date, but there are a large number of amendments in the bill.

There is nobody who desires to vote on every amendment which has been adopted in the Committee of the Whole, but when an amendment is placed on a bill the membership of this House, under the rules, has a parliamentary right under ordinary circumstances, a constitutional right, to force the House to vote on amendments that have been put on the bill in Committee of the Whole. The majority of this House has adopted a rule that has no precedent in the parliamentary history of this House for its brutality. Never before have we ever adopted a rule to authorize this House to suspend the rules and pass legislation by a majority vote, under suspension of the rules, except in the time of a filibuster. There is no filibuster existing in this House to-day. Nobody desires to start a filibuster. Every gentleman here desires to see the appropriation bills pushed through at the earliest possible moment.

Mr. CAMPBELL. Was the gentleman present last night?

Mr. UNDERWOOD. I was here a part, but not all of last night.

Mr. CAMPBELL. There are some of us who were here until half past 3 this morning, and we witnessed a filibuster that commenced early in the evening and continued throughout the night.

Mr. UNDERWOOD. I do not know what the gentleman calls a filibuster.

Mr. TAWNEY. We do.

Mr. UNDERWOOD. But the gentleman knows that it was within the power of the chairman of the Committee on Appropriations to enforce the rules of this House and hold the debate on every amendment that was offered here to five minutes in the affirmative and five minutes in the negative, and if he did not do so, then he allowed debate to run to a point where possibly it went to extreme limits. But it was within the power of the chairman of the committee in charge of this bill to restrict the debate to the items in the bill by merely enforcing the rules of the House.

Mr. CAMPBELL. I will say that the chairman used every possible effort to limit debate and to prevent the filbuster.

Mr. UNDERWOOD. I do not see anything in the RECORD where the chairman of the committee made a point of order against the debate along that line, and if he did not make a point of order he did not use the power that was in his hands to enforce the passage of the bill.

Mr. TAWNEY. If the gentleman will permit me, I will say that I moved to close debate, and on every motion of that kind the minority availed itself of every opportunity under the rules to delay the determination of that question by a demand for a division, by a demand for tellers, and by making the point of no quorum, and everything else.

Mr. UNDERWOOD. The gentleman is one of the best parliamentarians in this House, and it is not necessary for me to inform the House that he knows the rules of the House and that he did not have to move to close debate.

The SPEAKER. The time of the gentleman has expired.

Mr. CLARK of Missouri. Does the gentleman from Minnesota want to use any of his time?

Mr. TAWNEY. I do not know that I will.

Mr. CLARK of Missouri. I yield five minutes to the gentleman from Massachusetts [Mr. GARDNER].

Mr. GARDNER of Massachusetts. Mr. Speaker, if any gentleman objects to my discussing this cloture rule which has just been adopted, I wish they would call me to order promptly. Mr. Speaker, we have just voted for a rule under the supposition that it is a rule to expedite business, and for that purpose alone. I was not here last night. I know nothing about the scenes that took place. I believe there was disorder, and yet I believe substantial progress was made. Disorder is a bad thing, but denying to Members the right to amend a bill or a resolution is worse. A rule has just been adopted, and yet few Members know what it means, as this rule was brought in to-night. Members have come in here in a hurry on the call of the House and have voted without any conception of what they voted for. To my mind this way of legislating exceeds in its ill effect any possible result which could arise if two or three of the appropriation bills failed to pass at this short session of Congress. We are to have an extra session and could pass such bills at our leisure.

There is only one thing I hope, Mr. Speaker, and that is that we shall not find that we have adopted a rule ostensibly for the purpose of shutting off debate and stopping filibustering, but really framed to prevent Members of this House from offering amendments which they have a right to offer.

Mr. CLARK of Missouri. Mr. Speaker, I yield five minutes to the gentleman from Mississippi [Mr. WILLIAMS]. [Applause on the Democratic side.]

Mr. WILLIAMS. Mr. Speaker, this House had a startling illustration while it was considering the sundry civil appropriation bill of the carelessness with which it does business. The delegate from Alaska [Mr. CALE], not being present when a particular amendment to the bill was reached and passed, came in later and by unanimous consent obtained an opportunity to be heard. He made such a succinct, clear, and concise statement that it brought the minds of all right-thinking Members to the conclusion that the amendment adopted in the committee ought to have been defeated. I sought this afternoon to get a separate vote on that amendment in accordance with a natural and normal rule of this House.

Before that happened, while the gentleman from Minnesota [Mr. TAWNEY] was upon his feet presenting the sundry civil bill and immediately after the Chairman of the Committee of the Whole had made his report to the Speaker, the gentleman from Pennsylvania [Mr. DALZELL] was recognized to bring in a special rule from that occult and mysterious committee of which I am a nonacting member—the Committee on Rules. That report adopted the following rule:

That during the remainder of this session Rule XXVIII shall be, and hereby is, modified in the following particular:

"The vote on agreeing to the motion to suspend the rules shall in all cases be by majority instead of by two-thirds, and upon the demand of any Member opposed to the motion a second shall be considered as ordered."

The special rule was delivered by the three majority members of the Committee on Rules without a ten-minute, without a five-minute, without a one-minute notice to the minority members of that committee that it was to come up for consideration, and it cut off all votes on separate amendments not only upon this great appropriation bill, but upon every other appropriation bill until the end of the session whenever the motion to suspend shall be made.

No amendment passed in the Committee of the Whole shall hereafter be separately considered in the House of Representatives, if our parliamentary leaders do not want it done.

Last session a rule like this was brought in. There was then an excuse for it. We, on this side, were resorting to every course that we could in order to force the House to vote upon certain propositions. It was contended upon that side that our course was revolutionary and had to be met with revolutionary methods. At this session there is nothing of that sort going on, with the exception of a little by-play last night that everybody understood. There has not been the slightest indication of any desire to hold up the House for any length of time. We are told at the very last minute, gentlemen—Representatives of the American people—that we are compelled to have this rule, because we are so near the end of the session that, without it, without construing two-thirds to be a majority, and without overriding the rule for the demand for a second, we can not finish the appropriations that are necessary to the support of the Government.

I pass by the question that we are to have an extra session within eleven days after this House adjourns. If the statement that the great supply bills are so far behind as advocates of this rule state be true, Mr. Speaker, it is the most stupendous indictment of you as Speaker of this House that ever was drawn since the House of Representatives has been in existence. [Applause on the Democratic side.] If it be true, it proves your inefficiency, your absolute incompetency, and your inability to take care of and handle the House of Representatives and see that its ordinary routine business is attended to in time. If it be true, it proves that the majority upon the Republican side of the House is guilty of absolute inefficiency and incompetency,

if not of insanity. You are as a party incapable of governing the country on regular and common routine lines.

The SPEAKER. The time of the gentleman has expired.

Mr. CLARK of Missouri. I will yield to the gentleman as much of the five minutes remaining as he desires.

Mr. WILLIAMS. What have you done—and will not admit that you did it—or left undone, without honest confession of your own neglect? What has happened that is abnormal or difficult enough to prevent this House of Representatives, composed of alleged intelligent Members, under alleged intelligent management, from attending to the ordinary business of the country as previous Houses have done and passing the great supply bills? I will tell you what is happening; and it is happening more and more every year, not only here, but in the Senate. There is an absolute—no; I will not say conspiracy—habit, let us call it. There is a growing habit of taking up all the time possible in the committees and giving the body of the House and the Senate both as little time as possible to consider legislation. [Loud applause on the Democratic side.] In whose interest, and for whom? In the interest of the machine gang in the Senate and the machine gang in the House. [Renewed applause.]

Only in the interest of the few men who really know legislation, who stand before the country as the chief officers and the chief leaders of both bodies, men having their own way in secret legislation by committees securing the legislation that they want, and that the balance of you may have nothing to say about. The longer a bill remains in committee, the greater the opportunity to put private projects or corporation jobs in the bill and the less chance for light. You have got to the contemptible point where you can not even get a separate vote on an amendment to a great supply bill. [Applause.]

I am speaking without any passion or partisanship. I am speaking as a man who is going to retire from the House, and will not enter the other body soon enough thereafter that anything I have to say will have any effect upon immediately future legislation. You gentlemen, some of you, who have been talking throughout the country, telling how you wanted to amend the rules so that the majority of the House could handle itself, every man of you except one voted for this resolution. [Applause on the Democratic side.] You have cut your own throats, tied your own hands, you boasted insurgents and reformers. I said all except one; I am informed——

Mr. GARDNER of Massachusetts. The gentleman is mistaken.

The CHAIRMAN. Does the gentleman yield to the gentleman from Massachusetts?

Mr. WILLIAMS. Of course.

Mr. GARDNER of Massachusetts. The gentleman was mistaken. There was a very substantial number voted with the gentleman.

Mr. WILLIAMS. When we stood up I did not see but two. I beg pardon, I did see another, but I am informed that there were about half a dozen.

Mr. OLLIE M. JAMES. There were five or six over there.

Mr. WILLIAMS. However many, or rather however few of you there were, you have cut your own throats, you have tied your own hands, when we were ready—I can not tell what happens in committees without violating the rules of this body, and I am not going to do that—but we were ready to give you every possible opportunity for a rule whereby the majority of the House of Representatives could handle the business of the House of Representatives, and you have failed us, yourselves, and the country by adopting this rule.

And the Committee on Rules has reported two other rules out almost equally drastic, and when you adopted this rule you did not give to the Members of the minority upon the Committee on Rules an opportunity even to tell the country what the rule meant. The gentleman from Pennsylvania [Mr. DALZELL], resorting to the ordinary common parliamentary trick—I call it a trick, because that is all it is—took up about two minutes in saying that he was in favor of the adoption of the rule, and then called for the previous question, and the ordinary twenty minutes for debate given under the rule could not be granted, because the Chair ruled that the question had been debated by the gentleman from Pennsylvania. That trick is so common. [Loud applause on the Democratic side.]

The SPEAKER. The time of the gentleman has expired.

Mr. TAWNEY. Mr. Speaker, I yield five minutes to the gentleman from Michigan [Mr. GARDNER].

Mr. GARDNER of Michigan. Mr. Speaker, the House always listens with interest to the gentleman from Mississippi; he is sometimes instructive, often entertaining. But I resent, on behalf of the Committee on Appropriations and of other committees charged with making appropriations and of this side of the House, that we have entered into a conspiracy with ourselves or with anybody else, or of the habit to delay the reporting of bills. The gentleman knows that this session is covered by about eighty days of actual work if you use all the holidays. Here is a report of the hearings on a single bill in one volume of 1,100 pages and another volume of 300 pages; and that committee had estimates before it of $162,000,000, involving almost every known interest in this Government and for every island possession. That committee sat by day and by night. It would have been recreant to its trust, it would have been unfaithful to this Congress, it would have been unworthy of the confidence of this House, had it not gone thoroughly into the questions involving so many millions of dollars.

Mr. CLARK of Missouri. Mr. Speaker, I would like to ask the gentleman from Michigan this question: Is there any reason why the Appropriations Committee should not have met here on the 10th day of November and gotten up the appropriation bills, just as well as the Committee on Ways and Means met here to get up the tariff bill? Then you would have had these bills ready to put in the House.

Mr. GARDNER of Michigan. We could have gotten here, and the gentleman also could; but, Mr. Speaker, the law requires that the estimates shall be made to the Congress before the hearings shall begin, and the estimates were not submitted on the 10th day of November [applause on the Republican side], nor could they have been submitted earlier than the opening of the session of Congress.

Mr. CLARK of Missouri. I should like to ask the gentleman another question.

Mr. GARDNER of Michigan. If I can have more time.

Mr. CLARK of Missouri. The gentleman from Minnesota [Mr. TAWNEY] has control of the time. What is the reason you could not have gone up to these departments and fished out these estimates on the 10th of November, just as well as to wait until they sent them in to Congress?

Mr. GARDNER of Michigan. Mr. Speaker, I am astonished at the question of the gentleman from Missouri, a man whom I have delighted to follow in many things.

Mr. CLARK of Missouri. You had better follow me all the time, and you will be all right.

Mr. GARDNER of Michigan. The gentleman from Missouri made the best Republican speech the other day that I have heard in the House in a long time, and he made votes by it; but the gentleman should know that the estimates must be submitted according to law, and that in considering these estimates the committee must proceed in an orderly way.

Mr. CLARK of Missouri. Another question: Is it not true that the Appropriations Committee in days gone by have met here in vacation, before Congress convened, and begun their work on appropriation bills?

Mr. GARDNER of Michigan. Very rarely in the last ten years.

Mr. CLARK of Missouri. Well, they have done it?

Mr. LLOYD. Mr. Speaker——

The SPEAKER. Does the gentleman from Michigan yield to the gentleman from Missouri?

Mr. GARDNER of Michigan. Not now. I want to finish this point, and then I will be glad to listen to the gentleman.

Now, this sundry civil is but one of several bills involving larger or smaller amounts, but in the aggregate, mark you, one thousand million dollars, all to be investigated and reported upon and presented to this House in an intelligent manner.

The SPEAKER. The time of the gentleman from Michigan has expired.

Mr. TAWNEY. I yield two minutes more to the gentleman from Michigan.

Mr. GARDNER of Michigan. One thousand million dollars to be considered and reported upon and enacted into law in less than ninety days' time. Instead of charging the majority, and particularly the working committees, with dereliction of duty or conspiracy, the gentleman ought, in frankness, to acknowledge that not only the minority but the Congress and the Nation are under obligations to the men who work days and nights to accomplish, in an intelligent and faithful manner, their duty relative to the reporting of these bills. [Applause on the Republican side.]

Mr. WILLIAMS. Will the gentleman submit to an interrogatory right there?

Mr. GARDNER of Michigan. Yes; certainly.

Mr. WILLIAMS. Does not the gentleman agree with me that it is not the sole duty of members of committees, but the duty of Members of the House, representing the entire country, to be acquainted with the details of these great supply bills? And does the gentleman agree with me that unless these committees

get in their bills early enough the average Representative practically knows nothing about what is contained in them?

Mr. GARDNER of Michigan. In the first place, you have the Book of Estimates, which my friend from Missouri would have us follow and search out. You have the published documents, which he would have us go over before the estimates are made. These are open to every Member, just as much as to the members of the committee.

Mr. WILLIAMS. Now, I know the gentleman from Michigan so well, and his candor and frankness and fairness. Does the gentleman from Michigan pretend that a Member of the House, except on his own committees, can keep up with all the estimates of every sort prepared for all the different committees in the House? The gentleman knows that Members not on a committee must get their information from the committee, and that the committee ought to report early enough to give them that information.

The SPEAKER. The time of the gentleman from Michigan has again expired.

Mr. TAWNEY. I ask for a vote on agreeing to the motion.

The question being taken, the Speaker announced that the ayes appeared to have it.

Mr. CLARK of Missouri. Yeas and nays!

The yeas and nays were ordered.

The question was taken; and there were—yeas 140, nays 106, answered "present" 7, not voting 132, as follows:

Mr. BARTHOLDT with Mr. BROUSSARD.

Mr. ANDRUS with Mr. LEGARE.

Mr. WATSON with Mr. BRANTLEY.

Mr. SPERRY with Mr. RUCKER.

Mr. WILSON of Illinois with Mr. LEWIS.

Mr. SNAPP with Mr. BELL of Georgia.

The SPEAKER. Upon this vote the yeas are 140, the nays 106, present 7. The yeas have it, and the motion prevails.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. GARDNER of Michigan. Mr. Speaker, I call up the conference report on the bill (H. R. 25392) making appropriations for the expenses of the government of the District of Columbia, and I ask that the statement be read in lieu of the report.

The SPEAKER. Is there objection?

Mr. GILLESPIE. I object.

The SPEAKER. Object to what?

Mr. GILLESPIE. To the statement being read instead of the report.

The SPEAKER. Then the report will be read.

The Clerk began to read the report.

Mr. GILLESPIE. Mr. Speaker, I wish to withdraw my objection to the reading of the statement in lieu of the report.

The SPEAKER. The Clerk will read the statement.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 25392) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 3, 5, 7, 8, 14, 21, 23, 24, 27, 28, 29, 30, 32, 34, 41, 42, 43, 45, 46, 50, 52, 55, 60, 62, 63, 67, 69, 71, 78, 81, 83, 85, 89, 91, 93, 94, 98, 99, 100, 101, 102, 106, 108, 109, 110, 112, 113, 114, 116, 117, 118, 119, 120, 121, 123, 124, 127, 129, 131, 133, 147, 148, 150, 152, 155, 156, 158, 160, 162, 163, 164, 165, 166, 167, 168, 169, 174, 194, 195, 208, 211, 213, 214, 215, 216, 217, 227, 228, 229, 234, 235, 237, 240, 243, 254, 255, 258, 259, 261, 266, 267, 284, 288, 296, 297, 300, 304, 305, 309, 313, 319, 322, 324, 329, 330, 331, 332, 336, 338, 341, 343, 345, 346, 349, 351, 354, 355, 359, 361, 371, 372, 378, and 382.

That the House recede from its disagreement to the amendments of the Senate numbered 4, 6, 10, 11, 12, 13, 16, 17, 18, 19, 20, 31, 33, 35, 36, 37, 38, 53, 57, 64, 65, 66, 70, 79, 80, 82, 84, 86, 87, 88, 90, 95, 96, 103, 104, 105, 111, 115, 122, 125, 126, 134, 139, 140, 141, 142, 144, 145, 149, 151, 153, 157, 170, 171, 172, 173, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 197, 198, 212, 218, 219, 220, 222, 223, 224, 225, 226, 230, 231, 236, 241, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 262, 264, 265, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 285, 286, 287, 289, 290, 291, 292, 293, 294, 295, 302, 307, 310, 311, 312, 316, 317, 320, 321, 325, 328, 333, 334, 335, 347, 348, 350, 353, 356, 367, 369, 370, 374, 376, 379, 381, and 385; and agree to the same.

Amendment numbered 9: That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "one hundred and five thousand six hundred and fifty-four dollars;" and the Senate agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirty-eight thousand seven hundred and thirty dollars;" and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twenty-one thousand five hundred dollars;" and the Senate agree to the same.

Amendment numbered 25: That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert "six;" and the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirty-four thousand three hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 39: That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment as follows: In lieu of the matter proposed by said amendment insert the following: "municipal architect, whose duty it shall be to prepare and supervise the plans for and superintend the construction of all municipal buildings, and the repair and improvement of all buildings belonging to the District of Columbia under the direction of the Engineer Commissioner of the District of Columbia, three thousand six hundred dollars; and all laws or parts of laws placing such duties upon the inspector of buildings of the District of Columbia are hereby repealed;" and the Senate agree to the same.

Amendment numbered 40: That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "two hundred thousand seven hundred and eighty-two dollars;" and the Senate agree to the same.

Amendment numbered 44: That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment as follows: At the end of said amendment, after the word "dollars," insert the following: ": *Provided*, That hereafter there shall be assessed and collected an annual wheel tax on all automobiles or other motor vehicles owned and operated in the District of Columbia having seats for only two persons the sum of three dollars, and on all such vehicles having seats for more than two persons an additional tax of two dollars for each additional seat;" and the Senate agree to the same.

Amendment numbered 47: That the House recede from its disagreement to the amendment of the Senate numbered 47, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "nine thousand four hundred and twenty dollars;" and the Senate agree to the same.

Amendment numbered 48: That the House recede from its disagreement to the amendment of the Senate numbered 48, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "six thousand dollars;" and the Senate agree to the same.

Amendment numbered 49: That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twenty-nine thousand four hundred and twenty-five dollars;" and the Senate agree to the same.

Amendment numbered 51: That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "assistant, one thousand dollars;" and the Senate agree to the same.

Amendment numbered 54: That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirty-nine thousand three hundred and twenty dollars;" and the Senate agree to the same.

Amendment numbered 56: That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "purchase and maintenance of motor cycles;" and the Senate agree to the same.

Amendment numbered 58: That the House recede from its disagreement to the amendment of the Senate numbered 58, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "nineteen thousand dollars;" and the Senate agree to the same.

Amendment numbered 59: That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirty-six thousand dollars;" and the Senate agree to the same.

Amendment numbered 61: That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "four thousand dollars;" and the Senate agree to the same.

Amendment numbered 68: That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment as follows: On page 22, line 11, of the bill strike out "a permanent" and insert in lieu thereof "permanent;" and the Senate agree to the same.

Amendment numbered 72: That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "seventy-one thousand dollars;" and the Senate agree to the same.

Amendment numbered 73: That the House recede from its disagreement to the amendment of the Senate numbered 73, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "two thousand dollars;" and the Senate agree to the same.

Amendment numbered 74: That the House recede from its disagreement to the amendment of the Senate numbered 74, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "fourteen thousand dollars;" and the Senate agree to the same.

Amendment numbered 75: That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twenty thousand dollars;" and the Senate agree to the same.

Amendment numbered 76: That the House recede from its disagreement to the amendment of the Senate numbered 76, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "ten thousand dollars;" and the Senate agree to the same.

Amendment numbered 77: That the House recede from its disagreement to the amendment of the Senate numbered 77, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twenty-five thousand dollars;" and the Senate agree to the same.

Amendment numbered 92: That the House recede from its disagreement to the amendment of the Senate numbered 92, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "Northwest: To widen Thirteenth street extended ten feet on the easterly side, between Park road and Monroe street, and grade and improve the same, two thousand five hundred dollars, and the Commissioners of the District are hereby required to commence immediately the work herein provided for;" and the Senate agree to the same.

Amendment numbered 97: That the House recede from its disagreement to the amendment of the Senate numbered 97, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "One hundred and ninety-seven thousand seven hundred dollars;" and the Senate agree to the same.

Amendment numbered 107: That the House recede from its disagreement to the amendment of the Senate numbered 107, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "Seventy-five thousand dollars;" and the Senate agree to the same.

Amendment numbered 128: That the House recede from its disagreement to the amendment of the Senate numbered 128,

and agree to the same with an amendment as follows: At the end of said amendment, after the word "dollars," insert the following: " : *Provided*, That the above public-convenience stations be located on public space to be selected by the Commissioners of the District of Columbia, and the jurisdiction and control of such portion of any public reservation so selected as shall be required for the location of such stations and their approaches is hereby transferred from the United States official having charge of said reservation to the Commissioners of the District of Columbia, such transfer to take effect on the date of notice by the said commissioners to the said United States official of the location of the sites for said stations;" and the Senate agree to the same.

Amendment numbered 130: That the House recede from its disagreement to the amendment of the Senate numbered 130, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "three thousand dollars;" and the Senate agree to the same.

Amendment numbered 132: That the House recede from its disagreement to the amendment of the Senate numbered 132, and agree to the same with an amendment as follows: In lieu of the matter proposed by said amendment insert the following: "assistant electrical engineer, who shall perform the duties of the electrical engineer in the absence or disability of the latter, and shall have the same qualifications as to ability and technical knowledge as is required by law of the head of the department, one thousand eight hundred dollars:" and the Senate agree to the same.

Amendment numbered 135: That the House recede from its disagreement to the amendment of the Senate numbered 135, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "forty-five thousand two hundred and ninety-five dollars;" and the Senate agree to the same.

Amendment numbered 136: That the House recede from its disagreement to the amendment of the Senate numbered 136, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirteen thousand dollars;" and the Senate agree to the same.

Amendment numbered 137: That the House recede from its disagreement to the amendment of the Senate numbered 137, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "eleven thousand dollars;" and the Senate agree to the same.

Amendment numbered 138: That the House recede from its disagreement to the amendment of the Senate numbered 138, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "four thousand five hundred dollars;" and the Senate agree to the same.

Amendment numbered 143: That the House recede from its disagreement to the amendment of the Senate numbered 143, and agree to the same with an amendment as follows: At the end of said amendment, after the word "years," insert the following: " : *Provided*, That section five of an act entitled 'An act relating to the sale of gas in the District of Columbia,' approved June sixth, eighteen hundred and ninety-six, and all remedies therein provided, be, and the same are hereby, repealed, and all pending proceedings thereunder shall be vacated, and no judgment, decree, finding, permit, or valuation of any kind mentioned or intended to be mentioned in said section shall be made or ascertained.

"On and after the passage of this act every corporation engaged in the manufacture and sale of gas or electricity in the District of Columbia shall open and keep a set of books in manner and form prescribed by the Interstate Commerce Commission.

"The charter of the Washington Gaslight Company is hereby amended so as to increase the membership of its board of directors to seven."

And the Senate agree to the same.

Amendment numbered 146: That the House recede from its disagreement to the amendment of the Senate numbered 146, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "four thousand dollars;" and the Senate agree to the same.

Amendment numbered 154: That the House recede from its disagreement to the amendment of the Senate numbered 154, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "fifty-two thousand seven hundred dollars;" and the Senate agree to the same.

Amendment numbered 159: That the House recede from its disagreement to the amendment of the Senate numbered 159, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "seventeen thousand dollars;" and the Senate agree to the same.

Amendment numbered 161: That the House recede from its disagreement to the amendment of the Senate numbered 161, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "two thousand five hundred dollars;" and the Senate agree the same.

Amendment numbered 192: That the House recede from its disagreement to the amendment of the Senate numbered 192, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "one hundred and ten thousand four hundred and twenty dollars;" and the Senate agree to the same.

Amendment numbered 193: That the House recede from its disagreement to the amendment of the Senate numbered 193, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "seventy-five thousand dollars;" and the Senate agree to the same.

Amendment numbered 196: That the House recede from its disagreement to the amendment of the Senate numbered 196, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "ninety-two thousand five hundred dollars;" and the Senate agree to the same.

Amendment numbered 199: That the House recede from its disagreement to the amendment of the Senate numbered 199, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "nine hundred dollars;" and the Senate agree to the same.

Amendment numbered 200: That the House recede from its disagreement to the amendment of the Senate numbered 200, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "three thousand dollars;" and the Senate agree to the same.

Amendment numbered 201: That the House recede from its disagreement to the amendment of the Senate numbered 201, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "two thousand dollars;" and the Senate agree to the same.

Amendment numbered 202: That the House recede from its disagreement to the amendment of the Senate numbered 202, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "three thousand dollars;" and the Senate agree to the same.

Amendment numbered 203: That the House recede from its disagreement to the amendment of the Senate numbered 203, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "one thousand five hundred dollars;" and the Senate agree to the same.

Amendment numbered 204: That the House recede from its disagreement to the amendment of the Senate numbered 204, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "five hundred dollars;" and the Senate agree to the same.

Amendment numbered 205: That the House recede from its disagreement to the amendment of the Senate numbered 205, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "eleven thousand three hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 206: That the House recede from its disagreement to the amendment of the Senate numbered 206, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "forty-seven thousand five hundred dollars;" and the Senate agree to the same.

Amendment numbered 207: That the House recede from its disagreement to the amendment of the Senate numbered 207, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "one thousand five hundred dollars;" and the Senate agree to the same.

Amendment numbered 209: That the House recede from its disagreement to the amendment of the Senate numbered 209, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "For equipment, grading, and improving six additional school playgrounds, seven hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 210: That the House recede from its disagreement to the amendment of the Senate numbered 210,

and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "For maintenance and repairing eighteen playgrounds now established, nine hundred dollars; in all, one thousand six hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 221: That the House recede from its disagreement to the amendment of the Senate numbered 221, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "sixty thousand dollars;" and the Senate agree to the same.

Amendment numbered 232: That the House recede from its disagreement to the amendment of the Senate numbered 232, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "nine hundred and twenty-seven thousand four hundred and seventy-three dollars and fifty-two cents;" and the Senate agree to the same.

Amendment numbered 233: That the House recede from its disagreement to the amendment of the Senate numbered 233, and agree to the same with an amendment as follows: After said amendment insert as a new paragraph the following:

"That the following-described persons in the District of Columbia are hereby declared to be vagrants:

"Idle persons who, not having visible means of support, live without lawful employment; persons wandering abroad and visiting tippling shops or houses of ill fame, or lodging in groceries, outhouses, market places, sheds, barns, or in the open air, and not giving a good account of themselves; persons wandering abroad and begging, or who go about from door to door or place themselves in the streets, highways, passages, or other public places to beg or receive alms.

"All persons leading an idle, immoral, or profligate life who have no property to support them and who are able of body to work and do not work, including all able-bodied persons without other visible means of support who shall live in idleness upon the wages or earnings of their mother, wife, or minor child or children.

"Every person known to be a pickpocket, thief, burglar, or confidence operator, either by his own confession or by his having been convicted in the District of Columbia or elsewhere of either of such offenses, and having no visible or lawful means of support, when found loitering around in any building, park, highway, street, avenue, alley, or reservation, steamboat landing, railroad depot, station, banking institution, broker's office, place of amusement, room, store, shop, public place, or car or omnibus or other vehicle, or at any public gathering or assembly.

"Persons upon whom shall be found any instrument, tool, or other implement used for the commission of burglary or the commission of any other crime against property, or for picking locks or pockets, who shall fail to give a good account of the possession of the same, and all persons who by the common law are vagrants, whether embraced in any of the aforegoing classifications or not.

"That every person in the District of Columbia who shall be convicted of vagrancy under the provisions of this act shall be required to enter into security in a sum not exceeding five hundred dollars, conditioned upon his good behavior and industry for the period of one year, and if he shall fail to give such security he shall be committed to the workhouse in the said District for a term not to exceed one year. The security herein mentioned shall be in the nature of a recognizance to the District of Columbia with a surety or sureties to be approved by the police court of the said District, in which court all prosecutions under this act shall be conducted in the manner now provided by law for the prosecution of offenses against the laws and ordinances of the said District, but nothing contained in section forty-four of the Code of Law for the District of Columbia shall be so construed as to create or give to the accused, in prosecutions under this act, any right to trial by jury not existing by force of the Constitution of the United States."

And the Senate agree to the same.

Amendment numbered 238: That the House recede from its disagreement to the amendment of the Senate numbered 238, and agree to the same with an amendment as follows: At the end of said amendment, after the word "dollars," insert the following: ", or so much thereof as may be necessary;" and the Senate agree to the same.

Amendment numbered 239: That the House recede from its disagreement to the amendment of the Senate numbered 239, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "forty-eight thousand and eighty dollars;" and the Senate agree to the same.

Amendment numbered 242: That the House recede from its disagreement to the amendment of the Senate numbered 242, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirteen thousand five hundred dollars;" and the Senate agree to the same.

Amendment numbered 256: That the House recede from its disagreement to the amendment of the Senate numbered 256, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "five hundred and eight thousand two hundred and sixty dollars;" and the Senate agree to the same.

Amendment numbered 257: That the House recede from its disagreement to the amendment of the Senate numbered 257, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "ten thousand dollars;" and the Senate agree to the same.

Amendment numbered 260: That the House recede from its disagreement to the amendment of the Senate numbered 260, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twenty-seven thousand dollars;" and the Senate agree to the same.

Amendment numbered 263: That the House recede from its disagreement to the amendment of the Senate numbered 263, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "one hundred and nineteen thousand dollars;" and the Senate agree to the same.

Amendment numbered 268: That the House recede from its disagreement to the amendment of the Senate numbered 268, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "one hundred and eighteen thousand seven hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 283: That the House recede from its disagreement to the amendment of the Senate numbered 283, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twenty-seven thousand five hundred dollars;" and the Senate agree to the same.

Amendment numbered 298: That the House recede from its disagreement to the amendment of the Senate numbered 298, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "four hundred dollars;" and the Senate agree to the same.

Amendment numbered 299: That the House recede from its disagreement to the amendment of the Senate numbered 299, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "sixteen thousand nine hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 301: That the House recede from its disagreement to the amendment of the Senate numbered 301, and agree to the same with an amendment as follows: In lieu of the matter stricken out by said Senate amendment insert the following:

"Municipal court: For five judges, at two thousand five hundred dollars each; one judge, at the rate of two thousand five hundred dollars per annum for six months; clerk, one thousand five hundred dollars; assistant clerk, one thousand dollars; and janitor, four hundred and eighty dollars; in all, sixteen thousand seven hundred and thirty dollars;

"For rent of building, one thousand five hundred dollars;

"For contingent expenses, including books, law books, books of reference, fuel, light, telephone rental, and all other necessary miscellaneous items and supplies, seven hundred and fifty dollars; in all for the municipal court, eighteen thousand nine hundred and eighty dollars.

"For the following from March first to the end of the fiscal year nineteen hundred and nine: One clerk, at the rate of one thousand five hundred dollars per annum, five hundred dollars; one assistant clerk, at the rate of one thousand dollars per annum, three hundred and thirty-three dollars and thirty-three cents; one janitor, at the rate of four hundred and eighty dollars per annum, one hundred and sixty dollars; for rent of building, five hundred dollars; for furniture and equipment of rented building, two thousand five hundred dollars; in all, three thousand nine hundred and ninety-three dollars and thirty-three cents.

"The unexpended balance of the appropriation provided for the compensation of six justices of the peace by the District of Columbia appropriation act, approved May twenty-sixth, nineteen hundred and eight, is hereby reappropriated and made

available for the compensation of the judges of the municipal court from March first to the end of the fiscal year nineteen hundred and nine.

"The unexpended balance of the appropriation of four hundred dollars each for justices of the peace, for rent, clerical services, stationery, and other expenses, provided by the District of Columbia appropriation act, approved May twenty-sixth, nineteen hundred and eight, is hereby reappropriated and made available from March first to the end of the fiscal year nineteen hundred and nine for contingent expenses of the municipal court, including books, law books, books of reference, fuel, light, telephone rental, and all other necessary miscellaneous items and supplies."

And the Senate agree to the same.

Amendment numbered 303: That the House recede from its disagreement to the amendment of the Senate numbered 303, and agree to the same with an amendment as follows: At the end of said amendment, after the word "dollars," insert the following: " : *Provided*, That all appropriations herein made for said reformatory and workhouse are hereby made immediately available;" and the Senate agree to the same.

Amendment numbered 306: That the House recede from its disagreement to the amendment of the Senate numbered 306, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "seven hundred and twenty dollars;" and the Senate agree to the same.

Amendment numbered 308: That the House recede from its disagreement to the amendment of the Senate numbered 308, and agree to the same with an amendment as follows: In lieu of the sum proposed in said amendment insert the following: "fifteen thousand one hundred and forty dollars;" and the Senate agree to the same.

Amendment numbered 314: That the House recede from its disagreement to the amendment of the Senate numbered 314, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirty-nine thousand three hundred and thirty-six dollars;" and the Senate agree to the same.

Amendment numbered 315: That the House recede from its disagreement to the amendment of the Senate numbered 315, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "sixty thousand dollars;" and the Senate agree to the same.

Amendment numbered 318: That the House recede from its disagreement to the amendment of the Senate numbered 318, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twenty-two thousand five hundred dollars;" and the Senate agree to the same.

Amendment numbered 323: That the House recede from its disagreement to the amendment of the Senate numbered 323, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "forty thousand nine hundred and ninety-two dollars;" and the Senate agree to the same.

Amendment numbered 326: That the House recede from its disagreement to the amendment of the Senate numbered 326, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "seven thousand five hundred dollars;" and the Senate agree to the same.

Amendment numbered 327: That the House recede from its disagreement to the amendment of the Senate numbered 327, and agree to the same with an amendment as follows: In lieu of the matter proposed by said amendment insert the following: "For care and treatment of indigent patients, under a contract to be made with the Sibley Hospital by the Board of Charities, three thousand dollars;" and the Senate agree to the same.

Amendment numbered 337: That the House recede from its disagreement to the amendment of the Senate numbered 337, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirteen thousand seven hundred and seventy-five dollars;" and the Senate agree to the same.

Amendment numbered 339: That the House recede from its disagreement to the amendment of the Senate numbered 339, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "seven hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 340: That the House recede from its disagreement to the amendment of the Senate numbered 340, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "forty thousand and twenty-five dollars;" and the Senate agree to the same.

Amendment numbered 342: That the House recede from its disagreement to the amendment of the Senate numbered 342, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "two placing officers, at eight hundred and forty dollars each;" and the Senate agree to the same.

Amendment numbered 344: That the House recede from its disagreement to the amendment of the Senate numbered 344, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "eight thousand five hundred and twenty dollars;" and the Senate agree to the same.

Amendment numbered 352: That the House recede from its disagreement to the amendment of the Senate numbered 352, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "thirteen thousand one hundred and ten dollars;" and the Senate agree to the same.

Amendment numbered 357: That the House recede from its disagreement to the amendment of the Senate numbered 357, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "eight thousand and twenty dollars;" and the Senate agree to the same.

Amendment numbered 358: That the House recede from its disagreement to the amendment of the Senate numbered 358, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twelve thousand dollars;" and the Senate agree to the same.

Amendment numbered 360: That the House recede from its disagreement to the amendment of the Senate numbered 360, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "twenty-three thousand and seventy dollars;" and the Senate agree to the same.

Amendment numbered 362: That the House recede from its disagreement to the amendment of the Senate numbered 362, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "foreman, three hundred and sixty dollars; and night watchman for six months, at twenty-five dollars per month, one hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 363: That the House recede from its disagreement to the amendment of the Senate numbered 363, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "three thousand eight hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 364: That the House recede from its disagreement to the amendment of the Senate numbered 364, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "four thousand dollars;" and the Senate agree to the same.

Amendment numbered 365: That the House recede from its disagreement to the amendment of the Senate numbered 365, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "Five thousand nine hundred and twenty dollars;" and the Senate agree to the same.

Amendment numbered 366: That the House recede from its disagreement to the amendment of the Senate numbered 366, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "Two thousand five hundred dollars;" and the Senate agree to the same.

Amendment numbered 368: That the House recede from its disagreement to the amendment of the Senate numbered 368, and agree to the same with amendments as follows: On page 85, in line 19, strike out the word "other," and add at the end of the amended paragraph the following:

"The said commissioners are hereby empowered to prescribe the penalty or penalties for violation of any charge fixed by them."

And the Senate agree to the same.

Amendment numbered 373: That the House recede from its disagreement to the amendment of the Senate numbered 373, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "index clerk, one thousand four hundred dollars;" and the Senate agree to the same.

Amendment numbered 375: That the House recede from its disagreement to the amendment of the Senate numbered 375,

and agree to the same with an amendment as follows: In lieu of the matter proposed by said amendment insert the following: "meter computer, one thousand dollars;" and the Senate agree to the same.

Amendment numbered 377: That the House recede from its disagreement to the amendment of the Senate numbered 377, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "eighty-one thousand eight hundred and sixty dollars;" and the Senate agree to the same.

Amendment numbered 380: That the House recede from its disagreement to the amendment of the Senate numbered 380, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "forty-one thousand dollars;" and the Senate agree to the same.

Amendment numbered 383: That the House recede from its disagreement to the amendment of the Senate numbered 383, and agree to the same with an amendment as follows: In lieu of the sum proposed by said amendment insert the following: "sixty-two thousand dollars;" and the Senate agree to the same.

Amendment numbered 384: That the House recede from its disagreement to the amendment of the Senate numbered 384, and agree to the same with an amendment as follows: At the end of said amendment, after the word "Columbia," insert the following: "Hereafter the Commissioners of the District of Columbia shall not submit, nor shall the Secretary of the Treasury transmit to Congress, regular annual estimates for expenses of the government of the District of Columbia for any fiscal year that shall exceed in the aggregate a sum equal to twice the amount of the total estimated revenues of the District of Columbia for such fiscal year. Said estimates shall take into consideration and embrace all charges against the said revenues arising under appropriations other than the regular District of Columbia bill. Such annual estimates shall not be published in advance of their submission to Congress at the beginning of each regular session thereof;" and the Senate agree to the same.

WASHINGTON GARDNER,
MARTIN B. MADDEN,
ALBERT S. BURLESON,
Managers on the part of the House.

J. H. GALLINGER,
S. B. ELKINS,
B. R. TILLMAN,
Managers on the part of the Senate.

The Clerk read the statement, as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H. R. 25392, making appropriations for the expenses of the government of the District of Columbia for the fiscal year 1910, submit the following written statement in explanation of the effect of the recommendations in the accompanying conference report, namely:

The Senate by its amendments added $2,134,822.64 to the bill, of which sum it is agreed and recommended that the Senate recede from $1,410,726.67, and that the House agree to the sum of $724,095.97.

With reference to certain of the Senate amendments the effect of the action agreed upon and recommended is as follows:

On amendment No. 39: Provides for a municipal architect at $3,600 as proposed by the Senate.

On amendment No. 44: Insert a provision imposing an annual wheel tax on all motor vehicles in the District of Columbia, at the rate of $3 for each two-seated vehicle and $2 for each additional seat.

On amendment No. 72: Appropriates $71,000 instead of $35,500, as proposed by the House, and $100,000, as proposed by the Senate, for paving streets and avenues.

On amendments No. 80 to 97, inclusive, with reference to the improvement of certain county roads and surburban streets: Appropriate in the aggregate $197,700 instead of $133,600, as proposed by the House, and $254,200, as proposed by the Senate.

On amendment No. 104: Appropriates $85,000 as proposed by the Senate for widening the bridge across Piney Branch.

On amendment No. 105: Appropriates $5,000, as proposed by the Senate, to investigate the ownership of land and riparian rights along the Anacostia River.

On amendment No. 115: Appropriates $35,000, as proposed by the Senate, for cleaning snow and ice from streets, sidewalks, cross walks, and gutters.

On amendments Nos. 123 and 124: Appropriates $1,500, as proposed by the House, instead of $10,000, as proposed by the Senate, for playgrounds.

On amendment No. 140: Fixes, as proposed by the Senate, the price of street gaslights at $18 each per annum for lamps equipped with flat-flame burners.

On amendment No. 141: Fixes the price of street gaslights equipped with incandescent mantle burners at $20.85 each per annum, as proposed by the Senate, instead of $18 each per annum, as proposed by the House.

On amendment No. 143: Inserts a provision repealing section 5 of the act relating to the sale of gas in the District of Columbia, approved June 6, 1896, and also inserts a provision authorizing contracts to be entered into for lighting streets with gas or electricity for a period of not exceeding three years.

On amendment No. 145: Fixes the price of lighting streets by electricity at $85 per lamp, as proposed by the Senate, instead of $80, as proposed by the House.

On amendment Nos. 213, 214, 215, 216, and 217: Strikes out the appropriations proposed by the Senate for school buildings as follows:

Two hundred and fifty thousand dollars for a normal school building, $25,000 for refitting Franklin School building, $40,000 for repairs of Central High School building, $25,000 for repairs of Business High School building, and $10,000 for ground adjacent to Fillmore School.

On amendments Nos. 218, 219, and 220: Insert appropriations proposed by the Senate for school buildings as follows:

One hundred thousand dollars for additional ground for extension of McKinley Manual Training School, $95,000 for further extension of McKinley Manual Training School, and $4,000 for purchase of lots adjacent to Petworth School.

On amendment No. 221: Appropriates $60,000 instead of $50,000, as proposed by the House, and $100,000, as proposed by the Senate, for additional amount for repairs and improvements to school buildings.

On amendment No. 233: Inserts a provision applicable to vagrants in the District of Columbia.

On amendments Nos. 266 and 267, relating to the fire department: Strikes out the appropriations proposed by the Senate of $55,000 for a new engine company in the vicinity bounded by H and I streets and Eleventh and Thirteenth streets, and $37,000 for a new truck company in the vicinity of Twelfth and H streets NW.

On amendment No. 301: Inserts necessary appropriations for the new municipal court established by an act enacted at the present session of Congress.

On amendment No. 303: Inserts the provision proposed by the Senate with reference to sites for reformatory and workhouse.

On amendment No. 361: Strikes out the appropriation of $50,000 proposed by the Senate for buildings for a school for feeble-minded children.

On amendment No. 372: Strikes out the appropriation of $179,000 proposed by the Senate for the extension of water mains.

On amendment No. 382: Inserts, as section 7, the provision proposed by the Senate extending until June 30, 1910, authority to advance out of the general fund of the Treasury of the United States such sums as may be necessary to meet the general expenses of said District, as authorized by Congress; and a provision is added thereto requiring that hereafter the estimates for the government of the District of Columbia, submitted for any fiscal year, shall not exceed in the aggregate a sum equal to twice the amount of the total estimated revenues of the District of Columbia for such fiscal year.

WASHINGTON GARDNER,
MARTIN B. MADDEN,
A. S. BURLESON,
Managers on the part of the House.

Mr. COOK of Colorado. Mr. Speaker——

Mr. GARDNER of Michigan. Mr. Speaker, I move——

Mr. COOK of Colorado. Mr. Speaker, I rise to a question of personal privilege.

The SPEAKER. The gentleman's question could hardly interrupt the conference report, which is of the very highest privilege, perhaps the most highly privileged of all, because a conference report can interrupt a motion to adjourn.

Mr. GARDNER of Michigan. Mr. Speaker, I move that the conference report be adopted.

The question was taken, and the conference report was agreed to.

INDIAN APPROPRIATION BILL.

Mr. SHERMAN. Mr. Speaker, I call up the conference report on the bill H. R. 26916, the Indian appropriation bill, and

ask unanimous consent that the statement be read in lieu of the report.

Mr. WILLIAMS. Reserving the right to object, Mr. Speaker, if the gentleman from New York is to move to adopt the report without suspending the rules, I shall not object.

Mr. SHERMAN. That is what I am going to do.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26916) making appropriations for the current and contingent expenses of the Indian Department, for fulfilling treaty stipulations with various Indian tribes, and for other purpose for the fiscal year ending June 30, 1910, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 6, 9, 21, 22, 34, 43, 51, 57, 62, 63, 74, 76, 77, 78, 83, 84, 92, 94.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 5, 8, 10, 11, 12, 13, 14, 15, 16, 17, 20, 23, 24, 25, 26, 27, 29, 35, 36, 37, 38, 40, 41, 42, 44, 45, 46, 47, 48, 49, 50, 52, 53, 54, 55, 59, 60, 61, 64, 65, 66, 67, 68, 69, 70, 71, 73, 75, 80, 85, 86, 88, 89, 90, 93, 95, 96, 97, 98, 99, and agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: Strike out all of said amendment after the word "company," in line 9, and insert the following: "under such terms and conditions and such rules and regulations as may be prescribed by the said Secretary;" and the Senate agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: In line 2 strike out the word "act" and insert "provision;" in line 4 strike out the words "the said Secretary shall negotiate with the Indians for;" and in line 5 strike out the words "said land;" and after the word "price," in the same line, strike out the word "so;" in line 9 strike out the words "the provisions of this act" and insert "the terms of this provision;" and the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: Strike out all of the proposed amendment and insert the following:

"That the Secretary of the Interior be, and he hereby is, authorized, under the direction of the President, to allot any Indian on the public domain who has not heretofore received an allotment, in such areas as he may deem proper, not to exceed, however, eighty acres of agricultural or one hundred and sixty acres of grazing land to any one Indian, such allotment to be made and patent therefor issued in accordance with the provisions of the act of February 8, 1887" (24 Stat. L., 388).

And the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment as follows: In line 2 of the proposed amendment, after the word "tribes," insert "and Osage Indians in Oklahoma;" and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: In line 10, after the word "reservation" insert: "This provision shall not apply to the lands formerly comprising Indian Territory;" and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: In line 3, after the word "Arizona," insert the words "and New Mexico;" at the end of said amendment add the words "the same to be immediately available;" and the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment as follows: Beginning with the word "Repairs," in line 20, strike out all down to and including the word "dollars," in line 26; and the Senate agree to the same.

Amendment numbered 31: That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment as follows: Beginning with the word "Repairs," in line 20, strike out all down to and including the word "dollars," in line 26; and the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: In line 3 of the proposed amendment, after the word "moneys" insert the words ", not exceeding one hundred and fifty thousand dollars;" and the Senate agree to the same.

Amendment numbered 33: That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment as follows: In line 25 of the proposed amendment, after the word "agreement" insert the words "and also any sum or sums paid by the United States to or for the benefit of said Indians, whether as a gratuity or otherwise, except such sums as have been paid for a specific purpose and an adequate consideration;" in line 51, after the word "judgment," strike out the words "or out of any money in the Treasury not otherwise appropriated, which sum is hereby appropriated, to be reimbursed to the United States from the funds of the Confederated bands of Ute Indians;" in line 62 after the word "appealed," strike out the balance of the proposed amendment; and the Senate agree to same.

Amendment numbered 39: That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment as follows: In line 2 of the proposed amendment, after the word "Heyl," insert the words "upon surrender of the certificates herein referred to."

In line 5, after the word "of," strike out the balance of the proposed amendment and insert "one thousand five hundred dollars, the same to be accepted in full payment and discharge of seven hundred and fifty dollars of Kaw scrip and the interest thereon;" and the Senate agree to the same.

Amendment numbered 56: That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment as follows: In line 1 of the proposed amendment strike out "seven" and insert "five;" and the Senate agree to the same.

Amendment numbered 58: That the House recede from its disagreement to the amendment of the Senate numbered 58, and agree to the same with an amendment as follows: In line 1 of the proposed amendment strike out the words "sixty-six" and insert "fifty-eight;" and the Senate agree to the same.

Amendment numbered 72: That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment as follows: Strike out all of the proposed amendment and insert as follows:

"The Commissioner of Indian Affairs is hereby authorized to expend in behalf of said Indian school at Wahpeton, N. Dak., the unexpended balance of the item of five thousand dollars appropriated by the act of April 30, 1908, for the purchase of live stock, seed, equipment of farm, and machinery; and also to expend for said school the unappropriated balance of the appropriation of two thousand five hundred dollars made in said act of April 30, 1908, for the construction of concrete walk, driveways, and grading, and the unexpended balance of said two appropriations is hereby appropriated out of any money in the Treasury not otherwise appropriated."

And the Senate agree to the same.

Amendment numbered 79: That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment as follows: At the beginning of the proposed amendment, strike out the words "Whatever of said work remains uncompleted on said date shall be turned over to the United States Indian agent at the Union Agency, Okla., to be by him completed: *Provided;*" at the end of the amendment insert: "The Secretary of the Interior is directed immediately after July 1, 1909, and prior to December 1, 1909, to pay allottees out of the funds of the Creek Nation the amounts severally due for the equalization of their allotments. In making such payment for the equalization of the Creek allotments eight hundred dollars shall be taken as the standard value of an allotment: *Provided*, That the payment of such funds for the equalization of allotment shall be a final and conclusive settlement of all claims for the equalization of allotments in the Creek Nation: *And provided further*, That as a condition precedent to any such payment the Creek national council shall pass an act, in form approved by the Secretary of the Interior, discharging the United States from all claim and demand on this account;" and the Senate agree to the same.

Amendment numbered 81: That the House recede from its disagreement to the amendment of the Senate numbered 81, and agree to the same with an amendment as follows: In line 3 of the proposed amendment, strike out the word "July" and insert the word "December;" in line 6, strike out the word "nine" and insert the word "ten," and add: "The surface only of the segregated coal and asphalt lands of the Choctaw and Chicka-

saw nations shall be subject to condemnation under the laws of the State of Oklahoma for state penal institutions, county and municipal purposes, and for sewers and water systems: *Provided*, That the title to the surface of any lands so condemned shall revert to the Choctaw and Chickasaw nations upon its ceasing to be used for the purpose for which it was condemned, and the tribal relation is hereby continued for such purpose, and no title to any mineral rights in said lands so condemned shall be acquired hereunder;" and the Senate agree to the same.

Amendment numbered 82: That the House recede from its disagreement to the amendment of the Senate numbered 82, and agree to the same with an amendment as follows: At the end of the proposed amendment add: "*Provided*, That in no event shall the amount thus paid exceed five thousand dollars;" and the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment as follows: Strike out all of proposed amendment and insert: "That the Secretary of the Interior be, and he is hereby, authorized to withdraw from the Treasury of the United States, at his discretion, the sum of two hundred and fifty thousand dollars, or so much thereof as may be necessary, of the funds on deposit to the credit of the Kiowa, Comanche, and Apache tribes of Indians in Oklahoma, and pay out the same for the benefit of the members of said tribes for their maintenance and support and improvement of their homesteads for the ensuing year in such manner and under such regulations as he may prescribe;" and the Senate agree to the same.

Amendment numbered 91: That the House recede from its disagreement to the amendment of the Senate numbered 91, and agree to the same with an amendment as follows: Strike out all of the proposed amendment, and in line 22, on page 47 of the bill, after the word "education" strike out the word "at" and insert "of;" and the Senate agree to the same.

Amendment numbered 100: That the House recede from its disagreement to the amendment of the Senate numbered 100, and agree to the same with an amendment as follows: In line 4 of the proposed amendment, after the word "organization," strike out the balance of the amendment and add "engaged in mission or school work on any Indian reservation, for such lands thereon as have been heretofore set apart to and are now being used and occupied by such organization for mission or school purposes;" and the Senate agree to the same.

Amendment numbered 101: That the House recede from its disagreement to the amendment of the Senate numbered 101, and agree to the same with an amendment as follows: In line 12, after the word "dollars," insert the words "to be immediately available;" and the Senate agree to the same.

J. S. SHERMAN,
THOMAS F. MARSHALL,
JNO. H. STEPHENS,
Managers on the part of the House.

MOSES E. CLAPP,
CHARLES CURTIS,
ROBT. L. OWEN,
Managers on the part of the Senate.

The Clerk read the statement, as follows:

STATEMENT.

The Senate has receded from amendments Nos. 1, 6, 9, 21, 22, 34, 43, 51, 57, 62, 63, 74, 76, 77, 78, 83, 84, 92, and 94. These amendments in the aggregate proposed to add to the bill $466,000.

The House receded from amendments Nos. 2, 5, 8, 10, 11, 12, 13, 14, 15, 16, 17, 20, 23, 24, 25, 26, 27, 29, 35, 36, 37, 38, 40, 41, 42, 44, 45, 46, 47, 48, 49, 50, 52, 53, 54, 55, 59, 60, 61, 64, 65, 66, 67, 68, 69, 70, 71, 73, 75, 80, 85, 86, 88, 89, 90, 93, 95, 96, 97, 98, and 99. From the balance of the amendments the House receded with amendments, as hereinafter explained.

Amendments Nos. 2, 8, 12, 13, 15, 23, 25, 26, 29, 35, 64, 69, and 91 are merely phraseological or correction of errors in addition.

Amendments Nos. 3, 4, and 5, Nos. 3 and 4 of which are receded from with amendments, and No. 5, receded from without amendment, all relate to the same subject, and should have been considered as one amendment. Together they provide a method by which railroad companies, through application to the Secretary of the Interior, may obtain title to property required for gravel pits and other necessary purposes upon a compensation which the Secretary of the Interior considers adequate. This is a general proposition.

From amendment No. 7 the House receded with an amendment which struck out all the matter inserted by the Senate and inserted in lieu thereof a provision which amended the general allotment act for Indians, so that hereafter 80 acres of agricultural lands can be allotted to an Indian instead of 160 acres.

Amendments Nos. 10 and 11 together provide that the $200,000 appropriation for irrigation of land shall be immediately available and available until expended.

Amendment No. 14 simply makes clear that it is intended to use the money therein appropriated for schools for such purposes as are not otherwise specifically provided for in this bill.

Amendment No. 16 excludes from the operation of the House provision in reference to investigating the question of timber on Indian reservations the Menominee Indian Reservation in Wisconsin, for the reason that a special bill was passed a year ago relative to the timber upon this particular reservation.

Amendment No. 17 gives authority to the Commissioner of Indian Affairs to designate somebody to sign his correspondence when both he and the Assistant Commissioner are absent from the office.

Amendment No. 18 provides that all allotted lands, except those in the Five Civilized Tribes and the Osage Nation, may be leased for mineral purposes with the approval of the Secretary of the Interior.

Amendment No. 19 provides that where an Indian has received an allotment of land which is unsuited for the purpose for which it was intended, that that allotment may be canceled and another allotment on any untaken public lands may be given therefor, but is so amended that the provision does not apply to the lands heretofore within the Indian Territory.

Amendment No. 20 provides that the Indian agents shall annually report to the Commissioner of Indian Affairs with reference to such material as they may have on hand at their agencies which is no longer required for use at such agencies.

Amendment No. 24 authorizes the payment of $445 to two employees of the Indian Service, whose accounts were disallowed by the auditor, although the disbursement was made under the direction of the Secretary of the Interior.

Amendment No. 27 authorizes the payment of $930 to the contractor who constructed certain works at the Truxton Canyon Indian School, which amount was withheld from his final payment under the terms of the contract. The Indian Office reports that it was through no fault of the contractor that the work was not completed in the specified time.

Amendment No. 28 appropriates $40,000 for the purchase of certain lands and water rights for the use of the Navaho Indians in Arizona and New Mexico.

Amendment No. 30 provides for the disposal of the Fort Lewis School, in Colorado, and makes provision for the continuance of that school during the coming fiscal year if the school is not disposed of. The House provision simply disposed of the school without providing for its continuance in case of failure to dispose of it.

Amendment No. 31 is the same as amendment No. 30, except that it refers to the Grand Junction School, instead of Fort Lewis School.

Amendment No. 32 authorizes the Secretary to expend, from the money in the Treasury belonging to the Ute Indians, a sum not exceeding $150,000 for irrigating 10,000 acres of land.

Amendment No. 33 resubmits the claim of the Federated Band of Utes against the United States to the Court of Claims, with certain enlarged jurisdictional powers in relation thereto.

Amendment No. 36 makes the appropriation therein provided for reimbursable.

Amendment No. 37 makes provision for the payment of the claims of certain Indians whose improvements to lands, it is alleged, will be ruined by the construction of an irrigation dam site.

Amendment No. 38 gives authorization for the sale of certain lands belonging to certain Indians, the lands being located in Kansas and the Indians now residing in the Northwest. The purpose of the amendment is to save these Indians the unnecessary travel to and from Kansas to procure the income from their property and invest the proceeds of the sale of their lands in Kansas in property where they now reside.

Amendment No. 39 provides for the payment of scrip issued years ago for the Kaw Indians and which, save these two certificates, have heretofore been paid.

Amendment No. 40 relates to the disposal of the Morris School, Minnesota, and does not change the intent of the House provision, but more particularly describes the property which is to be disposed of.

Amendment No. 44 authorizes the use of $1,000 of the fund of the White Earth bands of the Chippewa Indians in an annual tribal celebration.

Amendment No. 45 provides that any moneys repaid to the United States out of the appropriation heretofore made and

reimbursable shall be reexpended for the benefit of the Fort Belknap Indians, under the same conditions as originally expended.

Amendment No. 46 makes reimbursable the appropriation therein made.

Amendment No. 47 makes immediately available $100,000 of the $250,000 appropriated for the purpose of constructing an irrigation system on the Flathead Reservation in Montana.

Amendment No. 48 makes the proceeds from the sale of timber, as well as lands, available to reimburse the Government for moneys expended for the Indians.

Amendment No. 49 extends the provision of the statute relating to the sale of liquor to Indians to the Flathead Indians in Montana after they have received their allotments.

Amendment No. 50 makes provision for the sale of all merchantable timber on the portion of the lands embraced within the Flathead Indian Reservation in Montana.

Amendment No. 52 makes provision for the extension of the provisions of law relating to the sale of liquor to Indians to the Indians on the Fort Peck Reservation in Montana.

Amendment No. 53 provides for an extension of the time within which the lands of the Crow Reservation in Montana shall be disposed of in accordance with the terms of the act opening all such reservations.

Amendment No. 54 appropriates $1,500 for the purpose of employing the so-called "line riders" to prevent encroachments by cattlemen upon Indian property.

Amendment No. 55 strikes out of the bill the provision for the disposal of the Indian school at Genoa, Nebr.

Amendment No. 56 reduces from $7,000 to $5,000 the amount appropriated for the construction of a barn at the Genoa School.

Amendment No. 59 strikes from the bill the provision which was made necessary when amendment No. 55 was in the bill.

Amendment No. 60 provides that the funds capitalized in the Treasury for the Winnebago Indians shall bear 5 per cent interest until withdrawn from the Treasury.

Amendment No. 61 changes the terms under which the Secretary is authorized to pay the money in the Treasury to the Winnebago Indians, making provision for taking of a new census of said Indians before any money is paid out.

Amendment No. 65 appropriates $25,000 for the completion of the irrigation system on the Zuni Reservation in New Mexico.

Amendment No. 66 makes provision for the payment of 5 per cent interest upon the funds of the Seneca Indians, of New York, capitalized and placed in the Treasury for their benefit until such time as the money is withdrawn from the Treasury and paid to said Indians.

Amendments Nos. 67 and 68 increase the appropriation so that there shall be maintained at the Cherokee School, North Carolina, 200 rather than 160 pupils.

Amendment No. 70 makes appropriation of $5,000 for heating and lighting plant at the Wahpeton School, North Dakota.

Amendment No. 71 is a change of total made necessary by amendment No. 70.

Amendment No. 72 reappropriates the unexpended amount of moneys appropriated for said purpose at said school for the fiscal year 1909.

Amendment No. 73 authorizes the Secretary of the Interior to turn over to the officers of certain counties in the State of Oklahoma, upon terms approved by the Secretary of the Interior, certain property.

Amendment No. 75 increases by $15,000 the amount appropriated for clerical work and labor in connection with the sale of inherited lands of the Five Civilized Tribes.

Amendment No. 79, as agreed to in conference, strikes out the provision for doing away with the office of Commissioner to the Five Civilized Tribes and makes provision for allottees of the Cherokee, Choctaw, and Chickasaw nations who have small remnants of allotments yet due them to receive money in lieu of lands to conclude such allotments, and also makes provision for the payment of the balance now in the Treasury belonging to the Creek Nation to the members of such nation, making the basis of an allotment $800 instead of $1,040, which was supposed would be the value of an allotment.

Amendment No. 80 gives the Secretary of the Interior authority to limit the amount paid to members of the tribal council of various Indian tribes known as the "Five Civilized Tribes."

Amendment No. 81 permits persons who have taken out town-lot patents in the Five Civilized Tribes, and who have defaulted in payment thereon, to now make good that default by paying the amount due plus 10 per cent interest thereon. It also limits the time within which freedmen of the Choctaw and Chickasaw nations can acquire the amount of allotment due them to December 1, 1910.

Amendment No. 82 authorizes the Court of Claims to allow the Secretary of the Treasury to pay certain Eastern Cherokee Indians for services heretofore rendered by them in attending their tribal councils, limiting the amount so to be paid to $5,000.

Amendment No. 85 provides for the payment of 5 per cent interest upon the capitalized fund of the Seminole Indians so long as that fund remains in the Treasury.

Amendment No. 87, as agreed to in conference, authorizes the withdrawal of $250,000 of the Kiowa, Apache, and Comanche tribal funds and the expenditure thereof by the Secretary of the Interior for the support and improvement of the members of said tribe during the coming year.

Amendment No. 88 authorizes the Secretary of the Interior, if he deems wise, to set aside 640 acres of land for the benefit of a Choctaw orphan industrial school.

Amendment No. 89 authorizes the Secretary of the Interior to issue a patent to a certain mission on the Pottawatomie Reservation, in Oklahoma.

Amendment No. 90 directs the Attorney-General to advance an action pending in the Supreme Court of the United States against the governor of the Choctaw Nation.

Amendment No. 93 changes the phraseology of the House provision for the disposal of the Chamberlain School, South Dakota.

Amendment No. 95 authorizes the Secretary of the Interior to pay a small balance due the Flandreau Indians to the members of the said tribe per capita.

Amendment No. 96 provides for the reservation of certain property in South Dakota as a cemetery for the use of the Standing Rock Indian Reservation.

Amendment No. 97 makes the appropriation therein provided for reimbursable.

Amendment No. 98 makes provision for the transfer of the Panguitch School in Utah to that State upon conditions therein named.

Amendment No. 99 makes provision for the proper protection of the Uncompahgre, Uintah, and White River Utes to certain waters needed for their use.

Amendment No. 100, as agreed to in conference, grants to the Secretary of the Interior authority to issue patents to any religious organization for property occupied by such organization for school or mission purposes upon any Indian reservation.

Amendment No. 101 makes provision for the legal representatives of a deceased claimant to be brought into a suit now pending in the Court of Claims under authority heretofore issued.

J. S. SHERMAN,
THOMAS F. MARSHALL,
JNO. H. STEPHENS,
Managers on the part of the House.

Mr. SHERMAN. Mr. Speaker, I move the adoption of the conference report.

The question was taken, and the conference report was agreed to.

On motion of Mr. SHERMAN, a motion to reconsider the vote whereby the conference report was agreed to was laid on the table.

NAVAL APPROPRIATION BILL.

Mr. FOSS. Mr. Speaker, I call up the conference report on the naval appropriation bill (H. R. 26394) and ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. The gentleman calls up the conference report on the naval appropriation bill and asks unanimous consent that the statement be read in lieu of the report. Is there objection?

Mr. GAINES of Tennessee. How long is the report?

Mr. FOSS. It is not long.

The SPEAKER. The Chair hears none, and the Clerk will read.

Mr. WILLIAMS. Mr. Speaker, I did not hear the motion of the gentleman from Illinois, and I merely want to know whether the gentleman moves to suspend the rules?

Mr. FOSS. No; I do not.

The SPEAKER. The gentleman has called up the conference report, and now the Clerk is proceeding to read the statement.

Mr. WILLIAMS. It is a plain motion to adopt a conference report.

Mr. FOSS. That is all I intend to make.

The SPEAKER. There is no reason to believe that any other motion will be made at this time than that. The Clerk will read.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 26394) making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes,

having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 7 and 39.

That the House recede from its disagreement to the amendments of the Senate numbered 1 and 55; and agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In lieu of the proposed amendment insert the following: "unless in case of minors a certificate of birth or a verified written statement by the parents, or either of them, or in case of their death a verified written statement by the legal guardian, be first furnished to the recruiting officer, showing applicant to be of age required by naval regulations, which shall be presented with the application for enlistment;" and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment as follows: In lieu of the proposed amendment insert the following: "extraordinary emergency;" and the Senate agree to the same.

On the amendments of the Senate numbered 58 and 59 the committee of conference have been unable to agree.

GEORGE EDMUND FOSS,
H. C. LOUDENSLAGER,
L. P. PADGETT,
Managers on the part of the House.

EUGENE HALE,
GEO. C. PERKINS,
B. R. TILLMAN,
Managers on the part of the Senate.

The Clerk read the statement, as follows:

STATEMENT.

The managers on the part of the House at the second conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 26394) making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes, submit the following written statement in explanation of the effect of the action agreed upon and submitted in the accompanying conference report on the amendments of the Senate, namely:

Amendment No. 1 provides that "The provisions of the act approved June 29, 1906, entitled 'An act making appropriations for the naval service for the fiscal year ending June 30, 1907, and for other purposes,' providing for the retirement in the next higher grade of officers of the navy who served during the civil war, shall not operate to deprive any officer of the navy who has been, or may be, retired since the passage of that act of the right to increased rank and pay to which, but for the passage of said act, he would have been entitled;" and the House recedes.

Amendment No. 7 provides that all employees of navy-yards, gun factories, and naval stations shall be granted fifteen days' sick leave in addition to the fifteen days' leave of absence now provided for by law; and the Senate recedes.

Amendment No. 11 relates to recruiting, and in lieu of the proposed amendment insert the following: "unless in case of minors a certificate of birth or a verified written statement by the parents, or either of them, or, in case of their death, a verified written statement by the legal guardian, be first furnished to the recruiting officer, showing applicant to be of age required by naval regulations, which shall be presented with the application for enlistment;" and the House recedes with the above amendment.

Amendment No. 18: The House recedes with the following amendment, striking out the proposed amendment and inserting "extraordinary emergency," which changes the restriction for the purchase of powder from any trust or combination in restraint of trade from the emergency of war to an extraordinary emergency.

Amendment No. 39 directs the Secretary of the Navy to investigate and report to Congress the advisability of establishing a naval base on the coast of the State of California south of San Francisco, and the Senate recedes.

Amendment No. 55 provides that officers and enlisted men of the Marine Corps shall serve as heretofore on board ships of the Navy, and the House recedes.

The committee of conference has been unable to agree on the following amendments:

Amendment No. 58 strikes out the following from the House bill:

"*Provided*, That no part of the above appropriation shall be used for the payment of the construction of any collier the total cost of which shall exceed $900,000."

Amendment No. 59: "That there shall be kept, in the discretion of the President, as far as practicable, one-half of the Navy of the United States on the Pacific at all times."

GEO. EDMUND FOSS,
H. C. LOUDENSLAGER,
L. P. PADGETT,
Managers on the part of the House.

Mr. FOSS. Mr. Speaker, this report leaves in disagreement only two matters, one relating to a collier to be built on the Pacific coast and the other relating to the disposition of the fleet. I move the adoption of the report.

Mr. GAINES of Tennessee. Mr. Speaker, I will ask the gentleman what is done about this powder-trust amendment in the bill? I would like to know what language is in there now.

Mr. FOSS. The language "of extraordinary emergency" in place of the word "war."

Mr. SHERLEY. Is there any change in the limitation on the price of smokeless powder?

Mr. FOSS. No change in the limitation at all.

Mr. SHERLEY. That is still left in the bill?

Mr. FOSS. Yes.

Mr. GAINES of Tennessee. Will the gentleman give us an example of "an extraordinary emergency?" I suppose he knows the language that he was using.

Mr. FOSS. That is a matter that is left with the Secretary of the Navy, or rather with the President of the United States.

Mr. GAINES of Tennessee. I am glad that we have got that much in on the powder trust.

Mr. FOSS. Mr. Speaker, I move the adoption of the conference report.

The SPEAKER. The question is on the adoption of the conference report.

The question was taken, and the conference report was agreed to.

Mr. FOSS. Mr. Speaker, on Senate amendment 58 I move that the House further insist on its disagreement.

The SPEAKER. The gentleman from Illinois moves that the House do further insist on its disagreement to Senate amendment 58.

Mr. GAINES of Tennessee. What is that amendment?

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment 58: Page 62, line 16, strike out all after "dollars" down to and including "dollars," in line 19; that is to say, strike out the following:

"*Provided*, That no part of the above appropriation shall be used for the payment of the construction of any collier the total cost of which shall exceed $900,000."

Mr. KNOWLAND rose.

The SPEAKER. Does the gentleman from Illinois yield to the gentleman from California?

Mr. FOSS. I yield to the gentleman.

Mr. KNOWLAND. Mr. Speaker, I wish to move that the House recede from its disagreement to the Senate amendment No. 58 and concur in the same.

The SPEAKER. The gentleman from California moves that the House do recede from its disagreement to the Senate amendment No. 58 and concur in the same.

Mr. FOSS. How much time does the gentleman desire?

Mr. KNOWLAND. I will ask for about fifteen minutes.

Mr. FOSS. I yield to the gentleman from California for fifteen minutes.

Mr. CLARK of Missouri. Mr. Speaker, before the gentleman begins, I would like to ask the chairman of the committee what this amendment is.

Mr. FOSS. Mr. Speaker, this limits the cost of a collier to $900,000.

Mr. CLARK of Missouri. That is, limits the House action or the Senate?

Mr. FOSS. The limitation is the action of the House.

Mr. CLARK of Missouri. And the Senate struck it out?

Mr. FOSS. The Senate struck it out. Last year we provided for two colliers, one to be built by private contract and the other to be built on the Pacific coast in the navy-yard, and since that time bids have been received by the Secretary of the Navy and the contract has been entered into for this collier to be built by private contract, to cost $822,000. Now, the Secretary of the Navy, from the estimates which he has received from the navy-yard on the Pacific coast, at Mare Island, estimates that this collier, if built in the navy-yard, will cost twice as much as the contract price already entered into with the private shipbuilding concern.

Mr. CLARK of Missouri. Cost twice as much?

Mr. FOSS. Yes.

Mr. CLARK of Missouri. And this motion is to recede and concur in the Senate amendment striking out the House limitation?

Mr. FOSS. The gentleman from California makes that motion. It is to strike out the House provision.

Mr. CLARK of Missouri. It strikes out the House limitation on the cost?

Mr. FOSS. Yes. I yield fifteen minutes to the gentleman from California.

The SPEAKER. The gentleman from California is recognized for fifteen minutes.

Mr. KNOWLAND. Mr. Speaker, I desire that the House and the country be fully acquainted with the exact status of this particular matter. A year ago the Committee on Naval Affairs, through its chairman, acquiesced in an amendment offered on the floor of the House by a distinguished member of that committee, providing for the building of two fleet colliers to cost $1,800,000 each, it being then supposed that these colliers would be constructed by contract in a private shipbuilding yard. An amendment to this amendment was offered by the gentleman from Virginia [Mr. MAYNARD], making it mandatory that one of these colliers be constructed in a navy-yard. The chairman of the committee then vigorously opposed the second amendment, declaring that to build in a navy-yard would entail additional cost, submitting documentary evidence in support of his contention.

This House, however, by a very decisive vote, went on record in favor of the sound policy of occasionally building vessels in government yards in order to maintain in these yards an efficient and thoroughly trained force, capable of constructing vessels of our navy should a combination exist among the private firms—conditions which have in the past prevailed. The amendment was adopted, the vote being 156 in favor to 43 against. Let this be impressed upon the minds of the Members of this House, that by the overwhelming vote of over 3½ to 1 this Congress decided that one of these colliers should be built in a navy-yard. When the bill reached the Senate, the senior Senator from California added to the amendment the words "Pacific coast," and the Navy Department designated the Mare Island Navy-Yard. Some of the material was actually contracted for.

It is now claimed that these colliers which were to cost $1,800,000 when a private yard was to construct them, can now be built for $800,000 or $900,000. An attempt was made in the present naval bill to change last year's law and construct this particular collier in a private yard, but I made the point of order against the paragraph and it was sustained. In order to still thwart the will of Congress, an amendment was inserted under "Construction and machinery" providing that no part of the appropriation should be used for the construction of any collier to cost over $900,000, the purpose of the limitation being to prevent a navy-yard from building the vessel, this low bid from private contractors being, so the Secretary of the Navy stated, below the actual cost of labor and material. This amendment was stricken out in the Senate and is now in dispute.

The statement that it will cost 100 per cent more to construct this collier in a navy-yard is ridiculous.

Mr. KIMBALL. Will the gentleman yield for a question?

Mr. KNOWLAND. Certainly.

Mr. KIMBALL. Who made that statement?

Mr. KNOWLAND. The statement has been made by the Secretary of the Navy. Now, I want——

Mr. KIMBALL. Which Secretary of the Navy?

Mr. KNOWLAND. Secretary Newberry. The statement was just made by the chairman of the committee that estimates had been received from the Mare Island Navy-Yard stating that the colliers could not be built for less. I challenge absolutely that statement, because I have telegrams and letters from the Mare Island Navy-Yard stating that they can build this collier for less than $1,800,000.

Mr. SLAYDEN. How much less?

Mr. KNOWLAND. I want to call attention to the fact that the Mare Island Navy-Yard has just completed the building of the collier *Prometheus*. The collier cost, I believe, a little over a million and a half dollars. In his testimony before the Naval Committee, Secretary Newberry stated, on page 360 of the printed hearings, that these colliers are 2 knots slower in speed, and consequently have considerably less power and are considerably less expensive. Notwithstanding these admissions on his part, he still claims that while they are less expensive than the collier we have just completed in California, it will cost more to build this particular collier at the same yard. The Secretary of the Navy declares that the private shipbuilding firms are taking these colliers at a loss in order to maintain the efficiency of their plants.

The highest figure as to additional cost between navy-yard and private construction has been 12 or 15 per cent, due to the eight-hour day and special holidays. It will not cost $1,800,000 to construct this collier in a navy-yard. It can not be constructed below the cost of material and labor, which the $900,000 limitation would mean, but it can be constructed at a far less cost than originally estimated, because it is a cheaper collier than the ones now nearing completion and which cost about $1,550,000.

A $900,000 limit is placed on this collier when even the Secretary of the Navy declares on page 363 of the hearings that he doubts if such low bids can be obtained for more colliers and estimates the vessels at $1,250,000.

Mr. SHERLEY. Will the gentleman yield for a question?

Mr. KNOWLAND. Certainly.

Mr. SHERLEY. What is the size of this collier compared with the one that has already been built in the Mare Island Navy-Yard?

Mr. KNOWLAND. I think its dimensions are about the same.

Mr. SHERLEY. What is its tonnage?

Mr. KNOWLAND. It may carry a few thousand tons more, but is built along the lines of a commercial collier instead of a naval collier.

Mr. SHERLEY. I understand it is a couple of thousand tons greater.

Mr. KNOWLAND. Yes; but 2 knots slower in speed.

Mr. SHERLEY. The difference in speed would make up the difference in bulk.

Mr. GAINES of Tennessee. Will the gentleman yield?

Mr. KNOWLAND. Yes.

Mr. GAINES of Tennessee. Have the prices for building these vessels been reduced since the Government threatened or began to make these vessels in the navy-yard?

Mr. KNOWLAND. They have been reduced $800,000 within a year.

Mr. GAINES of Tennessee. Eight hundred thousand dollars within a year? Are those official facts now, or is it just the opinion of the gentleman?

Mr. KNOWLAND. I state nothing but what is official.

Mr. GAINES of Tennessee. I understand the gentleman may have a personal opinion, but I want the facts.

Mr. KNOWLAND. Those are the facts.

Mr. GAINES of Tennessee. I am glad to know it is the official fact as well as the gentleman's personal opinion.

Mr. KNOWLAND. I want to again call attention to this fact, that I admit to the Members of this House that, in my opinion, the navy-yard can not compete, can not build the colliers for $900,000, when they are taken at a loss both as to material and as to labor.

Mr. RYAN. May I interrupt the gentleman?

Mr. KNOWLAND. Certainly.

Mr. RYAN. The adoption of the amendment proposed by the gentleman will have the effect of requiring, then, what Congress ordered to be done some time ago?

Mr. KNOWLAND. The adoption of my amendment will; yes.

Mr. RYAN. And build the collier in the government navy-yard?

Mr. KNOWLAND. In the government navy-yard. If the amendment is not adopted, then what situation do we find? We find this: You can not change an existing law in an appropriation bill.

Now, leaving this limitation upon the bill, what is the situation? The Government has been demanding colliers for years; they are sorely needed.

Mr. MADDEN. Does the gentleman wish the House to understand that a legislative enactment on an appropriation bill would not be as effective as in some other bill?

Mr. KNOWLAND. Not when it changes existing law.

Mr. MADDEN. Why, of course it is the same.

Mr. KNOWLAND. If the point of order is not made.

Mr. MADDEN. If it is enacted.

Mr. KNOWLAND. If it is enacted; yes. I understand, if no objection is made, then, of course, it stands; but "the gentleman from California" is generally on hand with an objection. But if this limitation is allowed to stand, what is the situation? We find that the Government will not be able to build this collier; you will not be able to give it to a private shipbuilding firm; and the result will be that an act of Congress will not be carried out and the Navy Department will be deprived of a much-needed collier.

Mr. SHERLEY. I can tell the gentleman where he can get two ships where there is not now enough water to float them.

Mr. KNOWLAND. The gentleman should give that information to the Secretary of the Navy.

Mr. SHERLEY. He could get it from the testimony of Colonel Goethals, who would then be able to get a class of ships that he could use instead of those that he can not now use.

Mr. KNOWLAND. Mr. Speaker, I want to say in conclusion that the people of California are decidedly interested in this matter. Congress, by a vote of three to one, decided that these colliers should be built in the navy-yard in the State of California. It was the mandate of Congress. The matter was discussed over and over again upon this floor.

Congress voted by a decisive vote that California should build this collier, and we of that State feel that in justice to us, in justice to our mechanics, this collier should be built where Congress declared it should be built. [Loud applause.]

Mr. FOSS. Mr. Speaker, I desire to ask the Clerk to read a letter from the Secretary of the Navy.

The Clerk read as follows:

NAVY DEPARTMENT,
Washington, February 26, 1909.

DEAR MR. FOSS: Referring to your inquiry for particulars as to recent bids submitted for the construction of a collier of 12,500 tons cargo capacity and a speed of 14 knots, also as to the estimated cost of building such a collier at the navy-yard, Mare Island, I beg to append hereto a tabular statement of the bids submitted for the construction of such a collier by contract, and give below the estimated cost of constructing such a vessel at the Mare Island yard.

It should be noted that the bids for the construction of this collier by contract are decidedly low and are believed to be well below the average cost of such a vessel, due to the very depressed state of the shipbuilding market at the present time.

As to the estimated cost of building one of these colliers at the navy-yard, Mare Island, it should be noted that this collier is to be built from the same plans as the contract-built vessel, and as this collier has not yet been contracted for, and full plans are not available, detailed estimates could not be prepared at the navy-yard, Mare Island. An estimate based upon the actual cost to date, and the estimated cost for completion of the collier *Prometheus*, now under construction at the navy-yard, Mare Island, will, however, give substantially accurate data as to what should be the probable cost of the 12,500-ton collier.

You will probably recall the fact that the original limit of cost for the collier *Prometheus* was $1,250,000. This limit of cost was subsequently increased by act of Congress to $1,550,000. The estimated cost to complete the *Prometheus* indicates that the authorized limit of cost will be very closely approached, if not exceeded. Certainly there will be no considerable margin.

The horsepower of the proposed 14-knot collier is 7,200, while that of the *Prometheus* is 7,500, the latter, though a much smaller vessel, having a speed of 16 knots. Making allowance for the simpler type of machinery of the 14-knot collier, and considering the actual cost of the machinery of the *Prometheus*, it is believed that the machinery of the proposed 14-knot collier could not be built at the navy-yard, Mare Island, for less than $450,000.

Assuming that the cost of the hull of the 14-knot vessel, as compared with the cost of the hull of the *Prometheus* will vary somewhat in the proportion of the actual hull weights, and making some slight reduction on account of the simpler form of construction of the 14-knot collier, it is estimated that the actual cost of construction of the hull of the 14-knot collier, including all auxiliary machinery and equipment, will not be less than $1,300,000, so that the total estimated cost of this collier, if built at the navy-yard, Mare Island, will be approximately $1,750,000.

As indicated in the beginning of this communication, bids recently submitted for the construction of the 14-knot collier can not be considered as accurately representing what should be the probable contract price of such a vessel under a normal condition of the shipbuilding market.

In comparing the cost of navy-yard work with contract work due allowance should be made for the less hours of labor, at approximately the same daily pay as that prevailing in outside yards; also twenty-six and one-half days' leave and holidays, for which full pay is allowed, without corresponding work. Provision must also be made for full pay during absence from work when such absence is the result of accident suffered in the yard, and if pending legislation is adopted still further expense will be incurred by reason of full pay during sick leave of navy-yard employees.

If, therefore, the 14-knot collier is to be built at the navy-yard, Mare Island, the original limit of cost of $1,800,000 should not be modified.

Very truly, yours, TRUMAN H. NEWBERRY,
Secretary.

Hon. GEORGE EDMUND FOSS,
Chairman Committee on Naval Affairs,
House of Representatives.

[Appendix to accompany letter from the Secretary of the Navy to Hon. George E. Foss, chairman House Committee on Naval Affairs, under date of February 26, 1909.]

Bids submitted by various shipbuilding firms for the construction of a 14-knot collier of a cargo-carrying capacity of 12,500 tons:

Newport News Shipbuilding and Dry Dock Company.

Class I	$790,000
Class II	825,000

William Cramp & Sons' Ship and Engine Building Company.

Class I	$805,000
Class II	775,000

Fore River Shipbuilding Company.

Class I	$933,000
Class II	954,000

Maryland Steel Company.

Class I	$993,800
Class II	1,011,400
Class III	1,027,350

New York Shipbuilding Company.

Class I	$1,074,000
Class II	1,104,000

After careful consideration of all the features of the various designs submitted, the board on construction unanimously recommended the acceptance of the Class I bid of the William Cramp & Sons' Ship and Engine Building Company, with the addition of a special form of winch, at an increase in the bid price of $17,500, making the contract price for the selected collier $822,500.

This contract has been actually awarded.

T. H. N.

Mr. FOSS. Mr. Speaker, I yield five minutes to the gentleman from Tennessee [Mr. PADGETT].

Mr. PADGETT. Mr. Speaker, this is a plain, simple, business proposition, as the statement of a few facts will illustrate. The Government was building two colliers—one in the navy-yard at Brooklyn, one in the navy-yard at Mare Island, California. The cargo capacity of these colliers was 5,000 tons. The cost of them ranged from one million and a half to $1,850,000. The one built at Mare Island Navy-Yard cost about one million and a half; the one built in the Brooklyn Navy-Yard, $1,850,000. The proposition reported by the committee in the naval bill to the House, based upon the testimony of the Secretary of the Navy and his earnest recommendation, was to authorize the purchase of two colliers under the authorization of the appropriation bill of a year ago. Upon a point of order, raised by the distinguished gentleman from California [Mr. KNOWLAND], they went out of the bill.

Thereupon, the House placed in the bill this limitation upon the cost, providing that the appropriation should not be used to construct a collier to cost more than $900,000, the Secretary of the Navy stating that he could get larger colliers and equally as good—though 2 knots slower, but amply fast to fill the requirements—for between $800,000 and $900,000. When the bill went over to the Senate, the Senate by amendment struck out the House limitation. The conferees have refused to agree to the Senate amendment, insisting that we can not afford to build in a navy-yard a collier for $1,850,000 when we can buy it in the market for $900,000; and we have adhered to the House proposition.

Mr. WILSON of Pennsylvania. Why is it that comparisons can not be had on the same type of collier? One is 2 knots slower than the other.

Mr. PADGETT. Because the ones that were authorized in the bill four years ago, and being built in the Brooklyn and Mare Island navy-yards, were provided to be 16 knots; the ones provided in the bill of a year ago were to be of 12,500 tons cargo.

Mr. WILSON of Pennsylvania. Is it not a fact that the faster the vessel the greater the cost?

Mr. PADGETT. Well, the difference in speed is only 2 knots, whereas the difference in cargo capacities is a difference between 5,000 and 12,500.

Mr. WILSON of Pennsylvania. There is a good deal of comparison in different types of boats.

Mr. PADGETT. But the 12,500 carrying capacity more than compensates the loss of the 2-knot speed, the ordinary traveling speed of the fleet being about 10 knots; but 14 knots is ample for all practical purposes. So that the whole thing is simply a business proposition, getting two colliers that would carry in the aggregate 25,000 tons for one collier that would carry 5,000 tons.

Mr. KNOWLAND. Will the gentleman yield for a question?

Mr. PADGETT. Yes.

Mr. KNOWLAND. Does the gentleman know that before the *Prometheus* and the other collier which was built at the Brooklyn Navy-Yard were commenced the Secretary of the Navy endeavored to get a contract to construct those colliers for less than the amount at which they were constructed in the navy-yard, and he could not get a bid?

Mr. PADGETT. I do not know what it was in the past. I am only speaking of what is offered at present, and the concrete proposition that we are dealing with now.

The SPEAKER. The gentleman's time has expired.

Mr. FOSS. I yield five minutes to the gentleman from New York [Mr. FITZGERALD].

Mr. FITZGERALD. Mr. Speaker, I believe that the presentation of a few facts will convince the House that the competition between the Government and the private contractor has been of immense saving to the Government, and that an effort to stop government competition is what is behind the amendment insisted upon by the House.

In 1902 Congress authorized two first-class battle ships of 16,000 tons displacement and 18 knots speed. The limit of cost was $4,212,000, and that is given in the official reports as the cost of the government-built ship.

The contract price of the ship built by private contract was $3,990,000. A year later a ship of the same capacity, the same size, identical in every respect, the *Vermont*, was built by

contract for $4,179,000—a difference of $33,000 from the cost of building in the navy-yard.

Last year Congress authorized two battle ships of 21,825 tons displacement, with a speed of 20¾ knots.

Now let me show the effect of government competition upon the price. The law provided that one of these ships should be built by contract and that the other should be built in a government yard. The limit of cost fixed by the Naval Committee is $6,000,000, and yet the Government has contracted to build this ship of 21,000 tons displacement for less money than it paid to build by contract the ship of 16,000 tons displacement. [Applause.] The contract price of the *Louisiana* was $3,990,000. That was the vessel of 16,000 tons displacement.

The contract price of the *Utah*, being built in competition with a vessel—the *Florida*—in a navy-yard, is $3,946,000, or $44,000 less than a ship 20 per cent smaller. A few years ago a collier was authorized to be constructed at the Mare Island Navy-Yard. I have here a list of ten bids that were made to build colliers by contract. The Naval Committee recommended to this House that they should not cost more than $1,800,000.

Not a single one of the bids made on the 13th of May last is as much as $1,100,000. There were ten bids below $1,100,000, and yet the Secretary of the Navy begged the Naval Committee to make the limit of cost $1,250,000 with those bids opened and in his possession. Those who remember what happened when the naval bill was before the House know why this amendment to limit the amount to be spent on any collier to $900,000 was put in. The Naval Committee brought in a recommendation that four colliers be built by contract, two additional to the two authorized last year, provided that those authorized to be built in a navy-yard should be built by contract; and the private contractors agreed that if the Government would reverse its action and take these colliers away from the navy-yards they would build four colliers for what the Navy Department and the Naval Committee originally estimated it would take to build two. In addition, the committee provided for a fifth collier identical with the other four, and they put the limit of cost $100,000 in excess of the price that they said that they could build the four of them for. This is the last attempt on behalf of the shipbuilding trust, and I hope that this House will deny its appeal to prevent honest competition by the government yards. [Applause.]

Mr. FOSS. I yield three minutes to the gentleman from Alabama [Mr. HOBSON].

Mr. HOBSON. Mr. Speaker, it is very important that our navy-yards should be maintained in an efficient condition of equipment and with skilled workmen assembled, and I believe the Naval Committee have taken full consideration of this important matter. I believe that our navy-yards are now in a position to do efficient work, and that the Naval Committee intend to and will from time to time provide work for these navy-yards to do.

Mr. Speaker, we are just now at a peculiar point in the shipbuilding industry. It is just as though you found a bargain counter in colliers, where actually you can get them for about three-quarters of the normal price. I believe that if the cost of building ships in the navy-yards was 12 or 15 or 20 or even 25 per cent in excess of the cost of building them by private contract, that this Naval Committee would not have made this change nor would it to-day be asking the House to stand for this contention; but it is a question of saving not $200,000, but of saving between $500,000 and $600,000. We must have economy henceforth in every direction. We believe you want to sustain us, and we want to save the country $500,000 or $600,000 next year, and the next year we will provide work for the Mare Island Navy-Yard.

Mr. KNOWLAND. Will the gentleman from Alabama yield for a question?

The SPEAKER. The time of the gentleman from Alabama has expired.

Mr. FOSS. I will yield the gentleman one minute more.

Mr. KNOWLAND. We all appreciate the great efforts which the gentleman from Alabama is making for the increase of the navy. He is very anxious that a sufficient number of colliers should be provided to accompany the fleet. I would like to ask the gentleman from Alabama what the result would be if the amendment offered by me does not prevail. Will not the result be that the Government will be deprived of this collier?

Mr. HOBSON. I do not think so. I think the Government would get it in a shorter time.

Mr. KNOWLAND. Will the gentleman answer how?

Mr. HOBSON. Because the time of building by contract is shorter than the time of building in the navy-yard.

Mr. KNOWLAND. Under the existing law you can not build this collier in a private shipyard.

Mr. HOBSON. I did not so understand. If that is the case, my position is exactly the reverse, because we ought to have the ships.

Mr. KNOWLAND. I am glad the gentleman agrees with me.

Mr. HOBSON. I hope the chairman of the Naval Committee will straighten out that question. I will ask the chairman of the Naval Committee, if he will be kind enough to answer, If we vote this down, do we lose the ship?

Mr. FOSS. I would state to the gentleman that, in my judgment, we would lose the ship this year.

Mr. HOBSON. Then, Mr. Chairman, I beg one minute to assert that we had to hire 49 foreign ships to take our coal in a time of peace across the Pacific Ocean. We ought not to lose one day, nor one week, nor one month of time in getting additional colliers, and therefore I stand for the amendment, and I hope others will do likewise. [Applause.]

Mr. FOSS. Mr. Chairman, I now yield five minutes to the gentleman from New York [Mr. WALDO].

Mr. WALDO. Mr. Speaker, I am not one of those that desire work done in the navy-yards at a loss to the Government, but I am one of those, however, who believe that a part, at least, of the work of building vessels for the navy should be done in the government yards for many reasons. In the first place, we have great plants at Mare Island, at the navy-yard in New York, and at various other navy-yards, that have been established at great cost to the Government. Large forces of skilled mechanics have been assembled from all parts of the country, and all this will be a practical loss to the Government if we stop building at the government yards. Secondly, if we stop building at government yards the vessels that will be added to our navy will be much below the high standard of construction and finish which has been set by those that have been built in the navy-yards.

Thirdly, the vessels will not be delivered until two or three, or even four years after the date fixed by contract. At the time the *Connecticut* was finished in the Brooklyn Navy-Yard and the *Louisiana* at the Newport News yard there were then in the Newport News yard six ships that were from ten to fifty-two months behind time, and the loss alone to the Government in interest, to say nothing of the use of the vessels, was much more than the difference in cost between the construction at the navy-yard and in private yards.

Fourthly, the moment we stop keeping the Government yards fitted with tools, machinery, and skilled mechanics to make repairs upon naval vessels, the extra cost in repairs will be two or three times in excess of the difference in cost of construction in the government yards over that in private yards. This has been proved time and again by the experiences of our Navy Department.

Fifthly. If we do not continue our policy of building in our navy-yards, we shall soon cease to have skilled, practical, and experienced naval constructors. There will then be no one to plan our war ships so that we may have the latest and best models and construction, and no one qualified to inspect vessels built in private yards to insure our obtaining vessels in accordance with contract.

Lastly, it seems to me that this action of the House committee is intended to provide for the purchase of vessels, to cease building in government yards eventually altogether, and that will be the result if we stop now.

If, instead of wasting some fifteen or twenty million dollars every year deepening our harbors for the benefit of foreign ships, work of no use to our vessels, because the harbors are already deep enough for any vessels we have, we would spend that amount on our own merchant marine, the private yards would be so busy building American vessels that they would not come here and beseech Congress every year to allow them to build inferior ships for our navy. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. FOSS. I yield two minutes to the gentleman from California [Mr. SMITH].

Mr. SMITH of California. Mr. Chairman, if I can have the attention of the House a moment possibly we may get this mysterious question straightened in our minds. The Government desires to have a collier built. It has decided by law to build it at its own shop, in its own shipyard. We do not change that phase of the case by placing now a new limitation on the cost. It seems to me that the matter of the limitation is indifferent. It is going to be done by the Government by day work——

Mr. SHERLEY. Will the gentleman yield?

Mr. SMITH of California. I have not the time—and by the purchase of material by the officers of the Government, and presumably at the best market price. Therefore, what does it signify in the long run whether the limit of cost be

one figure or another? The net result must be that we will get the collier as cheaply as the government agent can build it, or else we will get no collier at all. If we now place a limit beyond which the navy officials can not go, and they can not build the collier within that limit, then we get no collier at all; but it we get the collier, it will be at the reasonable cost of the Government's own agents.

Mr. FOSS. Mr. Speaker, I yield half a minute to the gentleman from Kentucky [Mr. SHERLEY].

Mr. SHERLEY. Mr. Speaker, in that half minute I simply desire to say that if the House insists on its position, the Senate can concur with an amendment, and we can authorize the building of the ship in private yards and save this money.

Mr. FOSS. Mr. Chairman, I yield three minutes to the gentleman from New Jersey [Mr. LOUDENSLAGER].

Mr. LOUDENSLAGER. Mr. Speaker, this is simply a business proposition. There does not seem to be much strength in the argument that the House did something a year ago in respect to which information now coming to the House changes the entire situation. The Naval Committee and the House placed this limit at $1,800,000 a year ago for these two colliers. It makes no difference now whether these colliers are 2 knots slower or not. They carry at least 2,500 more net tons of cargo coal, and the one that is authorized in this bill to be built by outside plants is exactly the same as is to be built in the navy-yard; and the limitation does not change the authority at all. If the navy-yard at Mare Island can build a vessel as cheaply as outside parties, which has heretofore been contended by those who have advocated building in the navy-yards that it can do, a collier will be given to the Government.

If the navy-yard can not do that, if it is to cost fourteen or fifteen or sixteen hundred thousand dollars, it can not build it, and that is the proposition for the House to decide at this time.

Mr. KELIHER. Will the gentleman yield, Mr. Speaker?

Mr. LOUDENSLAGER. Yes.

Mr KELIHER. Mr. Speaker, I would like to ask the gentleman how many colliers were appropriated for in the naval bill this year?

Mr. LOUDENSLAGER. In the naval bill or in the naval bill as it passed the House?

Mr. KELIHER. In the present pending bill.

Mr. LOUDENSLAGER. One collier.

Mr. KELIHER. Will the gentleman kindly indicate why, with this great bargain sale of colliers, his committee did not take advantage of it and order an appropriation for more?

Mr. LOUDENSLAGER. I desire to say to the gentleman that the Naval Committee did, and that it brought in a provision to change the law of last year, to change that authorization and the amount of the appropriation, and it put in three additional colliers, but some of the Members of the House saw fit, under the rules of the House, to make a point of order against it.

The SPEAKER. The time of the gentleman has expired.

Mr. FOSS. Mr. Speaker, I yield one minute to the gentleman from Iowa [Mr. DAWSON].

Mr. DAWSON. Mr. Speaker, the question for this House to decide is whether it wants two colliers or one collier for $1,800,000. In the naval appropriation bill last year, acting on the estimates of the Navy Department, we provided for one collier to cost $1,800,000, and to be built in the Mare Island Navy-Yard. Now, by reason of changed conditions of the shipbuilding industry, we find that we can get two colliers of substantially the same efficiency for the price of the one which was provided for last year. If the amendment offered by the gentleman from California prevails, we get only one collier for $1,800,000. If the House provision prevails, we get two colliers for the same money, and that is all there is to it.

Mr. HOBSON. Mr. Speaker, I would like to ask the gentleman from Illinois a short question. If you do not build a collier, how do you know that you will save money on it; how do you know you get it cheaper?

The SPEAKER. The time of the gentleman has expired.

Mr. COOPER of Pennsylvania. Mr. Speaker, I would like to ask the chairman of the Committee on Naval Affairs a question.

The SPEAKER. Does the gentleman yield?

Mr. FOSS. Yes.

Mr. COOPER of Pennsylvania. It was stated by the gentleman from California who makes this motion that this collier can be built for considerably less than $1,800,000. I, for one, would like to know what information the gentleman from Illinois has on that subject and what it will cost to build this collier.

Mr. FOSS. The most recent communciation from the Secretary of the Navy, which has just been read from the Clerk's desk, states we should not reduce the limitation of $1,800,000 by a single dollar, and that is based upon the facts gained in connection with the construction of the collier *Prometheus* at the Mare Island Navy-Yard, the same navy-yard where it is proposed to build this collier.

Now, Mr. Speaker, I wish to say just a word. There is plenty of work for our navy-yards in repairing our ships. There is no necessity for building ships or colliers at the present time in order to keep the labor in our navy-yards employed. I want that fact distinctly understood. Now, one year ago we provided for two colliers, one to be built by private contract and the other in a navy-yard on the Pacific coast, but since that time, since the House made that provision, the Secretary of the Navy finds that we can obtain two colliers for practically the limitation placed upon one collier of last year. This is, as the gentleman from Tennessee has well stated, a simple and practical business proposition.

Do you wish to save this money, or not? The gentleman from New York [Mr. FITZGERALD], the apostle of economy in this House, is in favor of our building this collier at the increased cost of a hundred per cent. I am surprised at his position, and I often wonder whether or not if the gentleman did not live in such close proximity to the Brooklyn Navy-Yard he would take this position upon the floor of this House. Now, gentlemen, this is the question: Do you want to save the money, or not? Do you want to build up the navy on lines of the strictest economy, or not? That is the question before the House at this moment. Mr. Speaker, I call for a vote and I hope this motion will be voted down.

Mr. HEFLIN. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. HEFLIN. I rise for the purpose of asking unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. HEFLIN. Mr. Speaker, our Government has very properly adopted the policy of suitably marking the important battlefields of the Republic. One of the most important and far-reaching battles in the scope of its wholesome influence on American civilization was General Jackson's decisive battle with the Indians at Horseshoe Bend, on the Tallapoosa River, in the State of Alabama. I desire to publish in the RECORD a memorial to Congress, giving some of the reasons why this battle ground should be set apart as a national park and monuments erected thereon.

MEMORIAL FOR BATTLE PARK—SENT BY HORSESHOE BEND COMMISSION—WOULD ESTABLISH PARK—ASKS THAT BILL OF REPRESENTATIVE HEFLIN BE ADOPTED—DR. THOMAS M. OWEN, SECRETARY OF THE COMMISSION, YESTERDAY SENT PAPERS PRAYING FOR ESTABLISHMENT OF A MILITARY PARK.

When the Horseshoe Bend Commission was organized last Wednesday, a memorial was adopted looking to the passage by Congress of a bill introduced by Hon. J. T. HEFLIN for the establishment of the Horseshoe Bend Battle Park and the appropriation of a sufficient sum for the purchase of land on which the battle was fought.

The memorial as sent to Washington by Dr. Thomas M. Owen, secretary of the commission, is as follows:

The battle of Horseshoe Bend, March 27, 1814, between the Americans and the Creek Indians.

Memorial of the Horseshoe Bend Battle Commission of the State of Alabama, praying Congress to establish a military park on the Horseshoe Bend battlefield.

To the Congress of the United States:

GENTLEMEN: Your memorialists, the Horseshoe Bend Battle Commission, duly and regularly constituted under and by virture of an act of the legislature of Alabama, approved August 16, 1907, respectfully petition and memorialize your honorable bodies to take early and favorable action upon H. R. 26395, introduced in the House of Representatives by Hon. J. T. HEFLIN, Representative from the Fifth Alabama District.

As your memorialists are informed, the legislation contemplated by the proposed bill has ample warrant in numerous acts, either creating national military parks, or in the publication of historical documents, or in monumenting historic spots, or in otherwise commemorating historic incidents in the past life of our country. In such legislation public opinion throughout the United States has unanimously concurred. But while much has been done on the part of the Federal Government in the patriotic direction indicated, there undoubtedly remain many points and places which, from the importance of the occurrences which took place upon them or in their vicinity, ought either to become the property of the Government or ought to be suitably commemorated in a permanent and lasting way.

Therefore in determining upon future action on the part of Congress, it is respectfully urged that due consideration be given those great events in the history of our country which in a certain sense have heretofore been neglected, and consequently in a sense forgotten. The bill above referred to has for its object the establishment of the Horseshoe Bend Battle Park and the appropriate monumenting or marking of what is commonly known as the "Horseshoe Bend battle ground," located on the Tallapoosa River, in the county of Tallapoosa, in the State of Alabama. Although the significance of this battle as one of the decisive battles in the long line of historic battles of the country has been emphasized again and again by both the local and the general historian, it has never yet received that attention, either from the State or General Government, which its importance has demanded. The bill of Mr.

HEFLIN seeks to meet what appears to be an apparent duty, long neglected, and, we believe, in a way which ought to commend itself to immediate and favorable action on the part of your honorable bodies. Hereinafter are set forth the principal acts connected with the subject, and to these careful and thoughtful attention is invited. It is believed that they will abundantly demonstrate the historic significance of the battle, and the great patriotic and educational value of the proposed legislation.

THE PLACE.

The point where the battle was fought occupies a unique place in the history of the Creek Indians, and it is to-day a romantic and picturesque spot in a prosperous section of the State. Parton, in Life of Jackson (1864), volume 1, pages 512 and 514, says of the bend in which the battle was fought:

"The attention of the reader is now to be directed to a remarkable 'bend' of the River Tallapoosa, about 55 miles from Fort Strother, the scene, for so many weeks, of General Jackson's strenuous endeavors. The bend of which we speak is about midway between the source and the mouth of the Tallapoosa. It occurs where the stream is not fordable during the spring rains, but is not wide enough to present a very serious obstacle to an Indian swimmer. From the shape of this peninsula the Indians called it Tohopeka, which means Horseshoe. It contains a hundred acres of land, since a cotton field. The neck or isthmus is about 350 yards across. The ground rises somewhat from the edge of the water. It was a wild, rough piece of ground, abounding in places which would afford covert to an Indian warrior. At the time of which we write the surrounding country for a hundred miles or more was a nearly unbroken wilderness of forest, swamp, and cane, marked only by the trail of wild beasts and the 'trace' of wild men. As well from its situation as its form, this place was entitled to be styled the heart of the Indian country."

BRIEF DESCRIPTION OF THE BATTLE.

While full and detailed accounts of the battle will be found in the appended documents and papers, a brief sketch is not inappropriate here. Hon. Willis Brewer, author of Alabama; Her History, Resources, Public Men, etc. (1872), page 547, describes it in a terse and graphic way:

"At Okfuskee, on the Tallapoosa, the British established a fort in 1735, and occupied it for several years for the purpose of alienating the Upper Muscogees from the French. Near Okfuskee, within and at the apex of the Horseshoe Bend, stood Tohopeka, where the Indians collected to resist Jackson Chula Harje (Old Mad Jackson), as they called him. They constructed a breastwork of timber across the mouth of the little peninsula, and were so confident of victory that they permitted their wives and children to remain in the town. The principal chief present was Manaowa, who led the party that killed Gen. William McIntosh twelve years after, and there were not less than 1,000 warriors present.

"General Jackson, with nearly 3,000 troops, left Fort Strother March 14, 1814, reached Fort Williams on the 21st, and on the 27th appeared before the place. General Coffee, with the cavalry, crossed the river and encircled the town on the east bank; then sent over a detachment to set fire to the village, and which made a vigorous attack on the rear of the Indian line. At the same time two pieces of artillery opened on the breastworks in front, and at noon the Tennesseans moved to the assault of them. The struggle at the breastworks was desperate, and lasted for some minutes; but the whites thronged over, and the Indians slowly fell back to the shelter of the undergrowth. Pressed vigorously, they took refuge in the reeds and thickets on the river bank. Jackson sent a flag of truce to obtain their surrender, but they fired on it. Torches were thrown into the thickets and the blaze drove many into the river, where they were killed by Coffee's troops. Night closed the conflict; Tohopeka was in ashes, and the hopes of the surviving Creeks lay in the dust saturated by the blood of three-fourths of their bravest warriors. A number were killed in the river, and 557 bodies were counted on the peninsula. Of the Tennesseans 32 were killed and 99 wounded; of the Cherokees, 18 were killed and 36 wounded; and of the tory Creeks, 5 were killed and 11 were wounded. Jackson returned to Fort Williams the next day."

SIGNIFICANCE OF THE BATTLE.

As indicated above, the wide significance of the battle of Horseshoe Bend has been emphasized again and again by both local and general historians. Your memorialists will not, however, rest on this mere general statement. They have caused to be assembled the views of representative historians and others, which it is believed will conclusively show the far-reaching character of the campaigns of Gen. Andrew Jackson, which terminated with the battle of Horseshoe Bend. These expressions, if they have any meaning at all, place this engagement not only among the great engagements of modern warfare but also among the epoch-making events in world history. The following are submitted:

Colyar, A. S., Life and Times of Andrew Jackson (1904), vol. 1, p. 162: "The loss was severe in Jackson's army, but it was destruction to the Creek Nation, and was the end of the campaign."

George Bancroft's eulogy, June 27, 1845, in Monument to Gen. Andrew Jackson (1846), p. 39:

"In six short months of vehement action the most terrible Indian war in our annals was brought to a close; the prophets were silenced; the consecrated region of the Creek Nation reduced through scenes of blood. The avenging hero sought only the path to peace. Thus Alabama, a part of Mississippi, a part of his own Tennessee, and the highway to the Floridas, were his gifts to the Union. These were his trophies."

Halbert and Ball, The Creek War of 1814 (1895), the fullest general work on the subject, p. 275:

"This battle may well be placed alongside of that destruction that came upon the Pequods in New England. Of that, Maryn says, 'It was not a battle—it was a massacre.' The well-informed reader will note more than one point of similarity between the old Pequod war and the Creek war. Perhaps the one was as needful as the other. The one blotted out a small tribe; the other subdued a great people."

M. Kenney and Ball, Indian Tribes of North America (1842), volume 2, page 100:

"The whole fight was of the most desperate character. The waters of the Tallapoosa River were red with blood. Of 900 warriors led into that sanguinary fight by Menawa, only 70 survived and 1 only, who fled at the first discharge of cannon, escaped unwounded."

Fiske, History of the United States for Schools (1899), page 299, says: "Andrew Jackson, with his Tennessee troops and a few United States Regulars, made a bloody campaign of nearly seven months, ending with the great battle of Tallapoosa (Horseshoe Bend) in March, 1814, which finally broke the Indian power in the Southwest."

John Frost, Indian Battles, Captivities, and Adventures (1859), page 351:

"This decisive victory put an end to the Creek war. In the short period of five months, from the 1st of November to the 1st of April, 2,000 of their warriors, among whom were their principal prophets and kings, had been slain, most of their towns and villages burned, and the strong places in their territory occupied by the United States troops. After this battle the miserable remnant of the hostile tribes submitted."

H. M. Brackenridge, History of the Late War (1844), page 195:

"This most decisive victory put an end to the war with the Creeks, and broke the spirit and power of these misguided men completely. The victory of Tallushatches, won by Coffee; of the Tallapoosa, by Creeks; the two victories of General Floyd, on the Georgia side of the Indian territory; these of Talladega and Enotachopco, won by Jackson; and the fatal battle of the Horseshoe Bend, fought by Jackson and Coffee, may be said to have 'cut up the war by the roots.'"

Parton, Life of Andrew Jackson (1864), volume 1, page 525: "But the war was over. The power of the Creeks was broken; half their warriors were dead, the rest were scattered and subdued in spirit. Fort Mims was indeed avenged. Jackson's amazing celerity of movement, and particularly his last daring plunge into the wilderness and his triumph over obstacles that would have deterred even an Indian force, quite baffled and confounded the unhappy Creeks. Against such a man they felt it vain to contend. The general had no sooner reached the Hid'ory Ground and procured for his tried and hungry men the supplies they needed than the chiefs began to come into his camp and supplicate for peace."

Buel, A. C., History of Andrew Jackson (1904), volume 1, page 338: "This ended the Creek war; for stubborn fighting and for general destruction alike of life and property on the part of the Indians it stands alone in the history of savage warfare on this continent. Never before had the Indians fought in such military fashion, suffered such losses, or held out to the bitter end as the Creeks did. The fighting power of the tribe was annihilated. At the outbreak of the war the Creeks were the richest Indians in America. At its end they were the poorest. From its disasters they never fully recovered. The destruction of three-fourths of the able-bodied men in any nation or tribe of any race or color must inevitably change its destinies permanently."

A. B. Meek, in The Red Eagle (1855), pages 88–89, thus commemorates this fierce and fateful engagement:

Yes, by their courage and their strength,
Muskogee's braves are quelled at length;
Six moons have rolled their silver tide,
And they are blasted in their pride;
The autumn stars saw triumph's glow;
The springtime sun, the broken bow!
Their blood has crimsoned all the rills
From Estanaula's tumbling wave
To where Escambia's waters lave;
The fire and sword have swept the land—
Death with no unrelenting hand.
At Tallisee in vain they stood,
Or poured at Autosee their blood!
No skill or cunning could drive back
The conqueror from his fiery track.
One final effort in despair,
As turns the panther in his lair,
Beside fair Tallapoosa's wave,
Within the "Horseshoe Bend" they made;
Yet found its refuge but a grave
That scarce a warrior could evade!
Oh, seldom in the battlefield
Have fiercer scenes or deadlier strife
Than this been witnessed.

The anonymous author of Memories of Andrew Jackson (1848), page 122: "This battle gave a death blow to their hopes; nor did they venture afterwards to make a stand. From their fastness in the woods they had tried their strength, agreeably to their accustomed mode of warfare in ambuscade—had brought on the attack—and in all, failure and disaster had been met. None of the advantages incident on surprise, and for which the red men of our forests have been always so characterized, had they been able to obtain. The continual defeats they had received were doubtless the reason of their having so strongly fortified this place, where they had determined to perish or to be victorious. Few escaped the carnage. Of the killed many, by their friends, were thrown into the river whilst the battle raged, and 557 were left dead on the ground.

"Among the number of the slain were 3 of their prophets. Decorated in a most fantastic manner—the plumage of various birds about their heads and shoulders—with savage grimaces and horrid contortions of the body, they danced and howled their cantations to the sun. Their dependents already believed a communion with heaven sure, which, moved by entreaty and their offered homage, would aid them in the conflict and give a triumph to their arms. Fear had no influence; and when they beheld our army approaching and already scaling their line of defense, even then, far from being dispirited, hope survived and victory was still anticipated. Monohoe, one of the most considerable of their inspired ones, and who had cheered and kept alive the broken spirit of the nation by his pretended divinations, fell, mortally wounded by a cannon shot in the mouth, while earnestly engaged in his incantations."

In view of the foregoing it is believed that every patriotic consideration demands affirmative action on this memorial. The establishment of the Horseshoe Bend Battle Park would not only be a long-deferred recognition and commemoration of one of the great historic events in the life of our people, but it would be another public expression of the patriotic and educational value of the lessons of the past. Its establishment would be a lasting memorial to the brave men who fought and to those who fell in those trying days, when hostile Indian aggression threatened our frontier civilization. But it would be more; it would mean that a grateful government could always be relied upon to do its duty not only to its patriotic dead, but to its patriotic living as well.

For the further information of Congress your memorialists respectfully append hereto a number of historical papers and documents of great importance, which will serve to more fully illustrate the character of the battle referred to, and which they pray may be taken as a part of this memorial.

The premises considered, your memorialists respectfully urge the enactment of the measure proposed by the bill of Hon. J. T. HEFLIN, or of some other suitable legislation on the subject.

HORSESHOE BEND COMMISSION.
BRAXTON BRAGG COMER,
Governor of Alabama and President of the Commission.
THOMAS MCADORY OWEN,
Director Department of Archives and History, Secretary of the Commission.
SAMUEL L. BREWER.
THOMAS L. BULGER.
JOHN W. OVERTON.
FELIX L. SMITH.
JAMES W. STROTHER.

MONTGOMERY, ALA., *February 17, 1909.*

The SPEAKER. The question is on the motion of the gentleman from California that the House recede from its disagreement to the Senate amendment and concur in the same.

The question was taken, and the Chair announced the noes seemed to have it.

On a division (demanded by Mr. KNOWLAND) there were—ayes 25, noes 220.

So the motion was rejected.

Mr. FOSS. Mr. Speaker, I move that the House further insist upon its disagreement to amendment numbered 58.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. FOSS. Mr. Speaker, I call for a reading of the next amendment, numbered 59, and upon that I move that the House further insist upon its disagreement.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment numbered 59: Page 64, after line 5, insert: "Sec. 2. That there shall be kept, in the discretion of the President, as far as practicable, one-half of the navy of the United States on the Pacific coast at all times."

Mr. HAYES. Mr. Speaker, I move that the House do recede from its disagreement to amendment numbered 59 and concur therein.

The SPEAKER. The gentleman from California moves that the House recede from its disagreement to amendment numbered 59 and concur in the same.

Mr. FOSS. How much time does the gentleman desire?

Mr. HAYES. Just a moment or two.

The SPEAKER. The question is on agreeing to the motion of the gentleman from California [Mr. HAYES].

The question was taken, and the Speaker announced that the noes seemed to have it.

Mr. HAYES. Division, Mr. Speaker.

The House was divided; and there were—ayes 49, noes 151.

So the motion was rejected.

Mr. FOSS. Mr. Speaker, I move that the House further insist on its disagreement to amendment No. 59 and ask for a conference with the Senate.

The motion was agreed to.

The Chair announced the following conferees:

Mr. FOSS, Mr. LOUDENSLAGER, and Mr. PADGETT.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. COUSINS. Mr. Speaker, I call up the conference report on the bill H. R. 27523, the diplomatic and consular appropriation bill, and ask that the reading of the report may be dispensed with and the statement may be read instead.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk will read the statement.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 27523) making appropriations for the diplomatic and consular service for the fiscal year ending June 30, 1910, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 6, 7, 8, 9, 11, 12, 19, and 22.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 5, 10, 13, 14, 15, 16, 17, 18, and 20; and agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"For two clerks to be employed by the Department of State and to be charged with the distribution of information among the diplomatic missions, one at the rate of one thousand eight hundred dollars per annum and one at the rate of one thousand six hundred dollars per annum; in all, three thousand four hundred dollars."

And the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the words "and amendments thereto," and the Senate agree to the same.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"For thirteen consular assistants as provided for by law, eighteen thousand three hundred dollars; twelve additional consular assistants, subject to the same provisions of law as the above thirteen, twelve thousand dollars; in all, thirty thousand three hundred dollars."

And the Senate agree to the same.

R. G. COUSINS,
C. B. LANDIS,
WM. M. HOWARD,
Managers on the part of the House.
EUGÈNE HALE,
S. M. CULLOM,
A. S. CLAY,
Managers on the part of the Senate.

The Clerk read the statement as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the bill (H. R. 27523) making appropriations for the diplomatic and consular service for the fiscal year ending June 30, 1910, submit the following written statement in explanation of the effect of the action agreed upon and submitted in the accompanying conference report on the amendments of the Senate:

Amendments Nos. 13, 14, 15, 17, 18, and 21 are verbal only, and the House conferees agreed to recede.

Amendment No. 1: House recedes, permitting the repeal of the law authorizing the President to create ambassadors whenever he learns that other nations are to so designate their ministers.

Amendment No. 4: House recedes with an amendment which permits the two clerks now provided for by law at the embassy to London for the distribution of diplomatic information to be assigned to the Department of State for the same purpose, and increases the appropriation by $400.

Amendment No. 5: House recedes; provides an increase in the appropriation for the entertainment of the International Prison Congress from $10,000 to $20,000.

Amendment No. 10: House recedes, leaving the appropriation of $2,830.79 for the annual share of the United States in the maintenance of the International Sanitary Bureau, the same amount that we appropriated last year.

Amendment No. 16: House recedes, leaving an appropriation of $9,000 for participation in The Hague International Congress for the purpose of promoting uniform legislation concerning letters of exchange.

Amendment No. 20: House recedes, leaving an appropriation of $3,267 to compensate the Japanese secretary of our embassy at Japan for the cost of erecting a house upon the embassy ground.

Amendment No. 23: House recedes, with an amendment providing 5 instead of 10 additional consular assistants, as proposed by the House.

On all other amendments, viz, Nos. 2, 6, 7, 8, 9, 11, 12, 19, and 22, the Senate recedes, leaving the provisions of the bill in the form in which they were passed by the House.

R. G. COUSINS,
C. B. LANDIS,
WM. M. HOWARD,
Managers on the part of the House.

Mr. COUSINS. Mr. Speaker, the agreement being a complete one and the items being so small, I ask unanimous consent that the report be agreed to.

The question was taken, and the motion was agreed to.

ADDITIONAL JUDGE, WESTERN DISTRICT OF WASHINGTON.

The SPEAKER laid before the House from the Speaker's table the bill (H. R. 27061) to provide for the appointment of an additional judge in and for the western district of Washington, with a Senate amendment disagreed to by the House.

Mr. JENKINS. Mr. Speaker, I move that the House further insist on its disagreement and agree to the conference asked for by the Senate.

The SPEAKER. Is there objection?

Mr. MACON. I object.

Mr. JENKINS. I move, Mr. Speaker, that the House further insist on its disagreement, and agree to the conference asked for by the Senate.

The question was taken, and the motion was agreed to.

The Chair announced the following conferees: Mr. JENKINS, Mr. ALEXANDER of New York, and Mr. CLAYTON.

PENSION BILLS.

Mr. SULLOWAY. Mr. Speaker, I ask unanimous consent that private pension bills now in order on the calendar may be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Rhode Island [Mr. CAPRON] will take the chair as Speaker pro tempore.

The SPEAKER pro tempore. The Clerk will report the first bill.

The Clerk read as follows:

A bill (H. R. 28285) granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors.

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of James Welsh, late of Company E, Fourth Regiment, and Company B, Battalion, Seventh Regiment Rhode Island Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Jonas F. Fortney, late of Company B, Forty-ninth Regiment Kentucky Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of George A. White, late of Company E, Ninth Regiment New York Volunteer Heavy Artillery, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Valentine Lapham, late first lieutenant Company E, Ninety-sixth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of George W. Vanschoyck, late of Company D, Twelfth Regiment Ohio Volunteer Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Louis S. Wyatt, late of Company C, Thirty-fifth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Emma Bonds, widow of John W. Bonds, late of Company K, Twenty-ninth Regiment Illinois Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving: *Provided*, That in the event of the death of Andrew W. Bonds, helpless and dependent son of said John W. Bonds, the additional pension herein granted shall cease and determine: *And provided further*, That in the event of the death of Emma Bonds the name of said Andrew W. Bonds shall be placed on the pension roll, subject to the provisions and limitations of the pension laws, at the rate of $12 per month from and after the date of death of said Emma Bonds.

The name of Charles B. Skinner, late of Company D, Seventy-fifth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Louis Ackerman, late of Company G, Thirty-seventh Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Henry Hinckley, late of Company G, Fifth Regiment, and Company I, Seventh Regiment, Vermont Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of John F. Youngblood, late of Company H, Fifth Regiment Tennessee Volunteer Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of William Lobdell, late of Company D, Third Regiment Wisconsin Volunteer Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Simeon Shirrell, late of Company I, Twenty-fourth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Albert Ray, late of Company H, Thirteenth Regiment West Virginia Volunteer Infantry, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Arie Koning, late of Company I, Twenty-fifth Regiment Michigan Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of William W. Sechler, late of Company H, Ninety-third Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Lafayette Jaques, late of Company I, Twenty-seventh Regiment New York Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Mary Kilburn, former widow of Henry Sayre, late of Company B, One hundred and sixty-sixth Regiment Ohio National Guard Infantry, and pay her a pension at the rate of $12 per month.

The name of Milton Nelson, late of Company H, Twelfth Regiment Illinois Volunteer Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of John M. Scoville, late of Company D, First Regiment New York Volunteer Light Artillery, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of George W. Derby, late of Company H, First Regiment New York Volunteer Light Artillery, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Nelson Matteson, late of Nineteenth Independent Battery, New York Volunteer Light Artillery, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of John W. Flowers, late of Companies I and C, Twelfth Regiment West Virginia Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Warren Myers, late of Company E, Fifteenth Regiment New York Volunteer Engineers, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Julia C. E. Hubbard, widow of Edwin L. Hubbard, late major, Third Regiment Wisconsin Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Hiram Rice, late of Company C, Second Regiment North Carolina Volunteer Mounted Infantry, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Martha Dalrymple, widow of Thomas Dalrymple, late of Company C, Eighth Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of William Thomas Langston, late of Company A, Eighty-fifth Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of John C. Davidson, late of Company B, Eighteenth Regiment Pennsylvania Volunteer Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Alfred Spence, late of Company E, Third Regiment Iowa Volunteer Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Andrew R. Ladd, late of Company E, Thirtieth Regiment Wisconsin Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Josiah U. Luyster, late of Company F, First Regiment Missouri State Militia Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of James Cafferty, late of Company C, First Regiment New Jersey Volunteer Cavalry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Samuel Uplinger, late of Company A, Two hundred and second Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of William V. Yeager, late of Company H, First Regiment Ohio Volunteer Heavy Artillery, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Thomas J. Perry, late of Company B, Thirty-fourth Regiment Iowa Volunteer Infantry, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Charles J. Brown, late of Company C, One hundred and twenty-eighth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of George T. Kelly, late of Company E, One hundred and twenty-sixth Regiment New York Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of John C. Lloyd, late of Company B, Fifth Regiment Pennsylvania Reserve Volunteer Infantry, and pay him a pension at the rate of $15 per month in lieu of that he is now receiving.

The name of Elizabeth T. Hardiman, widow of Thomas W. Hardiman, late captain Company G, Twenty-third Regiment Kentucky Volunteer Infantry, and captain Company F, Fifty-fifth Regiment Kentucky Mounted Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Sallie Conn, widow of James R. Conn, late of Capt. H. J. Springfield's company, Alabama Scouts and Guides, and pay her a pension at the rate of $12 per month.

The name of James W. Murphy, late of Company F, Ninth Regiment Missouri State Militia Cavalry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Francis M. Huston, late of Company K, Ninth Regiment Missouri State Militia Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of August Scheer, late of Company K, Ninth Regiment U. S. Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Michael Larkins, late of Company A, Ninety-sixth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Nicholas Shuman, late of Company B, Eighth Regiment New York State Militia Infantry, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Milton B. Tompkins, late of Company D, One hundred and thirty-fourth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Archibald O. Rose, late of Company G, Forty-sixth Regiment Missouri Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Thomas A. Conlee, late of Company K, Ninety-sixth Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Florence E. Stewart, widow of James W. Stewart, late of Company K, One hundred and thirty-ninth Regiment Illinois Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of Josiah Yoder, late of Company F, One hundred and twenty-ninth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of James S. Brand, late of Company B, Thirty-eighth Regiment Wisconsin Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Timothy Donahue, late of Company K, Seventh Regiment Minnesota Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of John Crawford, late of Company D, One hundred and thirty-seventh Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Moses Phillips, late of Company D, First Regiment Tennessee Volunteer Mounted Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Elias G. Pike, late of Company A, Tenth Regiment Minnesota Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Eliza Girvan, late nurse, Medical Department, U. S. Volunteers, and pay her a pension at the rate of $12 per month.

The name of Ole Olson, late of Company C, Brackett's battalion Minnesota Volunteer Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Robert I. Patterson, late of Company E, Nineteenth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Benjamin F. Welker, late of Company C, Twenty-third Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Theodore Pridemore, late of Company G, Fiftieth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Henry F. Houser, late of Company A, Fourteenth Regiment Wisconsin Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of James McKinley, late of Company D, One hundred and thirty-sixth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Mary E. Lucas, widow of Daniel R. Lucas, late second lieutenant Company C and chaplain Ninety-ninth Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $30 per month in lieu of that she is now receiving.

The name of John E. Kitzmiller, late second lieutenant Twenty-sixth Independent Battery Ohio Volunteer Light Artillery, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of George F. Plaskett, late of Company K, Seventh Regiment Connecticut Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Sallie S. Allen, widow of William H. H. Allen, late major and paymaster, United States Volunteers, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Frank H. Hall, late of Third Battery, First Battalion Maine Volunteer Light Artillery, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Cara E. W. Stone, widow of Henry Stone, late lieutenant-colonel One hundredth Regiment U. S. Colored Volunteer Infantry and brevet colonel United States Volunteers, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of James H. Shutts, late of Company F, Thirty-seventh Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of John H. Rublee, late of Company B, Tenth Regiment Vermont Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Marie Sinclair Russell, widow of Henry B. Williams, late captain Company F, Forty-sixth Regiment Wisconsin Volunteer Infantry, and pay her a pension at the rate of $20 per month.

The name of Alexander G. Wilkins, late of Company H, Fourth Regiment Pennsylvania Volunteer Cavalry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Thomas McCann, late of Company A, First Regiment Pennsylvania Reserve Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of John McGaughey, late of Company K, One hundred and fifth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Martha L. Brown, widow of John B. Brown, late of Company B, Third Regiment Massachusetts Volunteer Cavalry, and pay her a pension at the rate of $12 per month.

The name of William Potter, late of U. S. ships Ohio and Montgomery, U. S. Navy, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Thomas Farrell, late of Company B, Twenty-third Regiment Missouri Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Alfred Saxey, late of Company F, Tenth Regiment Kansas Volunteer Infantry, and first lieutenant Company H, First Regiment Indian Home Guards, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Ferdinand C. Porée, late second lieutenant Company C, Thirtieth Regiment Massachusetts Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Joseph Rigby, late of Company E, Fifth Regiment, and Company K, Seventh Regiment, Delaware Volunteer Infantry, and pay him a pension at the rate of $12 per month.

The name of Elton M. Durfey, late of Company K, One hundred and forty-first Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Charles H. Orr, late of Company G, One hundred and eighty-fourth Regiment New York Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of William H. Hoffman, late of Company D, Eighth Regiment Pennsylvania Reserve Volunteer Infantry, and Company I, Eleventh Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Vinney Streets, widow of William Streets, alias Willis Miller, late of Company K, Twelfth Regiment U. S. Colored Volunteer Heavy Artillery, and pay her a pension at the rate of $12 per month.

The name of Eliza Jane Ellis, widow of George Ellis, late of Company H, One hundred and fourteenth Regiment U. S. Colored Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of Rosetta E. Arnold, widow of Smith D. Arnold, late of Thirtieth unattached company, Massachusetts Volunteer Heavy Artillery, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Emma J. Thomas, widow of William H. Thomas, late second lieutenant Company I, and first lieutenant and adjutant, Fifth Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Elias W. Bowman, late of Company C, Fourteenth Regiment Illinois Volunteer Cavalry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Emma C. Swift, widow of Daniel D. Swift, late assistant surgeon One hundred and twenty-sixth Regiment Pennsylvania Volunteer Infantry, and surgeon Sixth Regiment Pennsylvania Volunteer Cavalry, and pay her a pension at the rate of $25 per month in lieu of that she is now receiving.

The name of John L. Brady, late of Company C, and first lieutenant Company E, First Regiment Delaware Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Lizzie Lynch, widow of Edward Lynch, late sergeant-major Second Regiment U. S. Infantry, second lieutenant Company I, First Regiment Veteran Reserve Corps, and captain, Eighth Regiment U. S. Infantry, and pay her a pension at the rate of $30 per month in lieu of that she is now receiving.

The name of Sarah A. Clark, widow of Andrew J. Clark, late of Company I, Third Regiment Minnesota Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of John W. Dunahey, late of Company E, Second Regiment Kentucky Volunteer Cavalry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Elizabeth B. Hughes, widow of William B. Hughes, late colonel and assistant quartermaster-general, United States Army, and pay her a pension at the rate of $40 per month in lieu of that she is now receiving.

The name of Henry S. Tillotson, late of Company E, Seventh Regiment Vermont Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of John Preman, late of Company A, Fourteenth Regiment U. S. Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Asa Hayes, late of Company H, One hundred and twenty-second Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of William D. Wallace, late of Company A, Fifth Regiment New Hampshire Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of George M. Teachout, late of Company H, One hundred and eleventh Regiment New York Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Malinda E. Church, widow of Josiah W. Church, late major, First Regiment Michigan Volunteer Light Artillery, and pay her a pension at the rate of $12 per month.

The name of Nancy Crowther, dependent mother of Charles A. Watkins, late of Company E, First Regiment U. S. Volunteer Sharpshooters, and pay her a pension at the rate of $12 per month.

The name of Howell Atwater, late captain Company E, First Regiment Connecticut Volunteer Cavalry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The bill was ordered to a third reading, read the third time, and passed.

CIVIL-WAR PENSIONS.

The next business on the Private Calendar was the bill S. 9454.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Elizabeth W. Waters, widow of Abner W. Waters, late captain Company F, First Regiment Oregon Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of Henry Horn, late of Company H, Ninth Regiment Ohio Volunteer Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Franklin L. Hayes, late of Company F, One hundred and fifty-seventh Regiment New York Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of John Deitrick, late first lieutenant Company K, Eighty-third Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Robert L. Rohm, late of Company F, Nineteenth Regiment Pennsylvania Volunteer Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Charles J. Stevens, late of Company H, Second Regiment Michigan Volunteer Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Hermund Gudmandson, late of Company A, Twenty-third Regiment Wisconsin Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Joseph R. Landes, late of Company B, Sixth Regiment Iowa Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of John Newhouse, late of Company K, Eleventh Regiment Iowa Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of William Fifer, late of Company H, One hundredth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Timothy Donovan, late of Company G, Twenty-first Regiment, Company K, Thirty-sixth Regiment, and Company C, Fifty-sixth Regiment, Massachusetts Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Homer J. Budd, late musician, band, Forty-sixth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of James Metzger, late captain Company C, Fifty-fifth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Elizabeth Smith Tennent, dependent sister of Edward Smith Tennent, late of Company A, First Regiment Louisiana Volunteer Infantry, war with Spain, and pay her a pension at the rate of $8 per month.

The name of Lilla May Pavy, widow of Octave P. Pavy, late acting assistant surgeon, United States Army, and pay her a pension at the rate of $30 per month.

The bill was ordered to a third reading, read the third time, and passed.

PENSIONS OTHER THAN CIVIL WAR.

The next business on the Private Calendar was the bill (S. 9421) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Jay B. Sessions, late of Company I, Thirty-seventh Regiment U. S. Volunteer Infantry, war with Spain, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of John Sexton, late of Company E, Fourth Regiment Tennessee Volunteer Infantry, war with Spain, and pay him a pension at the rate of $12 per month.

The name of Winslow H. Reaves, late second lieutenant, Artillery Corps, U. S. Army, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of Marianna C. Rockwell, widow of Charles U. Rockwell, late rear-admiral, United States Navy, and pay her a pension at the rate of $40 per month.

The name of Samuel H. Askew, late first lieutenant Company A, Second Regiment Georgia Volunteer Infantry, war with Spain, and pay

him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of William G. Glasgow, late of Company C, Second Regiment Nebraska Volunteer Infantry, war with Spain, and pay him a pension at the rate of $20 per month.

The name of Culbert King, alias Culbert Kenney, late of Captain Standage's company, Nauvoo Legion, Utah Volunteers, Utah Indian war, and pay him a pension at the rate of $16 per month in lieu of that he is now receiving.

The name of Flora R. Turner, widow of Thomas J. Turner, late medical director, United States Navy, and pay her a pension at the rate of $30 per month in lieu of that she is now receiving.

The name of Agnes L. Miller, widow of James M. Miller, late rear-admiral, United States Navy, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The name of John A. Browne, late of Thirty-sixth and Fourth companies of United States Coast Artillery, and pay him a pension at the rate of $30 per month.

The bill was ordered to a third reading, read the third time, and passed.

PENSIONS OTHER THAN CIVIL WAR.

The next business on the Private Calendar was the bill (S. 9278) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain dependent relatives of such soldiers and sailors.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Thomas H. Reynolds, late major Thirty-second Regiment Michigan Volunteer Infantry.

The name of Perry Duncan, late of Company G, Sixth Regiment Ohio Volunteer Infantry, war with Spain, and pay him a pension at the rate of $10 per month.

The name of Anna Sterr, dependent mother of Frank Sterr, late of Company I, Fifth Regiment U. S. Cavalry, war with Spain, and pay her a pension at the rate of $12 per month.

The name of George W. Webb, late second lieutenant Company H, Twenty-fifth Regiment U. S. Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Frances G. Webster, dependent mother of James C. Webster, late of Company A, Ninth Regiment, U. S. Infantry, war with Spain, and pay her a pension at the rate of $24 per month in lieu of that she is now receiving.

The name of Calvin W. Cooke, late captain, First Regiment Oregon Riflemen, Cayuse Indian war, and pay him a pension at the rate of $16 per month in lieu of that he is now receiving.

The name of Mary R. Greer, widow of John E. Greer, late colonel, Ordnance Corps U. S. Army, and pay her a pension at the rate of $40 per month in lieu of that she is now receiving.

The name of Byron H. Bronson, late of Company I, Fifth Regiment U. S. Infantry, and first-class private, Signal Corps, U. S. Army, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of Alexander Snodgrass, late of Company G, Eighth Regiment, and Company K, First Regiment, U. S. Infantry, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Florence Van Etta, former widow of John H. Purcell, late first lieutenant, First Regiment U. S. Infantry, and pay her a pension at the rate of $20 per month.

The name of George Stevens, late of Company C, Twelfth Regiment U. S. Infantry, war with Spain, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of Thomas H. Beck, late of Colonel Markham's regiment, Nauvoo Legion, Utah Volunteers, Utah Indian war, and pay him a pension at the rate of $16 per month in lieu of that he is now receiving.

The name of Martha E. Bradley, widow of Samuel Bradley, late of Captain Robinson's company, Tennessee Militia, war of 1812, and pay her a pension at the rate of $24 per month in lieu of that she is now receiving.

The name of Sarah B. Hatch, widow of Davis W. Hatch, late of Captain Walker's independent company, Texas Mounted Rangers, war with Mexico, and pay her a pension at the rate of $12 per month.

The name of John W. Ragan, late of Captain Tatom's company, Tennessee Volunteers, Florida Indian war, and pay him a pension at the rate of $16 per month in lieu of that he is now receiving.

The name of Ellen Bernard Lee, widow of Fitzhugh Lee, late brigadier-general United States Army, and pay her a pension at the rate of $50 per month.

The bill was ordered to a third reading, read the third time, and passed.

On motion of Mr. SULLOWAY, a motion to reconsider the votes by which the several bills were passed was laid on the table.

Mr. FRENCH. Mr. Speaker, it is now definitely planned that the President-elect will convene Congress in extra session on the 15th of next March, and the immediate object of the extra session is the enactment of a new tariff law. To-day, if we may gauge the public opinion of the country from the attitude of the press and the declarations of the last political conventions of both the Republican and the Democratic parties, we find that there is a pronounced and widespread demand that our tariff laws be reorganized. This demand is in part due to two conditions: First, it is due to the fact that the present law, while correct in the main, is by reason of changed conditions imperfect or inadequate or useless as applied to various industries. Second, this demand is due to the incessant clamor of the Democratic party for the revision of the tariff laws upon the theory that all tariff legislation for protection is obnoxious and a certain amount of credence that many people are inclined to give to a statement that is oft repeated and enunciated with apparent fervor.

It is easier to accept political theories after a hearty meal than it is when the fragrance of boiled ham and the odor of steaming coffee are memories of the day before. The American people have had ten years of progress unprecedented in American history, and during this decade not only have just criticisms of the tariff laws impressed themselves upon the minds of those interested in our political well-being, but the heresies of free trade have found lodgment as well. I believe that the policy of a protective tariff has meant more for the upbuilding of our country than any other single policy pursued by our Government aside from that of granting free homes to our people. Believing in this policy, I yet recognize that any tariff law, no matter how perfect it may be at the time it was enacted, can not be even approximately in harmony with business conditions for any long period of time. Believing, then, in the policy of protection and that the time is near at hand when our tariff laws will be modified, I believe that every citizen who is interested in the industries which I shall mention should urge that tariff modification be accomplished by those who believe in the principle of the tariff, and not by those who believe in the tearing down of our customs-houses and the abandonment of a policy that has meant good to our Nation's people.

PROTECTIVE POLICY HAS STOOD TEST.

The Republican policy of protection has stood the test of nearly half a century and has not been found wanting. Under it the wealth of the country has increased nearly sixfold, the money in circulation nearly fivefold, the foreign trade threefold, the value of manufactured products nearly sevenfold, wages in manufacturing establishments nearly sixfold, the number of wage-earners nearly threefold, and our mileage of railroads more than sixfold.

Our wealth per capita is two and one-half times as great as it was when the Republican party was intrusted with the policies of government by the American people. Our money circulation per capita is two and one-quarter times as great; the value of our farms is three times as great, and our farm products over twice as great as when the Republican party came into power; and the average earnings of the factory or foundry hand is two-thirds greater now than then.

When the Republican party elected the first President after its principles were enunciated, the balance of trade against us was $20,000,000 a year. For eleven years there has been an average balance of trade of about $400,000,000 a year in favor of our Government, and this notwithstanding the fact that over four times as many emigrants have come into this country since the present policy of protection was adopted as during the seventy years of our preceding history with a varying policy of protection and low tariff. Not only have these emigrants come, but we as a people have furnished work for them as well as for the workmen who were already upon our shores and called this country their home.

FOREIGN INVESTMENTS.

The policy of protection has not stopped with increasing the wealth of our own people. It has induced the investment of hundreds of millions of dollars as capital in this country that under a policy of free trade would have been invested elsewhere. Many English concerns manufacture in England for the foreign market and in the United States for the market of our country. Well-established concerns across the ocean were shut out of our market by the tariff or heavily handicapped by the duties imposed. No market is more profitable than the American market, and foreign manufacturers naturally desire to enter it and share its profits. They could do so with profit only by building manufacturing plants in the United States or investing their money in stock in such concerns.

We have no statistics to show how much the foreigner has invested in this country to secure the benefits or avoid the handicaps, to foreign producers, of our tariff, but the amount probably goes into the hundreds of millions. These men would naturally have preferred to keep their capital at home if they could have reached the American market from abroad without any tariff discrimination. The result has been that American labor has made many products that foreign labor would have made if our country had been pursuing a policy of free trade.

By the establishment of these industries in America that, without a protective tariff, would have been established abroad, American labor has gained before, as well as after, their establishment. It has drawn steady wages from their operations, but it drew wages from them before they began operations. The bricks and lumber that went into their buildings were manufactured in America and American labor was paid to manufacture them. The machinery that was placed in them was manufactured in America, and American labor was paid to make it. I am talking now about foreign investments that were made in this country in order to sell products in it without having to pay duty. The strongest opponent of protection will admit that but for the tariff this capital would have been invested abroad. The strongest opponent of protection must

admit that this has been a clear gain for American business, for American labor.

PROTECTIVE TARIFF VERSUS REVENUE DUTY.

We profit much by comparison, and an interesting object lesson is furnished in the history of the troubles and hardships that the country endured during the brief period that the Democratic party was in power when compared with the history of the previous era that our country enjoyed under Republican administration. Since 1860 we have had forty years of Republican and only eight years of Democratic administration. The Democrats, however, were not in such control of the Government as to enable them to make the changes in legislation that they desired to make until Cleveland's second term. So, while we have had forty years in which the Republican party has been intrusted with the direction of executive affairs and eight years in which the Democratic party has had this responsibility, we have had in reality forty-five years of Republican policy and three of Democratic, for the Wilson bill lived only three years. While it lived it wrought havoc. Of the forty-five Republican years, at least forty were years of prosperity. The three years during which the Democratic party worked its sweet will were three years of dire hardship and disaster. This is the record, and it is one which, from a Republican point of view, adherents to the policy of protective tariff need not feel ashamed. While we may change our tariff schedules, I see no reason in reviewing the history of our country for abating one whit the policy of protection which we have pursued.

ALL SECTIONS INTERESTED.

But it is not my purpose to devote much time to the discussion of the tariff as a system. The people less than four months ago placed the approval of their ballots upon it. The East spoke for protection to manufactured articles. The West spoke for protection to the so-called "raw materials." The New England States propose to sacrifice their mother-in-law's relation by asking that hides be placed upon the free list, forgetting that the West would be called upon to make no greater sacrifice if New England factory goods were relieved of all duty. The fact of the business is that we must be fair with all sections and with all industries. Eastern representatives will not overlook the interests of the East in the new tariff schedule, and I now want you to bear with me while I point out that the West has interests of equal importance to that great section as those that engage the attention of our eastern brethren.

In whose interest is it proposed to abolish the tariff on raw materials? It is not in the interest of the whole people, no matter how plausible may be the arguments advanced. The people would not get cheaper clothing, with manufactured products protected, if wool were placed on the free list. The people do not buy wool. The people buy clothing, and free wool would not mean cheaper clothing. It might mean larger profits to the manufacturers of woolen goods and of clothing. It would benefit no one else, but it would injure the woolgrowers. The Democratic party, through its perennial candidate for President, stands for free wool. Bryan declared in his speech of January 13, 1894, in the House of Representatives, "I am for free wool." True, he stands opposed to protection on manufactured articles, but standing for free wool he throws the wool producers of the West, if his policy were to be adopted, into competition with the wool producers of the whole world.

Of what benefit to the people would be free hides? Of none whatever. They do not buy hides. They do not even buy leather. They buy shoes, and free hides would not make shoes any cheaper so long as the duty on them remains unchanged.

SHEEP AND WOOL.

The people of Idaho are more interested in wool than any other State, except the States of Montana and Wyoming. I wish to submit a table which shows the number of sheep and the value of the wool clip in the 12 States of greatest wool production for 1907:

State.	Sheep.	Value of clip.
Montana	4,600,000	$7,640,268
Wyoming	4,481,931	7,211,773
Idaho	2,500,000	3,757,050
Ohio	1,950,000	3,717,188
New Mexico	2,600,000	3,260,400
Utah	2,075,000	3,162,819
Oregon	1,800,000	3,121,200
Michigan	1,500,000	2,731,995
California	1,750,000	2,679,000
Colorado	1,500,000	2,679,000
Texas	1,300,000	1,896,180
Wisconsin	840,000	1,710,072

See Statistical Abstract of the United States, pages 110 and 111.

Our people are heavily interested in woolgrowing. An industry that yields a profit of $3,757,050 to the people of a single State, with a population no greater than that of Idaho, can not be passed over lightly. The same interest, in greater or less degree, must exist in the other States which I have mentioned. A repeal of the duty on wool would so reduce the value of the product as to make the industry unprofitable. What would the repeal of the duty do for the woolgrowers? We have only to judge the future by the past. Nothing but a glance at the statistics of the industry is needed to show how adverse legislation, or even the fear of adverse legislation, hurts the woolgrowers of the country.

The following table shows the number of sheep in the country and their value and the number of pounds of wool produced year by year from 1883 to 1907–8:

Year.	Sheep.	Value.	Pounds of clip.
1883	49,237,291	$124,366,335	290,000,000
1884	50,626,626	119,902,706	300,000,000
1885	50,360,243	107,960,650	308,000,000
1886	48,322,331	92,443,867	302,000,000
1887	44,759,314	89,872,839	285,000,000
1888	44,544,755	89,279,926	269,000,000
1889	42,599,079	90,640,369	265,000,000
1890	44,336,072	100,659,761	276,000,000
1891	43,421,136	108,397,447	285,000,000
1892	44,938,365	116,121,290	294,000,000
1893	47,273,553	125,909,264	303,153,000
1894	45,048,017	89,186,110	298,057,000
1895	42,294,054	66,685,767	309,748,000
1896	38,298,783	65,167,735	272,474,708
1897	36,818,643	67,020,942	259,153,251
1898	37,656,960	92,721,133	266,720,684
1899	39,114,453	107,697,530	272,191,330
1900	41,883,065	122,665,913	288,636,621
1901	59,756,718	178,072,476	302,502,328
1902	62,039,091	164,446,091	316,341,032
1903	63,964,876	168,315,750	287,450,000
1904	51,630,144	133,530,099	291,788,032
1905	45,170,423	127,331,850	295,488,438
1906	50,631,619	179,056,144	298,915,130
1907	53,240,282	204,210,129	298,294,750
1908	54,631,000	211,736,000	311,138,321

See Statistical Abstract of the United States, pages 112 and 711.

I also submit a table showing the price of wool since 1882:

Year.	Fine.	Medium.	Coarse.
	Cents.	*Cents.*	*Cents.*
1883	39 to 40	40 to 44	33 to 37
1884	35 to 40	34 to 40	30 to 44
1885	32 to 34	31 to 35	28 to 32
1886	33 to 36	33 to 38	29 to 34
1887	32 to 34	36 to 39	33 to 34
1888	29 to 31	33 to 35	31 to 32
1889	33 to 35	37 to 39	31 to 33
1890	32 to 33	36 to 37	29 to 31
1891	31 to 33	35 to 37	29 to 31
1892	28 to 30	33 to 35	29 to 31
1893	25 to 30	24 to 33	21 to 31
1894	19 to 23	21 to 24	18 to 21
1895	16½ to 18	20 to 21	18 to 19
1896	17 to 19	18 to 21½	17 to 19
1897	19 to 27	21 to 29	19 to 25
1898	28 to 29	29 to 30	24½ to 26
1899	25½ to 31	28 to 33½	24 to 29
1900	26½ to 35	28½ to 35	26½ to 21½
1901	25 to 27	26 to 29	22 to 26
1902	25 to 28	26½ to 28½	24 to 25½
1903	29½ to 32	30½ to 31½	26 to 28
1904	32½ to 33½	31½ to 33½	29½ to 31½
1905	34 to 36	35 to 39	34 to 36
1906	33 to 34	37 to 38	33 to 36
1907	34 to 35	36 to 38	34 to 36
1908	33 to 34	35 to 38	33 to 36

See Statistical Abstract of the United States, page 566.

It would take more time than I have at my disposal to analyze all these figures. The value of sheep varies almost exactly with the value of wool. We find in 1883 the sheep of this country were worth $124,366,335. We find in 1885 their value had declined to $107,960,650, a loss of more than 13 per cent. I attribute the decline of 13 per cent from 1883 to 1885 to the revision of the tariff in 1883, following the report of the tariff commission of 1882. Wool was the particular article that was made to suffer. Following the election of Mr. Cleveland in 1884 a fight was made by him for free wool, and a bill, which included a provision for putting wool on the free list, passed the House in 1888, but was defeated in the Senate. The value of wool further declined from $107,960,650 to $89,279,926 in 1888, a loss of 17 per cent. The defeat of the Mills bill and the election of a Republican President were shown in the statistics to have produced an immediate gain in the value of sheep. At the close of the Harrison administration sheep were worth $125,909,264, a gain of 39 per cent over their value at its be-

UNIVERSITY LIBRARY
MARYVILLE, MISSOURI 64468

ginning. This value fell to $67,020,942 by the close of the second Cleveland administration, a loss of $58,888,322, or 47 per cent.

A tariff placing wool on the free list had been enacted and had done its work. It was during the pendency of this bill that Bryan declared in the House "I am for free wool." The Republican party in 1896 saved the industry from still further destruction, and last year the value of sheep in the country had risen to $211,736,000—a gain of $144,715,058, or 215 per cent. Remember this gain was made in twelve years under Republican administration and a protective tariff. Thus we see that in the past Republican success has meant prosperity for the woolgrowers, while Democratic success has spelled disaster. (For tariff on wool see 348 et. seq., act of 1897, 941.)

The products of Idaho are not heavily protected. The tariff on unwashed wool varies from 4 to 12 cents per pound; it varies from the equivalent of 12 per cent to the equivalent of 32 per cent ad valorem.

Who receives the benefit of this increase in price for wool? The woolgrower? In part, yes. But also the sheep herder, the camp tender, the sheep-shearer, the farmer who sells hay, and, in fact, all who are related to the sheep industry. Hon. P. G. Johnston, of Blackfoot, Idaho, submitted a table to the Ways and Means Committee, which is printed in their hearings, and which, though brief, speaks volumes on this subject. He compared the cost of raising sheep in 1897 and 1907. He took for his basis a flock, 1,700 head, consisting of 1,200 ewes and their lambs, and 500 yearlings.

In 1897 the expenses incurred were:

1 herder, at $35 a month	$420
1 camp tender, at $25 per month	300
Board for the two of them, $25 a month	300
Shearing, at 7 cents each	119
Feeding hay, at 20 cents each	340
Total	1,479

In 1907 the expenses incurred were:

1 herder, at $50 a month	$600
1 camp tender, at $40 a month	480
Board for the two men, $50 per month	600
Forest-reserve grazing fee, 7 cents each	119
Shearing, at 10 cents each	170
Feeding hay, at 50 cents each	875
Total	2,844

Mr. Johnston makes his deductions, then, in this language:

From the foregoing statement it will be seen that the cost of production has actually increased $1,365. The present tariff protection of 11 cents per pound on a 7-pound fleece (which is the Idaho average) amounts to $1,309, and, as above stated, the increase in expense being $1,365, it will be readily observed that the tariff is more than offset by the advanced cost of production.

HIDES AND SKINS.

Now, let us see about hides and skins. These are products in which the people of Idaho and the whole West are interested. The tariff imposes a duty of 15 per cent on hides of cattle. All other hides, except sheepskins with the wool on, are imported free. Leather is protected. Shoes and other leather products are protected, but hides and skins are not, with the exception of those which I have just mentioned.

Last year we imported hides of cattle worth $12,044,435, goatskins worth $13,325,126, and all other hides and skins worth $25,400,575. On the first named of these a duty of 15 per cent was imposed. The others were imported free. Hides and skins were imported into the United States free to the value of $42,725,701. These became dutiable as soon as they were turned into leather, but the owners of the animals from whose carcasses the hides were taken had no protection.

Idaho raises animals other than cattle, but the hides of such animals are admitted into the country free. The heavy imports of such hides show that the Government might collect a considerable amount of revenue by the imposition of a duty on them. The leather men and the shoe men have no right to complain so long as they import $3 worth of hides free for every dollar's worth on which they pay duty. No one else would have any right to complain, because no one else buys hides to any great extent. The owners of cattle and other animals in this country, even under the present tariff, do not supply enough hides to meet the demand. I have given you the figures for last year showing our imports. The figures for the year before are more striking. That year, or 1907, we imported hides and skins to the value of $83,206,505, of which $62,557,287 worth came in absolutely free of duty. We exported that year hides to the value of only $1,760,032. We imported $81,466,513 of value more than we exported, and on only one-fourth of this was a duty charged. It would be more in keeping with our policy of building up American industries, and more in keeping with the ideas of justice to the agricultural and stock-raising States, to extend this duty to the hides and skins of other animals than to take it from the hides of cattle.

INDIRECT BENEFIT OF PROTECTION.

I have now spoken somewhat briefly with regard to the direct effect a protective tariff has had upon certain industries of the West, of agricultural character. The benefit of the tariff, however, does not end here; there are indirect benefits that assume tremendous proportions. The sheep and cattle industries, for instance, can not succeed without bringing success to the farmers who raise hay. The range for all kinds of stock is limited; it is limited by areas, and it is limited by the seasons, and cattle and sheep men must of necessity go to the farmer to buy hay. It is true that there is a tariff duty on all kinds of hay, but I beg to urge that the greatest protection the farmer has who raises hay, who raises alfalfa, is given him, not because of the duty upon hay, but because of the duty upon stock, upon wool, upon hides. Look to the price of sheep, look to the price of wool, look to the price of stock, and normally you will find that when the prices of these commodities are high, the farmer is able to obtain a good price for his hay as well. On the other hand, when the products of the industries that I have mentioned are a drag on the market the farmer gets little for the hay which he produces. One industry can not suffer without bringing hardship to all. In a letter that I have received from Hon. P. G. Johnston, of Blackfoot, Idaho, a successful man, who is familiar with all phases of the sheep business from large actual experience, he states that in 1893 (after the election of a free-trade administration) wool was 8 cents per pound at Blackfoot, while in 1907 it had advanced to 23 cents per pound. Sheep were worth $1.50 per head in 1893, while in 1907 they brought as high as $5 per head. He states further that cattle and horses increased in value in only a less proportion, while during the same period alfalfa increased from $2 to $4 per ton.

The prices of particular commodities at particular places are always more interesting than general averages compiled from statistics from different places over the country at large. However, local prices are often modified to some extent by local conditions, and due allowance must be made for this. Hon. A. B. Moss, of Payette, Idaho, and Hon. Fred W. Gooding, of Shoshone, Idaho, two of the most enterprising and public-spirited men in the southern part of the State, have, at my request, furnished me with the local prices of various Idaho products in their respective localities. These figures are not gathered from one man in each locality, but are gathered from butchers, stockmen, and other men of practical experience. In detail they are approximately correct, and they represent a fair average of prices for eighteen years and constitute a striking commentary upon the relation the protective tariff bears to industries in which Idaho is interested. The tables were prepared separately, and from these tables I have prepared an average table, which, in a general way, will serve as a guide to the prices which have prevailed throughout south Idaho.

Table as gathered from butchers, stockmen, and other practical business men in south Idaho.

Year.	Sheep.	Wool.	Hides.	Cattle.	Alfalfa.[a]
1890	$2.87	$0.15	$3.50	$28.00	$3.00
1891	3.12	.15	3.50	28.50	3.00
1892	3.12	.15	3.25	27.50	3.00
1893	1.50	.09	2.25	16.50	2.00
1894	1.50	.09	2.00	15.50	2.00
1895	1.37	.08	1.87	15.00	2.50
1896	1.25	.06½	1.50	13.50	2.50
1897	2.25	.11	1.75	15.00	3.00
1898	2.75	.13	2.25	18.00	3.50
1899	3.00	.14	2.50	19.50	3.50
1900	3.00	.14	2.62	19.50	4.00
1901	3.12	.14	2.75	20.50	4.00
1902	3.50	.15	3.25	21.50	4.00
1903	3.50	.16	3.50	23.00	4.50
1904	4.00	.17	3.75	24.50	5.00
1905	4.25	.18	4.00	25.00	5.00
1906	4.75	.19	4.50	25.50	5.00
1907	5.12	.19	3.75	22.50	5.00

[a] Shoshone prices.

BEET SUGAR.

Again, the Government owes liberal treatment to the beet-sugar producers. They were induced to go into this industry during a period when a bounty was paid on sugar. When the Democratic party came into power, the bounty was abolished, but a tariff was enacted which gave the industry substantial protection. The first beet sugar produced in this country was manufactured in 1891–92. At that time, as already stated, a bounty was paid on sugar. Then only 7,155 acres in sugar beets were cultivated. Fifteen years later we had in cultivation

317,364 acres—an increase of more than fortyfold. The production increased from 12,004,838 pounds in 1891–92 to 927,256,430 pounds in 1907. Official figures are not available for last year, but the commercial estimate places the output for 1908 at 873,600,000 pounds, or nearly equal to the tremendous yield of 1907. Over 75 times as much beet sugar was produced in 1907 as in 1891–92, and from the standpoint of protection the encouragement given to this industry has been a decided success.

Idaho is tremendously interested in the production of beet sugar. The commercial figures for last year place the output at 51,968,000 pounds, while the official figures for 1907 show that Idaho alone produced more than 8 per cent of all the beet sugar manufactured in the United States, 75,928,200 pounds—an amount more than six times as great as the total quantity of beet sugar produced in the United States only sixteen years before. The published report on this subject of the Secretary of Agriculture for 1906 gives some figures of great interest to the State that I have the honor to represent.

General results of the beet-sugar industry in Idaho in 1906.

Total acreage	acres	20,000
Total tonnage	tons	230,000
Average yield per acre	do	11–11–14
Total capital invested		$4,500,000
Total money paid farmers for beets		$1,100,000
Total money paid factory labor		$260,000
Output of sugar (see table below)	pounds	64,000,000
Value of refined sugar, at 4½ cents per pound		$2,880,000

Estimated results of operation of Idaho factories in 1906.

Name and location.	Estimated product of sugar.	Estimated length of campaign.	Number of factory employees.	Number of farmers growing beets.
	Pounds.	*Days.*		
The Idaho Sugar Co., Sugar City	23,000,000	115	200	500
The Idaho Sugar Co., Idaho Falls	20,000,000	90	160	450
Snake River Beet Sugar Co., Blackfoot	10,000,000	85	140	200
Western Idaho Sugar Co., Nampa	11,000,000	75	160	300
Total	64,000,000		660	1,450

As indicative of the future, let me quote still further from the report of the Secretary of Agriculture:

At the present time Idaho has four sugar factories operating in the State, scattered along the Snake River from the western to the eastern part. These plants have given great impetus to agricultural development. There are several places in the State under serious consideration for building beet-sugar plants. It is anticipated that some of the projects will materialize in the near future.

During the past session factories in operation received a large tonnage and were worked to their capacity, the campaign lasting from eighty to one hundred and twenty days. The results of this session have done much to stimulate the industry in the State.

The State is developing very rapidly. Irrigation facilities, fruit culture, and the growing of alfalfa, small grain, and potatoes are extending rapidly. Indications point to the need of other sugar factories. The projectors of factories in Idaho are well advised by the needs of the industry. This experience was gained through a long, intimate acquaintance with it in Utah. There is no tendency to overdo the matter or overreach the capabilities of the State for sustaining the sugar industry. Factories will be built as fast as the business will warrant.

In the report for 1907 that Mr. B. T. Galloway, Chief of the Bureau of Plant Industry, makes to the Secretary of Agriculture he says:

Idaho with four factories, though but newly embarked in the industry, has risen to fifth place as a producer of beets and sugar. In sugar content of the beets last year Idaho almost equaled the phenomenal record made by California, and the average coefficient of purity, 88.3, exceeded anything on record in this country.

The report of the Secretary of Agriculture and the statement of Mr. Galloway are doubtless impartial, and they are so striking that no one can read them without a just feeling of pride in the past and confidence for the future. Shall we lower our tariff schedule on this industry and throw our own people into competition with the cheap labor of farm and factory of foreign lands? Before we contemplate so disastrous a policy, let us remember the benefits afforded by this industry are not limited to it alone. If one-half the growers of wheat in our country were to discontinue suddenly the raising of wheat, who can doubt the high price that wheat would command raised by the remaining half? If, then, it is true that less wheat brings a higher price per bushel, it is also true that every acre taken for the raising of sugar beets adds something to the value of lands devoted to other crops.

LUMBER.

Another industry that has meant much for the development of the West, and which to-day furnishes employment for a large army of men and a market for the produce of the farm, is the lumber business. I want to call attention briefly to the interest of the West in this great industry, lest we remember when it may be too late that our country and our enterprises and our people come before and should take precedence over the enterprises and people of any other land. The tariff to-day represents a protection of about 42 per cent to American industries as a whole, but not to the lumber industry. The lumber industry has scarcely any protection, and in the strict sense of the word has none at all, for the little duty of from 6 to 12½ per cent ad valorem upon some of the products of the forest does not constitute a duty large enough to raise the money necessary to bear the expenses of government if a similar duty were to be applied to all our imports. Not only this, but logs and round, unmanufactured timber, including pulp woods, firewood, and nearly all the finer classes of wood, are on the free list to-day. In spite of this there is a well-defined effort being made to strike down the small duty upon lumber, and especially the duty upon rough lumber and lumber of the lower grades.

This fight is being fostered and advanced by the lumber interests of the Dominion of Canada. What is their purpose? Why, simply this: These interests have a market to-day in Europe for all their high-grade lumber. They do not need to send this class of lumber to the United States. But they do want the United States as a market for their low-grade and poorer lumber. The duty to-day on this class of lumber is from $1 to $2 per thousand feet, and this is the duty that the Canadian lumbermen would have removed.

Now, let us see for a moment what the situation is as regards the Canadian lumberman. A large part of his lumber he purchases from the government upon the basis that requires but a comparatively small payment at time of purchase. He purchases a lease or the privilege of cutting and he makes no further payments until the trees are cut for lumber. The lumberman bears a small tax upon his purchase, and suffers the minimum loss in event of fire. The government sustains this because it does not part with the timber until it is cut. In other words, you may call it a subsidy; you may call it what you please; the Canadian government grants in this manner a substantial encouragement or protection to the lumber business. They grant a greater protection than our Government grants through the small duty. But this is not all. The State I represent in this body adjoins the Canadian Province of British Columbia. We naturally compare our wages with Canadian wages; we compare the class of workmen that we have with the laborers across the line; we compare conditions surrounding our industry with conditions surrounding the industry in the Dominion. What do we find? In the first place, we find white men working in our mills and lumber camps. In British Columbia we find that 75 per cent to 80 per cent of the men employed are Chinese, Japanese, or Hindoo laborers. Our laborers receive good wages, while laborers I have referred to in Canada are receiving from 80 cents to $1.25 per day. The whole country is familiar with the difference in the standard of living between our own people and the people from the Orient, and at a time when the race question is already creating an unrest among the people of the Pacific States we should not add to that unrest by forcing the American labor either out of employment or else into competition with the cheap labor of the Orient.

Our country owes it to our citizenship to grant as full protection to our laborers and our producers as their competitors receive encouragement from the Canadian government. To strike down the duty from this class of imports would bring about no material change as regards the market for higher class lumber. Europe and Canada furnish to-day the market for Canada. The United States furnishes the market for our own producers. The lower or cheaper grade of lumber would be shipped into this country from Canada. Eighty per cent of the cost of lumber in the United States is paid to labor. Our wages would need to be reduced to meet the wages of the cheap labor of Canada, or else our lumbermen would operate their mills for the production of the higher grades of lumber, allowing the timber that to-day is worked up into the lower grades to go to waste and necessarily reduce the force of men employed in the industry.

Finally, then, if you remove the duty that to-day exists upon the low-grade lumber, you will be compelled to raise the money for revenue purposes from some other source. The American people will save not a single penny. The rate to-day is not a tariff rate; it is not an average revenue rate. You may remove it, but if you do the American people will simply put the money thus saved into the Treasury from another pocket—that is all.

LEAD.

I must now pass briefly to another industry, and I have time merely to call attention to a few of the most important industries in which the West is concerned. Idaho is probably best known as a mining State, and as a mining State she takes first rank in the production of lead of all the States in our great country.

For years she has produced more than one-third of the entire lead output of the United States. Thousands of workmen are employed in her mines and at good wages. Our lead miners receive, according to information furnished me, about $3.65 for an eight-hour day. Add to the number of laborers employed in the mines the numbers of their families; add to this the thousands who find occupations in mining centers, and you have a vast population. This population must buy breadstuffs. They must consume meat. They must have fruits and the products of the garden and the dairy, and they must have clothes. Yet the very industry that I am discussing, the lead industry in the United States, is dependent for its existence in anywhere near its present magnitude upon the protective tariff. The duty upon lead is from 2⅛ to 2½ cents per pound.

I am advised by Mr. Stanley A. Easton, of Wardner, Idaho, who is a veritable encyclopedia upon this question, that probably only two lead-producing mines in Idaho could pay operating expenses were the duty upon lead to be removed, providing, of course, that the present wages would be paid and the hours of employment for the laborers be not increased. Probably like conditions prevail elsewhere; certainly the effect would be enormous. Can you imagine the effect upon economic conditions were the duty upon that one product to be removed? We have not reached the point where we are willing to concede the low wages to our workmen that is paid in Mexico or Germany or the United Kingdom. Wages in our own country are from two to five times as high as in those foreign countries. In Mexico lead miners receive from 85 cents to $1 per day. Nor are we willing that longer hours shall constitute a day's work. The other alternative is for our mines to close down. The first effect of this would fall upon those directly dependent upon the mines for employment. Here it is disastrous. The next effect would be felt by the business enterprises in the towns and cities in every mining region, and here again the effect would be disastrous. Only less harmful would be the effect upon the market gardener, the dairyman, the wheat producer, the man who has meats or fruits or other commodities which he must sell. With the miners out of employment, they could live for a while, it is true, by buying less meats, less fruits, less commodities of all kinds. They could for a while wear the clothes which they had discarded the year before. But they could not do this always. Sooner or later they would need to have work, and then they would compete with the laborer in scores of other employments, with the result that conditions still more difficult to bear would surely follow upon the industries which were not affected at first hand by protection given to the lead industry.

Right here I desire to give some figures gathered by the Division of Mining and Mineral Resources of the United States Geological Survey which will be of interest:

Production of lead in the United States, and production in Idaho.

Year.	Output in United States (short tons).	Output in Idaho (short tons).
1888	151,919	----------
1889	156,397	----------
1890	143,630	----------
1891	178,554	----------
1892	173,307	----------
1893	163,982	----------
1894	162,686	33,308
1895	170,000	31,638
1896	188,000	46,662
1897	212,000	58,627
1898	222,000	59,142
1899	210,500	52,154
1900	270,824	85,444
1901	270,700	79,654
1902	270,000	84,742
1903	282,000	99,590
1904	307,000	108,854
1905	302,000	99,027
1906	350,153	117,117
1907	365,156	111,697

From this table it will be seen how great the interest of Idaho is in this one item. Her total output for 1907 is considerably more than two-thirds of the entire output of the United States for 1888.

I now desire to point out the countries which produce lead, and my figures are from the same source as the ones referred to.

World's production of pig lead (metric tons).

Producing country.	1905.	1906.	1907.
Spain	180,700	180,900	185,800
Germany	152,600	150,700	140,000
France	24,100	25,600	23,000
Great Britain	23,300	24,000	27,400
Belgium	22,900	22,200	25,800
Italy	19,100	21,300	22,900
Austria-Hungary	13,500	16,400	15,400
Greece	13,700	12,100	13,800
Canada	25,700	23,800	21,000
Australia	107,000	93,000	97,000
Mexico	75,000	54,000	72,000
United States	312,500	334,800	340,700
Other countries	13,800	14,400	14,900
Total	983,900	973,200	999,700
Percentage produced by United States	31.76	34.40	34.08

From statistics compiled by Metallgesellschaft, Frankfort on the Main.

From the table which I have submitted it appears that the United States produces but little more than one-third of the lead output of the world, and we are importing lead from foreign countries. In 1905 we imported 196,755,408 pounds; in 1906, 168,208,939 pounds; and in 1907, 150,686,468 pounds.

Most of the lead that is imported is brought from Mexico. Some is brought from British North America, some from the United Kingdom and Germany, while a comparatively small proportion is contributed by other countries. After reflecting upon the wages paid to laborers in the countries which I have mentioned, after reflecting upon the hard conditions that surround these laborers, after reflecting upon the relation scores of industries bear to the lead industry, directly and indirectly, it must suggest itself to thoughtful men that a removal of the tariff from our lead industry would create an economic condition in every lead-producing region from which it would take years to rally.

WESTERN INDUSTRIES NOT HEAVILY PROTECTED.

Other products of the West have still less protection. Here are some of the products of Idaho and the duties upon the same or equivalent ad valorem duties:

Cattle, 20 to 27½ per cent ad valorem; horses and mules, 30 to 34 per cent ad valorem; sheep, 19 to 20 per cent ad valorem; hogs, free; timber and lumber, 6 per cent ad valorem; boards and planks, 10 to 20 per cent ad valorem; copper ore or pigs, free; lead, 2⅛ to 2½ cents per pound; sugar, 60 per cent ad valorem; hay, $4 per ton; hides, 12 to 15 per cent ad valorem; wool, 10 per cent to nearly 60 per cent ad valorem on some qualities.

Only on sugar and on lead are the duties as high as the average of the tariff. On some kinds of wool the duties are as high, but the kinds are not produced in the West to any great extent. On other products of Idaho the duties are low. If we wish to encourage a well-rounded development of the country, we can not afford to modify the tariff schedule so that it will be unequal, so that it will bear heavily upon one section and lightly upon another, or grant protection to the people of one section without granting protection to the people of every section.

PROTECTION TO MANUFACTURED PRODUCTS AND TO RAW MATERIAL.

Now, let me offer a few observations upon the broad principle of the protective tariff. There are those who, holding to the doctrine of protection, would yet restrict its benefits to the producers of manufactured goods. These men, if they could have their way, would make a tariff sectional and unjust. It would not stop with discriminating between individuals. It would discriminate between States. It would give the thickly settled States of the Northeast tremendous advantages, while leaving other sections to bear the burdens. I am opposed to all efforts to take from my people the benefits they enjoy under the tariff as it stands to-day. The tariff needs adjustment, but let it be along the line of removing the duty from products with which we can meet the products of foreign lands. In whose interest is the effort made to legislate for free raw materials, while the manufacturers of the finished product are protected? It is not in the interest of the people, for, as I have already stated, they do not buy raw materials. They buy the finished products. A tariff placing raw materials on the free list and leaving duties on the finished product would decrease the cost of manufacturing without decreasing the price at which manufactured goods are sold—without abolishing one jot or one tittle the price the consumers have to pay.

Such a tariff would be sectional and unjust. I favor a tariff that is neither sectional nor unjust; one that protects every industry that needs to be protected; one that protects industries in every State. A well-balanced tariff extends its benefits to every county of every State in all our land. A tariff of this kind is

fair and just, while a tariff of any other character—a tariff so arranged as to confer its benefits on some States and some sections, while leaving others unprovided for—would not be in keeping with the spirit of fair play which has become the ideal of the American people.

Suppose we go a step further and reduce the tariff on finished products while repealing the tariff on raw materials. If the duty on the finished product were reduced only enough to make up for the gain of the manufacturers in getting their raw materials free, the manufacturers would give up nothing, while calling on the farmers and other producers of raw materials to give up everything. Suppose, however, we put raw materials on the free list and make a deep cut in the duties on the finished products. What would then become of the revenue? Our tariff has a double purpose. It is intended for raising revenues as well as for the protection of American labor and American industries, and I firmly believe that indirect taxation is far more acceptable to the American people than the most carefully prepared system of raising revenues by direct taxation.

TARIFF FOR REVENUE.

From a revenue standpoint the tariff on such products as I have discussed is of vital importance. It gives us nearly one-sixth of our total collections through the custom-houses. The following table shows the revenue furnished in 1907 by some of the products of the kind Idaho furnishes:

Animals	$403,195
Hides and skins	8,115,391
Lead	982,235
Sugar	60,284,059
Wood and lumber and manufacturing	4,385,039
Wool	16,562,748
Total	85,732,667

About one-fourth of our entire customs revenue is raised from duties on the articles mentioned in the foregoing table. We could not afford to dispense with these duties. If we place these articles on the free list we will have to look elsewhere for more than $80,000,000 of revenue, or else borrow money year by year to meet the needs of the Government.

Men differ as to the means to be adopted for the purpose of increasing the revenue. How would we increase the revenues yielded by what remained of our tariff law if any considerable part of it were repealed? At first glance the answer seems easy. Increase the duties on such articles as are still protected by the tariff. But if the tariff be repealed as it protects raw materials we would then have remaining the tariff upon finished products, such as are ready for the people's use. When you do this, you increase their cost to the people. An abolition of the duties on raw materials would create a deficiency that would have to be made up, but it would save the people nothing, for they do not consume commodities in their raw form.

Now, suppose, to meet this deficit, the tariff on finished products should be increased. This increase would fall as a burden on the people who had not been burdened by the tax on raw materials, but rather who had profited thereby.

An increase in the tariff rates would reduce importations and in that way reduce the revenues, and it might reduce them to an extent great enough to fully counterbalance the gains made by the higher collections exacted in proportion to the volume of imports. To illustrate: If duties on certain commodities were doubled, and on account of their being doubled the volume of their import cut in half, the revenue would be precisely the same as before, while the tax on these commodities would have been increased.

There is another school of political thought that holds that the revenues would be increased by reducing duties. The idea is that this would increase the volume of imports. Now, this is true, providing the volume of imports be increased sufficiently; but here again arises a problem the solution of which will not be viewed with kindly regard by the producers of our own land. The total value of our dutiable imports last year was $790,391,644, and on these we collected $333,230,126. Our average rate of duty on dutiable articles was a little over 42 per cent. Now, cut this in half. If the average rate were only a little over 21 per cent we would have to import $1,580,783,328 of dutiable goods to raise the sum we raised last year.

We imported last year $1,434,421,425 worth of goods, free and dutiable. With a tariff average only half as high as the present tariff, and with no change on the free list, we would have found it necessary to import $2,224,813,089 worth of merchandise in order to raise the same revenue, and we would have deprived American labor and American capital of the profit of making $790,391,664 worth of products that they made. Do we wish to do this? For one, I do not.

Take another view of it. We imported products to the value of $1,434,421,425 last year, but we exported goods to the value of $1,880,851,678, leaving a net balance of $446,429,653 in our favor. If to raise this revenue it had been necessary for us to have imported goods to the value of $2,224,813,089, the balance in our favor would have been wiped out and the balance would have been against us to the extent of $343,962,011. The prudent man does not buy more than his income warrants; neither should the prudent nation.

TARIFF SHOULD APPLY EQUITABLY.

I am for the tariff on many commodities instead of for the tariff only on a few. I favor the extension of the benefits of protection to all sections, to all States, to all Americans, instead of giving all protection to a few States or, worse still, to a few industries.

Undoubtedly the tariff should be removed from certain industries that no longer need federal encouragement—industries that are able to meet the commodities produced in foreign lands and compete with them. On the other hand, many industries of our country, some of which I have named, would be crushed were the foreign producer permitted the same freedom of our markets that is accorded the producer of our own land. In considering the question of readjusting our tariff schedules, let us remember this and let us not destroy the good in abolishing the bad and obsolete. Let every citizen of our country remember that the greatest prosperity and development have come to our industries and to our States and the most fruitful era to the laborers in mill and factory and farm during the years that the policy of protection has been the acknowledged policy of our Government.

POCAHONTAS MEMORIAL.

Mr. CHANEY. Mr. Speaker, I ask unanimous consent to have a memorial printed in the RECORD.

The SPEAKER pro tempore. The gentleman asks unanimous consent to print a petition in the RECORD. Is there objection?

Mr. MANN. I reserve the right to object. I would state to the gentleman that it has not been customary to print petitions in the RECORD.

Mr. CHANEY. This is a petition on the same matter that the gentleman from New York [Mr. OLCOTT] presented yesterday.

Mr. MANN. What is it about?

Mr. CHANEY. It relates to a proposed memorial to Pocahontas by the Daughters of the American Revolution.

Mr. MANN. I have no objection to that.

The petition is as follows:

To the House of Representatives, Washington, D. C.:

Whereas it has come to the knowledge of this, the Pocahontas Memorial Association, duly incorporated in the District of Columbia on the 7th day of September, 1906, that a petition, coming from an alleged association, denominating itself "The National Pocahontas Memorial Association," claiming to have its headquarters in the city of New York, was on the 18th day of February, 1909, presented to the House of Representatives of the United States, and printed in the CONGRESSIONAL RECORD of that date; and

Whereas said petition contained many statements which are utterly untrue and without foundation in fact, and grossly misleading, and was evidently prepared for the sole purpose of defeating the bill which had passed the Senate and was then pending before said House of Representatives, providing for an appropriation of $5,000 to aid this association in the erection of a monument to the Indian princess, Pocahontas, on Jamestown Island, Virginia; and

Whereas it is the sense and belief of this association that the true state of facts were at the time unknown to the honorable Member who presented said petition; and

Whereas this association, feeling that it is its duty to state the true facts to this honorable gentleman and Congress: Therefore be it

Resolved, That the following statement of facts, which are well known by this association to be true and capable of being substantiated, be transmitted to the honorable House of Representatives of the United States, and the officers of this association are hereby directed to at once transmit to said honorable body said statement of facts, accompanied by this preamble and resolution, together with expressions of deep and heartfelt appreciation of the encouragement which this association has received from said honorable body.

STATEMENT OF FACTS.

At the beginning attention is most respectfully called to the similarity of the names of the two organizations, the name of the protesting organization being "The National Pocahontas Memorial Association," and that of this organization being "The Pocahontas Memorial Association."

It is most earnestly contended that neither this, the Pocahontas Memorial Association, nor its officers, ever heard or knew of the "National Pocahontas Memorial Association" until after its protest was printed in the CONGRESSIONAL RECORD of February 18, 1909. That there was no such organization in existence at the time of the organization of this association is fully established by the correspondence referred to in said protest and other communications, all of which are submitted herewith, marked in the order of their respective dates as "Exhibits Nos. 1 to 12," inclusive.

It will be observed that of these communications five are letters written on the letter head of the "National Commemorative Association," including the one sent by the chairman of the executive committee of "the Pocahontas commemorative monument committee," which is claimed in said communications by the president and chairman to be a committee of said association, and that all the other communications except the one from the officers of the Jamestown Exposition Company, addressed to Miss Desha, are responses to those letters of the National Commemorative Association, which include the one referred to in the protest as coming from Miss Desha, and also re-

ferred to in said protest as having been addressed to the "national Pocahontas memorial committee." That this statement, that said letter was addressed to the National Pocahontas Memorial Association, is wholly untrue is shown by said Exhibits Nos. 5 and 6, which show that the letter was addressed to, and its receipt acknowledged by, the officers of the National Commemorative Association.

Thus it appears from these exhibits and said protest that the "National Pocahontas Memorial Association" has come into existence since said correspondence terminated on the 19th day of October, 1905, and must be the successor of the "National Commemorative Association," else it should explain by what means it came into the possession of, and by what authority it appropriates to its own use, the correspondence addressed to the latter association.

It also appears from the letter of the "National Commemorative Association" (Exhibit No. 8) that the organization of this association was admitted by said association as early as October 9, 1905, the following language being used in said letter:

"Will you kindly call a meeting of your association and have them act officially on the propositions made in our first letter to you. The best way might be for your body to pass resolutions agreeing to those propositions."

The following claim, made in the first section of said protest, that "the National Pocahontas Memorial Association was organized and actively working to erect a memorial to Pocahontas at least two years before the people who compose the committee which is asking for the passage of the above-mentioned bill ever thought of such project," is shown, it is most respectfully submitted, to be without foundation in fact by the above exhibits, and it is most earnestly and emphatically denied that the organization of this association in 1905, and its subsequent incorporation on the 7th day of September, 1906, was caused in whole or in part by a knowledge of the work or the publications of the National Pocahontas Memorial Association or its predecessor, the National Commemorative Association, but was begun and undertaken wholly and entirely by a spirit of disinterested patriotism, without any knowledge whatever of the existence or work of said organizations.

In section 2 of said protest the following statement is made:

"When the National Pocahontas Memorial Association learned that another smaller committee was being formed in Washington to erect a monument to Pocahontas, we immediately wrote to the persons in that city who were forming the committee apprising them of our larger and broader organization which already had been formed under the name of the National Pocahontas Memorial Association. * * *

"To this communication Miss Mary Desha, who was and is the person most interested in the Washington movement, replied * * * and stated 'We will cooperate with you in any manner you may suggest, either as a subcommittee or a coordinate branch.'" * * *

After further quotations from said letter, the following statement is made:

"To this the National Pocahontas Memorial Association replied that the tone of her letter and the action of her committee pleased us very much; that we accepted the cooperation of the committee which she represented, with pleasure."

A copy of said letter from Miss Desha, addressed to the president of the National Commemorative Association and not to the National Pocahontas Memorial Association, as claimed in said protest, is filed among said exhibits as No. 5, and the response thereto, bearing the names of the president of the National Commemorative Association and the chairman of the Pocahontas memorial monument committee thereon are among said exhibits, marked Nos. 7 and 8. From these exhibits it will appear that the letter from Miss Desha was addressed to the president of the National Commemorative Association and not to the National Pocahontas Memorial Association, and the responses thereto were from the officers of the National Commemorative Association and were written on the stationery of said association, and did not come from the National Pocahontas Memorial Association, as claimed in said protest.

It further appears from said Exhibit No. 11 that said correspondence and proposition from the National Commemorative Association was thoroughly considered and officially acted upon by this association on the 19th day of October, 1905, a formal resolution being unanimously adopted by this association upon said date and transmitted to the National Commemorative Association, to which, as shown by said Exhibits Nos. 11 and 12, no written response was ever made. Among other things contained in said resolution are the following, the work referred to therein being the erection of a monument to the Indian princess, Pocahontas, and the monument committee referred to therein being the executive committee of said National Commemorative Association, as shown by these exhibits: Therefore be it

Resolved, First. That it is the sense and desire of this association that the accomplishment of the above work be undertaken jointly by this association and the said monument committee, and that the two bodies become united or jointly associated together for this purpose along the lines suggested in said communication.

Second. The officers of this association are hereby requested and directed to make further investigations of the subject and to take the necessary preliminary steps for the perfection of such a union. They are requested to obtain from the National Memorial Association the following information and report thereon to this association at the earliest possible date: The nature of its organization; if it has been incorporated, and if so, a copy of its charter; a copy of its resolutions appointing said "Pocahontas memorial monument committee" and authorizing it to act; the nature and extent of the latter's plans and work and methods of raising money; a copy or sketch of the design of the monument which has been accepted; the terms and conditions of contract with the sculptor and architect, together with copies thereof, and such other information as the officers of this association may find advisable for the association to possess.

Fourth. The arrangement of further details of the said contemplated joint association or union and the final consummation thereof are left subject to the future action of this association.

To this resolution and the communication transmitting it no written response was ever received; but subsequent thereto a representative of the National Commemorative Association called, first, upon the legal counsel, who, being too busy to take the matter up, referred him to the secretary of the association, Miss Desha, who gathered from him in response to her questions, as shown by said Exhibit No. 12, that the "National Commemorative Association" had never been incorporated; that it had no funds; that it consisted of a lady, who was a sculptor, and her husband, who was to be the press agent of the proposed association; and that the people whose names appear on the letter head had nothing to do with the association, and that one of them, a very prominent woman, afterwards declared that she had nothing to do with it, and had never heard of it.

Thus it appears that when this association called on the National Commemorative Association, of which the "National Pocahontas Memorial Association" claims to be the worthy successor, to furnish data establishing the fact of its incorporation, method of raising money, general liability, nature and extent of its work, design of the monument which was represented to have been accepted, and copies of the contracts with the sculptor and architect, all of which was perfectly reasonable and absolutely essential for the perfecting of a working basis which would have been at all in keeping with the trust imposed upon this association through its subscriptions, no written response was ever made, and no such data ever furnished, which, with other information obtained by this association, led it to believe that said communications and propositions had come from an unreliable source, and that it would be unwise for this association to form any connection therewith.

The same statement, contained in section No. 3 of said protest, as to arrangements having been made for transporting the remains of Pocahontas to America, was made in said letters, Exhibits Nos. 1, 2, and 8, about four years ago, and to this date nothing further has been done, which is evidence of what the protesting association is accomplishing.

As to the statement contained in said protest that one of our members was the principal person interested in the work of this association, and had made the contract with the sculptor to erect a monument, and the further statement contained in the fourth section of said protest that the monument which this association proposes to erect is a small, inartistic, and really insignificant affair, the following statement from the report of the Committee on the Library to the House of Representatives, No. 1970, Sixtieth Congress, second session, is respectfully submitted:

"In concluding this report the Committee on the Library desires to emphasize the fact that every safeguard has been thrown around the appropriation of the money provided for in the Senate bill. * * *

"It may be further stated, with the view of eliminating any precedent, that the Pocahontas Memorial Association is a national and not a state organization, being incorporated under the laws of the District of Columbia September, 1906, and representing almost every State in the Union. Besides the Pocahontas Memorial Association, the Daughters of the American Revolution and very many of the patriotic men and women of the United States are interested in the erection of the monument.

"The monument is an heroic-sized bronze figure of the Indian maiden. * * *

"A prominent site on Jamestown Island, a knoll above the embankment and facing the James River, where the statue can be seen from every passing steamer, has been offered to and accepted by the Pocahontas Memorial Association. The statue when erected will be perpetually cared for by the Pocahontas Memorial Association, and it will receive as much attention from the care taker of Jamestown and will be quite as safe as though it were in one of our city parks."

All of which statements this association most emphatically asserts are true and can easily be substantiated.

The matter of the selection of an artist was gone into by the association with a great deal of care, and an artist of rare skill and ability was selected at a full meeting of the association, and he has produced a highly creditable and artistic statue, which was described in the May, 1907, issue of the International Studio by that eminent artist and critic of art, Robert Burns Wilson, of New York City, as follows:

"The statue is William Partridge's latest work and commemorates a particular incident in the life of Pocahontas. She is represented at the moment when she is about to speak the warning which saved the colonists from certain death and shaped the destinies of the new world of America. It is the instant of arrested motion. On her brow is the portent of her message; in her eyes the level look of daring; she holds her hands in the attitude of one appealing for silence and belief. It is a speaking figure and impresses one with the beauty and gentleness of that self-sacrificing spirit."

This granting of the site referred to above by the Association for the Preservation of Virginia Antiquities to this association is most important, as without such a grant it would not be possible for this or any other association to erect a statue on Jamestown Island.

In conclusion, the Pocahontas Memorial Association is prepared to show that its bona fide membership consists of 2,836, made up of the leading men and women and best people of the entire country and representing almost every State in the Union; that it has raised and paid to the sculptor about $4,450, through membership dues, by subscriptions, etc., and that no one connected with the association has ever received or expects to receive any compensation whatever for the services rendered; that its officers and a large number of its members have contributed of their means, and have devoted an immense amount of labor and work to the association, with no other hope of reward than that which comes from the discharge of a patriotic duty, and to express in some fitting manner that homage and sense of gratitude which should be freely bestowed by all Americans to the memory of that little Indian girl "who under God was the instrument to preserve the first permanent English colony from death, famine, and utter confusion," and whose spirit of unselfishness and devotion to the accomplishment of a great work, so fittingly actuated by high and noble motives, is most respectfully commended for its consideration and example to the protesting association.

Most respectfully submitted.

L. MCLAIN,
President Pocahontas Memorial Association.
MARY DESHA,
Secretary.

ENROLLED BILLS AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills and joint resolution:

H. R. 26072. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the civil war, and to widows and dependent relatives of such soldiers and sailors;

H. R. 27419. An act to repeal the act of June 29, 1906, granting a pension to Jackson Adkins;

H. R. 8734. An act for the relief of Niels P. Larsen;

H. R. 26305. An act making appropriations for the Post-Office Department for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 27363. An act to provide for improving the navigable capacity of the Sabine and Neches rivers, and the canal connecting the Sabine and Neches rivers with the mouth of Taylors Bayou;

H. R. 28104. An act to amend an act to authorize a bridge across the Missouri River at or near Council Bluffs, Iowa, approved February 1, 1908; and

H. J. Res. 257. Joint resolution to authorize the Secretary of State to invite the Governments of France and Great Britain to participate in the proposed tercentenary celebration of the discovery of Lake Champlain by Samuel de Champlain.

QUAPAW INDIAN AGENCY LANDS, OKLAHOMA.

Mr. SHERMAN. Mr. Speaker, I desire to present the conference report on the bill (H. R. 16743) for the removal of the restrictions on alienation of lands of allottees of the Quapaw Agency, Okla., and the sale of all tribal lands, school, agency, or other buildings on any of the reservations within the jurisdiction of such agency, and for other purposes, for printing under the rules.

The SPEAKER. Is the gentleman ready to dispose of it now?

Mr. SHERMAN. I am, Mr. Speaker. I present the following conference report and statement, and request unanimous consent that the statement be read in lieu of the report.

The SPEAKER. The gentleman presents the following conference report and asks unanimous consent that the statement be read in lieu of the report. Is there objection? [After a pause.] The Chair hears none.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 16743) for the removal of the restrictions on alienation of lands of allottees of the Quapaw Agency, Okla., and the sale of all tribal lands, school, agency, or other buildings on any of the reservations within the jurisdiction of such agency, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate, and agree to the same with an amendment as follows:

Strike out all after the enacting clause and insert the following:

"SEC. 1. That the Secretary of the Interior be, and he is hereby, authorized, upon application of any adult member of either of the tribes of Indians belonging to the Quapaw Indian Agency, in the State of Oklahoma, to remove the restrictions on any part of or all of the lands allotted to such applicant, and permit a sale under such terms and conditions as he may deem for the best interests of the applicant, excepting a tract of not less than forty acres, which shall be designated and held as a homestead: *Provided*, That this section does not apply to the Modocs.

"SEC. 2. That the Secretary of the Interior be, and he is hereby, authorized to sell all or any of the tribal lands within the jurisdiction of the Quapaw Agency, and all agency, school, or other government buildings on any reservation within the jurisdiction of said agency, at public auction or by sealed bids, under such regulations as he may prescribe; and he is hereby authorized to convey all lands so sold to the purchaser thereof by patents in fee. And all lands within such agency which have heretofore been reserved for agency, school, or other purposes shall, on approval of this act, revert to the tribe within whose reservation the lands are located and be sold as tribal lands as herein provided.

"SEC. 3. That after the sale of all such lands as provided herein, the net proceeds of such sale, together with all funds belonging to such tribes from whatever source derived, shall be apportioned and paid pro rata, under direction of the Secretary of the Interior, to the members of each of the respective tribes, in such manner as he shall prescribe.

"SEC. 4. That the Secretary of the Interior is hereby authorized and directed to issue patents in fee to all religious societies and organizations, severally, for the lands occupied by them within any of such reservations and heretofore reserved to such societies, as shown on approved schedules of allotments.

"SEC. 5. That the Secretary of the Interior be, and he is hereby, authorized and directed to restore to the rolls of the Klamath Agency, in Oregon, those Modoc Indians now enrolled at the Quapaw Agency, in Oklahoma, formerly Indian Territory, together with their descendants living at the date of the passage of this act, and that upon the removal of any of said Indians to the Klamath Reservation, in Oregon, they shall be allotted as other Indians on said reservation, and that upon the passage of this act they be accorded all the rights and privileges of other Indians enrolled at the Klamath Agency: *Provided*, That for the purposes of such removal the Secretary of the Interior be, and he is hereby, upon application of any allottee, authorized to sell, under such rules and regulations as he may prescribe, all lands inherited and otherwise heretofore allotted to the members of said tribe in Oklahoma, and he is authorized to issue a patent in fee simple to the purchaser or purchasers of said lands, and all restrictions as to the sale, incumbrance, and taxation of said land shall thereupon be removed."

"*Provided, further*, That if any member of the Modoc tribe of Indians prefers not to have his or her land sold, such allottee may lease his or her land in Oklahoma for a period of not to exceed five years, the parent or next of kin having the care and custody of any minor executing the lease for such minor."

And the Senate agree to the same.

J. S. SHERMAN,
THOMAS F. MARSHALL,
JNO. H. STEPHENS,
Managers on the part of the House.

MOSES E. CLAPP,
CHARLES CURTIS,
T. H. PAYNTER,
Managers on the part of the Senate.

The statement was read, as follows:

STATEMENT.

The bill as it passed the House in sections 1 and 2 provided that all of the members of the various tribes in the Quapaw Agency, save the Modocs, be authorized to sell or encumber all of their real estate except a homestead of 40 acres, and as for the Modocs, such authorization extended to all save 24 acres, and also provided that upon application of an individual Indian, where it seemed wise, the Secretary of the Interior was authorized to permit a sale of the homestead. It also provided for the parent or guardian of a minor to make a selection for the minor, and in case of failure so to do authorized the Secretary of the Interior to make the selection for the minor; and further provided that any sale or incumbrance made prior to sixty days after the passage of the act shall be absolutely void.

As agreed to in conference, the bill authorizes the Secretary of the Interior to remove the restrictions upon alienation upon all the land except 40 acres of any individual member of any of the above-named tribes, save the Modocs, where a case is made to the satisfaction of the Secretary that such action is for the best interests of the Indians.

Section 2 of the bill as agreed to in conference is section 3 of the bill as passed by the House, which authorizes the sale by the Secretary of the Interior of all tribal property belonging to any of the said tribes.

Section 3 of the bill, as agreed to in conference, is section 4 of the bill as it passed the House with a proviso. As agreed to, section 3 provides that the Secretary of the Interior, after the sale of all of the lands above referred to, shall pay the proceeds thereof, together with any money now in the Treasury belonging to any of said tribes, to the members thereof pro rata in such manner as the Secretary shall prescribe.

Section 4 of the bill, as agreed to in conference, authorizes the Secretary of the Interior to issue patents to all religious societies for the land now occupied by them within said reservation for religious purposes.

Section 5, as agreed to in conference, was not contained in the House bill, but was inserted by the Senate. This authorizes and directs the Secretary of the Interior to restore to the Klamath rolls in Oregon the Modoc Indians now enrolled at the Quapaw Agency in Oklahoma, and when the Indians have removed to the Klamath Agency in Oregon that they be allotted as other Indians are allotted at such agency, and authorizes the Secretary, where such removal has been made, and application is made for that purpose by the allottee, to sell the lands in Oklahoma allotted to such Indian, and restrictions are removed for that purpose. This section further provides that if any Modoc Indian prefers not to sell his lands in Oklahoma, he may have authority to lease said lands for a period not exceeding

five years, and that, where the lands are owned by a minor, the parent or legal representative of the minor can lease for him.

There are, all told, of these Indian tribes about 1,050 Indians, and they have on an average of about 200 acres of land each, including the allotted and the unallotted.

J. S. SHERMAN,
THOMAS F. MARSHALL,
JOHN H. STEPHENS,
Conferees on the part of the House.

Mr. SHERMAN. I move that the conference report be agreed to.

Mr. FINLEY. About how much land is held by religious societies in these tribes?

Mr. SHERMAN. I can not give the gentleman the total, but it is a small amount. It would be absolutely a guess, but I should say less than a thousand acres very considerably, and possibly less than 500 acres.

The conference report was agreed to.

ENROLLED BILLS SIGNED.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles; when the Speaker signed the same:

H. R. 27068. An act to extend the time for the completion of the Alaska Central Railway, and for other purposes;

H. R. 24149. An act granting to the Montana, Wyoming and Southern Railway Company a right of way across the Fort Keogh Military Reservation, Mont.;

H. R. 15939. An act authorizing the Secretary of Commerce and Labor to exchange property;

H. R. 25823. An act to amend an act entitled "An act to extend the time for the completion of the Valdez, Marshall Pass and Northern Railroad, and for other purposes," approved February 21, 1907;

H. R. 21896. An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes; and

H. J. Res. 231. Joint resolution authorizing the Director of the Census to collect and publish additional statistics.

SALE OF TIMBER ON ALLOTTED INDIAN LANDS.

The SPEAKER laid before the House the bill (S. 4548) to provide for the sale of timber on allotted Indian lands, and for other purposes, with House amendments disagreed to and a conference asked by the Senate.

Mr. SHERMAN. I move that the House insist on its amendments and agree to the conference requested by the Senate.

The motion was agreed to; and the Speaker appointed as conferees on the part of the House Mr. SHERMAN, Mr. MARSHALL, and Mr. STEPHENS of Texas.

VETO MESSAGE—POSTMASTER AT SANDBORN, IND.

The SPEAKER laid before the House the following message (H. Doc. No. 1492) from the President, which was read:

To the House of Representatives:

For the reasons stated in the attached communication from the Postmaster-General, I return without approval H. R. 19762, entitled "An act to reimburse the postmaster at Sandborn, Ind." The postmaster's actual loss was $358.90. By some mistake the payment authorized is $450.43, or an excess of $91.53. It appears that the loss was due to the carelessness of the postmaster, in any event, but even if this were not so, he should not be allowed $91.53 more than the actual loss sustained.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 26, 1909.*

Mr. LINDBERGH. I move that the message and accompanying bill be referred to the Committee on Claims and printed.

The motion was agreed to.

VETO MESSAGE—W. P. DUKES.

The Speaker also laid before the House the following message (H. Doc. No. 1490) from the President, which was read:

To the House of Representatives:

For the reasons stated in the attached communication from the Postmaster-General, I return without approval House bill No. 7157, entitled "An act for the relief of W. P. Dukes, postmaster at Rowesville, S. C."

This man has had burglary committed at his store, in which the post-office is located, four different times. Twice the department allowed his claim for reimbursement, on the first occasion the loss being so small that nothing was done about it. On the fourth occasion when, owing to his own carelessness and in spite of burglary having been committed three times already in his office, he was again so careless as to leave his stamps in frail drawers instead of putting them in a safety vault which was in the office, the department felt that it would be putting a premium upon a carelessness so gross as to cover possible connivance if they should reimburse the postmaster. I entirely agree with the department. When a man's post-office has been entered by burglars three times and he continues so careless as to neglect to take any proper precautions and not even to put the stamps into the safe or lock the safe, he has no equitable claim against the Government for the loss, and it is a mistake for the Government to reimburse him.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 26, 1909.*

Mr. LINDBERGH. Mr. Speaker, I move that the message and accompanying bill be referred to the Committee on Claims and printed.

The motion was agreed to.

NORTH AMERICAN CONSERVATION CONFERENCE.

The SPEAKER also laid before the House the following message from the President, which was read and, with the accompanying documents (S. Doc. No. 742), referred to the Committee on Expenditures in the Department of Agriculture and ordered to be printed.

To the Senate and House of Representatives:

I transmit herewith the declaration of principles adopted February 23, 1909, by the North American Conservation Conference. This conference, held in the city of Washington between representatives of the nations which occupy the continent of North America, will unquestionably, as the declaration recites, "result in mutual benefits and tend to draw still closer the bonds of existing good will, confidence, and respect." "Natural resources," the declaration proceeds, "are not confined by the boundary lines that separate nations. We agree that no nation acting alone can adequately conserve them, and we recommend the adoption of concurrent measures for conserving the material foundations of the welfare of all the nations concerned, and for ascertaining their location and extent." It is with sincere gratification that I acknowledge the prompt and courteous response of the governments to which the invitations for the conference, whose conclusions I transmit, was addressed, and the broad, statesmanlike, and productive attitude and action of the conference itself. It has not only performed with marked efficiency and entire unanimity the important duties which devolved upon it but it has suggested a still wider field of useful action. The declaration "suggests to the President of the United States of America that all nations should be invited to join together in conference on the subject of world resources, and their inventory, conservation, and wise utilization." I have deemed it my duty to welcome and act upon the far-seeing suggestion of the conference, and have accordingly addressed such an invitation to the nations of the world, in the confident belief that such a meeting will foster the interests of every nation, will injure those of none, and will confirm and strengthen in us all the belief that the good of each is likewise the common good of all.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 26, 1909.*

NAVAL ORGANIZATION.

The SPEAKER also laid before the House the following message (S. Doc. No. 740) from the President, which was read and referred to the Committee on Expenditures in the Navy Department and ordered to be printed:

To the Senate and House of Representatives:

On January 27, 1909, I addressed the following letter to Hon. William H. Moody, Hon. Alston G. Dayton, Hon. Paul Morton, Rear-Admiral S. B. Luce, U. S. Navy, retired; Rear-Admiral A. T. Mahan, U. S. Navy, retired; Rear-Admiral Robley D. Evans, U. S. Navy, retired; Rear-Admiral William M. Folger, U. S. Navy, retired; Rear-Admiral William S. Cowles, U. S. Navy, retired:

MY DEAR SIR: I have appointed you as a member of a commission to consider certain needs of the navy. The organization of the department is now not such as to bring the best results, and there is a failure to coordinate the work of the bureaus and to make the department serve the one end for which it was created; that is, the development and handling of a first-class fighting fleet. With this proposition in view I will ask you to consider:

1. All defects in the law under which the Navy Department is now organized, including especially the defects by which the authority of chiefs of bureaus is made in certain respects practically equal to that of the Secretary or the President.

2. The division of responsibility and consequent lack of coordination in the preparation for war and conduct of war.

3. The functions of certain bureaus, so as to see whether it is not possible to consolidate them.

4. The necessity of providing the Secretary of the Navy with military advisers, who are responsible to him for coordinating the work of the bureaus and for preparation for war.

5. The necessity for economical allotment and disbursement of appropriations and for a system which will secure strict accountability.

6. Finally; I want your views as to how best to recognize and emphasize the strictly military character of the navy, so that preparations for war shall be controlled under the Secretary by the military branch of the navy, which bears the responsibility for the successful conduct of war operations.

I wish to have the above subjects considered under two general heads:

First, as to the fundamental principles of an organization that will insure an efficient preparation for war in time of peace, a separate report under this head to be submitted at the earliest practicable date.

Second, specific recommendations as to the changes in the present organization that will accomplish this result, the report under this head to be submitted later.

In addition to the above reports I desire your recommendation as to the number, location, and general facilities of the navy-yards which are required by strategic considerations in time of war and for maintaining the fleet in constant readiness for war in time of peace.

Sincerely, yours,

THEODORE ROOSEVELT.

This commission has just submitted to me the two following preliminary reports, the first dealing with the general principles governing naval organization and the second suggesting the creation of a joint commission for the purposes therein set forth:

GENERAL PRINCIPLES GOVERNING NAVAL ORGANIZATION.

WASHINGTON, D. C., *February 20, 1909.*

1. The office of the Secretary of the Navy being executive in character, nothing should be admitted into an organization of the department which would qualify his authority or diminish his ultimate responsibility. He has been in the past, and in the future should be, a civilian. He is the representative of the President, the constitutional Commander in Chief of the Army and Navy, under whose direction his authority is exercised.

2. The duties in charge of the Secretary divide under two principal heads, closely related but generically distinct—civil and military.

The civil duties embrace the provision or preparation of all the material of war. This is the function of the present bureaus.

The military duties concern the use of that material, whether in war or in such exercises as conduce to fitness for operations of war. For the direction of these military duties no subordinate provision corresponding to the bureaus on the civil side exist in the present organization established by statute.

3. The discharge of both these classes of duty involves a multitude of activities, quite beyond the immediate personal knowledge and supervision of a single man. This necessitates a subdivision of the duties, by which means the supervision of the Secretary is exerted through the medium of responsible subordinates. In this subdivision the principle of undivided responsibility, within the appointed field of subordinate supervision, should obtain, as it does in the superior office of the Secretary.

The bureau system, as now established by law for the civil activities of the department, insures for each bureau this undivided responsibility, qualified only by the authority of the Secretary, which, if exerted, does not divide the responsibility, but transfers it to the Secretary himself. Independent authority, with undivided responsibility, though in principle proper, suffers historically from intrinsic inability to cooperate, where a number of such independent units are present. The marshals of the first Napoleon—especially in Spain—in the absence of the Emperor, offer a familiar illustration. The bureau system, as at present constituted by law, contains no remedy for this inherent defect.

4. The coordinating power is in the Secretary's authority; but, owing to the shortness of tenure in office and to the inevitable unfamiliarity with naval conditions with which an incumbent begins, authority, though adequate in principle, is not so in effect. This inadequacy consists in lack of personal familiarity with the subjects before him, not merely severally, but in their collective relations; in short, lack of specific knowledge and experience. The organization should provide him with such knowledge and experience, digested formally so as to facilitate his personal acquirement; in short, an advisory body, equipped not with advice merely, but with reasons. In order to avoid the interruptions of continuity attending each new administration, entailing the recurrent temporary unfamiliarity of each new Secretary, it is expedient that this advisory body be composed of several persons. But while this provision would insure the continuity which inheres in a corporate body—in this case continuity of knowledge and of progress—the principle of undivided responsibility would dictate that one only of them should be responsible for the advice given to the common superior, the Secretary.

5. As regards the composition of the advisory body, the principles to be regarded are two—*a*, the end dictates the means; *b*, responsibility must be individual, in advice as well as in executive action.

a. The end is efficiency for war. The agents in war are the military and naval officers. Their profession qualifies them best to pronounce upon the character of the preparations for war of every kind, including not only schemes of campaign and tactical systems but the classes, sizes, qualities, and armaments of ships of war.

What the Secretary needs specifically and above all, is a clear understanding and firm grasp of leading military considerations. Possessed of these, he may without great difficulty weigh the recommendations of his technical assistants, decide for himself, and depend upon them for technical execution of that which he approves.

However constituted in detail, the advisory body should be taken entirely from the class to which belongs the conduct of war and upon whom will fall, in war, the responsibility for the use of the instruments and for the results of the measures which they recommend.

b. As regards individual responsibility for advice, it is suggested that the Secretary of the Navy nominate to the President the officer whom he deems best fitted to command the great fleet in case of war arising; and that this officer, irrespective of his seniority, should be head of the advisory body. He alone should be the responsible adviser of the Secretary.

The provision of a responsible adviser does not compel the Secretary to accept his advice, nor prevent his consulting whomsoever else he will. The provision suggested does not limit the authority of the Secretary, but it does provide him with the weightiest and most instructed counsel, and it lays upon the prospective commander in chief the solemn charge that in all he recommends he is sowing for a future which he himself may have to reap.

An essential principle in the constitution of such an advisory body is that the majority of the members should be on the active list, and should go afloat at not infrequent intervals; and, specifically, the head of the body, the prospective commander in chief, should, during the summer months, take command of the concentrated battle-ship force for maneuvers, target firing, and practice of every kind. This will insure also his sustained familiarity with administrative routine of the fleet and other practical matters.

6. In the two principal classes into which the duties of the Secretary of the Navy divide, civil and military, as enunciated in section 2 above, the work "civil" corresponds largely to the activities known as "technical" and there is no reason apparent why the same principle of undivided immediate responsibility should not be realized in the Navy Department in two chief subordinates, responsible the one for military supervision, the other for technical supervision, and for all information and advice given to the Secretary under these two heads. It is, of course, apparent that a perfectly suitable Secretary may come to his office with as little previous knowledge of the kind called "technical" as he has of military; nay, he may be perfectly efficient and yet not acquire in his four years of office either the technical or military knowledge presumable in men whose lives have been given to the two professions. Under the most favorable conditions every superior must take decisions largely on advice, which means not accepting another's opinion blindly but accepting statements of facts and weighing reasons.

The principle of the Secretary's ultimate individual responsibility dictates that he be at liberty to consult as many advisers as he thinks necessary; but the principle of the individual responsibility of two chief advisers for the advice given tends to insure the most exhaustive consideration on the part of men selected for their special competency. Careful consideration with special competency gives the best guaranties for advice; and a Secretary overruling it would do so under the weightiest sense of personal responsibility.

As a matter of detail, but yet so broad in bearing as to amount to a principle, it may be noted that while the adjective "military" is somewhat narrow in application, "technical" is extensive in scope. Naval construction, ordnance, and steam engineering are all technical professions. The selection of a chief technical assistant to the Secretary might therefore be made from the recognized technical experts of the navy, under any of the three heads named, or a competent civilian engineer and naval architect may be appointed as Second Assistant Secretary of the Navy, under whom the four technical bureaus may be coordinated.

7. In conclusion, it should be distinctly laid down as a cardinal principle that no scheme of naval organization can possibly be effective which does not recognize that the requirement of war is the true standard of efficiency in an administrative military system; that success in war and victory in battle can be assured only by that constant preparedness and that superior fighting efficiency which logically result from placing the control and responsibility in time of peace upon the same individuals and the same agencies that must control in time of war. There should be no shock or change of method in expanding from a state of peace to a state of war. This is not militarism; it is a simple business principle based upon the fact that success in war is the only return the people and the Nation can get from the investment of many millions in the building and maintenance of a great navy.

WASHINGTON, D. C., *February 18, 1909.*

The PRESIDENT:

The commission on naval organization, appointed by executive communication dated January 27, 1908, begs leave to submit the following preliminary report on the "Needs of the navy," etc.:

The last clause of your letter of instructions reads as follows:

"In addition to the above reports I desire your recommendation as to the number, location, and general facilities of the navy-yards which are required by strategic considerations in time of war and for maintaining the fleet in constant readiness for war in time of peace."

The two subjects when taken together, the dispensing with unnecessary navy-yards and the provision for navy-yards which are required "by strategic considerations in time of war and for maintaining the fleet in constant readiness for war in time of peace," are questions of such gravity and demand so much careful study that it would be impracticable for the commission to bring in even a preliminary report of any value in the limited time available.

The determination of the location of navy-yards and naval bases being a question involving military and strategic considerations of the highest national importance, we venture to recommend that at the earliest practicable date this subject be referred to a joint commission of senior naval officers and officers of the United States Army, which will be instructed to report formally to the President.

In accordance with the last report of the commission on naval organization, I have appointed a joint commission of army and navy officers to report on the subjects named therein, the commission consisting of the following men:

Rear-Admiral A. T. Mahan, U. S. Navy, retired, chairman; Rear-Admiral Charles S. Sperry, U. S. Navy; Rear-Admiral Richard Wainwright, U. S. Navy; Capt. C. McR. Winslow, U. S. Navy; Maj. Gen. J. Franklin Bell, U. S. Army, Chief of Staff; Brig. Gen. W. W. Wotherspoon, U. S. Army, General Staff, president Army War College; Brig. Gen. W. L. Marshall, U. S. Army, Chief of Engineers.

The appointment of this commission is peculiarly appropriate in view of action already taken by the Joint Board of the Army and Navy, a board the existence of which has been of marked benefit to the two services. This board, after discussing questions relating to the mutual relations of the army and navy in defending harbors which were liable to be used by the navy for the establishment of navy-yards and naval stations, reached the conclusion that thereafter whenever the army was engaged in the preparation of plans for the defense of a harbor which

would be used by the navy, the project for defending the harbor should be submitted to the representatives of the navy on the joint board before final adoption, with a view to having the project accord with the necessities of the navy. On the other hand, whenever the navy was planning to locate a navy-yard or naval station which it would be the duty of the army in case of war to assist in defending, either by seacoast fortifications or land operations of the army, that the matter of the location of the navy-yard or naval station should be submitted to the representatives of the army on the joint board before final adoption, with the view to having the army opinion as to the necessities in relation to the defenses to be established.

I ask your very earnest consideration of the "general principles" laid down by the commission in the report herewith embodied. In their essence these principles amount to a declaration that the navy should be treated, not with a view to any special or local interest, but from the standpoint of the interest of the whole country, and that all other considerations should be subordinated to keeping it in the highest condition of military efficiency, for it must be prepared for war, or else it is useless, and it can not be prepared for war unless always in the highest state of military efficiency. The whole object of the organization of the Navy Department is to create machinery which will in time of peace prepare for war; and such, no less, is the whole object of the War Department. All the administration machinery of the two departments should be considered from this standpoint. The two Secretaries should be supreme; but they should have the best and most responsible military advice.

It would be impossible to overestimate the good that has come from the creation of such bodies as the General Staff of the Army, the General Board of the Navy, the Joint Board, the War Colleges of the two services, and the like. Without these bodies it would have been utterly impossible to bring either service to anywhere near its present standard of efficiency. Great good has come from the development of the system of maneuvers, alike in the navy and the army; the efficiency shown by the expeditionary force of the army which went to Cuba, the efficiency shown by the great battle fleet which has just returned from its extraordinary voyage around the world, are both matters upon which this Nation should heartily congratulate itself. Very much was done in securing a good organization of the army under the plan formulated by Secretary Root. The administrative organization of the navy needs an entire remodeling along the plan indicated in the document headed "General principles" embodied in this report; for this plan contains the principles of naval administration which have been observed by every great power which has ever made, or is now making, a success of naval administration.

If the commission is able to submit to me its final plan before the adjournment of Congress, I shall at once lay it before you. This plan will supplement and define the general principles laid down in the preliminary plan.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 25, 1909.*

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted:

To Mr. FLOYD, indefinitely, on account of serious illness in his family.

To Mr. ELLERBE, indefinitely, on account of sickness.

QUESTION OF PERSONAL PRIVILEGE.

Mr. COOK of Colorado. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. COOK of Colorado. I rise, Mr. Speaker, to a question of personal privilege.

The SPEAKER. The gentleman will state it.

Mr. COOK of Colorado. I will read a brief paragraph from an afternoon paper published in this city, which says:

COOK'S SPEECH NOW MAY BE EXPUNGED.

* * * * * * *

In explanation of his resolution, Mr. TAWNEY said that Representative COOK claimed time for the purpose of talking on the subject under consideration, but that as a matter of fact he had violated the privileges of debate by making an attack on the Chief Executive of the Nation, instead of talking about the sundry civil appropriation bill.

Mr. Speaker, I made no statement of that kind to the gentleman from Minnesota [Mr. TAWNEY]. I am not compelled to consult the gentleman from Minnesota as to what I have said or what I shall say as a Member of this House.

RECESS.

Mr. PAYNE. Mr. Speaker, I move that the House take a recess until 11 o'clock to-morrow morning.

The motion was agreed to.

Accordingly (at 10 o'clock and 33 minutes p. m.) the House took a recess until Saturday, February 27, 1909, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

A letter from the Acting Secretary of the Treasury, transmitting a list of the documents received and distributed during the year 1908 (H. Doc. No. 1483)—to the Committee on Printing and ordered to be printed.

A letter from the Secretary of War, transmitting, in response to the inquiry of the House, laws and ordinances of Porto Rico and military orders and decrees affecting Porto Rico (H. Doc. No. 1484)—to the Committee on Insular Affairs and ordered to be printed.

A letter from the Secretary of the Treasury, transmitting a copy of a letter from the Attorney-General submitting an estimate of appropriation for expenses of the supreme court of the District of Columbia (H. Doc. No. 1485)—to the Committee on Appropriations and ordered to be printed.

A letter from the Secretary of the Treasury, transmitting a copy of a letter from the Secretary of State submitting an estimate of appropriation for satisfying the terms of the assignment and transfer made by Panama to Colombia (H. Doc. No. 1486)—to the Committee on Appropriations and ordered to be printed.

A letter from the Secretary of the Interior, transmitting an estimate of appropriation for heating system at Carlisle Indian School (H. Doc. No. 1487)—to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. ROBINSON, from the Committee on the Public Lands, to which was referred the bill of the Senate (S. 8654) for the relief of certain occupants of unsurveyed public lands in Craighead County, Ark., reported the same without amendment, accompanied by a report (No. 2264), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. BURTON of Ohio, from the Committee on Rivers and Harbors, to which was referred the joint resolution of the House (H. J. Res. 262) extending the operation of an act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes, reported the same without amendment, accompanied by a report (No. 2265), which said bill and report were referred to the House Calendar.

Mr. PERKINS, from the Committee on Printing, to which was referred House resolution 524, reported in lieu thereof a joint resolution (H. J. Res. 263) to provide for the distribution by Members of the Sixtieth Congress of documents, reports, and other publications, accompanied by a report (No. 2272), which said joint resolution and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. DIXON, from the Committee on Invalid Pensions, to which was referred the bill of the Senate (S. 9454) granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and helpless and dependent relatives of such soldiers and sailors, reported the same without amendment, accompanied by a report (No. 2263), which said bill and report were referred to the Private Calendar.

Mr. WATKINS, from the Committee on Naval Affairs, to which was referred the bill of the House (H. R. 26924) for the relief of John A. Brown, reported the same with amendments, accompanied by a report (No. 2268), which said bill and report were referred to the Private Calendar.

Mr. LOUDENSLAGER, from the Committee on Pensions, to which was referred the bill of the Senate (S. 9421) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors, reported the same with amendments, accompanied by a report

(No. 2266), which said bill and report were referred to the Private Calendar.

Mr. RICHARDSON, from the Committee on Pensions, to which was referred the bill of the Senate (S. 9278) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain dependent relatives of such soldiers and sailors, reported the same with amendments, accompanied by a report (No. 2267), which said bill and report were referred to the Private Calendar.

ADVERSE REPORTS.

Under clause 2 of Rule XIII, adverse reports were delivered to the Clerk and laid on the table as follows:

Mr. PARKER, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 15580) to authorize the President of the United States to appoint John Gibbon captain and quartermaster in the army, reported the same adversely, accompanied by a report (No. 2262), which said bill and report were laid on the table.

Mr. PARSONS, from the Committee on Insular Affairs, to which was referred the bill of the House (H. R. 17427) to provide for the payment for certain property or vested rights of the old notaries public of Porto Rico acquired by them from the Crown of Spain for a money consideration, and of which properties said notaries were deprived by the act of the legislative assembly of Porto Rico of January 31, A. D. 1901, reported the same adversely, accompanied by a report (No. 2269), which said bill and report were laid on the table.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 28347) for the relief of J. Walter Duncan—Committee on the Post-Office and Post-Roads discharged, and referred to the Committee on Claims.

A bill (H. R. 28349) granting a pension to Alice Milliken Byerly—Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. EDWARDS of Georgia: A bill (H. R. 28353) to authorize the Secretary of War to donate two condemned brass or bronze cannons and cannon balls to the city of Hinesville, in the State of Georgia—to the Committee on Military Affairs.

Also, a bill (H. R. 28354) to authorize the Secretary of War to donate two condemned brass or bronze cannons and cannon balls to the city of Swainsboro, in the State of Georgia—to the Committee on Military Affairs.

Also, a bill (H. R. 28355) to authorize the Secretary of War to donate two condemned brass or bronze cannons and cannon balls to the city of Statesboro, in the State of Georgia—to the Committee on Military Affairs.

Also, a bill (H. R. 28356) to authorize the Secretary of War to donate two condemned brass or bronze cannons and cannon balls to the city of Savannah, in the State of Georgia—to the Committee on Military Affairs.

Also, a bill (H. R. 28357) to authorize the Secretary of War to donate two condemned brass or bronze cannons and cannon balls to the city of Springfield, in the State of Georgia—to the Committee on Military Affairs.

Also, a bill (H. R. 28358) to authorize the Secretary of War to donate two condemned brass or bronze cannons and cannon balls to the city of Millen, in the State of Georgia—to the Committee on Military Affairs.

Also, a bill (H. R. 28359) to authorize the Secretary of War to donate two condemned brass or bronze cannons and cannon balls to the city of Lyons, in the State of Georgia—to the Committee on Military Affairs.

Also, a bill (H. R. 28360) to authorize the Secretary of War to donate two condemned brass or bronze cannons and cannon balls to the city of Darien, in the State of Georgia—to the Committee on Military Affairs.

Also, a bill (H. R. 28361) to authorize the Secretary of War to donate two condemned brass or bronze cannons and cannon balls to the city of Reidsville, in the State of Georgia—to the Committee on Military Affairs.

Also, a bill (H. R. 28362) to authorize the Secretary of War to donate two condemned brass or bronze cannons and cannon balls to the city of Pembroke, in the State of Georgia—to the Committee on Military Affairs.

Also, a bill (H. R. 28363) to authorize the Secretary of War to donate two condemned brass or bronze cannons and cannon balls to the city of Sylvania, in the State of Georgia—to the Committee on Military Affairs.

By Mr. MALBY: Resolution (H. Res. 595) to pay to the cashier in the office of Sergeant-at-Arms of the House additional compensation—to the Committee on Accounts.

By Mr. BURNETT: Resolution (H. Res. 598) requesting the Secretary of Commerce and Labor to send to the House certain information—to the Committee on Immigration and Naturalization.

By Mr. GODWIN: Concurrent resolution (H. C. Res. 73) for a survey of Elizabeth River in Brunswick County, N. C.—to the Committee on Rivers and Harbors.

By Mr. SLAYDEN: Concurrent resolution (H. C. Res 74) to authorize and direct the Secretary of State to begin negotiations with the Republic of Mexico for a treaty to permit individuals and associations to divert the water of the Rio Grande for irrigation purposes—to the Committee on Foreign Affairs.

By Mr. FULLER: Memorial of the legislature of Wyoming, relative to creating forest reserves—to the Committee on the Public Lands.

By Mr. PRAY: Memorial of the legislature of Montana, in favor of the opening of the Crow Indian Reservation to settlement—to the Committee on Indian Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. COOPER of Wisconsin: A bill (H. R. 28364) granting a pension to Mary A. Platt—to the Committee on Invalid Pensions.

By Mr. GODWIN: A bill (H. R. 28365) for the relief of Morris Bretzfelder, of Wilmington, N. C.—to the Committee on Claims.

By Mr. GOULDEN: A bill (H. R. 28366) granting an increase of pension to W. H. Dayton, alias W. H. Stewart—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28367) for the relief of Alice Harvey, mother of George Harvey—to the Committee on Claims.

By Mr. HUFF: A bill (H. R. 28368) granting an increase of pension to Charles A. Geissenhainer—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28369) granting an increase of pension to Michael Kelley—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28370) granting an increase of pension to William Jellison—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28371) granting an increase of pension to John Thompson—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28372) granting an increase of pension to John W. Park—to the Committee on Invalid Pensions.

By Mr. OVERSTREET: A bill (H. R. 28373) for the relief of C. H. Webb, jr., administrator of the estate of David B. Sanders, deceased—to the Committee on War Claims.

By Mr. SPIGHT: A bill (H. R. 28374) for the relief of the heirs of Frances Pickle, deceased—to the Committee on War Claims.

By Mr. SULZER: A bill (H. R. 28375) granting an increase of pension to Benjamin F. Clayton—to the Committee on Invalid Pensions.

By Mr. ESCH: Resolution (H. Res. 596) granting additional compensation to Horace D. Norton, Treasury messenger in the office of Sergeant-at-Arms of the House—to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ANDRUS: Petition of New Rochelle (N. Y.) Lodge, No. 756, Benevolent and Protective Order of Elks, for reservation for the care of the American elk—to the Committee on the Public Lands.

By Mr. ASHBROOK: Petition of Camp 13056, Modern Woodmen of America, against any legislation tending to increase insurance rates of the Modern Woodmen of America—to the Committee on Interstate and Foreign Commerce.

By Mr. BANNON: Petition of Portsmouth Council, No. 38, Junior Order United American Mechanics, favoring an effective Asiatic exclusion law against all Asiatics excepting merchants, students, and travelers—to the Committee on Foreign Affairs.

Also, petition of John G. Turner and others, favoring a national highways commission—to the Committee on Agriculture.

By Mr. BARCHFELD: Memorial of the house of representatives of the State of Pennsylvania, for an appropriation to establish a bureau of mines—to the Committee on Mines and Mining.

Also, petition of the Wire Company, the American Steel Company, the Clyde Coal Company, and the Iron City Sand Company, all of Pittsburg, Pa., favoring the Dalzell bill (H. R. 28175), relative to construction of flues, boilers, etc.—to the Committee on the Merchant Marine and Fisheries.

Also, petition of Meadville (Pa.) Lodge, No. 29, Benevolent and Protective Order of Elks, for a reserve in Wyoming for the American Elk—to the Committee on the Public Lands.

Also, petition of the International Correspondence School, favoring the Davis bill (H. R. 24841), for promotion of industrial education—to the Committee on Agriculture.

Also, petition of A. M. Hawes, of Erie, Pa., representing large business interests, opposing parcels-post and postal savings bank legislation—to the Committee on the Post-Office and Post-Roads.

Also, petition of Applied Agricultural Organizations of Pennsylvania, favoring the Davis bill, and in favor of H. R. 21318, relating to fungicides—to the Committee on Interstate and Foreign Commerce.

Also, petition of Frenchtown Grange, favoring the McHenry bill (H. R. 12682), relative to safeguarding bank deposits—to the Committee on Banking and Currency.

By Mr. BENNET of New York: Paper to accompany bill for relief of Patrick Oates—to the Committee on Invalid Pensions.

By Mr. BURLEIGH: Petition of Northern Light Grange, favoring a parcels post and postal savings banks—to the Committee on the Post-Office and Post-Roads.

By Mr. FLOOD: Petition of Staunton (Va.) Lodge, No. 357, Benevolent and Protective Order of Elks, for a reserve in Wyoming for the American elk—to the Committee on the Public Lands.

By Mr. FORNES: Petition of the American Lithographic Company, of New York City, protesting against H. R. 28192 as to the exception "where in either case the subjects represented are located in a foreign country"—to the Committee on Patents.

By Mr. FULLER: Petition of H. H. Robinson and Charles E. Sheldon, of Rockford, Ill., against parcels-post and postal savings bank legislation—to the Committee on the Post-Office and Post-Roads.

By Mr. GOULDEN: Petition of the American Lithograph Company, of New York, protesting against H. R. 28192—to the Committee on Patents.

Also, memorial of the Louisiana Purchase Exposition, department of press and publicity, favoring the proposition before the Committee on Appropriations—to the Committee on Appropriations.

Also, memorial of the superintendent of weights and measures of New York State, favoring the Mann bill—to the Committee on Interstate and Foreign Commerce.

By Mr. HAMILTON of Michigan: Petition of citizens of Hastings, Mich., favoring the Davis bill (H. R. 24841), for promotion of technical education—to the Committee on Agriculture.

Also, petition of citizens of Berrien County, Mich., against passage of Senate bill 3940—to the Committee on the District of Columbia.

By Mr. HUBBARD of West Virginia: Petition of Wheeling and Clarksburg (W. Va.) lodges of Benevolent and Protective Order of Elks, for an American elk reservation in Wyoming (H. R. 21980)—to the Committee on the Public Lands.

By Mr. HUFF: Papers to accompany bills for relief of W. Scott King (H. R. 27449), Charles A. Geissenhainer, Michael Kelly, William Jellison, John Thompson, and John W. Park—to the Committee on Invalid Pensions.

By Mr. LAWRENCE: Petition of 102 citizens of Stockbridge, Mass., favoring enactment of the Davis bill (H. R. 24841), for promotion of industrial education—to the Committee on Agriculture.

By Mr. LINDSAY: Petition of State of New York superintendent of weights and measures, favoring the Mann bill, relative to marking the net contents of commodities, etc.—to the Committee on Interstate and Foreign Commerce.

Also, petition of the Public Library of the District of Columbia, favoring H. R. 11758—to the Committee on the District of Columbia.

Also, petition of the American Lithograph Company, against H. R. 28192—to the Committee on Patents.

Also, petition of Veteran Association of the Fifth New York Volunteer Infantry, favoring S. 1045, to protect Bull Run battlefield monuments—to the Committee on Military Affairs.

Also, petition of the American Lumberman, favoring a duty of $2 per thousand on certain kinds of lumber—to the Committee on Ways and Means.

Also, petition of the Louisiana Purchase Exposition committee on legislation, proposing a monument to Thomas Jefferson on the site of the St. Louis Exposition, to be built out of any surplus remaining in settlement of its affairs—to the Committee on Appropriations.

By Mr. McHENRY: Petition of citizens of Dushore, Pa., favoring parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

Also, petition of W. M. Eret and others, favoring enactment of H. R. 24841, for promotion of industrial education—to the Committee on Agriculture.

By Mr. NEEDHAM: Petition of the Rotary Club, of San Francisco, favoring legislation to restore and preserve the merchant marine of the Nation—to the Committee on the Merchant Marine and Fisheries.

By Mr. NORRIS: Petition of certain residents of Axtel, Nebr., against parcels-post and postal savings bank legislation—to the Committee on the Post-Office and Post-Roads.

Also, petition of the North Platte Valley Water Users' Association, favoring Senator Brown's amendment to the reclamation act—to the Committee on the Public Lands.

By Mr. OVERSTREET: Petition of the Fortnightly Literary Club and the Indiana State Federation of Clubs, of Greencastle, Ind., favoring H. R. 24148, for federal bureau for children—to the Committee on Expenditures in the Interior Department.

By Mr. RICHARDSON: Petition of General Federation of Women's Clubs, for the suppression of tuberculosis, as per H. R. 18445 and S. 5117—to the Committee on Appropriations.

By Mr. SABATH: Petition of board of directors of National Business League of America, against legislation to establish a national consular school—to the Committee on Foreign Affairs.

By Mr. SHERMAN: Petition of Utica (N. Y.) Lodge, Benevolent and Protective Order of Elks, for a reserve in Wyoming for the American elk—to the Committee on the Public Lands.

By Mr. SPERRY: Resolutions of the Connecticut branch of the Order of the King's Daughters and Sons, favoring the children's bureau bill—to the Committee on Expenditures in the Interior Department.

Also, resolutions of the Connecticut state board of agriculture, favoring a national highways commission—to the Committee on Agriculture.

Also, resolutions of the Girls' Friendly Society, of Connecticut, favoring the children's bureau bill—to the Committee on Expenditures in the Interior Department.

By Mr. SPIGHT: Paper to accompany bill for relief of heirs of Frances Pickle—to the Committee on War Claims.

By Mr. STEENERSON: Petition of Crookston (Minn.) Lodge, No. 342, Benevolent and Protective Order of Elks, favoring a reserve for the American elk—to the Committee on the Public Lands.

Also, petition of the Commercial Club of Warren, Minn., for a national highways commission and federal aid in construction of highways (H. R. 15837)—to the Committee on Agriculture.

Also, petitions of J. D. Henry and other residents of Hallock; W. E. Wilson and other residents of Maine; T. A. Tronson and others, of Shelby; D. S. Wemple and others, of Fergus Falls; and K. Hodne and others, of Karlstad, all in the State of Minnesota, against a duty on tea and coffee—to the Committee on Ways and Means.

Also, petition of the Beall & McGowan Company, of Fergus Falls, Minn., favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

By Mr. THOMAS of North Carolina: Memorial asking for appropriation for Shelton River, North Carolina—to the Committee on Rivers and Harbors.

By Mr. TOWNSEND: Petition of citizens of Wyandotte, Mich., against parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

By Mr. VREELAND: Petition of residents of Allentown, Bolivar, and Wellsville, N. Y., who are oil producers, against any change in the duty on crude oil—to the Committee on Ways and Means.

By Mr. WANGER: Petitions of Mrs. S. Burns Weston and 6 others, of Marion, Pa.; Mrs. Sarah W. Evans and 17 others, of King of Prussia, Pa.; Misses Alice and Emma Burr and 21 others, Mrs. Charles M. Vanderslice and 20 others, Mrs. Isabella T. Watson and 18 others, Mrs. Harry K. Cummings and 17 others, the New Century Club, and Miss Nellie M. Frazer and 17 others, all of Montgomery and Wilkes-Barre, Pa., in favor of

H. R. 18445, to investigate treatment of tuberculosis—to the Committee on Appropriations.

By Mr. WEISSE: Petition of Sheboygan (Wis.) Lodge, No. 290, Benevolent and Protective Order of Elks, for an American elk reservation in Wyoming—to the Committee on the Public Lands.

Also, petition of Mountain Lumber Manufacturers' Association, favoring a duty of $2 per thousand on certain kinds of lumber and 30 cents per thousand on shingles—to the Committee on Ways and Means.

By Mr. WHEELER: Petition of Greenville (Pa.) Lodge, No. 145, Benevolent and Protective Order of Elks, for an American elk reservation in Wyoming—to the Committee on the Public Lands.

SENATE.

SATURDAY, *February 27, 1909.*

The Senate met at 11 o'clock a. m.

The Chaplain, Rev. Edward E. Hale, offered the following prayer:

Behold, I come quickly; and my reward is with me, to give every man according as his work shall be.

Blessed are they that do His commandments, that they may have right to the tree of life, and may enter in through the gates into the city.

For we know that if our earthly house of this tabernacle were dissolved, we have a building of God, an house not made with hands, eternal in the heavens.

Let us pray.

Father, Thou hast taught us this by Thy word in all ages by Thy well-beloved Son. To-day we are to go back in memory to those who have served Thee here and are now serving Thee in the larger service of that other world.

O God, be with us when we interpret history. Be with us Thou, when we look into the future to see what our own duty may be in these days that are before us. Show Thy servants in the Congress, show all persons in authority in the Nation, what it is to serve the living God and to bring in Thy law for our law, Thy rule for our passion, Thy strength for our weakness, and Thy love to be with us always, that we may bear each other's burdens, that we may find the duty that comes next our hands, that we may enter into that service which is perfect freedom.

We ask it as Thine own children.

Our Father who art in heaven, hallowed be Thy name. Thy kingdom come, Thy will be done, on earth as it is in heaven. Give us this day our daily bread. Forgive us our trespasses as we forgive those who trespass against us. Lead us not into temptation, but deliver us from evil; for Thine is the kingdom, and the power, and the glory, forever. Amen.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. HALE, and by unanimous consent, the further reading was dispensed with.

The VICE-PRESIDENT. The Journal stands approved.

THE IMMIGRATION COMMISSION.

The VICE-PRESIDENT laid before the Senate a communication from the chairman of the Immigration Commission, transmitting, on behalf of the commission, a statement to Congress relative to the work and expenditures of the Immigration Commission created under section 39 of the immigration act of February 20, 1907 (H. Doc. No. 1489), which was referred to the Committee on Immigration and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives by Mr. W. J. Browning, its Chief Clerk, announced that the House had passed the following bills:

S. 9067. An act entitled "An act to grant pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and dependent relatives of said soldiers;"

S. 9422. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and helpless and dependent relatives of such soldiers and sailors; and

S. 9454. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and helpless and dependent relatives of such soldiers and sailors.

The message also announced that the House had passed the bill (S. 9242) granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to the widows and dependent and helpless relatives of such soldiers and sailors, with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 16743) for the removal of the restrictions on alienation of lands of allottees of the Quapaw Agency, Okla., and the sale of all tribal lands, school, agency, or other buildings on any of the reservations within the jurisdiction of such agency, and for other purposes.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 25392) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1910, and for other purposes.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26916) making appropriations for the current and contingent expenses of the Indian Department, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1910.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 27523) making appropriations for the diplomatic and consular service for the fiscal year ending June 30, 1910.

The message further announced that the House insists upon its amendment to the bill (S. 4548) to provide for the sale of timber on allotted Indian land, and for other purposes, disagreed to by the Senate, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. SHERMAN, Mr. MARSHALL, and Mr. STEPHENS of Texas managers at the conference on the part of the House.

The message also announced that the House had agreed to the report of the second committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26394) making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes, further insists upon its disagreement to the amendments of the Senate Nos. 58 and 59, asks a further conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. Foss, Mr. LOUDENSLAGER, and Mr. PADGETT managers at the conference on the part of the House.

The message further announced that the House further insists upon its disagreement to the amendments of the Senate to the bill (H. R. 27061) to provide for the appointment of an additional district judge in and for the western district of Washington, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. JENKINS, Mr. ALEXANDER of New York, and Mr. CLAYTON managers at the conference on the part of the House.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 28175. An act to amend section 4434 of the Revised Statutes of the United States, and for other purposes;

H. R. 28245. An act making appropriation for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes; and

H. R. 28285. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills and joint resolution, and they were thereupon signed by the Vice-President:

H. R. 12499. An act for the relief of Clarence Frederick Chapman, United States Navy;

H. R. 15939. An act authorizing the Secretary of Commerce and Labor to exchange property;

H. R. 21896. An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes;

H. R. 24149. An act granting to the Montana, Wyoming and Southern Railway Company a right of way across the Fort Keogh Military Reservation, Mont.;

H. R. 25823. An act to amend an act entitled "An act to extend the time for the completion of the Valdez, Marshall Pass and Northern Railroad, and for other purposes," approved February 21, 1907;

H. R. 27068. An act to extend the time for the completion of the Alaska Central Railway, and for other purposes; and

H. J. Res. 231. Joint resolution authorizing the Director of the Census to collect and publish additional statistics.

CREDENTIALS.

Mr. GAMBLE presented the credentials of COE I. CRAWFORD, chosen by the legislature of the State of South Dakota, a Senator from that State for the term beginning March 4, 1909, which were read and ordered to be filed.

PETITIONS AND MEMORIALS.

Mr. LODGE presented a petition of Local Lodge No. 886, Benevolent and Protective Order of Elks, of Brookline, Mass., and a petition of Local Lodge No. 1078, Benevolent and Protective Order of Elks, of Winthrop, Mass., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and protection of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

Mr. DEPEW presented a petition of the Veteran Association, Fifth New York Volunteer Infantry, Duryee Zouaves, of New York City, N. Y., praying for the enactment of legislation to protect the monuments already erected or that may be hereafter erected on the battlefield of Bull Run, Virginia, which was referred to the Committee on Military Affairs.

He also presented a petition of the faculty of the Rochester Athenæum and Mechanics' Institute, of Rochester, N. Y., praying for the passage of the so-called "Davis bill," relative to agricultural and industrial education, which was referred to the Committee on Agriculture and Forestry.

He also presented a petition of sundry citizens of New Paltz, N. Y., praying for the passage of the so-called "rural parcels post" and "postal savings banks" bills, which was referred to the Committee on Post-Offices and Post-Roads.

He also presented petitions of Local Lodge No. 346, of Niagara Falls; of Local Lodge No. 756, of New Rochelle, and of Local Lodge No. 33, of Utica, all of the Benevolent and Protective Order of Elks, in the State of New York, praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

He also presented petitions of the Charities Association of Schenectady, of the congregations of the St. Barnabas Episcopal and Presbyterian Churches, and of the Republican Club and sundry citizens, all of Irvington, in the State of New York, praying for the passage of the so-called "children's bureau bill," which were ordered to lie on the table.

Mr. LONG presented a petition of Local Lodge No. 204, Benevolent and Protective Order of Elks, of Topeka, Kans., and a petition of Local Lodge No. 633, Benevolent and Protective Order of Elks, of Emporia, Kans., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

Mr. WARREN presented a petition of Local Lodge No. 624, Benevolent and Protective Order of Elks, of Rock Springs, Wyo., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which was referred to the Committee on Forest Reservations and the Protection of Game.

Mr. OWEN presented a memorial of the Eastern Cherokee Nation of Indians, praying that an amount necessary be appropriated to pay the interest of the judgment rendered by the Court of Claims of $1,111,284.70, since May 14, 1906, up to the date of the disbursement fund, which was referred to the Committee on Appropriations.

Mr. SCOTT. I present the petition, in the nature of a telegram, of Earl A. Henry, state mine inspector, of Charleston, W. Va., relative to mine explosions. I move that the petition be printed in the RECORD and referred to the Committee on Mines and Mining.

There being no objection, the petition was referred to the Committee on Mines and Mining and ordered to be printed in the RECORD, as follows:

[Telegram.]

CHARLESTON, W. VA., *February 26, 1909.*

Hon. N. B. SCOTT,
Washington, D. C.:

The loss of life in West Virginia mines makes it imperative that the Federal Government make liberal appropriation for the continuance of the tests at Pittsburg.

EARL A. HENRY,
State Mine Inspector.

Mr. PLATT presented a petition of members of the faculty of the Home Economics of Mechanics' Institute, of Rochester, N. Y., praying for the passage of the so-called "Davis bill," relative to agricultural and industrial education, which was referred to the Committee on Agriculture and Forestry.

He also presented petitions of Local Lodge No. 756, of New Rochelle, and of Local Lodge No. 535, of White Plains, both of the Benevolent and Protective Order of Elks, in the State of New York, praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

He also presented a petition of the Veteran Association of the Fifth New York Volunteer Infantry, Duryee Zouaves, of New York City, N. Y., praying for the enactment of legislation providing for the protection of the monuments already erected and which may be erected upon the Bull Run battlefield, Virginia, which was referred to the Committee on Naval Affairs.

He also presented memorials of the United States Printing Company, of Brooklyn, N. Y., and of the American Lithographic Company, of New York City, N. Y., remonstrating against the adoption of certain proposed amendments to the copyright law relating to lithographic and photo-engraving processes, which were referred to the Committee on Patents.

He also presented a petition of Huguenot Grange, No. 1028, Patrons of Husbandry, of New Paltz, N. Y., praying for the passage of the so-called "rural parcels post" and "postal savings banks" bills, which was referred to the Committee on Post-Offices and Post-Roads.

He also presented the petition of R. C. Boardman, of New York City, N. Y., praying for the enactment of legislation for the control and regulation of the waters of Niagara River, and for the preservation of Niagara Falls, which was referred to the Committee on Commerce.

He also presented petitions of The National Temperance Society and Publication House, of New York City; of Revs. A. R. Mills, S. C. Farnham, and F. S. Weeks, of Wyoming; of Rev. Wesley Mason, of Dresden; and of Rev. Edward M. Cullinan, of Fayetteville, all in the State of New York, praying for the passage of the so-called "Burkett-Foelker antigambling race bill," which were referred to the Committee on the Judiciary.

He also presented the memorial of Seabury & Johnson, of New York City, N. Y., remonstrating against the adoption of certain proposed amendments to the act of January 5, 1905, entitled "An act to incorporate the American National Red Cross," which was referred to the Committee on the Judiciary.

He also presented petitions of members of the Irvington Republican Club, of Greenburg; of the congregation of St. Barnabas Episcopal Church, of Irvington; of sundry citizens of Irvington; of sundry citizens of Rochester; of members of the Schenectady Charities Association, of Schenectady, and of Frances J. Schriver, of New Brighton; of Local Order No. 895, of Tarrytown; of Local Order No. 149, of Irvington; of Local Order No. 649, of Dobbs Ferry, and of Local Order No. 1420, of Hastings, all of the Brotherhood of Carpenters and Joiners of America, in the State of New York, praying for the passage of the so-called "children's bureau" bill, which were ordered to lie on the table.

He also presented a petition of the New York State Canned Goods Packers' Association, of Rome, N. Y., praying for the adoption of the measure in the agricultural appropriation bill providing for the retention and reimbursement of the scientific referee board in connection with the Bureau of Chemistry, which was ordered to lie on the table.

NAVAL APPROPRIATION BILL.

Mr. HALE submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 26394) making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have agreed to recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 7 and 39.

That the House recede from its disagreement to the amendments of the Senate numbered 1 and 55, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In lieu of the proposed amendment insert the following: "unless, in case of minors, a certificate of birth or a verified written statement by the parents, or either of them, or in case of their death a verified written statement by the legal guardian, be first furnished to the recruiting officer, showing applicant to be of age required by naval regulations, which shall be presented with the application for enlistment;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment as follows: "In lieu of the proposed amendment insert the following: "extraordinary emergency;" and the Senate agree to the same.

On the amendments of the Senate numbered 58 and 59, the committee of conference have been unable to agree.

EUGENE HALE,
GEORGE C. PERKINS,
B. R. TILLMAN,
Managers on the part of the Senate.
GEORGE EDMUND FOSS,
H. C. LOUDENSLAGER,
L. P. PADGETT,
Managers on the part of the House.

The report was agreed to.

Mr. HALE. I move that the Senate further insist on its amendments in disagreement, and grant the further conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice-President appointed Mr. HALE, Mr. PERKINS, and Mr. TILLMAN conferees on the part of the Senate at the further conference.

REPORTS OF COMMITTEES.

Mr. SCOTT. I am directed by the Committee on Military Affairs, to whom was referred the bill (H. R. 28059) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910, and for other purposes, to report it with amendments, and I submit a report (No. 1103) thereon. I give notice that I shall call up the bill at the earliest day possible.

The VICE-PRESIDENT. The bill will be placed on the calendar.

Mr. CARTER, from the Committee on the District of Columbia, to whom was referred the bill (S. 9369) to amend an act entitled "An act for the widening of Benning road, and for other purposes," approved May 16, 1908, reported it without amendment, and submitted a report (No. 1104) thereon.

BILLS INTRODUCED.

Mr. MILTON introduced a bill (S. 9492) for the relief of Robert Broadbent, Barger Holst, James A. Dunham, Byron Dawley, Axel Rosendahl, and Will J. Elliott, which was read twice by its title and referred to the Committee on Claims.

Mr. MONEY introduced a bill (S. 9493) for the relief of the Cumberland Presbyterian Church of Shiloh, Issaquena County, Miss., which was read twice by its title and referred to the Committee on Claims.

Mr. OWEN introduced a bill (S. 9494) for the relief of Mary M. Kennedy, Esther A. Pierce, Alfred Jemison, King Pierce, John H. Pierce, C. S. York, Dwight Jemison, and others, which was read twice by its title and referred to the Committee on Claims.

Mr. GUGGENHEIM introduced a bill (S. 9495) granting an increase of pension to Betsy B. Simons, which was read twice by its title and, with the accompanying paper, referred to the Committee on Pensions.

He also introduced a bill (S. 9496) granting a pension to Jennie Simpson, which was read twice by its title and, with the accompanying paper, referred to the Committee on Pensions.

He also introduced a bill (S. 9497) granting an increase of pension to Hubert Steimel, which was read twice by its title and, with the accompanying papers, referred to the Committee on Pensions.

He also introduced a bill (S. 9498) granting an increase of pension to John S. Sanderson, which was read twice by its title and, with the accompanying papers, referred to the Committee on Pensions.

He also introduced a bill (S. 9499) granting an increase of pension to John Mather, which was read twice by its title and, with the accompanying paper, referred to the Committee on Pensions.

Mr. CLAPP introduced a bill (S. 9500) for the relief of James McGeary and others, which was read twice by its title and, with the accompanying papers, referred to the Committee on Claims.

Mr. CARTER (by request) introduced a bill (S. 9501) for the relief of Cyrus H. Abbott and others, which was read twice by its title and referred to the Committee on Claims.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. LODGE submitted an amendment providing that all contracts made on behalf of the United States for telephone-exchange service shall be in such form as may be approved by the Attorney-General, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations.

Mr. TALIAFERRO submitted an amendment proposing to appropriate $50,000 for a fish-cultural and biological station on the Gulf of Mexico in the State of Florida, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Fisheries.

He also submitted an amendment proposing to appropriate $25,000 for a fish cultural station on the St. John's River, Florida, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Fisheries.

He also submitted an amendment proposing to appropriate $4,000 to complete the post-office, court-house, and custom-house building at Jacksonville, Fla., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations.

Mr. DEPEW submitted an amendment providing for the payment of certain judgments against the collector of internal revenue of the United States for the first district of New York, etc., intended to be proposed by him to the sundry civil appropriation bill, which was ordered to be printed, and, with the accompanying papers, referred to the Committee on Appropriations.

Mr. MILTON submitted an amendment providing for the relinquishment and release to John M. Bryan, jr., of Dade County, Fla., the interest of the United States in and to certain lands situated in Dade County, Fla., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations, and ordered to be printed.

He also submitted an amendment proposing to appropriate $316.25 to pay C. M. Cox, of Bonifay, Holmes County, Fla., for services rendered as United States commissioner in and for the northern district of Florida, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. FORAKER submitted an amendment relative to the matters in dispute between the Roman Catholic Church in Porto Rico and the United States and the people of Porto Rico, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. BRANDEGEE submitted an amendment providing an additional compensation of 20 per cent of the annual salary of assistant clerks and messengers doing clerical work in the Senate, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate and ordered to be printed.

Mr. RAYNER submitted an amendment proposing to appropriate $72,000 for payment to the State of Maryland for the principal sum, without interest, advanced by Maryland to the United States under the provisions of a joint resolution of the general assembly of Maryland of December 19, 1791, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

HEARINGS BEFORE COMMITTEE ON TERRITORIES.

Mr. BEVERIDGE submitted the following resolution (S. Res. 309), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Territories, or any subcommittee thereof, be authorized to send for persons and papers and to administer oaths, employ a stenographer, and to report such hearings as may be had in connection with any subject which may be pending before said committee, and have said hearings printed for the use of the committee; that the committee may sit during sessions of the Senate, and that the expenses thereof be paid out of the contingent fund of the Senate.

REVISION OF PENAL CODE.

Mr. HEYBURN. I ask for the adoption of the following order.

The order was read, as follows:

Ordered, That the bill (S. 2982) to codify, revise, and amend the penal laws of the United States be reprinted for the use of the Senate so as to distinctly show the amendments made to said bill by the House of Representatives and the amendments made by the Senate.

Mr. HEYBURN. This is really to correct the entry in the record. I find yesterday that that portion of the order made was in some way omitted from the record. I should like to have this order to print made in connection with the report of the conference committee which was printed.

Mr. CLARKE of Arkansas. In connection with the request just made by the Senator from Idaho, I wish to ask him if that means that he is not going to call up the conference report for consideration to-day?

Mr. HEYBURN. I thought that would be dependent upon when to-day ends. It has been suggested that the adjournment taken at the end of the eulogies to-day may be for a later hour to-day, so that the recess can carry the Senate over to to-morrow. If that should occur, I would not like to have the RECORD show that I agreed not to call it up to-day.

Mr. CLARKE of Arkansas. It might be necessary for some of us to be absent on business connected with the Senate.

Mr. HEYBURN. That is the situation as I understand it.

Mr. CLARKE of Arkansas. Very well.

The VICE-PRESIDENT. Without objection, the order is agreed to.

INTERMARRIAGE OF WHITES AND NEGROES.

Mr. MILTON submitted the following resolution (S. Res. 306), which was read:

Resolved, That the Committee on the Judiciary be discharged from further consideration of the bill (S. 8462) prohibiting the intermarriage of any white person to a negro in the District of Columbia, or in any Territory of the United States, and making the issuance of such marriage, if any, incapable of inheritance, and describing the penalty for such intermarriage, and defining the word "negro," and further prescribing a penalty for any person performing such marriage ceremony.

Mr. MILTON. I give notice that I shall call up the resolution Monday next immediately after the routine morning business for the purpose of submitting a few remarks thereon.

The VICE-PRESIDENT. The resolution will lie on the table.

CONGRESSIONAL DIRECTORY.

Mr. MILTON submitted the following resolution (S. Res. 308), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Printing be, and hereby is, authorized to have prepared and published an edition of the Congressional Directory for the use of Congress at its forthcoming extra session, copies of which shall be laid on the desks of Members within one week from the assembling thereof. And the Secretary of the Senate is directed to pay from the contingent fund for compiling, editing, and indexing the said edition the compensation usually allowed.

IMMIGRATION REPORTS.

Mr. MILTON. I submit a resolution and ask unanimous consent for its present consideration.

The resolution (S. Res. 305) was read, as follows:

Resolved, That the Secretary of Commerce and Labor is hereby directed, in so far as compatible with public interest, to send forthwith to the Senate the reports of Marcus Braun on immigration conditions along the Mexican border; the last report of John Greenberg; the 1906 report of James B. Reynolds on conditions at Ellis Island; the report, memoranda, and other data on the Chinese boycott by the special commission, composed of J. B. Reynolds, J. W. Jenks, and R. M. Easley, appointed February 24, 1906; and that the same be printed as separate Senate documents.

Mr. PENROSE. I move that the resolution be referred to the Committee on Immigration.

The motion was agreed to.

INAUGURAL CEREMONIES.

Mr. KNOX submitted the following resolution (S. Res. 307), which was considered by unanimous consent and agreed to:

Resolved, That it is ordered that upon the 4th day of March, 1909, the doors of the Senate Chamber shall be opened to receive those who are entitled to admission as shown by the programme arranged for said day by the Joint Committee of Arrangements for the Inauguration of the President-elect of the United States, and that such persons shall be admitted without reference to order or precedence and shall take the seats assigned to them and to which they will be shown by those in attendance.

It is further ordered that after the organization of the Senate shall have been completed, those assembled in the Senate Chamber shall proceed to the platform on the center portico of the Capitol in the order specified in the programme on arrangements, which order will be announced by an officer of the Senate.

PRESIDENTIAL APPROVALS.

A message fom the President of the United States, by Mr. M. C. Latta, one of his secretaries, announced that the President had approved and signed the following joint resolutions:

On February 26, 1909:

S. R. 126. Joint resolution authorizing the Secretary of War to donate six condemned cannon to the city of Cheyenne, Wyo.

On February 27, 1909:

S. R. 80. Joint resolution to provide for an accounting of certain funds held in trust for the Chippewa Indians in Minnesota.

HOUSE BILLS REFERRED.

H. R. 28285. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors was read twice by its title and referred to the Committee on Pensions.

H. R. 28245. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

PENSIONS AND INCREASE OF PENSIONS.

The VICE-PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 9242) granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to the widows and dependent and helpless relatives of such soldiers and sailors, which was, on page 6, to strike out lines 14 to 15, inclusive.

Mr. McCUMBER. I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

BOILER INSPECTION.

The bill (H. R. 28175) to amend section 4434 of the Revised Statutes of the United States, and for other purposes, was read twice by its title and referred to the Committee on Commerce.

Mr. FRYE. The bill relates to the measurement of boilers and tubes?

The VICE-PRESIDENT. That is correct.

Mr. FRYE. I am authorized by the Committee on Commerce to report back the bill favorably and ask that it may take the place on the calendar of the Senate bill which I reported yesterday, and that Senate bill (S. 9455) to amend section 4434 of the Revised Statutes, and for other purposes, may be indefinitely postponed.

The VICE-PRESIDENT. Without objection, it is so ordered.

REPORT OF NAVAL REORGANIZATION COMMISSION.

The VICE-PRESIDENT laid before the Senate the following message from the President of the United States (S. Doc. No. 743), which was read and, with the accompanying paper, referred to the Committee on Naval Affairs and ordered to be printed:

To the Senate and House of Representatives:

I send you herewith the final report of the commission on naval reorganization, which outlines a new departmental system. Accompanying is the letter from Mr. Justice Moody, sent to me in transmitting the report. I have expressed to Justice Moody and his associates my profound sense of obligation for the admirable work they have done.

I invite your attention to the sound and conservative character of this report. It is in full accord with American policy, for it recognizes the complete supremacy of the civil power as regards the military no less than the civil or manufacturing side of naval administration. Nothing drastic is recommended as to the bureaus or other agencies by means of which the purely business affairs of the Navy Department are now administered. These are simply coordinated and brought under the general control of the Secretary in such manner as to secure unity of effort and action. The recommendation for the creation of the two councils, the Secretary's general council and his military council, are based upon the fundamental and all-essential proposition that a navy exists and ought only to exist for war, and for war alone; for the efficacy of the navy in securing and guaranteeing peace depends absolutely upon its evident efficiency for war. Preparation for war can only be thorough and complete if the Secretary has the same expert military assistance and the same advisers in time of peace as in time of war. The proposed plan has this object in view. It should be remembered that perfection of organization and training and perfect preparedness cost no more than slipshod inefficiency in so spending money as to disregard, or even prevent or impede, proper training and preparedness. The plan outlined does not imply any greater expenditure of money than at present. It provides merely that the money should be spent wisely, instead of as at present spending it so that a certain proportion is wasted in friction or in useless work. Training and preparation are essential elements of success in war. It is necessary to have the best ships and to have a sufficient number of them; but the number and character of ships will not necessarily bring victory. Efficiency in organization and personnel must be the main dependence in securing victory where there is even an approximate equality in material.

To supplement and finish the work of this commission another commission must eventually be designated to take up the proposed plan and complete it as to details; but no plan can be satisfactory if there is deviation from the essential military principles specified in this report. These principles are those which all sound naval experts have come to recognize as fundamental. I call your attention to the fact that the commission, whose conclusions I lay before you, was composed of five rear-

admirals, two ex-Secretaries of the Navy, and an ex-Member of the House of Representatives, who throughout his term of service in the House was one of the most able and resolute champions that the navy has ever had in Congress.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 27, 1909.*

RIVER AND HARBOR APPROPRIATION BILL.

Mr. FRYE. I ask that House bill 28243, the river and harbor bill, be taken up for consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 28243) to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes, which had been reported from the Committee on Commerce with amendments.

Mr. FRYE. I ask that the formal reading of the bill be dispensed with, that it be read for amendment, and that the committee amendments first receive consideration.

The VICE-PRESIDENT. The Senator from Maine asks unanimous consent that the formal reading of the bill be dispensed with, that the bill be read for amendment, and that the committee amendments be first considered. Is there objection? The Chair hears none, and it is so ordered. The Secretary will proceed to read the bill.

The Secretary proceeded to read the bill.

The first amendment of the Committee on Commerce was, in section 2, page 2, line 23, before the word "thousand," to strike out "five hundred" and insert "six hundred and fifty," and on page 3, line 8, after the word "navigation," to insert:

Provided, That to prevent the diversion of the waters of the Missouri River through Lake Contrary and other contiguous lakes, $150,000 of this appropriation, or so much thereof as may be necessary, shall be expended.

So as to make the section read:

SEC. 2. That for emergencies, to provide for the restoration of channels, or river and harbor improvements, heretofore established or improved by the Government where, by reason of emergency, the usual depth of such channel or customary use of such improvement can not be maintained, and there is no sufficient fund available for such restoration, the sum of $650,000 is hereby appropriated to be immediately available. The amount herein provided shall be allotted by the Secretary of War: *Provided*, That in no case shall such allotment be made unless recommended by the local engineer having such channel or improvement in charge and by the Chief of Engineers, respectively: *Provided further*, That no single channel or improvement shall be allotted a sum greater than $50,000, nor any portion of the said appropriation, unless the same is necessary in the interest of navigation or to protect and preserve existing government work in the interest of navigation: *Provided*, That to prevent the diversion of the waters of the Missouri River through Lake Contrary and other contiguous lakes, $150,000 of this appropriation, or so much thereof as may be necessary, shall be expended.

The amendment was agreed to.

The next amendment was, in section 3, page 6, after line 7, to insert:

Hingham Harbor, Massachusetts: The balance remaining from appropriations heretofore made for this improvement may be diverted and made available for redredging the channel and extending the same in a general westerly direction.

The amendment was agreed to.

The next amendment was, on page 6, after line 22, to insert:

Improving Minnesota River: That the annual appropriation for operating snag boats on the upper Mississippi River, made by section 7 of the river and harbor act of August 11, 1888, is hereby made available for similar purposes on the Minnesota River and other tributaries of the upper Mississippi River.

The amendment was agreed to.

The next amendment was, in section 4, page 8, after line 10, to insert:

For the purchase and acquisition of sites for locks "B" and "C" on the Cumberland River below Nashville, $10,000.

Mr. FRYE. I ask that the amendment be rejected.

The amendment was rejected.

Mr. FRYE. I move to insert the following at the end of the bill.

The SECRETARY. It is proposed to insert at the end of section 16:

That the sum of $10,000 be, and the same is hereby, appropriated for the purchase and acquisition of sites for locks "B" and "C" on the Cumberland River below Nashville.

The amendment was agreed to.

The next amendment was, in section 7, page 11, line 19, after the word "Speaker," to insert "In the event of a vacancy occurring in the commission such vacancy shall be filled by the same appointing power," so as to read:

SEC. 7. That a commission be, and is hereby, created, to be known as the National Waterways Commission, to be composed of Members of the Sixtieth Congress who shall be Members of the Sixty-first Congress as well, as follows: Five Members of the Senate, to be appointed by the presiding officer thereof; seven Members of the House of Representatives, to be appointed by the Speaker. In the event of a vacancy occurring in the commission such vacancy shall be filled by the same appointing power.

The amendment was agreed to.

The next amendment was, in section 7, in the item for the creation of the National Waterways Commission, on page 12, line 18, after the words "United States," strike out "or Europe" and insert "and elsewhere," so as to read:

The members of said commission or of any subcommission or subcommissions thereof, may make investigations of waterways and harbors in the United States and elsewhere, and shall be allowed actual necessary expenses for the same and the expenses of necessary employees.

Mr. CULLOM. I wish to know whether the chairman of the committee can admit an amendment carrying about $100,000 for the purpose of making an opening underneath the canal known commonly as the "Hennepin Canal," for the purpose of preventing a flood tide upon a railroad crossing.

Mr. FRYE. It will be impossible for me to admit it to this bill. It will have to be done under the regular river and harbor bill.

Mr. CULLOM. I made the inquiry at this time for the reason that my colleague [Mr. HOPKINS], who has been absent, as the Senator knows, for some little time, had been written to, and it was not called to my attention until to-day. I desired to get the amendment made if I could. If it is contrary to the policy to amend the bill in that respect, I will withdraw any effort to do so.

Mr. FRYE. It is.

The amendment was agreed to.

The reading was continued to line 19, page 13.

Mr. FRYE. On page 13, line 19, I move to strike out the words "said dams" and to insert "dam across the South Branch," so as to read:

SEC. 8. That section 3 of "An act permitting the building of dams across the North and South branches of Rock River, adjacent to Vandruffs Island and Carrs Island, and across the cut-off between said islands, in Rock Island County, Ill., in aid of navigation and for the development of water power," approved May 1, 1906, be, and the same is hereby, amended by extending the time for the completion of dam across the South Branch to May 1, 1911.

The amendment was ageed to.

The reading was continued to line 20, page 15.

Mr. BACON. Mr. President, I do not wish to interfere with the orderly procedure. I understand the rule to be that the committee amendments shall be first disposed of. I presume it would be understood that, even if one did not offer an amendment, it would be in order to ask for an explanation of any section as it came from the House.

Mr. FRYE. Undoubtedly.

Mr. BACON. Some things might not be readily understood and might require some explanation. I do not wish to interrupt the proceeding now to do that. I only wish to make the suggestion to prevent any misunderstanding. There are some things being passed over in regard to which I should like to have some explanation from the chairman, but I will not now interrupt the reading for that purpose.

The reading of the bill was continued to line 6, on page 19.

Mr. FRYE. I move to strike out lines 1, 2, 3, 4, 5, and 6, on page 19, in the following words:

The Secretary of War is further authorized and instructed to cause to be made a preliminary examination and survey to ascertain and determine a proper plan and the probable expense for constructing in the rapids of the St. Marys River a filling basin or fore bay, from which the ship locks shall be filled.

The amendment was agreed to.

Mr. FRYE. I offer the following amendment, to come in immediately after the paragraph just stricken out.

The SECRETARY. At the top of page 19 it is proposed to insert:

SEC. 12. That the Secretary of War is hereby authorized, in his discretion, to permit any corporation or association of persons in King County, Wash., at their own expense and without cost to the United States Government, to widen, deepen, and straighten the Duwamish River, in said King County: *Provided*, That the work so done shall be in accordance with plans approved by the Chief of Engineers of the War Department.

The amendment was agreed to.

The next amendment was, on page 20, line 11, after the word "Michigan," to strike out "any Canadian waters which shall be compensated for by controlling or remedial works located on the Canadian side of the international boundary line," so as to make the additional proviso read:

Provided further, That nothing herein contained shall affect or impair the rights of the Michigan-Lake Superior Power Company, as they existed prior to the passage of this act, under the conditions heretofore prescribed by Congress, to divert from the said St. Marys River into its power canal, located south of the rapids, in the State of Michigan.

Mr. FRYE. In line 9, after the word "divert," I move to insert the word "water."

The amendment to the amendment was agreed to.

Mr. BACON. I will not ask the Senator to reply now unless he desires to do so, but I call attention to the fact that there

is a very grave question in my mind whether we have the power—of course the Senators from Michigan are those who are most directly interested—to embody in the bill a provision which asserts the right of the United States to lease the water power of a river belonging to a State. I think it is a very grave question, and I do not believe there is any such power in the Federal Government.

Mr. FRYE. I question whether there is power in the Government to do it where the Government authorizes the erection of a dam across a river by a private party or corporation, but this is only the erection by the Government of its own dam.

Mr. BACON. That does not change the proposition, Mr. President. Of course I do not intend to press it. Both the Senators from Michigan are here. I will only say the time may come when it will relate to some other State, and, so far as I am concerned, I protest now, and I shall always protest against it.

I shall not make any special fight on this provision, because the Senators from Michigan are the best judges of what is for the interest of their own State, but I would not be willing to pass in silence a proposition of that kind, even though it related to a State in which I have no direct interest. I do not think that the Federal Government has any control over waters within a State, except for the purposes of navigation, and the fact that it makes a dam for the purpose of improving navigation does *not in* anywise give it any property in the water power of that State. It belongs to the State; it belongs to the individuals of the State who own the land to the thread of the stream.

Mr. FRYE. That matter has been a good deal discussed in both committees, and the conclusion reached in both was that the Government has the right to do what is approved of in this bill.

Mr. BACON. It may have been reached by the committee, but I think it is a very grave matter for the Senate to reach that conclusion.

Mr. TELLER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Maine yield to the Senator from Colorado?

Mr. FRYE. Certainly.

Mr. TELLER. Mr. President, I do not care at this time to go into any general discussion of this question. The Supreme Court of the United States has said on certain occasions that the Government of the United States does not have the power to build a dam across a river unless it is to further the interests of navigation. So the Government can not build a dam across a river for water power; that is certain; and that the State owns the water can not be doubted.

I have heretofore cited a large number of cases, and I could cite at least a dozen more and two or three that the courts have decided since the Two hundred and ninth United States Reports. There are two cases that affirm the doctrine unequivocally that the State owns the water, and the Government of the United States has not any right to interfere with it and can not convey any interest in it in any possible shape. A contract made by the Government of the United States unauthorized by the Constitution is a nullity. It was so declared in 1845 by the Supreme Court of the United States. That is a fundamental principle that everybody might have understood, but the court went into it and decided it in the case I called attention to yesterday on another point.

I do not like to see in these bills an open, palpable contradiction on the part of the Senate and House of what everybody knows the courts have decided many times for at least seventy-five or eighty years. If the Government wants to do anything of this kind for any purpose except for navigation, it is utterly without the power to do it. Why should the Government of the United States enter into the question of leasing water or leasing rights on a river?

Mr. President, I will not take the time to discuss it; I presume the Senators from Michigan will have something to say on the subject; but I want to enter my protest against it as bad legislation, as undignified legislation, that ought not to be allowed here.

I want to say that I am not a bit alarmed about the power of Congress to take away from the State any power it has. The Supreme Court has declared that it could not deprive a State of its power under the Constitution, not even with the consent of the State.

Mr. NELSON. Mr. President, I agree with the legal proposition announced by the Senator from Colorado in the main, but in this case the provision relates to the St. Marys River, flowing between Lake Superior and the lower lakes. The river passes over a succession of rapids at this point. The Government, a good many years ago, constructed a canal on the south side of the river, and in that canal there are two locks. Ships can only pass up and down from the upper lakes to the lower lakes by going through this canal. It is essential for the Government to build an additional canal and two more locks on account of the commerce of that country.

A preceding section of the bill proposes to condemn all the riparian land between the canal and the international boundary line. If that condemnation takes place, as provided in the bill, the United States becomes the riparian owner to the middle of the channel or wherever the international boundary may be. In a recent case that has been decided in the Supreme Court here from Michigan, involving this very question, the Supreme Court held that under the laws of Michigan, as interpreted by their supreme court, the right is in the riparian owner and not in the State.

In some cases they hold it is in the State, but here they held that it is in the riparian owner, subject to the public use. If these condemnation proceedings are carried on and the United States becomes the owner up to the middle of the stream or the boundary line, it becomes the riparian owner and ought to be in the position of any other riparian owner. You must construe this paragraph of the law in reference to that.

The canal company that is referred to was given a right to take water out of the lake above the head of the rapids and above the head of the government canal and above the head of the locks. The river and harbor act of 1903 authorized the Lake Superior Canal Company to draw water through that canal from the lock above. This simply leaves that legislation as it is. It does not affect it one way or another. The Government proposes to get control of the whole bed of the river there by condemnation proceedings for the purposes of improving the navigation, and in aid of that, as an incident, is constructing work there at the head of the rapids to improve the navigation. The power is in the Government as riparian owner, and as the constructor of that power it ought to have the right to control the water That is substantially and briefly the situation.

Mr. TELLER. The statement made by the Senator from Minnesota does not change the law. The United States Government condemns the land simply as a proprietor. It owns land only as a proprietor. If it wants a fort or a post-office site, it has to get a concession from the State to have any more jurisdiction over it than it has over other lands held by private individuals.

The State has absolute control over the question of riparian rights. The Supreme Court, in the case of Kansas *v.* Colorado, decided that question fully. It had been decided several years before. It is in the power of the State of Michigan to say to-morrow, and after we have made this contract, that the riparian right ceases or shall be exercised under certain restrictions of the State. Those decisions are ample and abundant. I think there will not be any impropriety on my part if I say that the committee ought to have considered this question with a view to what the courts and the Michigan authorities might do in the future. They can say whether it is the Government that holds the land or individuals. They can say that the old doctrine of riparian rights shall be abandoned.

Mr. President, I think this is a great blotch upon this bill. I will be glad to vote for it, I think, in the main, but I am certainly not going to vote for a proposition of this kind. I do not think it is to our credit to put in the bill provisions that are in plain contradiction to the determination of the courts of the country, and that, too, the superior court, the court that passes upon these constitutional questions.

Mr. CLARKE of Arkansas. Mr. President——

Mr. FRYE. The unanimous consent was that the committee amendments should first be disposed of. If any Senator proposes to strike out, after the committee amendments have been disposed of, then this discussion would be legitimate, but I do not understand that it is, right here at this point.

Mr. TELLER. It is legitimate on an amendment that proposes to do a thing that you can not do under the Constitution, or at least I think you can not.

Mr. FRYE. No such amendment has yet been reported.

Mr. TELLER. Are we not upon the amendment on the question of water?

Mr. FRYE. We are on the condemnation part of the provision, but the amendment has not been reached authorizing the leasing of the power.

Mr. BACON. It all relates to the same subject-matter.

Mr. CLARKE of Arkansas. I want to say a word in relation to the action of the committee.

Mr. TELLER. The provision for condemnation is general legislation, and I raise the point of order on it.

Mr. FRYE. You can not do it, because it comes from the House of Representatives, and no point of order can be made against it.

Mr. TELLER. That part is in the bill as passed by the House.

Mr. FRYE. That part is in the bill as passed by the House.

Mr. TELLER. That is correct, I think, but we can strike it out.

The VICE-PRESIDENT. Does the Senator from Maine yield to the Senator from Arkansas?

Mr. FRYE. With pleasure.

Mr. CLARKE of Arkansas. Mr. President, the point raised by the Senator from Colorado [Mr. TELLER] had not escaped the attention of the committee in the consideration of that particular provision of the bill. I believe it was the unanimous opinion of the committee, so far as occasion arose for its expression, that the doctrine announced by the Senator from Colorado was the correct one; but the facts in this case distinguish it, making it necessary to apply an entirely different doctrine. Wherever the common law prevails the bed of nonnavigable bodies of water is in the ownership of the adjacent proprietor. This particular stream, which connects this particular body of water, was never navigable until made so by artificial means, by the expenditure of money and the employment of engineering facilities.

The land either passed to the State of Michigan under the swamp and overflowed land grant of 1850 or it remained in the United States Government and was disposed of and passed to private owners.

So the United States Government owns only so much water or the right to flow water over so much land as has been acquired by the usual means of negotiation or by condemnation. It was thought that that particular state of facts did not raise squarely the question as to whether the United States Government had any right in connection with streams except the right to provide for their unobstructed navigation, because of the fact that this did not present the question which has been raised by the veto message of the President of the United States in the St. James River case. We concluded to let it pass because it presented a question in which the State of Michigan was more directly interested than the United States Government or any other proprietor.

When the question stated by the Senator from Colorado is squarely raised, I think I shall be compelled to agree with him unless I have some reason for concluding that my present estimate of the authority is not a correct one. It seems to me self-evident that it grows out of the very nature of the Government and the very character of ownership that has always obtained to the bed of navigable streams.

Mr. FRYE. On page 20, line 11, after the word "Michigan," in lieu of the language proposed to be stricken out, I move to insert the following:

Under such rules and regulations as shall be from time to time prescribed by the Secretary of War.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. SMITH of Michigan. Mr. President, in view of the statement of the Senator from Georgia [Mr. BACON] with reference to this particular section of the bill, and also the statement of the Senator from Colorado [Mr. TELLER], I feel that I ought to explain my attitude upon this proposition.

In the first place, the practical question presented to the Senate is the question of insuring the navigability of the waters of the St. Marys River. Upon that question, which is a practical one for engineers and not a legal one, the House has taken action.

Mr. BACON. If the Senator will pardon me, I think that is a legal question, but I do not think there is any doubt about what should be done with the question.

Mr. SMITH of Michigan. I do not think the Senator understands me.

Mr. BACON. The Government, of course, has a right to make the stream navigable.

Mr. SMITH of Michigan. The first question that arises is the necessity for the taking. Upon the question of necessity, I think the courts have uniformly held that an authorization by Congress establishes the question of necessity.

This is a narrow stream, and it is not and never has been navigable. The construction of canals or locks are essential to navigation. It is held by the engineering department of the Government that they need additional land for the construction of new locks.

Mr. TELLER. I should like to suggest to the Senator from Michigan the government engineers do not agree on that.

Mr. SMITH of Michigan. It seems to me unnecessary to acquire all this land for additional locks. But upon that question, which I think is purely one of fact, I do not wish to interpose my objection, although upon the question of the right of the Government to acquire this river to the international boundary for purposes of navigation there may be an honest difference of opinion.

Personally I do not think we need the land or the water lying between the present locks and the international boundary for purposes of navigation, but the contention of the Government is that we will need it in the future, and it asks a free hand. If they need it, they can take it under the power of condemnation. The question of necessity being a question of fact, I am not disposed to quarrel with the engineering department of the Government as to its needs; but I would not have the Senator from Georgia [Mr. BACON] or the Senator from Colorado [Mr. TELLER] or any other Senator imagine for a moment that I believe that the Federal Government has the constitutional power to acquire this river for the purpose of vending the water power——

Mr. BACON. That is exactly the point. I want to ask the Senator if the provision on page 19, beginning at line 14, does not undertake to do that very thing.

Mr. SMITH of Michigan. I am quite willing to pass the constitutional question up to the courts to decide, but I do not by so doing change my opinion at all. I believe that the law is well established that, wherever water power is an incident to navigation, it may be sold, and wherever the question of water power is paramount it is in direct conflict with the Constitution. The power is not given to the Federal Government to exploit water power as a commercial enterprise.

Mr. BACON. Now, if the Senator will pardon me, I will give him an illustration.

The VICE-PRESIDENT. Does the Senator from Michigan yield to the Senator from Georgia?

Mr. SMITH of Michigan. Certainly.

Mr. BACON. I will take the Coosa River, in Alabama, which rises in Georgia and flows into Alabama, upon which the Government has constructed certain locks for the purpose of putting the river in a condition where it can be navigated. Of course, in the construction of those locks the Government has had to build dams; and the water power, which is thus created or made available, is on territory belonging to the government of the State of Alabama—private owners, riparian owners. I want to ask if I understand the Senator correctly to say that in such a case as that the Government of the United States would own that water power and have the right to lease it?

That I understand to be the contention of the President of the United States in several messages which he has sent to this body, and I think he has gone so far as to veto a bill because that right was not recognized. I can not now name the bill, but I think the President has done so.

Mr. SMITH of Michigan. Mr. President, the riparian owner can not be divested of his water right.

Mr. BACON. If the Senator will pardon me a moment, if that is the Senator's proposition, I should like very much for the Senator to point to the adjudication which he says would establish that proposition.

Mr. SMITH of Michigan. I want the Senator from Georgia to understand me. In a navigable stream, where the Government has the paramount right to navigate and control the navigation——

Mr. BACON. The Government never has the paramount right to navigate.

Mr. SMITH of Michigan. It has the paramount right to navigate——

Mr. BACON. To navigate?

Mr. SMITH of Michigan. To navigation.

Mr. BACON. Well, no.

Mr. SMITH of Michigan. Yes.

Mr. BACON. I beg the Senator's pardon.

Mr. SMITH of Michigan. It has the paramount right to navigation.

Mr. BACON. No.

Mr. SMITH of Michigan. To regulate navigation?

Mr. BACON. Ah! it has the power to control it, but not the power to navigate.

Mr. SMITH of Michigan. To control it.

Mr. BACON. Of regulation.

Mr. SMITH of Michigan. Wherever the necessities of navigation are such that the Government is obliged to acquire the riparian land, as is the case at Sault Ste. Marie, and as such riparian proprietor is obliged in the interest of commerce to build locks and dams and water power is developed or acquired, the right to dispose of the same to best advantage must exist.

I do not want to be misunderstood at all, neither do I wish my position to be at all contradictory. I do not believe that the necessities of navigation require the taking of this stream to the international boundary; but if it is to be taken, and the

necessity established, then I want the communities affected to have the benefit of the water power either through the Government or through private enterprise, and I have proposed an amendment making it mandatory upon the Government as a riparian proprietor to develop that water power for the benefit of the communities affected thereby.

Now, does the Senator from Georgia recognize the distinction I make?

Mr. BACON. That is rather a narrow distinction. I do not recognize the correctness of the Senator's logic and reasoning.

Mr. SMITH of Michigan. If the Senator recognizes the distinction, I will not dwell upon it further.

Mr. BACON. Yes.

Mr. SMITH of Michigan. I want my view to square with the legal rule and the constitutional situation. I have great pride in the Government's position. The St. Marys River is an important strait connecting Lake Superior with Lake Michigan. If the Government acquires this property in the interest of navigation, I want the water power, second only to Niagara, to be developed for the benefit of the communities bordering that stream.

I have no special quarrel with the Government's desire to acquire this land; I do not think it is necessary for purposes of navigation; but if the Government thinks it is necessary, I am not going to quarrel with them about it. I do insist, however, that the proviso at the end of page 20, from line 18 to line 3 on page 21, shall constitute a part of this act.

Mr. BACON. If the Senator will pardon me—I do not wish to take him from the floor, because I desire to hear him further on the question——

Mr. SMITH of Michigan. I have no desire to discuss it further.

Mr. BACON. I want to read the language of this provision to show that, according to my understanding, at least, the purpose as indicated by the Senator from Michigan is not the purpose expressed in the bill. The language is this:

> The right to the flow of water, and riparian, water power, and other rights, now or hereafter owned by the United States in the St. Marys River in Michigan shall be forever conserved for the benefit of the Government of the United States, for the purpose of having the water power developed.
>
> Not for the purpose of navigation, but—
>
> either for the direct use of the United States, or by lease or other agreement, through the Secretary of War, who is hereby authorized to make such leases or agreements.

The prime purpose there is not navigation. Navigation is not mentioned.

Mr. SMITH of Michigan. Let me call the attention of the Senator to section 11, on page 15:

> SEC. 11. That the ownership in fee simple absolute by the United States of all lands and property of every kind and description north of the present St. Marys Falls Ship Canal throughout its entire length and lying between said ship canal and the international boundary line of Sault Ste. Marie, in the State of Michigan, is necessary for the purposes of navigation of said waters and the waters connected therewith.

Mr. BACON. Yes.

Mr. SMITH of Michigan. That is the basis of this declaration. If that is not true, this entire declaration fails. If it is true, then, as an incident, the Government acquires the rapids in this river and may use it for the purposes described in the section to which the Senator from Georgia refers.

Mr. BACON. But even conceding the contention of the Senator, which I do not, as to the change in the attitude of the Government whenever the consideration of navigation is paramount, the section now under consideration is one in which the plain proposition is made, not simply that the Government is to utilize a water power which has been developed by the construction of works intended to improve navigation, but that the purpose of this is to develop such water power.

Mr. SMITH of Michigan. If the Senator from Georgia will permit me, if this was a petition in condemnation in a court of record by a quasi public corporation, the first thing that they must find would be the allegation in section 11 as to the necessity. The next would be the compensation. The Government may declare the taking a necessity. I have seen evidence that it intends to do it. If so, then I insist that what they acquire as an incidental right shall not run to waste, but must be used for the benefit of the people of Michigan.

Mr. President, the Government intends to force section 11 into the law, and I am doing the best I can to see to it that that water power, which is a very valuable asset to the State of Michigan, shall not be lost. That is my only concern.

Mr. FRYE. Mr. President, why can not the debate be postponed until a motion is made to strike out this entire section, and let us go on with the committee amendments?

Mr. TELLER. Why can we not strike it out now?

Mr. FRYE. Because it is not a committee amendment.

Mr. TELLER. The Senator prefers to go on with the committee amendments?

Mr. FRYE. I prefer to go on with the committee amendments, and then any Senator can, of course, move to strike out the entire section in regard to St. Marys River.

The VICE-PRESIDENT. The Secretary will resume the reading of the bill.

Mr. BANKHEAD. Mr. President, I desire to say just a word, and I think this is a very appropriate place to say it, while we are discussing the question of navigation and power combined.

It is perfectly evident that the erection or construction of locks and dams for navigation has never yet created a single reliable horsepower in this country, and never will. Where locks and dams are constructed for navigation, of course their height limits the head. The head, of course, regulates the power, if power is intended to be developed. I have in mind now a river in Alabama where 18 locks have been constructed for the purpose of promoting navigation on that river, and there is not generated now and never can be generated a single horsepower at all of them combined that is reliable; and power that is not reliable and that can not be depended upon every day in the year is almost worthless, unless you go to the expense of adding an auxiliary steam plant to supply power when the water itself does not supply it.

The question of water power is a very important one. I believe that is one of the richest assets that we have. I do not mean the richest asset of the Government, but of the people of the country or the State where the power can be developed. If this power, so valuable to develop all of the resources of the country, is ever to be utilized, it must be done in conjunction with navigation. One or the other is inevitably destroyed when you undertake to construct and operate them separately. It can not be done, as all the engineers in this country will tell you.

I do not expect it done in this bill, but this question must be settled. Some understanding must be reached as to the manner in which navigation and power can be supplied on the same river. The Government of the United States will never construct dams where to create power great reservoirs for the storage of water are necessary. They will be constructed only as aids to navigation. Individuals will never construct great dams and reservoirs for power in order to give the Government navigation. So, to my mind, it is perfectly evident that there must be cooperation if the two purposes are ever to be conserved together. It can not be in any other way.

The Government of the United States, desiring to improve the navigability of a river where great and valuable water power may be established, ought in the very inauguration of the work to look to it that in the construction and operation of locks power at the same time will be provided. This they must do, Mr. President, unless the Government makes up its mind that for all time this power, valuable as it may be, must give place to navigation exclusively.

I hope the Congress, at some future day when they have more time to devote to this important question, will take it up in an intelligent way and work out some plan by which the power on rivers that are navigable when improved may be utilized and at the same time navigation provided for. How that can be done is for Congress to determine—whether or not the Government of the United States, in pursuance of this policy, shall conclude that it is wise, politic, and businesslike to enter into some understanding or agreement with private individuals by which the Government may build a part of the locks and dams and the individual or corporation the other part, bearing the expense fairly, whatever it may be, and when completed the Government has the navigation and absolute control over it, and the individual or the corporation who participates in the work shall have and enjoy the power under proper regulation.

I merely wanted to say that much, Mr. President, while we were on the subject.

The reading of the bill was resumed. The next amendment of the Committee on Commerce was, on page 20, line 18, after the words "Secretary of War," to insert the following proviso:

> *Provided further*, That any excess of water in the St. Marys River at Sault Ste. Marie over and above the amount required for the uses of navigation shall be leased for power purposes by the Secretary of War upon such terms and conditions as shall be best calculated in his judgment to insure the development thereof and most conducive to the commercial progress of the communities affected. The Secretary of War may as often as necessary make such regulations and fix such charges as in his judgment are reasonable and just and best calculated to carry out the purposes of this section.

Mr. TELLER. I want to object to that amendment. I ask the Senator from Maine to let it pass over.

Mr. FRYE. Why not let it be agreed to? Then, if a motion is made to strike out the entire section, of course it will come up in the Senate.

Mr. TELLER. I may not want to move to strike out the entire section, but I do desire to have this stricken out.

Mr. FRYE. If this goes out, the whole section will go out.

Mr. TELLER. Mr. President, I want to make my objection that this is general legislation, vicious legislation, and unconstitutional legislation on an appropriation bill. I think that will raise the point of order.

The VICE-PRESIDENT. The Chair is of the opinion that the first point of order is well taken, and therefore sustains that point of order.

Mr. FRYE. Is the Chair certain that Rule XVI applies to a river and harbor bill—that a river and harbor bill is a general appropriation bill?

The VICE-PRESIDENT. The Chair so understands.

Mr. FRYE. There is a different rule applied to river and harbor bills from that applied to other appropriation bills.

The VICE-PRESIDENT. The Chair is of the opinion that the river and harbor bill is a general appropriation bill in the sense contemplated by the rule.

The reading of the bill was resumed.

Mr. FRYE. On page 21, line 7, I move to strike out "six" and insert "eight."

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 21, line 7, before the word "hundred," it is proposed to strike out "six" and insert "eight," so as to read:

SEC. 13. That for examinations, surveys, and contingencies, and for incidental repairs for rivers and harbors for which there may be no special appropriation, the sum of $800,000 is hereby appropriated, to be immediately available.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, under the subhead "Alabama," on page 23, line 13, after the word "the," to strike out "Sipsey Fork" and insert "Saunders Ferry," so as to make the clause read:

Mulberry and Locust forks of the Warrior River, up the Mulberry Fork to its junction with the Saunders Ferry, and up the Locust Fork to the mouth of Fivemile Creek.

Mr. FRYE. I move to further amend that paragraph, in line 13, by striking out "its junction with the," after the word "to."

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 23, after line 20, to insert:

Chickasabogue Creek at its mouth.

The amendment was agreed to.

The next amendment was, on page 23, after line 21, to insert:

Bayou La Batre.

The amendment was agreed to.

The next amendment was, on page 23, after line 22, to insert:

Coosa River, with a view to storage reservoirs at, near, or above the sites of Locks and Dams Nos. 12, 14, and 15, by cooperation with the Alabama Power Company, or any other corporation duly organized under the laws of the State of Alabama, in the development of water power for industrial purposes, the report to state what proportion of the cost should be borne by the United States.

Mr. BACON. I ask that that amendment be passed over for the present.

The VICE-PRESIDENT. Without objection, the amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, under the subhead "Arkansas," on page 24, after line 7, to insert:

And an examination shall be made as to the feasibility, as an aid to navigation on the Ouachita River, of the construction of a canal from Grand Mary Lake to Felsenthal, Ark., and an estimate submitted as to the cost thereof.

The amendment was agreed to.

The next amendment was, on page 24, after line 11, to insert:

Arkansas River, between Little Rock and Dardanelle, with a view of ascertaining if said part of said river is susceptible of being made available for purposes of navigation during the entire year, and, if found capable of being made so available, then to report an estimate of the cost of improving such part of said river by the construction of locks and dams, or otherwise, as well as to report an estimate of the probable tonnage that will seek transportation thereon in the event the same were so improved.

Mr. FRYE. In the amendment of the committee beginning in line 12, on page 24, at the end of the line, I move to strike out the name "Dardanelle" and insert "Ozark."

The VICE-PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. On page 24, line 12, at the end of the line it is proposed to strike out the name "Dardanelle" and insert the name "Ozark."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, under the subhead "California," on page 25, after line 14, to insert:

Humboldt Harbor, South Bay Channel, with a view to the removal of obstructions to navigation to the wharf at Fields Landing.

The amendment was agreed to.

The next amendment was, on page 25, after line 19, to insert:

Humboldt Bay to Eel River, with a view to the construction of a ship canal.

Mr. PERKINS. With the permission of the chairman of the committee, I will move that that amendment be disagreed to, the same item being provided on page 54.

Mr. FRYE. That is right. Let the committee amendment be disagreed to.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, under the subhead "Connecticut," on page 26, after line 18, to insert:

Connecticut River up to Hartford.

The amendment was agreed to.

Mr. FRYE. On page 26, line 21, after the word "from," I move to strike out "Newport" and insert "Wilmington."

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 26, line 21, after the word "from," it is proposed to strike out "Newport" and insert "Wilmington," so as to read:

Christiana River, from Wilmington to Christiana.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, under the subhead "Delaware," on page 26, after line 24, to insert:

Christiana River, from Wilmington to Christiana.

Mr. FRYE. Let that amendment be rejected.

The VICE-PRESIDENT. The question is on agreeing to the amendment.

The amendment was rejected.

The next amendment was, on page 26, after line 25, to insert:

Laurel River up to Laurel.

The amendment was agreed to.

The next amendment was, under the subhead "Florida," on page 27, line 6, after the word "walls," to insert "to protect government property; and also to providing a channel 16 feet deep and 300 feet wide from the city of St. Augustine to the ocean," so as to make the clause read:

St. Augustine Harbor, with a view to constructing the necessary sea walls to protect government property; and also to providing a channel 16 feet deep and 300 feet wide from the city of St. Augustine to the ocean.

The amendment was agreed to.

The next amendment was, on page 27, after line 9, to insert:

New Smyrna Inlet.

The amendment was agreed to.

The next amendment was, on page 27, line 15, after the word "to," to insert "the ocean, with a view to obtaining a depth of 30 feet;" so as to make the clause read:

St. Johns River, from Jacksonville to the ocean, with a view to obtaining a depth of 30 feet.

Mr. FRYE. I am informed that in the blueprint of the bill as it came from the House, on page 37, line 15, the words "its mouth" appear after the words "Jacksonville to," but those words do not appear in the printed bill as it is before the Senate. I move, therefore, to amend the amendment by striking out the words "its mouth" and inserting the words of the committee amendment "the ocean, with a view to obtaining a depth of 30 feet."

The amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 28, after line 11, to insert:

New River, Florida, with a view to securing a depth of 20 feet of water at the cut-off near the mouth, with jetties to protect the same.

Mr. FRYE. In line 12, after the word "river," I move to insert the words "Dade County."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, under the subhead "Georgia," on page 28, after line 19, to insert:

Satilla River.

Mr. FRYE. In line 20, before the word "Satilla," I move to insert "Big."

Mr. BACON. The amendment which the Senator suggests is correct, as there are two such rivers in Georgia. If there is any mistake it can be corrected in conference.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, under the subhead "Georgia and Alabama," on page 29, line 3, after the word "navigation," to strike out "and development of water power in connection therewith," so as to read:

Etowah, Coosa, and Tallapoosa rivers, with a view to their improvement for navigation.

Mr. LODGE. That term is to be stricken out throughout the bill?

Mr. FRYE. Yes; throughout the bill.

The amendment was agreed to.

The reading of the bill was continued to the end of line 20 on page 30.

Mr. BURKETT. I should like to ask a question, so that I may gain some information. I should like to understand something about the plan and the theory upon which the bill is builded. My attention has been attracted to it especially because of these three rivers in Iowa—the Des Moines River, the Cedar River, and the Iowa River. I should like to have somebody explain to me what it is that determines the committee in putting streams in the bill. I have seen the three rivers mentioned, and in my opinion they are not susceptible of navigation. I should like to know what is proposed to be done with those rivers. Are they a fair illustration of the other rivers provided for in this bill? I ask for information now because I may want to offer an amendment.

Mr. FRYE. The bill provides first for a preliminary survey. If the preliminary survey shows that the streams ought not to be improved for navigation, that is the end of it. If the examination shows that commerce requires the improvement, a survey is ordered. It goes to the chief engineer. Then it goes to the board of review. It is not possible, with that examination, for anything to get through that ought not to get through.

Mr. BURKETT. That is what I understood, although I have not had time to study the bill. What is determinative in the case of such rivers?

Mr. FRYE. If Members of Congress appear before the committee and request that a certain river be put in for preliminary survey, it is generally put in. Nearly all of the provisions for surveys have passed the Senate by concurrent resolution, and nearly all have similarly passed the House.

Mr. BURKETT. I thought such resolutions were usually lost in the House. They must involve some expense. How much expense does the Senator think is involved in these preliminary surveys?

Mr. FRYE. All the surveys in the bill will carry about $600,000, if they are made. A mere preliminary survey does not cost much. It is made through the local engineer.

Mr. BURKETT. Did the committee give attention to the practicability or desirability from a navigable standpoint of having these rivers surveyed? There are provided for in this bill rivers which anyone who knows the facts at all would say at once are not worth spending money upon. They can never be made navigable upon any reasonable expense. It is simply a waste of money. I observe that the amount is very small, but it seems to me some attention ought to be given to it before any money is authorized to be expended.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, under the subhead "Kansas," on page 30, after line 22, to insert:

Missouri River at the city of Atchison, with a view to restoring said river to its proper channel.

The amendment was agreed to.

The reading of the bill was continued to the end of line 18, on page 31.

Mr. FRYE. On page 31, line 15, before "Jefferson-Shreveport," strike out "the" and insert "survey of the."

The amendment was agreed to.

The reading of the bill was resumed and continued to the end of line 21, on page 31.

Mr. FRYE. I offer the amendment I send to the desk.

The SECRETARY. On page 31 strike out lines 20 and 21 and insert:

Isle au Haut Thoroughfare between the island of Isle au Haut and Kimballs Island, with a view to obtaining a channel of increased depth and width and the establishment of a harbor of refuge.

The amendment was agreed to.

The next amendment was, under the subhead "Maine," on page 32, after line 3, to insert:

St. Croix River at and near Calais.

The amendment was agreed to.

The next amendment was, under the subhead "Maryland," on page 32, after line 13, to insert:

Corsica River.

The amendment was agreed to.

The next amendment was, on page 33, line 9, after the word "navigation," to strike out "and the development of water power in connection therewith," so as to make the clause read:

Connecticut River, from Hartford, Conn., to Holyoke, Mass., with a view to its improvement for navigation.

The amendment was agreed to.

The reading of the bill was continued to the end of line 2, on page 34.

Mr. FRYE. At the top of page 34, after the word "harbor," in line 1, I move to insert "to east end of Fulton street and."

The amendment was agreed to.

The next amendment of the Committee on Commerce was, under the subhead "Michigan," on page 34, after line 18, to insert:

Cheboygan River, with a view to widening its channel and rebuilding or repairing the locks so as to render the river navigable for boats drawing 8 feet of water.

Mr. FRYE. Let the amendment be disagreed to.

The amendment was rejected.

The next amendment was, on page 34, after line 21, to insert:

Forester Harbor, with a view to deepening the same to 20 feet.

The amendment was agreed to.

The next amendment was, on page 34, after line 23, to insert:

White Lake Harbor, with a view to providing a channel depth of 20 feet and a turning basin.

The amendment was agreed to.

Mr. FRYE. I offer the amendment I send to the desk.

The SECRETARY. At the bottom of page 34 it is proposed to insert:

Traverse Bay, at Traverse City, with a view to the construction of a breakwater.

The amendment was agreed to.

The next amendment was, at the top of page 35, to insert:

Leland Harbor, with a view to providing a harbor of refuge by the construction of a breakwater.

Mr. FRYE. Let the amendment be disagreed to.

The amendment was rejected.

The next amendment was, under the subhead "Minnesota," on page 35, after line 2, to insert:

St. Clair River, with a view to making a cut from the north to the south channel near Algonac.

Mr. FRYE. Let that amendment be also disagreed to.

The amendment was rejected.

Mr. FRYE. I offer the amendment I send to the desk.

The SECRETARY. On page 35, after line 4, insert:

Au Sable River, with a view to obtaining a suitable depth over the bar at the mouth by dredging.

The amendment was agreed to.

The next amendment was, under the subhead "Minnesota," on page 35, after line 21, to insert:

Zipple Bay, Lake of the Woods, with a view to establishing a harbor of refuge.

The amendment was agreed to.

The reading of the bill was continued to the end of line 13, on page 36.

Mr. FRYE. I offer the amendment I send to the desk.

The SECRETARY. On page 36, line 13, before the words "Fond du Lac," insert "the stone quarries near," so as to read:

St. Louis River, from the upper limit of present project to the stone quarries near Fond du Lac.

The amendment was agreed to.

The next amendment of the Committee on Commerce was, under the subhead "Minnesota and Wisconsin," on page 36, after line 13, to insert:

The report upon the examination and survey for the location of a canal connecting Lake Superior and the Mississippi River by way of the St. Croix River, as provided by the river and harbor act of 1894, and as supplemented by the provisions of the river and harbor act approved March 31, 1899, shall be completed by a further report as to whether existing conditions render such project now feasible and practicable, considering the necessary location, plans, cost of construction and maintenance, commerce affected, water supply, and incidental water power developed in connection therewith.

The amendment was agreed to.

The next amendment was, under the subhead "Montana," on page 37, after line 17, to insert:

Yellowstone River, from its mouth to the city of Glendive, with a view to maintaining a 4-foot stage of water and the building of a lock at the United States Government dam.

Mr. FRYE. In line 18, after the word "of," I move to strike out "Glendive" and to insert "Miles City."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 37, line 22, after the word "Lake," to insert "with a view to dredging the channel and putting in piling on the east side," so as to make the clause read:

Polson Bay, Flathead Lake, with a view to dredging the channel and putting in piling on the east side.

The amendment was agreed to.

Mr. BACON. We have passed over the amendment on page 36. I want to call attention to that amendment.

Mr. FRYE. It provides merely for a report.

Mr. BACON. I know that, but it is something we have nothing to do with. It is no business of the Federal Government to develop water power or to legislate for the development of water power.

Mr. FRYE. Why does not the Senator move to strike it out? What is the use of making a reservation?

Mr. BACON. I will make that motion.

Mr. FRYE. I should like to have it made now.

Mr. NEWLANDS. Will the Senator from Georgia permit me to make a suggestion?

Mr. BACON. Certainly.

Mr. NEWLANDS. The Senator from Georgia doubtless heard the Senator from Alabama [Mr. BANKHEAD] speak of the importance of cooperation between the State and the Nation in the development of both navigation and water power, assigning to each the part that belongs to it, so that navigation, which is a federal function, and the development of water power, which is a state function, can both be promoted. As I understand, this amendment simply calls for a report regarding the waterway, so that the plan will cover everything that is necessary to develop a river to its highest purpose, both for navigation and water power. Is it not well to have such a report before us? When the report comes in, we will consider how far the Federal Government can act in the matter within its powers, and to what extent the State or individuals or corporations acting under the State can act under state powers.

The Senator from Alabama very clearly showed that unless these works were planned with reference to both uses we could accomplish one purpose only, and that would be the promotion of navigation.

It seems to me it is very much better to leave this provision in the bill, and then determine later on what part of the work shall be assigned to the Nation and what part shall be assigned to the State.

We are on the eve of the great work of coordination of the various national services relating to water. We are also on the verge of cooperation between the national sovereignty and the state sovereignty in reference to the development of rivers, and it is important that we should have a plan before us to ascertain what each sovereign shall do and what each sovereign shall pay in the construction of these works, which serve a double purpose.

Mr. BACON. Mr. President, I well understood the suggestion of the Senator from Alabama, which has been repeated by the Senator from Nevada, and I do not recognize at all the propriety of its adoption. It necessarily involves the idea that the Government of the United States is going into copartnership and into business relationship with private persons or private corporations, who may be interested in water power at places where the Government is interested in protecting the navigability of a river. Senators will see at once that that is necessarily the conclusion.

Mr. NEWLANDS. Mr. President——

Mr. BACON. I heard the Senator through with pleasure. I hope he will hear me through. Then I will yield with great pleasure. Senators will see that that is necessarily the result of the suggestion when it is proposed that when the Government shall enter upon works for the purpose of improving navigation, it shall enter into negotiations with private corporations or private individuals who may be interested in the water power at that point to divide between them the expense and to own jointly between them the property. That is the necessary, inevitable process by which that end is to be accomplished. I will not stop to elaborate that point. In the first place, it is absolutely foreign and antagonistic to the principle upon which the Government acquires any property anywhere for any public use. It can acquire property only for public use.

Mr. FRYE. I am perfectly willing that there shall be stricken out of the bill wherever it occurs the term "incidental water power."

Mr. BACON. Then I will not have another word to say.

Mr. BANKHEAD. Mr. President——

Mr. FRYE. I hope the Senator from Alabama will let the consideration of the bill be proceeded with. The time is passing away rapidly, and there are eulogies to be delivered.

Mr. BANKHEAD. I yield.

Mr. FRYE. "Incidental water power."

Mr. TELLER. Those words are to go out.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 36, in line 24, it is proposed to strike out "incidental water power developed in connection therewith."

Mr. GALLINGER. Let the word "and" be inserted before the words "water supply."

Mr. BANKHEAD. I understood the Senator to suggest that he was perfectly willing that everything in reference to water power should be stricken out.

Mr. FRYE. I am willing that it shall be stricken out. It occurs in several places. We have stricken it out in reference to the Connecticut River.

Mr. BACON. We have stricken it out as to Delaware and Georgia.

Mr. FRYE. We have stricken it out there.

Mr. BANKHEAD. I am going to yield to the suggestion of the committee, of course. But these are the most important provisions in this bill.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Georgia to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, under the subhead "New York," on page 39, after line 13, to insert:

Bay Ridge and Red Hook channels, New York Harbor, with a view to the removal of the shoal between these channels and the deep water of the bay and the construction of a breakwater or quay extending from Red Hook Point on and along the easterly side of said shoal as it now exists, for the purpose of providing protection to that part of the harbor against the effects of westerly winds.

Mr. FRYE. In line 18 I move to strike out the word "easterly" and insert the word "westerly."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was continued to page 40, line 8, the last paragraph read being as follows:

Hudson River, with a view to providing a channel not less than 200 feet wide and 12 feet deep at all stages from deep water in the lower river to Waterford, including a lock and dam at Troy suitable in size for all probable purposes of navigation and commerce to and from the Barge Canal.

Mr. FRYE. On page 40, line 8, after the word "Canal," I move to insert:

Below Troy channel to correspond in width with the existing project.

The amendment was agreed to.

The next amendment was, on page 40, after line 19, to insert:

The Secretary of War is hereby directed to report as soon as he is satisfied that the city of New York is prepared to undertake the work to be done by it preliminary to or contemporaneous with any dredging to be done by the United States Government, as recommended in the report and plan of the Secretary of War transmitted under date of February 25, 1909, for the improvement of Jamaica Bay, New York, and its entrance at Rockaway Inlet and Dead Horse Inlet.

The amendment was agreed to.

The next amendment was, under the subhead "North Carolina," on page 41, line 6, after the letter "a," to strike out "suitable depth and width" and insert "depth of 30 feet and a suitable width," so as to make the clause read:

Cape Fear River, at and below Wilmington, with a view of obtaining a depth of 30 feet and a suitable width.

Mr. SIMMONS. I wish to have striken out the words "depth of 30 feet and a suitable width," restoring the House language, "suitable depth and width."

Mr. FRYE. The Senator wants to have the committee amendment disagreed to?

Mr. SIMMONS. Yes.

The amendment was rejected.

Mr. SIMMONS. That restores the House language?

Mr. FRYE. It restores the House language.

The next amendment was, on page 42, after line 3, to insert:

Little Contentnia River up to the town of Ridge Springs.

The amendment was agreed to.

The next amendment was, on page 42, after line 5, to insert:

Contentnia River from Snow Hill to Stantonburg.

The amendment was agreed to.

The next amendment was, on page 42, after line 6, to insert:

Neuse River from Pamlico Sound to Kinston; Trent River up to Trenton; Pasquotank River up to Elizabeth City; Roanoke River up to Wel-

don; Chowan River up to a point opposite Winton; with a view to providing channels of 10 feet depth, to conform with the depth of the authorized canal to connect the waters of Pamlico Sound with the ocean at Beaufort.

The amendment was agreed to.

The next amendment was, on page 42, after line 13, to insert:

Cape Lookout, with a view to providing a harbor of refuge for the largest coastwise vessels.

The amendment was agreed to.

The next amendment was, on page 42, after line 15, to insert:

Cape Hatteras, with a view to providing a harbor of refuge for the largest coastwise vessels.

Mr. SIMMONS. In line 17 I move to strike out the word "coastwise" and insert the word "seagoing."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 42, after line 17, to insert:

Swift Creek from its confluence with the Neuse River to the head of navigation on said Swift Creek.

The amendment was agreed to.

The next amendment was, on page 42, after line 19, to insert:

Smiths Creek from its confluence with the Neuse River to the head of navigation on said Smiths Creek.

The amendment was agreed to.

The next amendment was, at the top of page 43, to insert:

NORTH AND SOUTH DAKOTA AND MONTANA.

The Missouri River from Sioux City, Iowa, to Fort Benton, Mont., and the Yellowstone River from mouth to Billings, Mont.

The amendment was agreed to.

The next amendment was, under the subhead "Ohio and West Virginia," on page 43, line 21, after the word "Numbered," to strike out "26" and insert "29," so as to make the clause read:

Survey of Ohio River, with a view to the selection of sites for the additional locks and dams between Lock No. 8 and Lock No. 29, and for the preparation of plans and estimates.

The amendment was agreed to.

The reading of the bill was continued to line 24, on page 43, in the items under the heading "Oklahoma."

Mr. FRYE. After the word "to," in line 24, I move to strike out the words "a point opposite Pauls Valley," and to insert "Mountain View," so as to read:

Washita River, up to Mountain View.

The amendment was agreed to.

Mr. FRYE. At the bottom of page 43, I move to insert:

The North Canadian River, with a view to the diversion of a portion of its waters into the Cimarron River in the locality of Blaine County.

The amendment was agreed to.

The next amendment was, under the subhead "Oregon," on page 44, line 9, after the word "mouth," to insert "including the bar thereof," so as to make the clause read:

Coquille River, from the mouth, including the bar thereof, up to Myrtle Point.

The amendment was agreed to.

The next amendment was, under the subhead "Rhode Island," on page 45, after line 10, to insert:

Newport Harbor, with a view to an extension of the improvement as indicated in projects "B" and "C," contained in House Document No. 438, Fifty-ninth Congress, second session.

The amendment was agreed to.

The next amendment was, on page 45, after line 14, to insert:

Point Judith Pond, with a view to obtaining a navigable depth.

The amendment was agreed to.

The next amendment was, on page 45, after line 16, to insert:

The Secretary of War is hereby authorized and directed to report to Congress a plan and estimate for a landing place to be constructed in the harbor of refuge at Point Judith, Rhode Island, within the area protected by the shore-arm breakwater, in accordance with the recommendations contained in the letter dated April 2, 1908, from the Secretary of War to the Speaker of the House of Representatives, and printed in H. Doc. No. 911, Sixtieth Congress, first session.

Mr. FRYE. In line 22, after the word "April," I move to strike out the word "second" and to insert "thirtieth."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 46, line 3, after the word "Point," to insert "and to extending the 25 feet deep anchorage area westward to the western harbor line from a point just above Harbor Junction pier to Fields Point and cutting off Fields Point back to the harbor line," so as to make the clause read:

Providence River and Harbor, with a view to widening and straightening the channel between Kettle Point and Gaspee Point, and to extending the 25 feet deep anchorage area westward to the western harbor line from a point just above Harbor Junction pier to Fields Point and cutting off Fields Point back to the harbor line.

The amendment was agreed to.

Mr. FRYE. On page 46, after line 6, I move to insert:

Inner harbor, Great Salt Pond, Block Island, with a view to widening the present channel and providing increased anchorage.

The amendment was agreed to.

The reading was continued to page 47, line 15, the last paragraph read being as follows:

TENNESSEE, ALABAMA, AND KENTUCKY.

Survey of Tennessee River from Knoxville to its mouth, with a view to securing the best permanent navigation by open channel work, or locks and dams, or both, and making an estimate of the cost of same, with a view to securing a depth from Knoxville to Chattanooga of 6 feet, if obtainable, or any such less depth as may be practicable between such depth and the present project depth; and from Chattanooga to the mouth of the river a depth of 9 feet, if obtainable, or such less depth as may be practicable between such depth and the present project depth.

Mr. FRAZIER. On page 46, line 6, after the word "from," I move to strike out "Knoxville" and to insert the words "the confluence of the Holston and the French Broad rivers, forming the Tennessee River."

Mr. FRYE. There is no objection to that amendment.

The amendment was agreed to.

The reading was continued to page 48, line 13, the last paragraph read being as follows:

Channel extending from the mouths of the Sabine and Neches rivers to the mouth of Taylors Bayou, including the Sabine River from Orange to said canal, and the Neches River from Beaumont to said canal, with a view to widening and deepening said canal and removing the obstructions in the said rivers and improving the same; and in making such examination or survey the engineer or engineers having the same in charge shall take into account and make report upon any proposition for participation in the expense of said project by the localities immediately affected thereby.

Mr. BAILEY. I understand we are on the committee amendments now, but I want to inquire of the chairman of the Commerce Committee if this provision, with respect to extending the channel from the mouths of the Sabine and Neches rivers, and requiring the engineers to take into consideration whether those people ought to be compelled to contribute, is not an unusual provision and not only out of the ordinary as to the general course of the Government, but it is practically the only provision of this kind in the bill, is it not?

Mr. FRYE. I think it is; but is not that the very canal a bill for which has been already passed authorizing those people to make the improvements?

Mr. BAILEY. No; Mr. President, that bill was for a canal. This is for the improvement of the Sabine and Neches rivers. It is a different project. I simply wanted to call the attention of the chairman to it and to say that at the proper time I shall ask that that requirement be stricken out.

Mr. FRYE. The words "and make report upon any proposition for participation," and so forth. Is that the part the Senator wishes to strike out?

Mr. BAILEY. Yes, sir; the words "shall take into account and make report upon any proposition for participation in the expense of said project by the localities immediately affected thereby."

Mr. FRYE. Let the words be stricken out now, then.

Mr. BAILEY. Very well.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 48, line 9, after the word "same," strike out the words:

And in making such examination or survey the engineer or engineers having the same in charge shall take into account, and make report upon any proposition for participation in the expense of said project by the localities immediately affected thereby.

Mr. FRYE. No; strike out the last three lines—the words "and make report upon any proposition for participation in the expense of said project by the localities immediately affected thereby."

Mr. BAILEY. I think, Mr. President, the Secretary is right. I think that all after the semicolon is related to the simple proposition of compelling the localities to participate in the expense. I think, if the chairman will read it attentively, he will find that that is true.

Mr. FRYE. The Senator wants to have the whole clause stricken out?

Mr. BAILEY. Oh, no; I only want to have stricken out the semicolon and to insert a period in line 9, and all beginning with the words "and in making such examination or survey" and ending with the word "thereby" in line 13.

Mr. FRYE. I have no objection to that.

The amendment was agreed to.

The next amendment of the Committee on Commerce was, under the subhead of "Texas," on page 48, after line 13, to insert:

Galveston Harbor, Galveston Channel, Texas City Channel, and Port Bolivar Channel, with a view to a comprehensive and systematic plan of improvement.

The amendment was agreed to.

The next amendment was, under the subhead "Virginia," on page 49, line 12, after the word "Inlet," to insert "with a view to obtaining a channel depth of 15 feet," so as to make the clause read:

Chincoteague Inlet, with a view to obtaining a channel depth of 15 feet.

The amendment was agreed to.

The next amendment was, on page 49, line 21, after the word "feet," to insert "and with a view to removing the bars in and near the mouth of Bennetts Creek," so as to make the clause read:

Nansemond River, from Hampton Roads to Suffolk, with a view to widening and straightening the channel and deepening the same to 25 feet, and with a view to removing the bars in and near the mouth of Bennetts Creek.

The amendment was agreed to.

The next amendment was, on page 49, line 24, after the letter "a," to strike out "suitable depth and" and insert "depth of 35 feet and suitable," so as to make the clause read:

Norfolk Harbor and the approaches thereto, with a view to obtaining a depth of 35 feet and suitable width from deep water in Hampton Roads via Elizabeth River and the Southern Branch to the navy-yard; also between Lamberts Point and Pinners Point, with a view to providing additional anchorage area abreast of and above Lamberts Point; also the Southern Branch of the Elizabeth River above the navy-yard.

Mr. FRYE. On page 50, line 1, after the word "in," I move to strike out "Hampton Roads" and to insert "the sea."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 50, line 9, before the word "between," to strike out "suitable depth and width" and insert "depth of 35 feet and suitable width," so as to make the clause read:

Channel across Newport News Middle Ground Bar, with a view to obtaining a depth of 35 feet and suitable width between Old Point and Newport News.

The amendment was agreed to.

The reading of the bill was continued to line 24, page 51, in the items under the heading "Wisconsin."

Mr. FRYE. I move, at the bottom of page 51, after line 24, to insert:

Yahara River, with a view to securing a channel 4 feet deep from Madison to Janesville.

The amendment was agreed to.

The next amendment was, under the subhead "Intracoastal waterways," on page 52, line 13, after the word "Sound," to insert:

To include a canal from the protected waters of Narragansett Bay, through the ponds and lagoons lying along the southern coast of Rhode Island and thence to Watch Hill and Fishers Island.

So as to read:

Survey for the construction of a continuous waterway, inland where practicable, from Boston, Mass., to Long Island Sound, to include a canal from the protected waters of Narragansett Bay through the ponds and lagoons lying along the southern coast of Rhode Island and thence to Watch Hill and Fishers Island; thence to New York Bay, etc.

The amendment was agreed to.

The next amendment was, on page 54, after line 22, to insert:

Survey for the construction of a continuous inland waterway in the State of California, between suitable points on Humboldt Bay and Eel River in said State, for the purpose of ascertaining the cost of a channel with a maximum depth of 9 feet, or such lesser depths along any section or sections of said waterway as may be found sufficient for commercial, naval, and military purposes. Such survey shall include an examination of all practical routes and the preparation of plans and estimates of cost along the most available route.

Mr. GALLINGER. I call the attention of the chairman to the fact that the word "practical," in line 5, on page 55, should be "practicable."

Mr. FRYE. That is true. I move that amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 56, after line 22, to insert as a new section the following:

SEC. 15. That the sum of $1,875 be, and the same is hereby, appropriated to be paid to JOHN H. BANKHEAD, of Alabama, for his services on the Inland Waterways Commission from the 14th day of March to the 18th day of June, 1907.

The amendment was agreed to.

The reading of the bill was concluded.

The VICE-PRESIDENT. The hour of 1 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated by the Secretary.

The SECRETARY. A bill (S. 6484) to establish postal savings banks for depositing savings at interest, with the security of the Government for repayment thereof, and for other purposes.

Mr. CARTER. I ask that the bill be temporarily laid aside.

The VICE-PRESIDENT. Without objection, the bill will be temporarily laid aside.

Mr. FRYE. At the bottom of page 23, the Coosa River amendment, the Senator from Georgia asked should be passed over.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 23, after line 22, insert:

Coosa River, with a view to storage reservoirs at, near, or above the sites of Locks and Dams Nos. 12, 14, and 15, by cooperation with the Alabama Power Company, or any other corporation duly organized under the laws of the State of Alabama, in the development of water power for industrial purposes, the report to state what proportion of the cost should be borne by the United States.

Mr. BACON. Mr. President, I just want to say one word. This is a tentative bill, as it were, and of course it does not occupy the same relation as if it were a bill upon its passage for the execution of these works.

I do not intend to occupy the time of the Senate or offer any amendments to the bill, but I want to say that the attitude which I occupy in regard to this water power is not based solely upon the theory that the Government is transcending its power in that regard, but it has reference to a matter which I consider to be of a most practical and important nature.

We have reached an era when the matter of the development and use and ownership of the water power of the country is going to be one of the most important features in our industries, and that is in connection with its relation to the general use of electricity. We have all over this country, in all the States, or certainly in a large majority of them, an incalculable wealth in the matter of water power. It belongs to the States, it belongs to the people in the States, and I am not willing myself to sit silent for a moment under the suggestion that the Government of the United States, never mind what its original purpose may be, has any power to lease those water powers, even though the water power may be developed by a dam erected by the United States for the purpose of improving navigation.

When the United States erects a dam, it is for the specific constitutional purpose of improving the navigation of a river. There its function ends, and the water and the power which is developed on it still remain the property of the owner of it; and there are plenty of ways in which it can be utilized without interfering in any manner with the use of the water by the Government in the perfection of the navigation of the river.

It is for the purpose of guarding against the possibility of the recognition of any such power on the part of the Government of the United States and for the purpose of preserving to our people their rights in this water power that I make this suggestion. I am the more impressed with the importance of so doing, because it has not only been contended by individuals in private stations and by some in the Senate and in the House, but the President of the United States has distinctly announced the proposition, and in a message to Congress has said that he would veto any bill which did not recognize the right of the United States to the use of water power within a State where they had erected dams for the purpose of navigation or any other purpose and the right of the United States to sell and lease that water power to others, thereby denying the rights of the owners within the State.

That doctrine I utterly repudiate and deny, and I wish to enter a protest against it here, so that when the time comes when any of these projects are sought to be put in operation we may be able to defend the right of the people to the ownership of their own water power, never mind by whom it may be developed.

Mr. FRYE. I wish to ask the Senator from Georgia a question. I am not going to argue this question, because I have not any time; but suppose the Government, in the erection of a dam made necessary for the purposes of navigation, creates an enormous power which can be made useful and is not necessary for the navigation, what on earth are we to do with it?

Mr. BACON. It belongs to the original owner. Here the Government builds a dam for the purpose of supplying a lock with water. All the time the water is flowing over that dam and is going to waste. It can be diverted into a ditch or a canal for the purpose of power or irrigation or anything else, so long as it does not interfere with the purpose for which the dam was built by the United States.

Mr. FRYE. In any quantity of instances we have given to individuals and to corporations the right to use that water. The Government has given it in numerous cases.

Mr. BACON. Very well. I will say that it is proper to get the consent of the Government to the utilization of the water, because the party might seek to use it in a way which would interfere with the purpose of the Government in the erection of the dam. But that is very different from the Government undertaking to say it owns the power and can sell it or lease it for the benefit of the Government.

Mr. FRYE. I can not agree with the Senator.

Mr. BACON. The sole function of the Government is to so control that water as to aid in navigation.

Mr. BAILEY. That is the Government's whole power.

Mr. BACON. That is its whole power, and whenever the owner of that water power, because he is the owner of it as long as it is on his land, wishes to utilize it, it is the duty of the Government to permit him to utilize it, so far as he can do it without interfering with the purpose of the Government in the erection of a dam.

Mr. LODGE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Massachusetts?

Mr. BACON. I do, with pleasure.

Mr. LODGE. I can not see that this amendment has anything at all to do with navigation.

Mr. BACON. The Senator from Massachusetts probably did not hear what I said. I said that I did not propose to obstruct the bill in any way or to offer any amendment to it; but as this matter had been discussed, I wished to state that my view was not limited to the question simply as to whether the Government of the United States was exceeding its constitutional function—although there can be no more important question than that—but that the purpose I had was to resist at the outset the proposition that the Government has the right when it erects a dam for the purpose of improving the navigation of a river to claim ownership in the water power thus developed, either to sell it or to lease it.

Mr. LODGE. This clause, as I read it, is put in not for the purpose of helping navigation, but to create water power. So the United States has come in there and spent the money of all the people of the United States to create water power——

Mr. BACON. I do not believe in it.

Mr. LODGE. And then the United States has no rights in that water power at all.

Mr. BACON. That is exactly what I am objecting to.

Mr. LODGE. They have no right to create it.

Mr. BACON. That is exactly what I am objecting to. I do not believe in any legislation committing the United States to work on streams for the purpose of developing power. Its function is to develop the navigation of streams. I have been contending against that all the morning.

Mr. BANKHEAD. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Alabama?

Mr. BACON. I do.

Mr. BANKHEAD. Mr. President, I quite agree with the Senator from Georgia in some of his views. He says that he is trying to preserve this power for the people of the States.

Mr. BACON. Yes.

Mr. BANKHEAD. That is exactly and precisely what I am trying to do also. Water power in Alabama is as valuable as coal mines in Alabama.

Mr. BACON. I quite agree with the Senator in that, and that is the reason I am interested in it.

Mr. BANKHEAD. I, too, am interested in it. The Senator from Georgia proposes that the Government may go along and improve these rivers for navigation and thereby utterly and totally forever destroy every horsepower on them, and nobody could get any benefit therefrom.

Mr. BACON. My position is just exactly the opposite of that.

Mr. BANKHEAD. Wait a minute. I think I know some little about the question of navigation and water power. I undertake to say, as I have already said, that there has never been constructed in the United States a dam for navigation alone that ever produced or ever will produce a reliable horsepower. When you go along and construct these dams and locks for navigation and destroy the water power that might be created if they were constructed for the double purpose of power and navigation, it seems to me that it is wicked.

Take the Coosa River, in my State. A few years ago a survey of that river was ordered for navigation, and it was made. The engineers said that it would take 31 locks to improve it, at an enormous cost. Congress said, "The cost is prohibitive; we can not enter upon the improvement of that river," and the construction of 31 locks for navigation and the project of the improvement of the river was practically abandoned, as the chairman of the Committee on Commerce [Mr. FRYE] knows.

We ordered another survey, and instructed the engineers to take into consideration while the work was being done the question of power. They made the survey and reduced the number of locks to 14—less than half those proposed by the original survey. How? Simply by increasing the height of the dams and the lift and creating storage in an immense pool of water that could be used for power. Without storage, nobody will undertake to say that you can produce power. You must have it. Varying stages of the water make that necessary. Sometimes the water is up, a great volume is running to waste over the crest of the highest dam, and in other long periods there is scarcely sufficient water for navigation purposes, unless it is stored with a view of creating power.

I protest against any action in this Senate or in this Congress which looks to the destruction of the great water power in the State of Alabama; and that is what this proposition does, absolutely and forever. Go on and improve this river for navigation, construct dams from 12 to 15 feet high, make it impossible ever to build with a view to creating power, and you have destroyed it.

One more proposition and then I am through. It is a matter of great economy to the Government, Mr. President. Here, according to this survey, 14 locks took the place of 31 locks. Our proposition is that the Government build those 14 locks to the extent that navigation requires, and no more, and that the State of Alabama may authorize individuals or corporations to contribute, to supplement, to cooperate, or whatever else you may call it, with the Government and build 25 feet or 30 feet or 40 feet, as the case may be, at their expense—not at the Government's expense—and when the work is completed, what happens? You have navigation better far than under the original plan of the Government to build exclusively for navigation, and you have a power, Mr. President, the value of which can not be estimated. There is no exhausting it.

We are burning up our coals in Alabama at a rapid rate. They are going up in smoke, and that is the end of them. Let us develop this great power to take the place of our coal, and we will have it for domestic purposes, and we will have a power equal to all the coal fields in Alabama to drive our mills and the wheels of industry that now take our coal in such great quantities.

I protest, sir, against this Congress now or at any other time proceeding to improve these rivers, with the knowledge that when it is done, according to the views of the Senator from Georgia [Mr. BACON], they have utterly and absoultely destroyed this power beyond all hope of its future use.

I agree with the Senator from Georgia that this water power, every drop of it, beyond the requirements of the Government for navigation, belongs to Alabama and to the people of Alabama. I deny that the Government has any control over it or any ownership in it, except alone for the purpose of navigation. When that has been provided, their control and interest is at an end, except to regulate the flow, and to see to it that in all future time the navigation of these rivers is not interfered with by reason of the operation of these water powers.

Then, sir, the power created, not by the Government, but by individual enterprise and individual capital, belongs to the people who created it and to nobody else. They must get a charter from my State if they are going to develop it in my State, just as they would for any other purpose.

Mr. FRYE. Mr. President——

Mr. BANKHEAD. I will yield to the Senator in a moment.

They must own the land on each side, which they must transfer to the Government when the Government undertakes to build the locks. They must pay for all the overflowed lands, which sometimes amount to a great deal.

I am speaking of the case where they may submerge land by reason of the height of the dams beyond what the Government submerges it for navigation. They, of course, pay for that, so that it does not cost the Government anything. It secures better and more reliable navigation, and at the same time it develops a power, the value of which can not be overestimated.

Mr. BACON. Mr. President, the Senator from Alabama interrupted me, as I supposed, to interject an inquiry.

Mr. BANKHEAD. I beg the Senator's pardon. I thought he was through.

Mr. BACON. The Senator asked me to yield, and I did so.

Mr. BANKHEAD. I thought the Senator from Georgia was through.

Mr. BACON. I have very little more to say. The Senator from Alabama and I agree upon the fundamental proposition—that is, that nothing should be done which should recognize the right of the Government to the right of ownership in this water, from which would follow a right to sell or lease it—and the proposition of the Senator, as I have said before, looks necessarily to the question of the Government going into partnership with individuals or corporations to develop water power, not for the public benefit, but for the benefit of such individuals or corporations. I do not believe with the Senator on the proposition that the building of a dam for the purposes of navigation destroys the opportunity for the utilization of those waters for power. On the contrary, as I have intimated before, it would be the duty of the Government, where the parties who own the water power—who own the water and the power and seek to

utilize it—to permit them to utilize it so far as it can be done without interfering with the purpose of navigation for which the dam was constructed. When a man owns the water site on which the Government has built a dam to aid navigation it is a simple thing to come to the Government and get authority to use the water power thus developed.

My purpose is that the great water powers that the Senator from Alabama so eloquently speaks of as more valuable than the coal fields of Alabama shall not be put in a position where the proposition which has been made to this Senate and to the House of Representatives in a message from the President of the United States can be recognized for an instant; and that is that the Government of the United States owns the power and can sell it or lease it. I want to guard against that. I want to guard and protect those powers for the benefit of the people in each State to whom they belong, and let them be taken possession of by the United States Government, to which they do not belong.

Mr. FRYE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Maine?

Mr. BACON. I do.

Mr. FRYE. I am notified that I can have about twenty-five minutes more on this bill, and that is all. I should like to conclude the bill.

Mr. BACON. Mr. President, I always yield to the Senator from Maine. I have had frequent experiences of the same kind. Whenever the Senator is in charge of an appropriation bill, the same appeal is made, and I have invariably yielded, as I do now.

Mr. FRYE. The Senator from Georgia is very kind and courteous.

Mr. BACON. The Senator always wants his bills passed without discussion.

Mr. FRYE. The Senator is very kind and courteous.

Mr. LODGE obtained the floor.

Mr. BANKHEAD. I should like to ask the Senator from Georgia one question.

Mr. LODGE. I have the floor in my own right, Mr. President.

Mr. BANKHEAD. I simply wanted to ask the Senator from Georgia a question.

The VICE-PRESIDENT. The Chair recognized the Senator from Massachusetts [Mr. LODGE].

Mr. LODGE. I believe I have the floor, Mr. President.

The VICE-PRESIDENT. The Senator from Massachusetts is entitled to the floor.

Mr. LODGE. Mr. President, the Senator in charge of the bill told me on the floor here, in response to an inquiry made in debate, that the development of the water power, stricken out on page 29, and the same in regard to the Connecticut River stricken out, was the policy of the bill.

Mr. TELLER. And all other places.

Mr. LODGE. And all other places. Now, it is left for this one place. If we are going into the question of water power, or the Government entering on a general development of water power without regard to navigation, it has got to be for all the States, or it has got to be for none. There is no reason why we should strike it out in Georgia, in Connecticut, and in Massachusetts—I think it is right to strike it out; I make no objection to striking it out in those States—but you can not strike it out in those States and leave the Alabama amendment in the bill, which is nakedly and avowedly for no other purpose than to develop water power.

It has been stated here on the floor that a survey for the improvement of the navigation of the Coosa River was so expensive that it was prohibitive, and it was abandoned. The amendment does not attempt to say that the provision is for navigation. It is to build storage reservoirs. If we are going into the business of developing rivers in the various States in order to develop water power we must do it in all the States.

Mr. BACON. That would be a pretty large job.

Mr. LODGE. And that would be a pretty large undertaking. I think if the provision in relation to the Connecticut River, in which the States of Connecticut and Massachusetts are interested, has gone out—and I made no objection to it, for I think it is unwise to enter on that policy—and the provision in regard to certain rivers in Georgia is taken out, as the Senator knows, I do not think such a provision ought to be left in the bill for one State and one especial project.

Mr. BANKHEAD. Mr. President——

The VICE-PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Alabama?

Mr. LODGE. Yes.

Mr. BANKHEAD. I think the Senator is laboring under a misapprehension.

Mr. LODGE. I am laboring under no misapprehension as to what that amendment says.

Mr. BANKHEAD. I understood the chairman of the committee to say that the amendments relating to water power would go out of the bill.

Mr. LODGE. And the amendment for the Coosa River, that we have been talking about, relates to power and nothing else.

Mr. BANKHEAD. I understood that went out, although I very much regretted it.

Mr. LODGE. I did not so understand. The Senator from Georgia had it passed over, I think, and we have been debating it.

Mr. BACON. That amendment was passed over. I will say to the Senator from Massachusetts that the Senator from Maine [Mr. FRYE], in charge of the bill, stated that all amendments relating to water power would be taken out.

Mr. LODGE. Then the amendment beginning in line 23, on page 23, is out of the bill?

Mr. BACON. I suppose, under the general statement of the chairman, that would be included.

Mr. LODGE. The amendment beginning in line 23, on page 23, is out of the bill?

Mr. BACON. I suppose the Senator from Maine had that in contemplation.

Mr. LODGE. But the amendment is not out of the bill, as a matter of fact. I think I am not mistaken.

Mr. FRYE. What page?

Mr. LODGE. Page 23, beginning in line 23.

Mr. KEAN. That ought to go out.

Mr. LODGE. It ought to go out, like the other power items.

Mr. TELLER. Let it go out.

Mr. FRYE. Let the amendment be disagreed to.

The VICE-PRESIDENT. Without objection, the amendment is disagreed to.

Mr. FRYE. The committee instructs me to offer the following amendment——

Mr. BANKHEAD. Mr. President——

The VICE-PRESIDENT. Does the Senator from Maine yield to the Senator from Alabama?

Mr. BANKHEAD. I want to set myself right about this amendment. I understood the chairman of the committee to say that all the amendments relating to water power would go out on the suggestion of the Senator from Georgia. I acquiesced in that, as will be remembered, but I said at the time that it was a blunder and that I thought it was the most important part of the bill.

I want to ask the Senator from Georgia if he does not believe that the construction of dams on the Coosa River for navigation will destroy the water power on that river?

Mr. BACON. Mr. President, I do not claim to be an expert, as the Senator from Alabama does, but it so happens that I have been down on the Coosa River and have been through the locks that the Government has erected there—four of them, are there not?

Mr. BANKHEAD. Yes; but the Senator said——

Mr. BACON. I am trying to answer the Senator's question. I recollect distinctly spending some time once at one of those locks, and I recollect distinctly that at the time I was there there was a very considerable amount of water flowing over the crest of the dam, which it seemed to me could be utilized by being diverted to a ditch on the opposite side without interfering with the water supply for the lock. If that were done, certainly the water power could be utilized. But even if that particular instance is not controlling, it does seem to me to be a plain proposition that where the Government erects a dam for the purpose of controlling the water so that it may be diverted into a lock, most of the time when the lock is closed the water is not flowing through the lock, it is flowing over the dam, and it is a very simple proposition to divert that excess of water in such a way that it can be utilized in the propulsion of machinery.

Mr. FRYE. I understand the amendment was disagreed to?

The VICE-PRESIDENT. The amendment was disagreed to.

Mr. FRYE. I offer an amendment on behalf of the committee.

Mr. CLAY. With the Senator's permission, just a word—and I will speak but a word.

The VICE-PRESIDENT. Does the Senator from Maine yield to the Senator from Georgia?

Mr. FRYE. Yes.

Mr. CLAY. This amendment, as I understand, was inserted at the instance of a Member of the other House from the State of Georgia.

Mr. FRYE. I think it was.

Mr. CLAY. I think that is correct. I am informed that the object and purpose of the amendment was this: Private parties

in Alabama and Georgia agree to spend large sums in helping build these locks and dams if they are built in such a way as to enable them to be used both for the purpose of navigation and to develop the water power. The inquiry is simply to be made with a view of finding out how much the private parties ought to pay and how much the Government ought to pay. The only object intended was simply to ascertain if the Government could not be saved expense in building those locks and dams, by private parties assisting in doing it, without interfering with navigation, with the view and purpose of using the water for navigation and also for power purposes. I am not against the amendment. I am in favor of it.

Mr. LODGE. Let me say to the Senator that there is no proposition here about navigation. It has been admitted that the river could not be made fit for navigation because the survey shows that the cost would be prohibitive.

Mr. CLAY. I understand that thoroughly. I have read the amendment, and I say to the Senator that Coosa River has never been developed because of the fact that it would cost five or six million dollars to build locks and dams. I understand that if this investigation is made it will be demonstrated that private parties, for the purpose of developing water power, will put up fully half of the money to improve the navigation on that stream.

Mr. LODGE. This amendment is directed to the development of water power. We have been told by the chairman of the committee that all such amendments were to go out. They have gone out in regard to Georgia; they have gone out in regard to Connecticut, and they have gone out in regard to Massachusetts. So I do not see why this amendment should be left in the bill.

Mr. CLAY. I will not discuss it further, because I have served on the committee with the Senator from Maine and I know he means business, that he does his work well, and wants to get through. So I will not consume time; but I can reply to the Senator and will do so fully when this bill is completed.

Mr. FRYE. I now offer the amendment which I send to the desk.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 28, after line 14, at the end of the Florida items, it is proposed to insert:

The Narrows, Santa Rosa Sound, Florida, for a channel of 9 feet.

The amendment was agreed to.

Mr. FRYE. I understand the amendment on page 48, line 14, was agreed to. I should like to have it disagreed to.

The VICE-PRESIDENT. The amendment will be considered as open. The Secretary will state the amendment.

The SECRETARY. On page 48, after line 13, the committee proposed to insert:

Galveston Harbor, Galveston Channel, Texas City Channel, and Port Bolivar Channel, with a view to a comprehensive and systematic plan of improvement.

The VICE-PRESIDENT. The question is on agreeing to the amendment.

The amendment was rejected.

Mr. FRYE. That completes the committee amendments.

Mr. McCUMBER. I offer the amendment which I send to the desk.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 3, after line 12, it is proposed to insert:

To provide for revetting the shores of the Missouri River to protect the banks and maintain the present channel at the landings at Frazier, Mont.; Mondak, Mont.; Judith, Mont.; and Expansion, N. Dak., the sum of $45,000, or so much thereof as may be necessary, is hereby appropriated, to be immediately available.

The VICE-PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. HEYBURN. I offer the amendment which I send to the desk.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 30, after line 20, it is proposed to insert:

Idaho: Clearwater River, from its mouth to Kamiah, for the purpose of ascertaining the cost of creating a channel with a maximum depth of 6 feet.

The VICE-PRESIDENT. The question is on the amendment.

The amendment was agreed to.

Mr. SMITH of Michigan. I offer the amendment which I send to the desk, to come in on page 20, line 18, after the word "War."

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 20, line 18, after the word "War," it is proposed to insert:

Provided further, That, the consent of the State of Michigan having been first obtained, any excess of water in the St. Marys River at Sault Ste. Marie over and above the amount required for the uses of navigation shall be leased for power purposes by the Secretary of War upon such terms and conditions as shall be best calculated in his judgment to insure the development thereof and most conducive to the commercial progress of the communities affected. The Secretary of War may, as often as necessary, make such regulations and fix such charges as in his judgment are reasonable and just and best calculated to carry out the purposes of this section.

Mr. SMITH of Michigan. Mr. President, I simply desire to insure on the St. Marys River the use of water power there, even though the Government acquires the entire riparian rights to the international boundary. In order to insure that, I think it is absolutely essential to retain the provisions contained from page 17 to page 20. The water in the rapids is too valuable an asset; it is worth too much to the people of this country, and especially to the people of the State of Michigan, to have it run to waste over those rapids. I have great hope that no Senator will seriously object to the adoption of the amendment.

Mr. LODGE. Mr. President, with the proviso as it originally stood, which the Senator from Michigan has just explained, I am in hearty sympathy. The Government is there going to take, solely for the purpose of navigation, the land on one side, with the riparian rights, and it would be a great mistake if the Government did not have the authority to lease or sell the power created by those natural falls.

But there has been inserted in this proviso a proposition that the Government can not dispose of that excess of water flowing over its own land without the assent of the State. Mr. President, it is a very extraordinary proposition that the Government is not able to deal with its own land, which it has acquired either by cession, by purchase, or condemnation—property which perhaps it has paid for with the money of all the people of the United States. It is a very extraordinary proposition that the Government should not be allowed to deal with its own property without the assent of the State in which that property happens to be located. I can not vote for that proviso with such an insertion as that in it, under which a government reservation is to be controlled by the State in which it is placed. It seems to be most extraordinary doctrine. I do not see how it is possible to vote for the amendment with that language in it; but I want the remainder of the provision adopted, for I think it is a very proper one. I move to strike out the words at the beginning of the amendment, so that I can vote for the proviso.

The VICE-PRESIDENT. The Senator from Massachusetts proposes an amendment, which will be stated.

The SECRETARY. It is proposed to amend the amendment by striking out at the beginning the words:

Provided further, That the consent of the State of Michigan having been first obtained.

Mr. LODGE. Yes; those are the words.

Mr. NELSON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Michigan yield to the Senator from Minnesota?

Mr. SMITH of Michigan. I do.

Mr. NELSON. Before the question is put on the amendment I have just one word to say, and the Senator from Michigan ought to reflect upon it. The reservoir from which this water is drawn is Lake Superior. The people of Minnesota and Wisconsin are as much interested in that water as the people of Michigan. To say that that water in Lake Superior can not be utilized without the consent of the State of Michigan is not only to put a veto on the United States, but a veto on Minnesota and Wisconsin as well.

Mr. SMITH of Michigan. Mr. President, the somewhat unenviable situation is presented that the proviso, as I drafted it, is in conflict with the rules of the Senate, and the Senator from Colorado [Mr. TELLER] made a point of order against it, and it was stricken out by a ruling of the Chair. Now, I am in the very unfortunate situation of being obliged either to meet the contention of the Senator from Colorado or to offend the judgment of the Senator from Massachusetts [Mr. LODGE]. I do not want to do either, but I should like this proviso as it was originally attached to the matter. I feel that the provision in the bill as it came from the House, which is not subject to a point of order, practically grants this contention, but that it is not strong enough to meet the situation as it exists. That it needs this additional language I feel very sure.

I know that I offend the good judgment of the Senator from Massachusetts and the Senator from Minnesota, but I took the risk of doing that with the hope that I might appease the opposition of the Senator from Colorado.

Mr. LODGE. The Senator from Michigan understands very well that my objection goes to the principle which the words I have moved to strike out involve.

Mr. TELLER. Mr. President, if the amendment now proposed by the Senator from Massachusetts to the amendment of the Senator from Michigan is adopted, the amendment will be

just as it was when I made a point of order against it. That point of order was sustained; and if it is amended, I shall make the point of order on it again, which must also be sustained. I am content to let it go as the Senator has now presented it. Although I have some objection to it, I will not make the point of order.

Mr. LODGE. I move to strike out the words which I have indicated.

Mr. SMITH of Michigan. I have no alternative than to take the sense of the Senate upon it.

The VICE-PRESIDENT. The Senator from Massachusetts proposes an amendment, which will be stated.

The SECRETARY. It is proposed to strike out the words:

Provided further, That the consent of the State of Michigan having been first obtained.

Mr. HEYBURN. The idea of condemning land on the shore without defining the limits will be disposed of in very short order. I do not think we need be disturbed much about that. Otherwise, I should be inclined to oppose the establishment of this kind of a precedent.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Massachusetts to the amendment of the Senator from Michigan.

The amendment to the amendment was rejected.

The amendment was agreed to.

Mr. BAILEY. I call the attention of the chairman of the committee to the amendment of the Senate committee, which appears on page 44, lines 14, 15, and 16. I ask the chairman to consent that the amount shall be stricken from the bill.

Mr. FRYE. It has already been done.

The VICE-PRESIDENT. It has already been done.

Mr. MILTON. I offer the amendment I send to the desk.

The SECRETARY. On page 7, after line 3, it is proposed to insert:

That for securing a depth of 22 feet at East Pass, St. Georges Sound, Florida, $15,000, said amount to be immediately available, in order to continue the work now being done by the dredge boat Caucus.

The amendment was agreed to.

Mr. OWEN. On page 44, after line 2, I move to insert:

And thence to Tulsa, reporting an estimate of the cost to make the same navigable.

The amendment was agreed to.

Mr. TELLER. On page 19, I move to strike out from line 14 to the word "compensation," in line 5 on the next page.

Mr. PILES. I do not get the amendment.

Mr. TELLER. It commences in line 14 and continues to line 5 on the next page.

Mr. PILES. I wish the Senator would withhold the amendment until the Senator from Michigan, who has stepped out of the Chamber, returns. That affects his State very materially. I do not think he would like to have it disposed of in his absence.

Mr. TELLER. It does not seem to me as though we are going to complete the bill to-day.

Mr. FRYE. I hope the Senator from Colorado will not refrain from offering his amendment in the absence of the Senator from Michigan. I want to get the bill through before 2 o'clock.

Mr. TELLER. I have offered the amendment merely because I want to keep my personal record reasonably clear. I desire the Senate to understand that I do not agree to it.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Colorado.

The amendment was rejected.

The bill was reported to the Senate as amended, and the amendments were concurred in.

Mr. TELLER. I desire to make a formal motion. I will not debate it. I move to strike out section 11.

The amendment was rejected.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

HOUR OF MEETING MONDAY.

Mr. ALDRICH. I move that when the Senate adjourns to-day it be to meet at 11 o'clock on Monday next.

The motion was agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives by Mr. W. J. Browning, its Chief Clerk, announced that the House had passed the following bills:

S. 8554. An act authorizing the Secretary of the Interior to sell part or all of the surplus lands of members of the Kaw or Kansas and Osage tribes of Indians in Oklahoma, and for other purposes; and

S. 8654. An act for the relief of certain occupants of unsurveyed public lands in Craighead County, Ark.

The message also announced that the House had agreed to the amendments of the Senate to the following bills:

H. R. 4286. For the relief of John Shull; and

H. R. 15681. For the relief of the Compañía de los Ferrocarriles de Puerto Rico.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 27053) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. SCOTT, Mr. HAUGEN, and Mr. LAMB managers at the conference on the part of the House.

AGRICULTURAL APPROPRIATION BILL.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 27053) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. WARREN. I move that the Senate insist upon its amendments, that the request of the House for a conference be granted and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Vice-President appointed Mr. WARREN, Mr. DOLLIVER, and Mr. MONEY conferees on the part of the Senate.

MEMORIAL ADDRESSES ON THE LATE SENATOR LATIMER.

Mr. TILLMAN. Mr. President, I submit the resolutions I send to the desk, and I ask for their present consideration.

The resolutions were read, considered by unanimous consent, and unanimously agreed to, as follows:

Senate resolution 310.

Resolved, That the Senate has heard with profound sorrow of the death of the Hon ASBURY C. LATIMER, late a Senator from the State of South Carolina.

Resolved, That as a mark of respect to the memory of the deceased Senator, the business of the Senate be now suspended to enable his associates to pay proper tribute to his high character and distinguished public services.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased Senator.

Mr. TILLMAN. Mr. President, it is a little more than fourteen years since I was sent by the people of South Carolina to be one of their representatives in this Chamber. As things now are that is about one-third of the average lifetime of a man, and while during the time there have transpired many events of national importance, it seems but a brief period after all. Yet during this comparatively short span I have served here with five United States Senators from South Carolina, and after the 4th of March my sixth colleague will have taken the oath at the desk. It is a strange coincidence that all of these men who have come and gone save one were younger in years than I. Three of them have answered the roll call on the other side of the river. First in service, John Lowndes Manning Irby, bright, brave, witty, and genial; next, the knightly and courtly Joseph Haynesworth Earle, forceful, logical, chivalrous, and in every way well equipped for work in the forum or on the bench; last, ASBURY CHURCHWELL LATIMER, who, while denied in youth those advantages of education possessed by the other two, was in some respects the superior of either of them.

His was not a career which one would naturally expect to follow from childish environment and family tradition, as was the case of the other two. While of a good family, his opportunities, owing to the war, were poor and he early had to begin the struggle of life, which barred him from the education and that acquaintance with books which are in great degree essential in a public career. But the obstacles he overcame and the force of character and native mental vigor which he displayed marked him as a man who of necessity would have made an impress in any walk of life.

He was born in what was then Abbeville district, South Carolina, July 31, 1851—Abbeville, which has given birth to or been the homes of so many of South Carolina's illustrious sons—Calhoun, Cheves, Noble, McDuffie, Burt, Gary, McGowan, the two Wardlaws, Perrin, not to mention my present colleague. The original settlers of that county were Scotch-Irish Presbyterians and French Huguenots. Their descendants have well illustrated the sturdy traits and high ideals of their ancestors.

ASBURY CHURCHWELL LATIMER was only 14 when the war closed, and could not, on account of poverty, devote much time to getting an education, and early set about mapping out a career for himself and working toward making of life a success. He

married quite young, one of the safest and best things for any man to do who wishes to preserve high ideals and gain the inspiration which alone comes from contact and association with good and noble women. He had a hard struggle for a few years as a farmer, but, possessed of great energy and a keen business sense, he soon outstripped most of his fellows in gathering a competence, and was so successful as a business man that in later years he had grown to be what in the South is considered wealthy.

After the death grapple upon which the people of South Carolina entered in 1876 with the carpetbaggers and negroes for the maintenance of white civilization, during which crisis Mr. LATIMER did his full duty, like many other farmers, he relapsed into indifference to public affairs. It was only in 1890, when 39 years of age, that he came to the front as an active political factor in his county and State. He had moved to Belton, in Anderson County, in 1880, and when what was known as the "farmers' movement" or "reform campaign" shook the State from center to circumference, his sturdy good sense and forceful manner of speaking won him the confidence and support of his friends and neighbors, and he soon became an acknowledged leader.

It was during the year 1890 when I was a candidate for governor that I first became acquainted with him, and I have had, therefore, the fullest opportunity to observe and note with surprise and admiration the wonderful growth of the man. His ignorance of public affairs and current political events was then so great that it would have been thought utterly absurd that two years later he would be a successful candidate for Congress against one of the ablest lawyers and best speakers in the State, or that it would be possible for him to hold that high position with great credit to himself and entire satisfaction to his constituents for ten years, and then be elected to the United States Senate over a man so popular that he had been recently elected governor and who was withal a good orator and able lawyer. These achievements in politics were not brought about by chicanery or trickery of party conventions, but through the primary system, where the appeal must be made directly to the voters themselves. When he entered the race for Congress in 1892 I doubt if he had ever attempted to address at any length any assemblage other than a Sunday school or other religious gathering, for his bent of mind was in that direction. But with very little practice he developed into one of the best stump speakers we have ever had in the State.

When he entered Congress he began to study public questions, and the facility with which he mastered details and gained acquaintance with political and governmental history was well-nigh marvelous. Only those who know how ignorant and simple-minded he was eighteen years ago, as far as politics was concerned, could believe it possible that in so short a time he would become versed in public affairs to such an extent that he could venture to enter into the debates in the other House and in the Senate with any degree of safety or success.

While a Member of the House he early became deeply interested in the subject of rural free delivery, and he went about pressing experiments along that line and urging its universal adoption with such vigor that he must be considered as one of the pioneers and a potent instrumentality in the inauguration of that great and beneficent system. Another matter with which his name will long be associated was the good-roads question. So well posted did he become on this subject that he was invited to many States other than his own to address meetings called for the purpose of advancing the construction of better highways.

He was an ardent friend of every measure looking to the advancement and uplift of the agricultural interests. Being a practical farmer he understood the needs of other farmers and could the better set about aiding in legislation for their advantage. Early in his public career he became the stanch friend and supporter of the Agricultural Department, and was ever on the watch to aid in the development and growth of that great bureau.

Up to the age of 40 it is doubtful if any man in American politics had made so little preparation for a political career as he. There are not any that I know of, except Andrew Johnson, who with so small a beginning, achieved a more signal success as a public man. He and I entered the political arena together in 1890, and were on terms of intimacy and friendship without a break during the entire eighteen years since. I have little or no doubt that had he lived he would have been reelected to the Senate. And thus one of the strange and inscrutable manifestations of the Divine Providence is brought home to me, that a man so much my junior in years, and so strong and vigorous in body and mind, should have been snatched from a life of great usefulness and promise in such an untimely and unexpected manner.

He was in this Chamber, healthy and strong, attending to his duties as a Senator, one week, and the next we were called upon to witness his sudden and sad death. Of a sturdy and vigorous stock and with every promise of a long and useful career, he departed from among us, again illustrating, as is so often the case, the beauty and pathos of the lines:

Man that is born of woman is of few days, and full of trouble. He cometh forth like a flower, and is cut down: he fleeth also as a shadow, and continueth not.

As the waters fail from the sea, and the flood decayeth and drieth up: So man lieth down, and riseth not: till the heavens be no more, they shall not awake, nor be raised out of their sleep.

It is idle for us to complain or to wonder at the inscrutable ways of the Creator. These things have always been and always will be. We come into being and enter upon the battle of life full of ardor and eager for the fray. In the midst of our work the summons comes, and we know not why we are called, but we must respond. So we pass along down to the grave and join the great and silent majority who have preceded us.

Senator LATIMER had his faults and weaknesses, as all of us have, but he was generous, brave, and had many noble qualities. He is gone and we mourn his loss. He can not come back to us, but we must go to him in a brief while.

The boast of heraldry, the pomp of power,
And all that beauty, all that wealth e'er gave,
Await alike the inevitable hour:
The paths of glory lead but to the grave.

Mr. HEMENWAY. Mr. President, I want to join my friends in adding a word of tribute to the memory of Senator LATIMER. I learned to know his real worth while serving with him in Congress, and I am told that in his early life he selected the motto, "that success lay not in the character of the work, but in the vim and thoroughness with which it was executed." What a worthy precept that is! And it is especially worthy in this day of tremendous business activity and wonderful national development.

Most men who fail, fail not because of inability or incapacity, but because of the lack of thoroughness and judgment with which they undertake to do things. Senator LATIMER stood high in the esteem of his colleagues in the Senate, and his work was highly appreciated. And we pay him the highest tribute when we say that he was a high-minded, honest, industrious Senator, who loved his home, his State, and his country.

Mr. OVERMAN. Mr. President, on the 4th day of March, 1903, 30 Senators were sworn in and took their seats in this Chamber for a term of six years, and it is remarkable but sad to relate that in so short a space of time one-sixth of that number have passed into the great beyond. Of that number, together with 9 others of our noble Senators who within that short time have taken their chamber in the silent halls of death, was Hon. ASBURY C. LATIMER, junior Senator from the State of South Carolina, in whose memory I, mindful of his long and patriotic public service, desire to add a few words to those which have already been said in testimony of his worth and character.

I would contribute a modest and simple tribute to our friend whose presence we miss and whose face we will see no more upon this earth. At the time he entered the Senate he was in the fifty-first year of his age—just in the prime of his manhood. Of splendid physique, healthy and robust, tall and stately, he gave promise from a human standpoint of outliving all of his class who were sworn in that day.

He came to the Senate from the House of Representatives, where he had served for ten years. Like most of our southern youths, at the close of the civil war he had but few advantages for an education, and only attended for a few months in the year what was known as the "old field" schools. He worked upon the farm. He came up through poverty, amidst great struggles and tribulations, without a profession, from the farm to reach the greatest office in the gift of the people next to the Presidency.

In his young manhood he became one of the most successful farmers in his community, and in 1878 he was happily married to Miss Alice Brown, a niece of Governor, afterwards Senator, Joe Brown, of Georgia. She brought to him beauty, refinement, and culture. She cast her lot with him for better or for worse, and throughout his life from that time until his death she was an inspiration to him. He was successful in business and was looked upon as one of the leading citizens in his county.

When the great political upheavel came in South Carolina, when the fires of discontent against the old régime which had been for years smoldering in the hearts of the people, burst forth, when the dissatisfaction of the country people against what was called the "aristocrats"—the city people who for years had held all the important offices—at last found expression in

the Farmers' Alliance meeting, in the public meetings, in meetings held in the little country schoolhouses all over the State, Mr. LATIMER, under the battle cry of "Tillman and reform," sprang into the thickest of the fight, arousing the people of his section to almost a frenzy, and he soon became the leader of that faction in his county. It was hard to find a man to run for the nomination for Congress against the brilliant George Johnstone, one of the best lawyers and best speakers in the State, and who was then serving his first term in Congress, and who, according to the old custom which prevailed there, was entitled to an indorsement and another term.

But some one must be found to oppose him, and at a late hour LATIMER entered the list and announced his candidacy. He met Johnstone in joint debate, and, to the surprise of himself and to the great satisfaction of his friends, it was soon seen that he was easily a match upon the stump for Johnstone; and when the returns came in LATIMER had won by a large majority. This was his first campaign.

He was simple, but forceful and direct in speech, and never deceived the people. He was plain, but earnest and straightforward. He understood the people and knew their wants. He promised them the reforms which they were demanding and did what he could for their accomplishment. He impressed himself upon all who heard him, and they supported him gladly. Four times after that he was nominated for Congress, and elected without opposition. He loved the people and they loved him; and he loved his State. He was ever watchful of their interest, and was soon recognized, not only by the people of his own district, but by the people of the whole State, as one of the most useful members of his congressional delegation. He was always trying to do something for the people of South Carolina, and succeeded where many times before others had failed.

In 1902 he entered the race in the primary for the nomination for United States Senator against ex-Governor John Gary Evans and Senator John L. McLaurin; and after a bitter and most exciting campaign, in which he met upon the stump in joint canvass in every county of the State these able adversaries, everywhere winning the hearts of the people, he was chosen to succeed Senator McLaurin in this great body.

As he was a faithful Representative so he was a true and faithful Senator. He never tried to advertise himself. He made no pretentions to oratory, nor to greatness, but was unassuming and did his work well, untiring and zealous in doing what he thought was best for the interest of the people and the welfare of his country. He seldom joined in the debates in the Senate, but when he did what he said was practical and to the point.

While liberal and generous in his support of public measures intended to promote the prosperity of the whole country, in whatever was proposed to advance the interest of his State, he was zealous, alert, and his every effort was aroused and excited for its accomplishment.

He was sincere, generous, genial, warm-hearted, and kind in his nature. He was a member of the Methodist Church and attended regularly church services on Sunday morning. He loved to join in the singing of the beautiful sacred hymns, and often his strong, mellow voice could be heard in praise to God. He was charitable and gave cheerfully of his means to the support of the church and her institutions.

He was a devoted and indulgent father, a fond husband, and kind friend. He was never so happy as when at home on his farm in South Carolina, surrounded by his good wife, four charming daughters, and his noble son of whom he was justly proud. It was there in the tranquillity of that sacred spot where he found his highest peace, and he knew from a glad and bright experience that earth holds no joy so sweet as the quiet contentment, the confiding love, and the hallowed associations which cluster around the ideal home.

But while we mourn his loss and miss his pleasant voice, his kindly manner, and genial companionship, we may well pause at the threshold of the touchingly beautiful home life which has been enshrouded in impenetrable gloom and the deepest sorrow.

In the presence of his grief-stricken loved ones and many sorrowing friends and a company of distinguished citizens who had come to pay their last tribute of respect, all that was mortal of Senator LATIMER was laid to rest in the modest little cemetery near his beautiful home in the little town of Belton.

He has passed on to join the great majority. It is not permitted for us to know where the loved ones go:

But this we know: Our loved and dead, if they should come this day,
Should come and ask us, "What is life?" not one of us could say.
Life is a mystery as deep as ever death can be;
Yet, oh, how sweet it is to us, this life we live and see.
Then might they say, those vanished ones, and blessed is the thought,
"So death is sweet to us, beloved, though we may tell you naught;
We may not tell it to the quick, this mystery of death;
Ye can not tell us, if ye would, the mystery of breath."
The child who enters life comes not with knowledge or intent;
So those who enter death must go as little children sent.
Nothing is known. But I believe that God is overhead,
And as life is sweet to the living, so death is to the dead.

Mr. CARTER. Mr. President, on the first day of this month one year ago there was no more rugged, vigorous Senator in the Chamber than the junior Senator from South Carolina. Mr. LATIMER was physically strong and promised a long and useful career. In the course of our proceedings, before the month had closed, this Chamber was brought to silence by the announcement of his death. His surrender to the final impulse was less to be expected than that of any other Member of the body. He was a man of good habits who had led a regular life, although a great and indefatigable worker, and his general appearance, with enduring strength manifest in every movement of his stalwart and splendid frame, indicated that it would be a long series of years before the reaper would reach him.

But he passed away, and a committee of the Senate was appointed to attend the funeral services at his home. I was appointed a member of that committee and was a witness to the tribute of affection and respect paid to his memory by the people who knew him best in the rural district in South Carolina where he had lived throughout his life. It was a sad homecoming for the family; it was trying to the feelings and sentiments of the committee to witness the manifestations of deep sorrow and grief, for it was touchingly shown that Mr. LATIMER was a lovable man. Although rugged in manly strength, vigorous in mind, and stalwart in frame, he was of a gentle and kindly disposition. In all his relations with his colleagues deference for the wishes and feelings of others marked his deportment always. His every action betokened gentle breeding and high sentiments.

He entered this Chamber as a Member of the Senate on the 4th day of March, 1903. He was a trained legislator, because he had ten years of previous experience in the House of Representatives. His work in that body was not of a perfunctory character, for at the very beginning he had undertaken work of a serious nature. He was the pioneer in the House of Representatives, as was the senior Senator from New Hampshire [Mr. GALLINGER] the pioneer in the Senate, of a movement to secure national aid in the improvement of the post-roads of this country, and his efforts in behalf of that movement ceased only with his death. He did not live to see the movement successful, but he did live to see the country awakened to a realization of the necessity for some broad and comprehensive action with reference to the important subject to which he gave so much earnest attention.

His constant devotion to duty had much to do with the early appearance of the summons to lay down his burden. I doubt if the people of the country at large ever realize the exacting duties which devolve upon a Member of either House of Congress who is intent upon faithfully and fully discharging the duties of a Representative from a district or a Senator from a State.

I entered the House of Representatives twenty years ago, and within the last few minutes I have run over the roll call of the Senate and the House as then constituted. I find that of the membership of this Chamber in 1890, only five remain, the Senator from Rhode Island, the senior Senator from Illinois, and two Senators from Maine, and the senior Senator from Colorado. Within the period of twenty years all have gone forth, either into private life or "over the river to rest under the shade of the trees." But the dread reaper has garnered in a greater harvest than the call to duty in private life.

Of the membership of the Senate of twenty years ago, 52 have died and only 28 survive, and of the 28 survivors, 5 still remain Members of the Senate. After the 4th day of March, a few days hence, only 4 will remain.

In the House of Representatives of that day, the House, of which the present presiding officer [Mr. LA FOLLETTE in the chair] was a Member and a distinguished member of the Committee on ways and Means, the roll call, if sounded now in the Chamber, could not be answered by many who were then distinguished legislators, statesmen, and citizens of the Republic. I recall our late lamented President, who was then chairman of the Committee on Ways and Means of the House; the great Speaker, whose wonderful achievements in parliamentary science challenged the attention of the world; Hon. Nelson Dingley, from Maine; William McKinley, of Ohio; Thomas B. Reed, of Maine; and a line of men as distinguished in their day as men have been in the history of this Republic at any time. Men who

should be living now in the full vigor of manhood have broken down, one after another, under the pressure of the exacting and oppressive life which must be led by the Senator or Representative who justly conceives his relation to his people or his State and to the eighty-odd million of people whose destiny and well-being are committed to the care of these two small bodies of men.

Added to the ordinary burdens of the day is that oppressive sense which comes from labor not only unrequited, but frequently misunderstood and often misrepresented. It sometimes happens, not through the malice of men, but through their thoughtlessness, that when every nerve is strained the Senator or Representative is set before the public as trying to do the very opposite of that which he is strenuously endeavoring to accomplish. Misrepresentation, harsh, cruel, and un-Christian-like criticism have much to do with breaking down the nervous and physical organism of struggling men in public life. I think we can take it for granted that the expectancy of life in the arena of public affairs is much diminished by the combination of burden and unjust criticism.

Our late departed colleague and friend was of the earnest, tireless manner of man. His habits were good, his purposes were lofty, his devotion to his people unquestionable. Every day was with him a serious day and every task a serious task. He lived an honorable life, and in the good opinion of all who *knew him* best those who loved him best may find their greatest consolation.

Death does not end all even to those who have no faith in an existence beyond the grave, for as a pebble cast into the middle of the sea will send a tiny warning wave to every shore, so will each good influence once set in motion reach to the uttermost ends of human experience. In the good he did, in the example he set, and in the things he achieved for his home, his neighbors, and his country, our lamented friend left a common legacy for all mankind.

Mr. SMITH of Michigan. Mr. President, it has been very hard for me to realize that the late Senator from South Carolina has been called to his final home by death. He was the type of man that one would imagine might live always. Large, robust, strong physically and mentally, he looked as though he might stand as a great oak in the forest of life for many years to come.

I had the pleasure of knowing the Senator from South Carolina for many years, first as a Member of the House of Representatives, where I served with him for a decade, and when this place came to me and I entered the Senate for the first time as a new Senator I was led to a seat beside the late Senator from South Carolina.

In this historic Chamber I was instructed, cheered, comforted, and stimulated by him, and the friendship which had grown warm and valuable through the years of our acquaintance came as a benediction to me in this new place.

The late Senator from South Carolina was an extraordinary man. Full of fire and dash and impulse, yet he could control his feelings so admirably that few who came casually in contact with him ever realized the depth of his feeling or the scope of his desires.

Mr. President, I enjoyed the friendship of the late Senator LATIMER during the years of our acquaintance, and I rise to-day, informally, merely for the purpose of testifying to the beauty of his character, the strength of his friendship, the devotion of his heart and mind to the people he served, and especially the unflagging loyalty of that Senator to the State which sent him here.

South Carolina has sent to this Chamber many eminent men. Much of the history of our country is intertwined and interwoven with the experiences of South Carolina's representatives, and the distinguished senior Senator from that State [Mr. TILLMAN], whose colleague Senator LATIMER was, suffered a great personal loss when he was called away.

With that harmony and unity of purpose which should characterize the Representatives of States in this Chamber, they struggled together and won their victories together in this great field.

South Carolina has contributed many able men to the public service and should be proud of her Senators now here. Mr. LATIMER was an honor to his State, an honor to his friends, and an honor to his country, and his memory will never be blotted from my mind.

I love to think of him as I saw him last here in this Chamber, with quiet dignity, unobtrusively moving among his fellows, vigilantly looking after the routine business of his State, and I love to think of him as I saw him across the sea, when, freed from that official care which is so burdensome to us all, he acted like a boy at play as he moved about in that recreation upon which he had set his heart; and the new experiences in strange lands kindled his soul and imparted life and refreshment to his last years.

Mr. President, Senator LATIMER was a fine type of the southern gentleman—quiet and unobtrusive; gentle, yet firm; gallant, yet modest; courteous, yet brave; and helpful to all with whom he came in contact. I hope, as this day is set apart in his honor, as a tribute to his memory, that it may also instill in the heart of every Senator his noble virtues, which shall ever remain as a rich heritage to the people of our common country.

Mr. FLINT. Mr. President, it was my good fortune to be intimately associated with the late Senator from South Carolina during the brief period which we served together in the Senate. We were members of the Senate Committee on Public Lands, and in the work of this committee I had an excellent opportunity to observe his character, disposition, and methods of performing the duties which devolved upon him. He was, first of all, a practical man; and being endowed with a large measure of native shrewdness, wisdom, and what is known as "common sense," his opinion, advice, and suggestions were eagerly sought and greatly valued by his colleagues of the committee. He was particularly well fitted for service upon this committee, as he always took a great interest in the public lands of the country, and especially those lands adapted to agriculture, with a view to making such disposition of them as would be of the greatest possible benefit to the farmers of the country. Having been a prosperous farmer himself, he was an enthusiastic believer in the efficacy of an early experience and training upon the farm for the development of the highest type of citizenship.

He took great interest in the movement which was inaugurated some years ago for the enactment of a federal law for the reclamation of the swamp and overflowed lands of the country, along the lines of the irrigation act. With his usual energy and thoroughness, he contributed largely to the vast amount of data which was collected upon this subject, and was an enthusiastic supporter of the measure which was finally favorably reported by the Senate Committee on Public Lands.

Senator LATIMER was essentially a self-made man. The obstacles which confronted him in his early youth and during his young manhood, which deprived him of the opportunities for academic training, have been dwelt upon at length by others who have delivered eulogies upon his life, and need not be enlarged upon by me.

We read of Senator LATIMER's first activities in the political affairs of his State when he took part in the campaign of 1876. In 1890 he was elected chairman of the Democratic party in Anderson County, and was reelected in 1892. He administered the affairs of his party so successfully that he was urged to enter the race for lieutenant-governor, but declined. Shortly after this he was elected as Representative in Congress from the Third Congressional District of his State, and entered upon his career of ten years of unbroken service in that branch of the National Congress. As a climax to this conspicuous career he was elevated to the Senate and had served five years when unexpectedly and greatly to our sorrow he was taken from among us. His friends and colleagues were greatly shocked by his sudden and untimely death, and with one accord we gather here to-day to pay our respects and to honor his memory. Mr. LATIMER was only a little beyond the point which is usually considered middle life, and his sudden demise serves as a reminder of the uncertainties of life and the necessity for us to put forth our best efforts while we may in order that we may not leave our work undone. Though he died in the prime of life, his industrious habits, zeal, enthusiasm, and energy with which he pursued his daily tasks enabled him to perform an average man's work in the comparatively short period which he lived.

From an humble farmer lad to the highest place within the gift of the people of his State is a record of which anyone might well feel proud. When we have coupled with this a career that was beset with difficulties and obstacles from the beginning, all of which were overcome and success attained, notwithstanding the lack of the early opportunities which are usually essential to success, it distinguishes the man as a leader among men and as one whose example might well be emulated by the youth of our land.

Senator LATIMER's friends and neighbors, and all those who knew him best, testify with one accord to his Christian manhood, his consistent living, his beautiful home life, and his loyalty and devotion to his friends, which, after all, are more to be desired than great riches or great honors.

Mr. DOLLIVER. Mr. President, I appreciate very much the privilege, which has come to me by the invitation of the senior

Senator from South Carolina [Mr. TILLMAN], to say a few words about the public services of the late Senator LATIMER. I have felt all the more drawn to this mournful duty, since the Senator an hour ago asked me to perform it, because during the whole period of his service in the House of Representatives I was his colleague and his friend.

In the early years of service in the House an opportunity, which never afterwards comes to us, is given, of knowing with friendly intimacy those who are our associates in that service. So, it happened that, being young Members of the House, we were thrown much together and had that rarest of all the privileges of public life—the opportunity of close personal acquaintance. The House of Representatives, especially in those days, was a somewhat stormy and tumultuous body. It had its own standards for the recognition of ability and merit, and, tested by those standards, more severe, I think, than in any other arena of service in the world, Senator LATIMER speedily rose in the estimation of his colleagues to a position of influence and growing usefulness.

Shortly after I came to this body he was elected to the Senate, and it was a special pleasure and gratification to me to find that we were to work together upon the same committee—the Committee on Agriculture. Sitting there side by side until he passed from among us, I had a still further opportunity to know him and understand his motives and views of life and of duty, public and private, and to set a somewhat accurate estimate upon his character and upon his talents. So on this day I am glad to speak of his career, that fine and faithful public service which ended so untimely with his death.

It has been said here that he was without educational advantages in his youth. I believe that little or no evidence of that can be found in the things that he said or in the things which he accomplished while in the Congress of the United States. Education can do much for every man; and yet Senator LATIMER brought to the work of his manhood a preparation still more valuable than the training of the schools—the discipline of hardship, the culture of experience, that excellent drill of daily labor which comes not from the academies of learning, but from a postgraduate course in the university of the world in which we live.

I was especially impressed during my acquaintance with him with the fact that while he belonged to the period following the rebellion, inheriting possibly many of its peculiar points of view, yet he seemed less encumbered by them than any man from the South whom I have ever known.

He was one of the pioneers of the new school of American political thought. He anticipated the disappearance of old theories. To him it seemed that the Government of the United States ought to be in a practical, working sense, the servant of the American people. He had the same interest that we all have in questions of war, and peace, and diplomacy, and commerce, and industry, but to his mind the largest political questions in America were the questions that concern the lives and the homes and the welfare of the 80,000,000 of men, women, and children who constitute the Government of the United States. So in his service in Congress hardly a trace of partisan dogma can be found. Nor did he ever find trouble in the Constitution when the task was before him to strengthen the foundations upon which society itself rests.

He had a tempestuous political education in the same school that brought into public life the great abilities of our honored friend, the senior Senator from South Carolina [Mr. TILLMAN]; but he did not in this Chamber, it appeared to me, emphasize any of the acute and vital issues, the extreme and explosive opinions, which were a part of the political environment of his earlier years. I do not mean that he deserted his convictions, or held a loose view of his party obligations. I mean, rather, that in the interest of the work he was trying to do here he was able to subordinate himself, to push aside the narrow and transitory things which often embitter and enfeeble our public life, in order to find a surer road to the accomplishment of higher and better ends which he pursued.

In both Houses of Congress his attention was given to everyday matters into which partisanship enters in no sense at all. He was a student of what may be called the "lowly problems of government." He recognized the fact that the great bulk of the business of the Congress of the United States is without any partisan color of any sort. And so it seemed to me that in these respects he dismissed more completely than any other man with whom I have been associated the notion that the Government of the United States is a partisan affair. We find him engaged in the obscure and unheralded work of the committees to which he was assigned, and the questions that interested him most were the questions that lie nearest to the earth and concern most intimately the daily lives and happiness of the American people. For example, he was an advocate, possibly the most influential in the Senate, of good roads for the people of the United States.

He had that vision which enabled him to see that the least excusable losses of American agriculture do not lie where we so often place them, but lie at the very doors of the people; and the thing that seemed to impress his mind most as a member of the Committee on Agriculture was the fact that we lose more in the United States in hauling the crops which we raise into the town markets near which we live than we afterwards do by the conspiracies of the market place or the abuses of interstate commerce. I have often heard him say that if he could realize his dream of a model system of internal transportation on the common public highways of the country, he would have done more good than anybody could hope to do by legislative reforms of railway management in the United States.

He was equally interested in the problems of popular education, especially in the South, and most of all the modern efforts to make our schemes of elementary education respond to the needs of our industrial life. So he labored quietly and modestly, without ostentation or display of any sort, in those tasks which appeared to him to represent in a comprehensive sense the living questions in which the Government of the United States ought to concern itself.

For myself I not only respected his character, but I tried to study the attitude of his mind and to appreciate that fine philosophy of our affairs which enabled him thus to throw aside partisan motives, to dismiss from his mind almost entirely the spectacular questions which are most attractive in our public life, and devote himself with earnest attention to the humbler questions which bring the Government of the United States near to the people, making it responsive to their needs and effective in the guidance of their social progress. It was against his homely intuitions that the civilization of one century should be left helpless on account of a meager understanding of a Constitution made by the people of another.

He will be remembered in both Houses of Congress for his stalwart strength of mind and of body. Above that, he will be remembered for a certain modesty and fidelity of character which made him a reliable worker in whatever field was assigned to him in the business of the United States.

I do not know what his religious views were. He had a characteristic reticence as to the life he lived within himself. I never heard him say a word in all our conversations about that, but if his actions interpreted his faith—and the acts of men are the surest expression of their faith—we do not go astray in paying to him the loving tribute which belongs to a broad-minded patriot, a representative citizen, and an upright Christian man.

Mr. GARY. Mr. President, men of exalted character and civic virtue have ever been thought worthy of admiration and their memory worthy of perpetuation. Throughout the land we have erected and are each day erecting monuments in honor of those who have been conspicuous for the possession of such attributes. It is the boast of Rome that the Via Appia and the Via Sacra are lined with monuments to her consuls, generals, and senators, men who have done some service for their country.

Impelled by the same sentiment and actuated by the same desire to put on record our appreciation of exalted character and worthy citizenship, we have this day paused in our labors and laid aside our calendar to honor one who exemplified in the highest degree exalted character and worthy citizenship—one who has done some service for his country. Surely, Mr. President, on such occasion I should add my voice to the chorus of praise of him whose people are my people, whose friendship I had the honor to enjoy, and who has done much service for the State I in part represent.

A distinguished queen's counsel has said:

The highest gospel is a biography—

And he well adds—

So is the life of every good man.

A casual study of the career and character of our departed friend will demonstrate how well his life illustrates this aphorism. That he was a good man no one will deny. When an account shall have been given of the deeds done in the flesh many will be the acts of benevolence and deeds of kindness to his credit; for, like Abou Ben Adhem, he loved his fellow-man. He was ever ready to lend a helping hand to such as might need his assistance. But his was no ostentatious giving of charity that the world might see and applaud, but rather after the fashion of that enjoined in Scripture, which says:

When thou doest alms, let not thy left hand know what thy right hand doeth.

Not only was he a good, a benevolent, and a kind-hearted man, but he was a man of statesmanlike qualities as well.

"He dipt into the future far as human eye could see," and ere it was too late he sounded the first warning note to the people of my State against that steadily deteriorating process which goes on on every hand apace—that process of whose danger Horace Bushnell once said:

The constant importation, as now, into our country of the lowest orders of people from abroad, to dilute the quality of our natural manhood, is a sad and beggarly prostitution of the noblest gift ever conferred on a people.

Senator LATIMER entertained similar sentiments, and he proclaimed them in no uncertain terms. May we, Mr. President, have the wisdom to heed his timely warning while we are yet a homogeneous people.

Then, too, Mr. President, as another instance of his statesmanlike qualities and of his desire to promote the welfare of the masses, we might mention his insistent urging of our people to build better roads and build them upon scientific principles. To you people of the North this may mean but little, because you have them already, but to us of the South, to us who for centuries have been accustomed to and satisfied with roads that are a hindrance to progress and the development of our natural resources, such stimulation as was given by his eloquent tongue was sadly needed. With us he was the pioneer along this line, and at times he seemed almost as one crying in the wilderness. His insistence and eloquence have already borne fruit, and had he lived a few years longer he would have witnessed a full realization of his hopes.

Did time permit I might recount the many blessings our people now enjoy as a direct result of his work in establishing free delivery of our mails in the rural districts. In this, if he was not the pioneer, he was, at least, the earnest, insistent, and effective worker. Indeed, Mr. President, his unceasing efforts seemed always to be toward bettering the condition of the masses.

It has been said, however, that he was not an educated man. If by the term "educated" is meant "trained in college walls," the claim will be readily granted. But, sirs, if education signifies such training as fits one to think energetically and with concentration along right lines, then he was essentially an educated man, albeit that education was not received in college walls nor at the feet of some mighty Gamaliel. He was what might be termed a "self-educated man."

Born and reared on a farm, inspired by the observations of nature in its purest form and by the teachings of God-fearing parents, he early learned to cherish high ideals and lofty aims. With such a foundation upon which to build and being possessed of robust health, strong common sense, and a keen and unerring perception of human nature, he felt less than most men that lack of college training, regarded by some as indispensable to the highest development. He was, indeed, another illustration of what Burns so aptly says:

The pith o' sense and pride o' worth
Are higher ranks than a' that.

It is true that he took no conspicuous part in the great debates in this Chamber, yet he was always at his post of duty, ever ready to take advantage of any opportunity to befriend his people and ameliorate the conditions of the masses. But of his work as a legislator and of his usefulness as a Member of this body, there are others better qualified to speak than I.

But it seemed fitting, Mr. President, that I, who have known him from early manhood till his untimely end, should speak of him as a friend, neighbor, and citizen. It seemed to me that it is proper that I, who was in a position to observe it, should convey to this body some idea of the profound sorrow that was felt and manifested throughout my State when it was learned that ASBURY C. LATIMER was no more. When it was learned, Mr. President, that the Black Camel had knelt at his door, that in the midst of life, duty, and usefulness his sun of life had gone down, the people felt that their friend and tribune had gone, that they had sustained a loss they could ill afford. But his career is ended; his noble work is done; and the world is better for his having lived in it. By his work the great masses of common people were made better and happier, more contented and more comfortable. The present condition of progress, improvement, and happiness in the rural districts is a constant reminder of his friendship for the people, and on account of this his memory will ever be cherished by them. But "let us seek no further his merits to disclose."

Let us conclude this inadequate tribute by repeating, as applicable to him, the words of one of South Carolina's most eloquent sons, who said of another:

He acted throughout life on the maxim that in morals it is more to deserve than to command success.

He has left to his children, to the State of his birth and home a precious legacy of the lesson of his life. May it be an inspiration to us all, may we strive to imitate his worthy example, and may his untimely taking off be to us a reminder that the young may die, the old must die, and the wisest knoweth not how soon.

MEMORIAL ADDRESSES ON THE LATE REPRESENTATIVE POWERS.

Mr. FRYE. Mr. President, I offer the resolutions which I send to the desk.

The VICE-PRESIDENT. The resolutions will be read.

The resolutions were read, considered by unanimous consent, and unanimously agreed to, as follows:

Senate resolution 312.

Resolved, That the Senate expresses its profound sorrow on account of the death of the Hon. LLEWELLYN POWERS, late a Member of the House of Representatives from the State of Maine.

Resolved, That the business of the Senate be now suspended, in order that fitting tributes may be paid to his memory.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and to the family of the deceased.

Mr. FRYE. Mr. President, the Powers family was rather a remarkable one. Arba Powers, a stalwart man physically and mentally, built for himself a log cabin in Maine, and from his home sent out into the world eight sons equally stalwart in mind and body. All of them, by their own exertions, aided only by heredity and an early training in economy, thrift, and hard work, achieved success.

Nearly all of them held important public offices in Maine and elsewhere, and discharged their official duties in a manner entirely acceptable to the people. These log cabins have, I think, made more valuable contributions to the Republic than have the homes of wealth and luxury. The oldest of these sons was Governor POWERS, to whose memory we pay tribute to-day. He had the advantage of education in our free schools, the first in the country having been established in the district of Maine.

It is an interesting incident that William King, our first governor, an ardent friend of Thomas Jefferson, visited him at his home at Monticello before he entered upon the duties of his office, and Jefferson, at his request, wrote the article in our Constitution which perpetuated our free-school system.

Mr. POWERS continued his studies in the academy; then for two years in Colby University; then entered the Albany Law School, from which he graduated with honor. He commenced the practice of the law at Houlton, in Aroostook County, the northeast county of this country, then mostly in wilderness, now said to be, in the value of its farm products, the fourth in the United States.

He gained what in those days and in his State was a large and lucrative practice, so large that he was obliged to take as a partner his youngest brother, Frederick, who later on became a judge in our supreme court. Mr. POWERS was a business man of great sagacity, of clear foresight, and invested his surplus earnings in wild lands, which became very valuable and made him a wealthy man. At the time of his death he was the largest individual owner in Maine, having holdings amounting to 200,000 acres.

Mr. POWERS was attorney for the State for the county of Aroostook from 1864 to 1871; collector of customs for the district of Aroostook from 1868 to 1872; a member of the house of representatives in Maine for six terms, during one of which he was speaker; was elected governor of Maine in 1896 and reelected in 1898. He was elected to the Forty-fifth Congress from the fourth district and elected to the Fifty-seventh Congress in April, 1901, to fill the vacancy caused by the resignation of Hon. Charles A. Boutelle, and to the Fifty-eighth and Fifty-ninth and Sixtieth Congresses.

I was a Member of the House in the Forty-fifth Congress when Mr. POWERS made his first speech. It commanded the attention of the House and made a favorable impression. While serving his State in its legislature he had a commanding influence in the enactment of important legislation. As governor he had strong convictions and the courage of them; he was fearless, not parsimonious, but wisely economical; and by his forcefulness, his tireless energy, his business sagacity, made his administration of the affairs of the State eminently satisfactory to the people, who reelected him by an increased majority.

Governor POWERS was a first-rate, all-round lawyer, the product, I think, more frequently of the country than of the city practice. As an advocate he was forceful, exhaustive, and successful, if not eloquent.

As a legislator, his clear vision and business sagacity, together with his accurate legal knowledge and commanding presence, compelled attention and rendered him effective.

He was an ardent Republican, a firm believer in the protection policy, loyal to all of the fundamental principles of his party, and yet always tolerant to those differing with him.

He made hosts of friends and few enemies. Socially, he was very attractive, was a fine conversationalist, abounding in apt anecdote, and quick of wit. He was a devoted husband and a loving father.

He fought well life's battles, and won more victories than fall to the lot of most men. In his death his country, his State, and his family have suffered a most serious loss.

Mr. SUTHERLAND. Mr. President, of right and of necessity our concern is for the living rather than for the dead, because the living need us and the living we can help. The dead can only be held in affectionate remembrance. The span of our days upon this earth is short, and there is so much to be done by the living for the living that the task of doing it will ever remain our chief and most imperative duty. Life itself is a series of battles, wherein each of us must play the soldier's part and assume the soldier's responsibility, contending with whatsoever weapons we can best use, accepting, if we are wise, the victories which we may win without too much self-pride and the defeats which we may suffer without too much self-pity, and submitting at the end serenely, patiently, and courageously to the inevitable stroke of that final grim antagonist against whom no man can prevail. To one who has grown weary of the strife the stroke is sometimes not unwelcome; but whether sweet or bitter, to-day or to-morrow or finally it comes to all, and the vacant places in the ranks are filled by new comrades and the battle goes on, for the militant business of the world must be done, whoever may fall. While the stern necessities of the living will not permit us to sit idly with the dead, it is fitting and proper that we pause in the conflict and pay passing tribute to the memory of those who, having borne with us the heat and the stress of the struggle, have passed on to their final rest. It is appropriate that we reverently give expression to our gratitude for what they did and our appreciation of what they were. For this purpose we are here this afternoon.

Mr. President, it was my good fortune to meet Governor POWERS very soon after I became a Member of the House of Representatives in the Fifty-seventh Congress, and during the sessions which ensued I became intimately acquainted with him. He was a man of striking personality. His face and figure were so sufficiently out of the ordinary that they will not soon be forgotten, and both are very clearly in my mind to-day. His frame was strong, almost massive; his head large and well formed; his features rugged, strong, furrowed with deep lines. His face, when in repose, gave an impression of sternness, but was full of enchanting kindliness when illumined with the smile that always came at the word of a friend—a face, withal, full of character, expressive, thoughtful, which at once and instinctively inspired confidence and trust. His manner to all was gentleness and courtesy personified. He was by nature social—a lover of his fellows. He was a good conversationalist and a good listener, which is sometimes a more amiable, if rarer, accomplishment. He could tell a good story or listen to one with keen and intelligent appreciation. His good nature was infectious.

Mentally, he was, I thought, more sound than alert. He did not come to a decision quickly. His conclusions were not intuitive, but the result of patient, deliberate, painstaking, intellectual effort. Almost as a necessary consequence, having arrived at a determination respecting the merits of a proposition, he was immovable, albeit he was not dogmatic or stubborn. He listened to the views of others with an open mind; he did not differ for the mere sake of difference. He was an earnest partisan in the highest and best sense. A Republican all his life, the traditions and principles of that great party had been woven in the very warp and woof of his character, and yet he never hesitated to voice his disagreement whenever his party declared for something he could not indorse; but when he disagreed it was reluctantly, regretfully. Always he gave his own party the benefit of the doubt.

It is a trite thing to say of any citizen of the Republic that he is patriotic. That is the normal attitude, thank God, of all our people. It is equally a trite thing to say of any properly constituted man that he is humane. That is the common attribute of our modern civilization. But a good many people are patriotic in sentiment and humane in feeling who are neither in practice when the practice entails personal sacrifice. Governor POWERS believed that love of country was not a mere abstraction, but a deep and holy sentiment for which one should be willing to give his time and strength and property and, if need be, his life. When war was declared with Spain he was the governor of his State. He was urged to call a special session of the legislature in order that an appropriation might be made to equip and supply a regiment of volunteers for service in the field. This he declined to do, because of the great expense an extra session would involve, but instead he went into his own pocket and paid out of his personal means the great sum which was required to properly equip the troops and send them to the front. That the legislature at its next regular session promptly reimbursed him detracts in no measure from the generosity and patriotism of his act. There was no legal obligation on their part to do so, and most men would probably have called the legislature together instead of taking upon their own shoulders the burden and responsibility which he assumed without regard to the consequences.

He was strongly opposed to capital punishment. He thought, as many others have thought, that the poorest use to make of even a bad man is to kill him. The object of punishment for crime is threefold—to reform the criminal, to protect society against a repetition of the crime, and to deter others from committing like offenses. Capital punishment does none of these. The death of the criminal precludes reformation; society is effectually protected by permanently depriving the criminal of his liberty, and life imprisonment operates as a deterrent quite as well as capital punishment. Sheep stealing was at one time a capital offense in England, but sheep stealing was as popular when the punishment was death as it has ever been since that punishment was abolished. Organized society has no more right to take human life as a matter of vengeance than has the individual. This was the way in which the matter presented itself to the mind of Governor POWERS, and as a member of the judiciary committee of the state house of representatives he succeeded in impressing his views upon his colleagues, with the result that his bill abolishing capital punishment in Maine was reported to the house and subsequently enacted into law.

This upright man and splendid citizen, having served his State and country with signal success and distinguished honor as legislator, as governor, and as Congressman for more than thirty years, on the 28th day of last July passed from the conflicts of this world into the rest of the world that is to be.

What lies beyond the grave it has not been given us to know. The old, old question, at once the most pitiful and the most stupendous inquiry of the human race, echoing from the lips of Job through the vanished and the vanishing years, is to-day, as of old, the passionate and sometimes despairing cry of the human heart—"If a man die, shall he live again?" Science has measured and weighed the stars, analyzed the sunbeam, caught the rhythm and the music of the waves of sound, wrested from nature her choicest and most closely-guarded secrets and enslaved her most subtle and powerful forces, but to this one question she gives no answer which carries either hope or conviction. The lips of the young asking "whence" and of the old inquiring "whither" are alike unanswered. Faith alone vouchsafes a reply. Somewhere in the innermost sanctuary of the self there is something which assures us that at the end we shall find a door and not a wall. The vast majority of mankind, when told that nature at the very heart is dead, experiences that fainting of the soul that comes in the presence of a supreme falsehood. Every cell and every nerve instinct with life cries out against it.

What, then, am I,
An infant crying in the night,
An infant crying for the light,
And with no language but a cry?

* * * * *

My own dim life should teach me this:
That life shall live for evermore,
Else earth is darkness at the core,
And dust and ashes all that is.

We stand upon a mountain top and look down long stretches of undulating forest, over grass-grown meadows and peaceful pastures filled with slow-moving and contented herds; we see the lordly river stretching like a ribbon of silver with long vistas of shimmering shallows and shadowed banks; we lift our eyes to the blue sky, and see here a fantastic cloud and there a hawk lazily drifting with outstretched and motionless wing. Our senses thrill with the glory of the vision; but the majesty of mountain, the beauty of field and river, the splendor of the sky, the witchery of cloud and sunlight and shifting shadow are not in the eye or the brain or the body of the beholder, but in the soul. We close our eyes and the scene is gone from the physical sight, but we behold it, nevertheless, softened and subdued, yet filled with a tender and dreamful loveliness, still pictured in the marvelous gallery of the mind. Then may we not believe that, when the darkness of death is come and the cells of the brain go back to dust, a conscious something, above and beyond all nerves and tissues and cells and brain, which saw the picture and hung it in the memory, will mount from this earthly night of death into the light of the eternal morning?

Mr. SMITH of Michigan. Mr. President, in the busy whirl of life, with its trials and exactions, we pause to pay a tribute to the memory of one of our late colleagues in the House of Representatives.

LLEWELLYN POWERS, for many years a Representative in Congress from the State of Maine, served with honor and credit to his Commonwealth and to the country. Maine has been limited in its geographical area, and almost unlimited in its material resources and seemingly inexhaustible in its wealth of able and distinguished men, many of whom have been chosen because of their special fitness for public place, and retained in the service with credit to the State which commissions them as long as they have been willing to serve.

Think of a State which has within a generation contributed to the public service a Fessenden and a Hamlin, a Blaine and a Reed and a Dingley, and is now so honorably represented by our colleagues, Senator HALE and Senator FRYE, than whom there are no more able, conscientious, upright, worthy, or influential men.

I consider myself fortunate to have served with many of these men in the latter years of their public service. Reed and Dingley and Boutelle and Milliken were all colleagues of mine in the House of Representatives, and I learned something from each of them. I consider the country most fortunate to-day to be guided, as it often is, by the practical common sense and the wise experience of the distinguished Senators from Maine now in this Chamber. True to her high traditions, Maine commissioned our late colleague for duty here.

Mr. POWERS first entered public life as a young man, and retired after one term in Congress. He carried his shrewd commercial instincts into the busy world of affairs and made a business success of life. Later returning, after serving as governor of his State, he entered again into the activities of legislative life. I consider that we were fortunate indeed in his legislative companionship. He was modest and unpretentious, yet he was firm and substantial. He made few tenders of his sympathy or kindliness of nature, but no one could come in contact with him and fail to appreciate that he was one of nature's truest men.

Mr. President, death places its hand upon all that lives, and in calling LLEWELLYN POWERS from an ideal home life and the activities and responsibilities of private and public employment nature drafted an honorable and a worthy son. His personality will long be missed in the House of Representatives and among those who loved him.

I simply desire to pay my tribute to his lofty character, his usefulness, and his fidelity, and I shall long remember the pleasure and the satisfaction I have taken in our companionship and association here.

Mr. DIXON. Mr. President, LLEWELLYN POWERS was born in Pittsfield, Me., December, 1836, the eldest of ten children. He was descended from a family that had been prominent in New England for many generations and whose name frequently appears on the muster rolls of the Continental Army. Born on a farm, he was educated in the common schools and academies of his native State and at Colby University. He entered the Albany Law School and graduated therefrom in 1860. He immediately returned to Maine and began the practice of his profession at Houlton, the county seat of Aroostook County. Of splendid physique, affable in manner, temperate in his habits, and industrious in his profession, front rank at the local bar was soon attained.

Like most young lawyers, he was soon attracted to the field of local politics. In 1864, four years after being admitted to the bar, he was elected prosecuting attorney of his county, and was twice reelected to the same position. He held the position of United States collector of customs for four years. In the early seventies he was sent to the Maine legislature for three consecutive terms and then elected as a Representative to the Federal Congress, for serving one term in that body along with a distinguished delegation from the State of Maine, which numbered among its members such men as James G. Blaine, WILLIAM P. FRYE, and EUGENE HALE.

Defeated for reelection in the greenback agitation of 1878, he again took up the practice of his profession. Twelve years later he again entered public life as a member of his state legislature, serving again three terms, during the last of which he was elected speaker.

Then followed his election as governor in 1896 and his reelection in 1898 by a majority of nearly 50,000. A few months after his retirement as governor he was again elected a Member of Congress, where he served continuously until his death on July 28, 1908.

Elected by the people of his own district three times as prosecuting attorney, six times as a member of the legislature, and five times a Member of Congress, his actual time spent in the public service covered a period of a quarter of a century.

Unlike most men who devote so much of their lives to the public business, Governor POWERS was also most successful in his own private business affairs. By his own exertions and good business judgment he accumulated a private fortune of considerable magnitude. Coming from a State justly celebrated for the sound conservatism of its people, he was by nature, blood, and training well fitted for the position of one of the leaders, both in business and political affairs.

It was my pleasure to have served with him for four years in the other end of this Capitol. The Maine delegation, famous for a century past for its strong membership in both Houses of the Federal Congress, was then famous for having three ex-governors of the State in a delegation of only four members.

Governor POWERS was a striking figure in that body, comprising a membership of nearly 400 men, the directly chosen Representatives of 90,000,000 people. Large and well-proportioned physically, swarthy of complexion, a massive head crowned with a shock of raven-black hair, he attracted notice among his fellow-Members. He was most genial in his manner, conservative in his speech, and fair in his judgment of both men and measures. Measured by any standard, his life was a successful one. In business affairs, in the legal profession, and in the public service he had achieved distinction in all.

At the close of their life this can be said of but few men. Most men whom the world calls successful have only achieved success along some one line of action. Our so-called great and successful men have nearly always been deficient in some things.

To his wife and children, to his State, and to the Nation LLEWELLYN POWERS has left a record of an industrious, well-spent, well-ordered, and successful life.

So long as men of his type shall be selected as the chosen leaders of the people of the respective States of this Republic, all is well.

Mr. HALE. Mr. President, I had hoped to secure some facts in a family historical way about the Powers family in Maine, a typical New England family, a household that is the real type of New England life, but the inquiries which I have made as to details have missed their way, and I can only say here that our colleague, Governor POWERS, was the natural and distinguished representative of the New England family and farm life and of nature's stimulating surroundings, and that it was distinguished as have been very few Maine families. It had the inspiration, the best inspiration for youth, of country life, country associations, of the training and education that come in New England, I know in Maine, from the district school and the academy and the religious and moral teachings that go with a sober and temperate community.

The Powers homestead was the seat of plain but ample country hospitality. The neighbors gathered there; the ministers in their rounds came to the Powers house; the boys and the girls, as they were born and reared, imbibed all the healthful influences that come from such a life; and when the day came and they went afar from home life and joined in the life of the larger world they were found equal to any occasion.

The family furnished distinguished lawyers and legislators and men of large and sagacious business minds, and stands to-day in my mind as one of the best products of New England and Maine country life. One of the family was a most distinguished member of the supreme court of Maine, and when he voluntarily retired from that high place it was to the regret of all our people. Others of the Powers family have joined in making the record of Maine in business and in legislation and in social life, and all have been active and influential factors.

There was none superior to the Governor. That is our fashion, Mr. President, in Maine. A man who has once been governor with us is always "Governor." He may be a Member of the House of Representatives, but we call him "Governor." He may come to the Senate, but he is "Governor." He may go to the Cabinet, or even to higher places, and I fancy we should always think of him and address him as "Governor." So Mr. POWERS was always to the people of Maine, from the time that he served in our highest chief magistracy, "Governor" POWERS.

What my colleague has said of him, and what other Senators who shared in the pleasure of his acquaintance have said, is true. He was a leading and influential figure wherever he was seen. He was intelligent and faithful in his duties, courageous in his standing by his beliefs and convictions, and was never a negligible factor. In Maine, whether in its legislature or as its highest executive officer, or in Congress in the House of Representatives, upon whatever committee he served, and wherever he appeared and was seen and known, he had weight, he had consid-

eration. He was of importance not by intrusion, for, as one of the Senators has just said most fittingly, he was by nature, while courageous and outspoken, a modest and reserved man. But wherever he was, he was of account.

We were proud of him in Maine, Mr. President. We were proud of his position in Congress, of the increasing weight of his character and his counsel as the years went by; and it was with a sense of great loss that Maine gave him up as a public servant.

He had in him great elements of what I may call the practical, shrewd side of New England character. He was not easily moved in business or in politics or socially from what he believed to be the true and the practical course. It was shown in his business life. I knew him always quite intimately, from the time when he began practicing as a young lawyer in a young country shire town. He gained, in the estimation of his neighbors, friends and clients, and the people as a lawyer, as a business man (and was almost infallible in his judgment as to investments), the returns that would legitimately come to a young man from his growing resources.

He was at last, as my colleague has said, one of the largest owners of valuable lands in the State of Maine, and he was worth, I suppose—what with us is a large fortune—a million dollars. He was not penurious. While he was frugal and saving he had a large and generous mind.

I shall miss him, Mr. President, very greatly, because, coming from the same part of the State, we were thrown together closely; and I think I may say that in the years I have known him, with increasing regard for more than forty years, we had no differences. He and I in political matters, in matters touching state interests, and what was of most account to our people, traveled together.

All of this companionship, Mr. President, all of this association, will dwell with me as long as I continue in public life. My colleague and I have had an unusually long service in Congress; I think I may say an unusually friendly and cordial service together. We have seen nearly everybody who has come here with us and in the other House disappear. Neither to him nor to me will the remnant of our days be the same with the new men. He and I will welcome them and act with them so far as we can helpfully, but we shall miss the departed, and none will we miss more than Governor POWERS.

MEMORIAL ADDRESSES ON THE LATE REPRESENTATIVE WILEY.

Mr. BANKHEAD. Mr. President, I submit the resolutions which I send to the desk, and I ask for their adoption.

The VICE-PRESIDENT. The Senator from Alabama submits resolutions, which will be read by the Secretary.

The resolutions were read, considered by unanimous consent, and unanimously agreed to, as follows:

Senate resolution 311.

Resolved, That the Senate has heard with profound sorrow of the death of Hon. ARIOSTO A. WILEY, late a Member of the House of Representatives from the State of Alabama.

Resolved, That the business of the Senate be now suspended in order that fitting tributes may be paid to his memory.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and to the widow and family of the deceased.

Mr. BANKHEAD. Mr. President, we are present in this Chamber to pay homage to the memory of a man who for many years was my warm personal friend, and it is with feelings of deep sorrow that I must pronounce these brief, cruel words: "He is dead!"

In reviewing the career of ARIOSTO APPLING WILEY four aspects of his character stand out preeminently: Energy, patriotism, loyalty, and human kindliness. He was a scholar, a lawyer, a soldier, a statesman, and, although able in each and all of these, he was greatest as a friend. It was this lovable, human quality that made the hearts of thousands of his people to mourn at his untimely taking off.

Colonel WILEY began the practice of law in Montgomery in 1872, a fresh young alumnus of Emory and Henry College, Virginia, in partnership with that eminent jurist, ex-Chief Justice Samuel F. Rice, of the Alabama supreme court. This partnership lasted for eighteen years, during which time Judge Thomas G. Jones, federal judge of the middle district of Alabama at the present time, was also a member of the firm. The experience and knowledge gained in his early practice equipped Colonel WILEY for the duties that devolved upon him in his future political career.

In 1882 he was elected to the lower house of the Alabama legislature, where he served as chairman of the committee on the revision of laws, as a member of the committee on corporations, and invariably as a member of the judiciary committees. For years thereafter he was either in the house or the senate of the legislature of his State. His city was also the beneficiary of his talents and loyalty, for he served fifteen years as an alderman of her administrative board.

His most distinguished professional services, however, of a national character were those performed while chief legal adviser and chief of staff to General Lawton during the organization of affairs in Cuba following the Spanish-American war.

Colonel WILEY was a soldier by blood and tradition. His father, Judge J. McCaleb Wiley, was an officer in the Mexican war, and although his son was but a lad during the war of secession, he was ever deeply stirred by the stories of valor and of strategy displayed by both of the contending armies. For a number of years he was captain of the Montgomery Mounted Rifles, a famous local military organization, and for twenty years he was connected with the Alabama National Guard, having risen from a lieutenant to the command of a regiment. He was a man of unusually robust and handsome physique, and in the uniform of a high officer presented a martial and impressive figure.

He served upon the staffs of four successive governors of his State, holding the positions of judge-advocate-general, with the rank of colonel of cavalry; of inspector-general; of chief of ordnance, respectively, upon the staffs of Governor Seay, Governor Oates, Governor Johnston, and Governor Samford. He was well prepared by training and experience, therefore, for the position of second in command of the Fifth Regiment of Volunteer Infantry of the United States Army, to which President McKinley appointed him, for Cuban service, on June 9, 1898. His appointment to this position was unanimously confirmed in this Chamber, and that your confidence was well placed was proven by the services which Colonel WILEY rendered to his country on the island. Upon receiving his commission as lieutenant-colonel he hurried with his command to Santiago de Cuba, his regiment reaching the eastern province just after the battle of San Juan Hill was fought. Shortly after arriving at Santiago General Lawton, commanding that department, availed himself of Colonel WILEY's legal abilities, making him his chief legal adviser and chief of staff. His legislative experience, his military talents, and his legal lore were all brought under contribution in his services as acting civil governor of the Province of Santiago, to which position he was appointed. He set in motion the machinery of the civil government, organized the courts, and contributed greatly to the restoration of law and order. Upon his return to civil life, after a year's military service for his country, he was at once elected to Congress, which position he held until his sad death last June.

Of his political services I could say much. Immediately upon his entrance into the House of Congress he began to display that effective energy that characterized his whole career. He secured large appropriations for his district for internal improvements and gave unfailing sympathy and response to the individual demands upon his legislative services. My association with him, especially during his service in Congress, was an intimate one. He was always active and vigilant for the best interests of his constituents, and was never too busy to exhaust every resource to comply with any request they should make. Among the many things he accomplished for them, and one of which he seemed to be proud, was a bill introduced and passed by him, with considerable difficulty, for the relief of a number of homesteaders who had entered on certain railroad grants. Hundreds of poor but most deserving people in Alabama would have lost their homes and the result of years of toil in the improvement of their farms had it not been for this bill.

It was through his duties as a member of the Military Committee that Colonel WILEY came into friendly and intimate relations with Mr. Taft, who was then Secretary of War. It was because Mr. Taft saw in him a man of broad experience and deep sympathy that he invited him to become a member of the party accompanying him to the Orient.

Colonel WILEY accepted Mr. Taft's invitation for three reasons. First of all, he was a citizen and representative of a cotton-growing country, and he desired to investigate the possibilities of China and Japan as markets for his people's chief product. Secondly, he had been reared in a section of the country where there were vast thousands of an inferior race, and knew, as only a southern man can know, the quality of patience and firmness, of charity and justice that must be used toward a people who have not yet made an ultimate place for themselves in social or economic life. It was with the thought in his large heart that he might be of some active service to the inhabitants of the Philippines, as well as to the flag he served in common with them, that he agreed to go 10,000 miles from home and friends.

In a letter to one of these friends, written upon the high seas on the long voyage, Colonel WILEY said, concerning these alien citizens, quoting from Robert Herrick:

We are bound to one another inseparably in this life of ours. We make a society that is composite. Whatever we do to weaken the sense of that common bond disintegrates society. Whatever we can do to deepen the sense of that common bond makes life stronger and better.

The third reason why Mr. Taft's invitation appealed to Colonel WILEY was personal to the poetic, the romantic, and the adventurous side of his nature. He was a man of refined mental culture, and his imagination had often been stirred by the literature and history of the Orient. Therefore those of us who had been privileged to know intimately this phase of the man's inner self can understand the pleasure the prospect of these foreign travels afforded him. The contrasts of life were never more clearly illustrated than in the fact that the very day when Secretary Taft was nominated by the dominant political party of the United States to fill the highest office in the gift of the people the silent form of Col. A. A. WILEY, his friend and comrade, was being conveyed from the mountains of Virginia back to the heart of the cotton country that he loved so well to find a resting place.

We are such stuff
As dreams are made on,
And our little life
Is rounded with a sleep.

He was genial and kindly and generous, possessing in a larger degree than most men possess those warm friendships that are rooted in esteem's deep soil, resulting from a slow and gradual culture of kind intercourse necessary to bring them to perfection.

One of these friends and neighbors, upon the occasion of his funeral, wrote the following delicate verses in his memory:

Not because the Nation needs him,
Not because the State will mourn,
Do I gather up the brightness
That his gracious smile has worn,
And now weave it into garlands,
That no time can wilt or fade,
For the grave upon the hilltop
Where the sunshine meets the shade.

How his happy, friendly presence
Mingles with the sod to-day,
As a shining shaft at sunset
Pierces into clouds of gray;
And I call from spaces endless
Where remembered kindness grows,
This one little song of tribute
Set about with friendship's rose.

Not alone to kings and peasants
Did his cordial hand extend,
Everything that needed comfort
Felt the presence of this friend;
Animals and trees and flowers
Flourished where his eyes would stray,
And he counted years as empty
If no blessing went his way.

Now he rests; and loud the bird song
Tells the cheer his voice had told;
Soft clouds drift above the hilltop
As if they his words enrolled.
Life was sunshine, life was friendship—
This, and more, his bright heart shed;
And a smile meets us this morning
That will live when time is dead.

Mr. MCENERY. Mr. President, Col. ARIOSTO APPLING WILEY, a Member of the Sixtieth Congress from the Second Congressional District of Alabama, died on the 17th day of June, 1908, in the city of Washington.

The high and low, the good and bad, must die,
And then, 'tis taught, begin again to live,
Somewhere, somehow, who knows?

Col. ARIOSTO WILEY was born in the State of Alabama on November 6, 1848. He was graduated with honor at Emory and Henry College, Virginia, in June, 1871. He chose the law for his profession, and for eighteen years was in partnership with that eminent jurist, ex-Chief Justice Samuel F. Rice, of the supreme court of Alabama, and after his death continued the management of the late firm's legal business, which involved many intricate questions in law and large interests. He was thus thrown in contact with a bar distinguished for the ability and high character of its membership. He rapidly rose to the front rank of his profession, and his legal ability was acknowledged throughout the State of Alabama.

I have been told by those who were familiar with his connection with the bar that he was a skillful special pleader and an expert practitioner, while his knowledge of the principles of jurisprudence and their foundation was as thorough as his application of them was masterly.

In the House of Representatives he was classed among the foremost of its able Members. His style in his addresses was that of close and severe reasoning, without ornamentation, concise, and correct. There was left no impression of diction or declamation, but only of the thing said. He had the sublimest faith in the wisdom of the fathers of the Republic, and never departed from their teaching. No popular outburst could influence him to vote for any measure which his conscience told him violated the Constitution, notwithstanding the demand that it was for the relief of an "oppressed people from corporate power and tyranny." He did not believe that the wisdom of past times was "the unripe fruit of imperfect intellectual culture." He was a patriot. He served with distinction in the Spanish-American war and was recommended for promotion to brigadier-general by his commanding officer for service in the field, and as an able counselor and adviser in framing a constitution for the Province of Santiago. In the field of legislation he was eminently successful, and in the general assembly of Alabama, in the house and the senate, he was industrious, wise, and conservative, and his influence on legislation was recognized in the enactment of needed laws, judicious and wise, which greatly promoted the material interests of the State.

There rests no stain upon his integrity in professional, private, or public life. He was scrupulously punctual and just in all his dealings. In domestic life he was pure and without fault. He was a delightful companion. He had solid good sense, a cheerful temper, good humor, and a playful wit, and there was about him a charm which attracted the humblest and the highest. He was beloved of all classes in his State, both for his great usefulness in the public service, the warmth of his affection, and for his virtues.

His life was spent in the courts, in legislative chambers, in the field, in party conflict—in fact, from birth to mature manhood his life was one of conflict and endeavor. It is rare, indeed, that such a character appears and passes through such experiences with character not only untarnished, but brightened. Success attended his every footstep, and his people applauded and rewarded his steady advance. His nature was noble and generous, even to the greatest fault. There was nothing paltry or sordid in his understanding or his heart. We remember his kindly nature and social graces—

While the soft memory of his virtue
Yet lingers like twilight hours
When the bright sun is set.

Mr. JOHNSTON. Mr. President, ARIOSTO A. WILEY was born in Alabama in 1848. He was a descendant of distinguished Scotch ancestors, who settled in Mecklenburg County, N. C., before the Revolution and acquitted themselves as patriots in that eventful struggle. He graduated at Emory and Henry College, Virginia, and was admitted to the bar in 1872. He began the struggle of life in the period of reconstruction, when the clouds hung dark and heavy over his native State, and when despair was held at bay only by the indomitable courage and fidelity of her people. He soon removed from Troy to the capital city of Alabama and entered upon a long and brilliant career which finally placed him at the head of his profession in that city so famous for its lawyers.

He was not one of those lawyers who attained success by a devotion confined to his profession to the exclusion of all other affairs of life, but was a citizen taking interest in all that concerned the people of his city, county, and State, serving them well and faithfully for quite twenty years in the municipal government and in the house and senate of his State. In the latter he was chairman of the most important committees in each house, and was faithful and diligent in the performance of every duty, notwithstanding his pressing engagements at the bar. When the war with Spain occurred Colonel WILEY tendered his services and was commissioned lieutenant-colonel of the Fifth Regiment U. S. Volunteer Infantry.

He soon attracted the attention of the gallant and lamented General Lawton, and served as his chief of staff and as civil governor of the eastern province of Cuba for some time. Returning home when the war ceased, he was elected to the Fifty-seventh Congress, and continued to serve in that body until he died, a Member of the Sixtieth Congress, in the vigor of a splendid manhood.

This is the brief record of his public service, but what historian can relate or what friend narrate the many services he rendered, the kindly deeds he performed, or the joy he brought to the friends with whom he associated, to his family and loved ones, or to those in distress or sorrow?

I knew him well as legislator, lawyer, citizen, soldier, and friend. He served on my staff when I had the honor to be governor of Alabama. Kindly, sympathetic, cheerful, full of generous sympathies, courageous, strong in his convictions, faithful to friends, to his country and State, to be with him, to know his heart, and to witness his many unselfish and generous

acts was to appreciate him more and more at his true value. He was bold and aggressive when he stood for client or cause, a formidable adversary in any forum, and a generous foeman who never struck below the belt or causelessly wounded the feelings of any man. The combat over, the victory won, he bound up the wounds of his adversary, soothed his feelings, and never boasted of his deeds or harbored animosity.

Whilst he commanded attention and respect in any forum to which he was called by the graces of his oratory and the logic of his argument, it was in the social circle where the kindliness of his heart and scintillations of his intellect shone most conspicuously.

No man of generous impulses who knew him well could fail to love him. No appeal was ever made to his sympathy that did not meet prompt response; no demand for his services by the people he loved so well was ever denied, however great the personal sacrifice.

I saw him here in Washington in his last illness, suffering great pain, but thoughtful still of the comfort of those around him. Little then did I think that I should never again see his attractive smile, feel his generous greeting, or hear his kindly voice.

I saw him laid to his eternal rest in his loved city, and I saw the great concourse of friends and acquaintances, white and black, that gathered around the grave to bid a long farewell to a generous, faithful, and affectionate friend; and it seemed then to me that this tribute to the man, to the citizen, and to the friend was the most convincing testimony that any man could have that he had not lived in vain or wrought for self alone.

Many years will doubtless pass before time shall have taken the edge from the sorrow of wife and son. The sympathy of friends, the remembrance of happier days, may bring some solace to their hearts; and it must soften their grief to know and feel that the loss is not all theirs, and that the people of his city and State, and a host of friends, will long remember and regret him.

MEMORIAL ADDRESSES ON THE LATE REPRESENTATIVE MEYER.

Mr. McENERY. Mr. President, I offer the resolutions which I send to the desk.

The VICE-PRESIDENT. The resolutions will be read.

The resolutions were read, considered by unanimous consent, and unanimously agreed to, as follows:

Senate resolution 315.

Resolved, That the Senate expresses its profound sorrow on account of the death of the Hon. ADOLPH MEYER, late a Member of the House of Representatives from the State of Louisiana.

Resolved, That the business of the Senate be suspended in order that fitting tributes may be paid to his memory.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and to the family of the deceased.

Mr. McENERY. Mr. President, during each session of Congress we are called upon to pay tribute to the memory of distinguished Members who have passed away.

Of them who wrapped in earth are cold
No more the smiling day shall view,
Should many a tender tale be told.
For many a tender thought is due.

One of the most lovable and tenderest of men, Gen. ADOLPH MEYER, a Member of the Sixtieth Congress, died in the State of Louisiana at his home in the city of New Orleans on the 8th day of March, 1908. Of him many tender tales can be told, and many tender thoughts suggest themselves as due to his cherished memory. He was born October 19, 1842; was a student at the University of Virginia until 1862, during which year he entered the confederate army, and served until the close of the war on the staff of Brig. Gen. John S. Williams, of Kentucky. At the close of the war he returned to Louisiana and had been engaged largely in the culture of cotton and sugar since; was also engaged in commercial and financial pursuits in the city of New Orleans; was elected colonel of the First Regiment of Louisiana State National Guard in 1879, and in 1881 was appointed brigadier-general to command the First Brigade, embracing all the uniformed corps of the State; was elected to the Fifty-second, Fifty-third, Fifty-fourth, Fifty-fifth, Fifty-sixth, Fifty-seventh, Fifty-eighth, Fifty-ninth, and Sixtieth Congresses.

To this short sketch from the Congressional Directory I may add that as a merchant he was universally respected, and as a planter he was known and admired for his progressiveness; and as a soldier for undaunted skill and courage, receiving the highest encomiums from his commanding general, on whose staff he served during the war. As brigadier-general of the national guard, he was in service for more than eight years, and added by his persistent efforts, under the guidance of General Beauregard, to the deserved popularity of the organization and to its admirable discipline. As a Representative in Congress from Louisiana he was always diligent in serving his State, and no interest affecting it escaped his attention. To the welfare of his constituents individually he was devoted, and day after day he was at the departments looking into their condition and their wants.

I quote from the eulogy on General MEYER of Mr. Foss, chairman of the Committee on Naval Affairs, of the House of Representatives, who knew him more intimately than any Member of that body.

> But General MEYER's greatest work consisted not so much in serving the constituency which elected him as it did in serving that greater constituency which extends from the Atlantic to the Pacific and from the Gulf to the Great Lakes. It was his labors in the upbuilding of the American Navy for which he will be longest remembered. He was the oldest member of the Committee on Naval Affairs. He had served for seventeen years, and no man was more familiar with the great subjects pertaining thereto than himself.
>
> The many and able reports on naval subjects which he has written will stand as a monument to his faithfulness, ability, and industry. When he became a member of the Naval Committee we had not a single battle ship in commission and the tonnage of our new navy was less than 200,000, whereas now, when the pending naval bill shall have become a law, the tonnage of our navy will reach 850,000. General MEYER can rightfully be called one of the legislative builders of the new navy, because during the seventeen years of his service upon the committee more than three-fourths of the new American Navy has been built.

While his education was interrupted during his long service in the army, the training there was useful, as he had learned discipline, self-control, and self-denial, and, in the privations and dangers of army life, human nature in all its phases. Fortunately his habits were studious and his tastes scholastic. He had good judgment and unfailing tact. No circumstance, however embarrassing, disturbed the evenness of his temper, and what he had to do was done at the right time and in the right way, and his words were suitable on all occasions to the matter under discussion. With his self-possession there was in his manner modesty and dignity. With his many attractions, it is not to be wondered that he had ardent admirers and devoted adherents among all classes of people in his district.

When the Fifty-ninth Congress adjourned, which he had attended, General MEYER was apparently in full health and vigor. No Member of it had brighter hopes for the future and none had a clearer conscience for having done his duty well and faithfully. It was expected that he would be returned here for many years to come, so well, so faithfully, and ably had he represented his district.

The day preceding his death he was hopeful of life, bright, and cheerful, expecting to attend the opening of the Sixtieth Congress. We have so often been called upon to pay tribute to the memory of those who have left here in perfect health, but who have been suddenly called, that we must be impressed with the uncertainty of the hour of death.

Determined are the days that fly
Successive o'er thy head;
The numbered hour is on the wing
That lays thee with the dead.

While the hour may have come at an unexpected time, General MEYER was not unprepared for the dreaded ordeal of passing into the unknown—

Across that ebbing tide which has no flow.

His entire life had been a preparation for the conflict with death. He was in no fear of its near approach. Why was there no cloud on the soul of one who had passed through life pursuing professions and callings that carried with them strong temptations?

The unbroken testimony of all who knew him from early manhood is that he had strong convictions of right; that he had the highest order of moral and physical courage; that he had to the fullest measure generous sympathies and impulses, which went out into active work among the poor and afflicted. Possessing such qualities, he filled every office to which he had been called with honor, ability, and fidelity. In war he was a valiant soldier; in peace, a good citizen, an able and conscientious legislator. He loathed the gross sensualisms now so common and deplored, that excessive luxury which commercial prosperity has developed. Apart from the emphatic testimony of his friends, the slightest acquaintance with him was enough to show that his heart was right, full of love and sympathy, and that he was in full fellowship with his Maker, and that he had a clear vision and passionate hatred of all wrong. He never stooped to flatter popular prejudice. He was independent in his political actions, while he gave steady support, so far as they harmonized with his convictions to party policy and discipline. Fortunately, his opinions and temper harmonized with the progressive spirit of his constituents. The commercial, industrial,

agricultural, and professional people rallied around him with their energy and self-confidence, their pride and their patriotism, to the support of a statesman whose aims were lofty and unselfish, whose life was pure and full of kindly feeling for all conditions of humanity and of tender and affectionate love for wife and child. He loved his adopted State with enthusiastic devotion. The splendor of her history, the vast extent of her domain, the manifold resources of her wealth, the learning of her jurists, the character of her people, unsurpassed for energy, intelligence, and hospitality, her strength, and her power.

His glowing patriotism was the spell which bound his people to him. His successful career is remarkable for the abnegation of all selfishness, the sacrifice of personal consideration to a sense of duty so well performed in every station, that his public virtue is to be more admired than any particular act which he did or any particular faculty which he possessed. The personal popularity of General MEYER was such as might be expected from a man who was modest, candid, and affable, without any pretense to genius or great superiority over his fellow-man. His generosity and charity were boundless, limited only to his means of giving. He believed that he who withheld his generosity until death gave nothing at all. A great part of his income went for the relief of the poor and for the support of his faith. In his religious and moral character there is much to admire and imitate. He was a firm believer in his faith, yet he was too firmly imbued with the spirit of the age to judge harshly of those who differed with him. But all forms of vice and all irreverence for religion and impurity in expression were steadily condemned.

There was for his acceptance further preferment and higher reward. The world held out to him promises for greater usefulness and great distinction. But how uncertain is the realization of the hopes and rewards of an earthly career. His untimely death is a warning.

But he had hopes beyond earthly promise. His life was one of continuous endeavor, and to him the promise of eternal life and glory, a trust in God—

> To whose eternal doom
> Must bend the sceptered potentates of earth—

was of greater value than the flattering and ephemeral honors of life. He had learned from his sublime faith—

> 'Tis to the vulgar death too harsh appears,
> The ill we feel is only in our fears;
> To die is landing on some silent shore
> Whose billows never break nor tempest roar;
> Ere well we feel the friendly stroke 'tis o'er.

In this short sketch of General MEYER I have not been blinded by the clouds which gather round the dead, but I have given an impartial though an inadequate description of his character. He had pleasing and elegant manners, was possessed of large general information, and his society was much courted, and those who enjoyed his esteem and confidence learned that each day found him prepared—

> To hold his course unfaltering while the voice
> Of truth and virtue up the steep ascent
> Of nature calls him to his high reward—

for in his studied efforts to perfect himself he had—

> Summed the actions of the day
> Each night before he slept.

Mr. CLAPP. Mr. President, as we advance into the years the shadows gather about us. One by one those of our own generation pass beyond. General MEYER fell in the full prime of his strength and his achievements. His long service, faithful and successful, might well have been taken as a warrant of additional and still more valuable service and of still greater honors had his life been spared. There is an immutable law which decrees that real honor is intertwined with true achievements. Obedient in his very nature to that law, General MEYER combined with valuable service to his country the gathering of honors to himself.

It has been suggested here this afternoon that these services bear but little fruit unless we consider the lessons which they teach. The chords which reach from the living to the dead, while mystic, silent, and unseen, are vibrant with immortal truths. Of the truths thus borne to us upon this occasion I shall only dwell upon one, and that is the lesson of life, for whatever there may be of immortality, whatever there may be in that which lies beyond, this much is certain: This life is the vestibule of the life to come.

A short time ago in this Chamber I listened to the prayer of one of the great divines of his age, and I heard these words fall from his lips:

> We know, O Lord, that Thy omnipotence is our omnipotence if we but be one with Thee.

I believe, sir, that to-day that sentiment would awaken a responsive echo in every pulpit in Christendom; and yet, simple as it is, it reverses the thought and the experience of ages. That simple statement sweeps away the cobwebs of dogma and creed that reach back through the corridors of nineteen centuries to the hour when the Master in turn shook the ritualism of fourteen centuries with the simple statement "The kingdom of heaven is within you." This reversed all that had gone before. This thought, sinking into human consciousness, supplants the gospel of word with the gospel of action.

This thought takes from the old creed the constantly reiterated prohibition "Thou shalt not" and in place inserts the injunction "Thou shalt." It substitutes now for hereafter. In this concept of the Infinite, human effort becomes a factor as never before; while it lessens not our thought of immortality, it deepens our appreciation of this life and its opportunities; while it detracts nothing from our worship of the Infinite, it quickens our appreciation of our own powers to reach toward the Infinite.

This is the difference between creeds which, barren of fruitage, barren of blessings to humanity, have passed away, leaving that old, but new, thought of to-day, rich in its blessings, chief of which is the inspiration to human effort, a thought which brings man to a truer and a closer relation with Deity; and in that relationship must be found the truer relationship of man to man—a broadened brotherhood of man. With that truth sinking deeper into our consciousness, we will no longer "remember the dead and forget the living," but while we will still bring our tribute and strew flowers over the grave of the dead, abating nothing of our tender memory of the departed, we will appreciate our duty to those about us and thus reflect sunlight along and strew with flowers the pathway of the living.

Mr. PERKINS. Mr. President, the Congress of the United States lost a most useful Member in the death of Representative ADOLPH MEYER, and the State of Louisiana a most faithful servant. States which send here men of the high character and great ability that he possessed have reason to be proud, and Louisiana fully appreciated the worth of her distinguished son. In all positions which he occupied—in the army, in agricultural pursuits, and in business enterprises—he exhibited those great qualities of sincerity and unselfishness which endeared him to all who knew him. These qualities quickly caused him to occupy a prominent position when he was first elected one of the Representatives of Louisiana in the Fifty-second Congress, and he added materially to the strength of that State's delegation in the House until his death.

For several years he was the ranking member of the Committee on Naval Affairs of the House, and as members of conference committees on naval bills we became well acquainted, and that intimate knowledge of him thus gained excited in me admiration for his ability and profound respect for his character. He was always most courteous and conciliatory in the consideration of the most vexed questions which arose in the consideration of naval questions in conference committee, and at all times showed himself to be most earnest and energetic in the work of building up a great navy.

When he first took his seat in Congress we had launched only one battle ship, the first *Maine*, whose destruction in the harbor of Habana was the immediate cause of the Spanish-American war. We had authorized construction amounting to only $43,000,000, and the total cost of the entire naval establishment for the year 1891 was only $25,000,000. The enlisted force of the navy at that time was only 8,250 men, whose pay amounted to $7,300,000. Since that time our navy as it stands to-day, the second in the world in point of fighting strength, has been built up. What went before was simply the establishment of the foundation.

Mr. MEYER voted for the authorization of practically all but 4 of our 31 battle ships, for all of our 12 armored cruisers, for most of our large fleet of protected cruisers, gunboats, and so forth, for all of which we have up to this time appropriated $344,904,298, of which he voted for over $300,000,000. The total yearly cost of the entire naval establishment has grown from $25,000,000 to $129,000,000 for the fiscal year of 1908. The number of enlisted men has increased from 8,250 to 44,500, and their pay to $30,000,000. As we became Members of Congress at about the same time, Representative MEYER and I have voted in favor of the bills which have made our navy what it is to-day. I found in him the same earnest endeavor to create a strong naval force that I myself had, and which prevailed among the Naval Committees of the two Houses.

At the time of the Spanish-American war no one was more active and energetic in all that related to naval affairs than

Representative MEYER, and he was always ready to cooperate for the best interests of the service and of the Nation. In one of the debates on the naval bill in the House Representative MEYER expressed his attitude toward this important arm of the public service thus:

I do not think the navy a subject for partisan discussion. It is one to lift a man above the rancor of a partisan. I should be very sorry to believe that the American people are willing to have the subject of the navy considered in this way. In my service on the Naval Committee I, together with my Democratic colleagues, have ever held this object of preparing the navy for national defense above party, and sought beyond party to develop our strength to the highest degree commensurate with our greatness and safety. I believe that now is the time to build up our navy. I ask the House to give it careful, patriotic consideration, and, in the words of Lawrence, who in Boston Harbor fought his glorious fight, as he fell, maintaining the honor of his country: "Don't give up the ship:"

These are the sentiments of every loyal American, and have inspired the efforts of all the members of the Naval Committees of both Houses in their work of upbuilding the navy. They are the sentiments which animate both committees to-day, and I know that the words of the late honored Representative from Louisiana will inspire all future committees in the great work which they will have to do.

We have just seen return to the port from which it sailed over a year ago the most powerful fleet of war vessels which has ever made an extended voyage, and this one has carried the American flag around the world on a course aggregating 42,000 miles. Not one of the 16 battle ships was in the service at the outbreak of the Spanish-American war. In fact, only two had then been launched, and that hardly a month before the outbreak of hostilities. This great modern fleet is nearly five times greater in displacement than was our fighting force in Cuban waters, while the offensive power—the weight of metal that can be fired in a given time—has increased 2,000 per cent; and in striking force the broadsides of the Atlantic Fleet are thirty times that of the fleet which destroyed the Spanish vessels. Besides this, the marksmanship has increased from an average of 5 per cent of hits at the battle of Santiago to about 70 per cent as developed by the practice of the fleet which has just made the circuit of the globe, and the tremendous power which resides in our fleet of modern battle ships will be used, should there be occasion, with the same resistless energy which has always characterized our engagements on the sea, and in time of victory will be held in check in accordance with the humanitarian spirit which actuates the bravest men whose calling is to fight upon the ocean, and which called forth the command of Capt. Jack Philip when Cervera's ships had been riddled and had been run ashore: "Don't fire, boys. Don't you see the poor fellows are drowning?"

The victory won, mercy took the place of battle fury, and the spirit of peace went abroad beneath the clouds of smoke from hostile guns. Such has always been the American Navy, and such it will always be; and for such the man whom we honor here to-day always exerted his strongest efforts. With such men in the councils of the Nation, and such men on the decks of our battle ships, the Republic need have no apprehension as to a foreign foe.

No one would have been more enthusiastic at the record made by the Atlantic Fleet, which has just returned from its world-encircling cruise, than Representative MEYER were he alive to-day. No one would appreciate more than he the value of the lessons learned, the experience gained, and the vast increase given to the efficiency of our sea fighting force through this year's training that it has received. Officers and men are more fit for any duty on the ocean, and problems that twelve months ago would have sorely troubled them have now been solved. The year's cruise has demonstrated that no navy in the world is the superior of our own. It has shown that no better warships are afloat than ours, which fact is due to the ability of our designers and to the skill and faithful workmanship of our mechanics. No machinery has ever better stood the test of use; no vessels ever proved more seaworthy.

And, above all, the men of the fleet have, by their discipline and manliness exhibited in the four quarters of the globe, won the profound respect of all nations. They have exhibited the characteristics which have made, and which will always make, the men of the American Navy the best who ever trod the decks of a man-of-war—self-confidence, self-respect, intense loyalty to the flag, a spirit of self-sacrifice, and a bravery which knows no fear. Officers and men of the Atlantic Fleet have, by the exhibition of these qualities, quadrupled the effectiveness of the American Navy, for the world knows now and knows it thoroughly that the American flag floats above fighters whose ideal is John Paul Jones and whose example they will follow in time of stress. The immortal words, "I have not begun to fight yet," will be their inspiration, and men so inspired can never be defeated. Such is the navy that Representative MEYER assisted in creating, and his work is the most important that Members of this body can perform, for it creates the strongest assurances of peace that the Nation can possess.

Mr. GALLINGER. Mr. President, others who knew him better than I, have spoken and will speak of the public services of the distinguished man whose memory we all cherish. Mine will be but a few words of heartfelt appreciation.

ADOLPH MEYER entered the House of Representatives at the same time that I became a Member of this body, and he was honored with eight successive elections, representing the district in which New Orleans, his home city, is a part. It was my privilege to become acquainted with him shortly after he entered Congress, and I soon learned to highly value his friendship. He was a man of large business capacity, belonging to the class of men who have built up the great industrial and commercial interests of our country. He was a diligent legislator, among other things, taking a great interest and pride in matters pertaining to the navy, serving with distinction on the Committee on Naval Affairs.

General MEYER was a courtly man—dignified and self-poised under all circumstances. Neither the trappings and follies of ostentatious display nor the common and vulgar things of life appealed to him. He was a genuine knight, with lofty views and pure ambitions, devoted to his friends, and true to the ideals that distinguish the high-minded and honorable public servant.

He was a genial and lovable man, always acting the part of a gentleman of the old school. Courteous, companionable, and sincere, it was a pleasure and delight to meet him, and the memory of his gracious and gentle qualities will long remain with those of us who were privileged to know him. His life was a useful and valuable one, and in his death the State of Louisiana and the Nation sustained a great loss.

Mr. President, it has been said that "the tomb is but the gateway to an eternity of opportunity." If that be so, death is robbed of its terrors, and the future life is to be welcomed rather than dreaded. If that be so, we can think of our departed friend as having simply passed out of mortal sight, to enter upon a higher and happier life beyond. We miss his genial presence here, but his memory will be a benediction and a blessing to the community in which he lived and to the larger constituency which, as a public man, he represented with rare fidelity and ability.

Such men are needed in our national life, and their loss can not be overestimated. But the inevitable fiat came to him, as it will, sooner or later, come to all of us, and fortunate, indeed, will it be if, when the summons comes, we are as well prepared to meet the change as was he of whom we speak to-day.

Mr. President, if our faith in the future life is well founded, how beautifully appropriate are the lines of Rudyard Kipling:

When earth's last picture is painted,
And the tubes are twisted and dried,
When the oldest colors have faded,
And the youngest critic has died.
We shall rest—and, faith, we shall need it—
Lie down for an aeon or two,
Till the Master of all good workmen
Shall set us to work anew!

And those that were good shall be happy,
They shall sit in a golden chair;
They shall splash at a ten-league canvas
With brushes of comets' hair;
They shall find real saints to draw from—
Magdalene, Peter, and Paul;
They shall work for an age at a sitting
And never get tired at all!

And only the Master shall praise us,
And only the Master shall blame;
And no one shall work for money,
And no one shall work for fame;
But each for the joy of the working,
And each to his separate star,
Shall draw the thing as he sees it
For the God of things as they are.

And so I will content myself by placing this simple wreath of affectionate remembrance on the grave of my departed friend, whose memory will be an inspiration to all who knew him, and whose life work points us to high ideals and noble purposes. "May he rest in peace."

Mr. FOSTER. Mr. President, twice within the year just ended death has called from Congress a Representative from the State of Louisiana.

On each occasion it was the dean of the delegation to be summoned, and while in an elective body which renews its membership every two years rank does not always mean long tenure,

yet in these instances two Members of unusual length of service went to their reward.

In the case of Gen. ADOLPH MEYER, of the first district, but three of his party then in Congress could claim a longer period of membership in the House.

General MEYER was born at Natchez, Miss., on the banks of the Father of Waters, sixty-five years ago. It would seem that fate decreed all the activities of his life, private and public, should center about the mighty river which cleaves this continent as it flows, unceasing, to the sea.

Whether as a boy upon its banks; as a planter behind the barriers built to keep out the annual flood that sweeps down like the torrent of the Nile; whether as a factor in New Orleans and the consignee of argosies freighted with the staples that line its shores, his name and labors are inseparably connected with the great stream; and his crowning public service in Congress was his effort to create a naval station and a haven at its mouth, where not only vessels of war, but those of peace, from the seven seas might come and make repair.

He received a careful early training, and being of a refined, studious nature, with the means to indulge any bent, it seems but natural that in the selection of a life work his preference should have been the law. The bar of Natchez in that day was famous. Sergeant S. Prentiss was his fellow-townsman, and the meteoric career of that great man could not fail to impress and fire to emulation an ambitious youth.

With the purpose of perfecting himself for a career at the bar young MEYER matriculated at the University of Virginia at the age of 18. He was an apt student, and, with the earnestness and thoroughness that remained his most noble attributes until the end, was preparing at the institution founded by the immortal Jefferson, for the battle of life, when the tocsin of war in reality sounded.

Exchanging the classic shades of the academy for the camp, he displayed soldierly qualities of a high order. He was early promoted to the rank of captain, and given an important staff assignment; and at the close of the war held the post of assistant adjutant-general under Gen. John S. Williams, of Kentucky. The mettle he displayed as a soldier was illustrated years afterwards, when war was declared between this country and Spain. His old commander, in indorsing him for one of the commands of the volunteer forces, wrote to President McKinley as follows:

> He was preeminent for soldierly qualities, the loftiest courage, fidelity, and endurance. In fact, he seemed a natural-born soldier, and commanded the confidence and admiration of the entire command.

The Senate is familiar with the fate of the confederate soldier, when, bowing to the arbitrament of war, he returned home. Many of that gallant host were subsequently sent to Congress by a grateful people, and on occasions like this their valor, fortitude, and privations have been so often and eloquently told that they need be but referred to now.

When the young captain returned to Natchez after the unequal struggle, it was to put behind him all dreams of preferment at the bar, to cross over the great river into Concordia Parish, La., and begin life anew as a cotton planter.

While thus engaged he acquired much practical knowledge of the levee system and other needs of the alluvial country that was subsequently used here to the advantage of his State. He was by temperament, however, adapted to and longed for an urban rather than a country life, and after a few years of planting moved to New Orleans and engaged in the cotton factorage and commission business.

Those were stirring times in Louisiana. It was the period of reconstruction, and a condition frequently existed amounting to civil war. It was a time of peril, especially to the white people living in the outlying districts, and their chief reliance lay in their militia.

While this condition prevailed, General MEYER was called upon, by reason of his experience in the confederate army, to reorganize the state troops, and under his command the Louisiana Militia became efficient to a high degree.

In 1890 he was elected a Representative to Congress, and at once demonstrated a peculiar fitness for the place. He was ever watchful of the interests of his State, painstaking and energetic in his efforts to serve his people, and broad and liberal in his treatment of all public questions. He was at all times affable and easy of approach and ever ready to listen to the appeal of the humblest as well as the highest who might seek his aid or counsel.

These qualities in time became proverbial, not only in his own district, but throughout the State. He thus established a place for himself in the confidence and esteem of the people, and was renominated and reelected practically without opposition during his long service in the other branch of Congress.

His career in that body as one of the hardest workers and leaders of his party is familiar to most Senators. While making no pretense at rhetorical effect, he gave to every subject discussed the thorough consideration of the student, and when he addressed the House his speeches were noted for their thought and literary excellence.

His best work, however, was done in council—in committee—where his prudence, fairness, conservatism, and wisdom were early recognized and highly valued to the end.

On entering upon his duties in the House he was assigned to the Committee on Naval Affairs, and he was the oldest-ranking member at the time of death. When he became a Member, there was not a battle ship on the naval list, and our tonnage was less than one-quarter of what it is to-day. No one labored more industriously to have our sea force grow and wax strong, and in the language of the chairman of the House committee:

> General MEYER can rightfully be called one of the legislative builders of the new navy, because during the seventeen years of his service upon the committee more than three-fourths of the new American navy has been built.

But it is with the naval station at Algiers that his name will be most enduringly connected. His efforts in the House in conjunction with the labors of the senior Senator from our State in this Chamber resulted in the establishment of a floating dock where the largest ships may be repaired. More than a million six hundred thousand dollars have already been expended on this great work, and while not yet completed, it stands a monument to his foresight, persistency, and untiring zeal.

So likewise must his name be connected with much other notable legislation affecting his district and State. He labored for years to secure the completion of the shaft which marks the field of Chalmette, just below New Orleans, where General Jackson won his immortal victory over the British legions fresh from their laurels at Waterloo.

He was ever active in securing the needed appropriations for his State. With his colleagues he worked assiduously and successfully to obtain the necessary funds for the building and maintenance of our levees; for deepening and widening the mouth of the Mississippi River; for the retention in active operation of the United States mint; for the construction of the post-office building in his city; and for the river improvements in front of New Orleans—all works of vast importance to the general public.

His efforts, however, were by no means confined to Louisiana. He was connected with the Committee on District Affairs almost as long as he served on the Naval Committee, and labored as zealously to make this the most beautiful capital in the world as he did to restore the American flag to its proud position on the sea.

Personally, General MEYER had many charms and attractions. He was always kind, gentle, and considerate in his daily associations, a loyal and stalwart friend, and never forgot a kindness. He was a devoted husband, a kind parent, and affectionate brother; ever bright, cheerful, and thoughtful of the happiness of each and every one in the family circle, and never permitted the duties of his public life to mar or distract the harmony and happiness of his home.

Few men have sacrificed at the altar of public service more liberally than he. To give the best that was in him to the State, with an unstinted hand, and keep no reckoning; to labor in the public vineyard from the early morn of life until an end that came just as twilight greeted the evening star; to serve in camp or council as chance and duty might decree, and then to lie down to rest with the consciousness of work well and faithfully performed is a record of which Louisiana is justly proud.

MEMORIAL ADDRESSES ON THE LATE REPRESENTATIVE BRICK.

Mr. BEVERIDGE. Mr. President, I submit the resolutions which I send to the desk, and ask for their adoption.

The VICE-PRESIDENT. The Senator from Indiana offers resolutions, which will be read:

The resolutions were read, considered by unanimous consent, and unanimously agreed to, as follows:

Senate resolution 314.

Resolved, That the Senate has heard with profound sorrow of the death of the Hon. ABRAHAM LINCOLN BRICK, late a Member of the House of Representatives from the State of Indiana.

Resolved, That the business of the Senate be now suspended in order that a fitting tribute may be paid to his memory.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and to the family of the deceased.

Mr. BEVERIDGE. Mr. President, I rise to pay a tribute of admiration and affection to the memory of the Hon. ABRAHAM LINCOLN BRICK, late Representative in Congress from the Thirteenth Congressional District of Indiana, who departed this life on April 7 of last year. In saying the few words

which I shall speak I know that I voice the sentiment of all the people of the thirteenth district regardless of creeds or parties.

Mr. BRICK was born in St. Joseph County May 27, 1860, just at the beginning of that mighty conflict to save the Nation's life, and it was natural that the loyalty of his parents should find their highest expression in bestowing upon their son the name of that wonderful man under whose guidance the Nation came through the desperate peril which for five years threatened its existence.

Very early in life Mr. BRICK showed unusual mental gifts, and he was noted even in the common schools for his brilliance of mind. He went through the usual course of our common-school instruction, and finally was graduated from the South Bend High School. Later he attended Cornell, Yale, and Michigan universities. After having graduated from the law department of Michigan University in 1883 he began the practice of law in South Bend.

It was not a great while before ABRAHAM L. BRICK became known as one of the very ablest young lawyers, not only of his district, but of the whole State. Few men of his age anywhere were better grounded in legal principles or acquired a richer legal learning. In 1886 he was elected prosecutor for the counties of St. Joseph and Laporte, and he conducted this office with such distinction that the people showed their approval by making him their Representative. He was elected to the Fifty-sixth Congress and reelected to the Fifty-seventh, Fifty-eighth, Fifty-ninth, and Sixtieth Congresses.

In the House of Representatives he constantly grew in influence and efficiency. He was gradually advanced to the membership of important House committees, his ability and industry in every instance having justified his appointment. His work on the House committees was painstaking and thorough, and his judgment upon matters referred to him for settlement was singularly clear and sound. He won the absolute confidence of his colleagues in the House, regardless of party, and he won it by solid work and careful study. He was approaching the fullness and maturity of his unusual powers when death suddenly laid her hand upon his heart, and he passed away from us for a little while.

Mr. BRICK was a mingling of courage and modesty, of rugged strength and a woman's lovableness, of a lawyer's keenness and a poet's imagination. He was an example of the influence which the tremendous moral and intellectual activities of the people at the time of his birth produced upon the children born during that period. He was delicately sensitive to all the nobler impulses, and his bravery amounted to absolute fearlessness. His mind was electric in its rapid operations, and mathematical in the correctness of its conclusions. In his friendships he was loyal, and his devotion to those to whom he gave his heart was almost passionate.

Not only was he deeply versed in the law, but he was a wide reader of all literature. I shall never forget one particular evening which we spent together in my apartments reading Markham's immortal poem on Abraham Lincoln and talking about the large things of history and fate. His brilliancy of speech, his fertility of thought, his wide information were as astonishing as they were delightful.

Mr. BRICK was a stalwart Republican. He profoundly believed in what he understood to be the principles of that party, and he felt that the welfare of his country could best be secured by Republican policies and government. He was a partisan, but with him partisianship meant patriotism.

He has gone from our physical presence, but not from our hearts and our memories. No one who ever knew him ever will forget ABRAHAM LINCOLN BRICK. There are those who look on death as a cruel thing, but I never could share this view. Surely we go hence to something better, purer, nobler; and if we do, death is no more to be regretted than is birth, just as death is no greater a mystery than birth. So death should be accepted as only an incident in an eternal life.

That man is fortunate who, when death comes to him, can leave behind a record of useful work accomplished, of needed things actually done. And particularly fortunate is that man to whom the people give their commission to do their work. As I view it, all good work of every kind, whether in private or public life, is equally important. We can not get along without any of it. The man who digs a well has done as good a thing as the man who erects a monument; the explorer is as admirable as the inventor; the brick mason as necessary as the merchant. But perhaps work done for the people as a public servant, while not of any greater value than any other work, is more distinguished for its largeness and touches more human beings. To do this work fell to the lot of ABRAHAM LINCOLN BRICK; he did it superbly, and he leaves behind a clean, bright record of labor faithfully performed for the Nation.

Mr. HEMENWAY. Mr. President, ABRAHAM LINCOLN BRICK was born in St. Joseph County, Ind., May 27, 1860, and that county was his home until the time of his death, when his body was laid tenderly at rest there forever, and where he is remembered to-day lovingly and pleasantly by thousands of sorrowing friends. We lay aside for a time to-day the cares and duties of public life to pay tribute to his memory, and recall again to our minds his pleasing and charming personality, his high sense of honor and patriotism, and his strong devotion to the service of his people.

The Congress of the United States is made up of men of varied character and temperament, but none render better service to their country than those substantial, hard-working men who attend to their duties and are imbued with the desire to work out substantial legislation that will be of real benefit to the people. In fact, it has been said by an eminent Speaker of the House of Representatives that the real work of Congress is done in the committee rooms, where bills are carefully scrutinized, data collected, and information sought as to the real and practical effect of proposed legislation. The value of this work can not be overestimated, and it was here that Mr. BRICK served his country best. He was an able lawyer, with a strong analytical mind, with an honest desire to work out good legislation. He did not spend his time seeking to find out what policy might be popular and then advocate such policy, but he rather tried to determine whether or not a given proposition or policy was right.

This Government of ours is a tremendous business institution, and it will prosper or fail just in the degree in which business methods are applied in the administration of its affairs. In the fourteen years that I have spent in the American Congress I have observed that more lasting and substantial good has been accomplished by the common sense, practical legislator who threw aside all desire for popular approval and worked with the purpose of securing good legislation, rather than by the theorist who is always seeking something that will attract attention and abandoning that as soon as he finds something more attractive, and all the while seeming to be impressed with the idea that the weight of nations rests on his shoulders. Mr. BRICK belonged to the former class, and when he passed away the people of his district and the State of Indiana and the whole Nation lost a safe and valuable public servant.

Mr. BRICK was a college graduate and a scholarly, cultured gentleman, but in addition to this he had a quality which colleges and universities can not give, and without which their training is useless, and that is common sense. He was my personal friend, and I learned to know him for his true worth. He was broad minded, unselfish, and charitable. He was proud of Indiana and of her history. He was honored by her people and he in turn honored them. In Washington he is remembered with respect and pride. In Indiana he is remembered with gratitude.

MEMORIAL ADDRESSES ON THE LATE REPRESENTATIVE GRANGER.

Mr. ALDRICH. Mr. President, I offer the resolutions which I send to the desk.

The VICE-PRESIDENT. The resolutions will be read by the Secretary.

The resolutions were read, considered by unanimous consent, and unanimously agreed to, as follows:

Senate resolution 313.

Resolved, That the Senate has heard with profound sorrow the announcement of the death of the Hon. DANIEL L. D. GRANGER, late a Representative from the State of Rhode Island.

Resolved, That the business of the Senate be now suspended in order that fitting tribute may be paid to his memory.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and to the family of the deceased.

Mr. ALDRICH. Mr. President, Mr. GRANGER was born in Providence, R. I., in 1852. He was educated in the public schools of Providence and graduated from Brown University. He was a lawyer by profession, and engaged in active practice until 1889, when he was elected city treasurer of the city of Providence. He served in that capacity for eleven years, and was a faithful and efficient public servant, securing the confidence and support of members of both political parties.

In 1900 he was elected mayor of the city of Providence, and was reelected in 1901. The success of his administration as the chief magistrate of his native city strengthened the esteem continuously accorded to him by the people of Providence.

He was elected to the House of Representatives as a Democrat in 1902, and reelected in 1904 and 1906. For twenty years—

almost the entire period of his active life—he was engaged in the public service.

The depth and sincerity of the regard with which he was held by a very wide circle of friends and admirers was evidenced by the numerous tributes to his memory, made public at the time that his death was announced in Providence.

Mr. GRANGER was closely affiliated with St. John's Episcopal Church in Providence, and was one of its most active and influential members. He was vestryman of the church, and for twenty-five years preceding his election to Congress was superintendent of its Sunday school. He was frequently a lay member of church conventions.

I can perhaps best illustrate the position held by Mr. GRANGER in the estimation of representative men of Providence by quoting from recent statements made by the Right Rev. W. N. McVickar, bishop of Rhode Island, and Col. R. H. I. Goddard, one of Rhode Island's leading citizens.

Bishop McVickar, in speaking of Mr. GRANGER's death, said:

> Both church and state have lost a very valuable man, a man who was noted for his high principles and integrity. He was a man whom the State and city had delighted to honor.

Colonel Goddard said:

> Mr. GRANGER was a faithful city treasurer, an excellent mayor, and an able Representative in Congress. His death is a distinct loss to Rhode Island, whose interests he served most conscientiously. In his private life he was exemplary, and throughout his public career he *stood for the highest* standards of political honor.

These expressions fairly represent the estimate placed upon the character and services of Mr. GRANGER by those who knew him best and were most closely associated with him in his religious and political life. This judgment of those most familiar with his successful public career and his many private virtues enables us to measure the loss sustained by the people of Rhode Island in the death of Mr. GRANGER.

Mr. WETMORE. Mr. President, DANIEL LARNED DAVIS GRANGER was born at Providence, R. I., May 30, 1852, and died at Washington February 14, 1909. His funeral took place from St. John's Protestant Episcopal Church, at Providence, and he was buried at Swan Point Cemetery on February 17.

Mr. GRANGER was fitted for college in the schools of his native city; was graduated from Brown University in the class of 1874, from Boston University in 1877, with the degree of LL. B.; was admitted to the bar of Rhode Island the same year, to the United States bar in 1882, and for ten years practiced his profession. In 1902 he received the honorary degree of A. M. from his alma mater.

The first of Mr. GRANGER's family in America, Launcelot Granger, was an inhabitant of Ipswich, Mass., as early as 1648, and afterwards of Newberry, in the same State. He went to Suffield, Conn., in 1674, where the line of descent of Congressman GRANGER remained until his great-grandfather and grandfather removed to Buffalo in 1800 and 1806.

Capt. Abner Granger, the great-grandfather, was present at the battle of Crown Point in 1758 and the taking of Montreal in 1760. He took part in the battles about New York, in New Jersey, and Pennsylvania, and during the winter of 1777–78 was at Valley Forge. He was also a participant in the war of 1812. At his death, in 1816, a Buffalo newspaper described him in an obituary notice as a "veteran of three wars."

Judge Erastus Granger, the grandfather, was appointed by Jefferson agent for the Six Nations, and also by him postmaster, surveyor of the port, and collector of the port of Buffalo, performing the duties of the three last offices by deputy. He was also one of the judges of the court of Genesee, supervisor of Buffalo, and one of the founders of St. Paul's Episcopal Church, being its first senior warden. As Indian agent he was largely instrumental in making a treaty with the Six Nations which bound them to neutrality; and afterwards, when they openly joined the side of the Americans, he was commissioned as lieutenant-colonel of New York Volunteers and went to the front with them to Canada.

The Rev. James Nathaniel Granger, D. D., the father, was born at Canandaigua, N. Y. In 1828 he received an appointment to the United States Military Academy at West Point, but, deciding to become a clergyman, entered the Hamilton Literary and Theological Institute, now Colgate University, and was graduated from the collegiate department and theological school. In 1842 he became pastor of the First Baptist Church of Providence, R. I., and was for many years president of the Rhode Island Baptist State Convention, president of the Rhode Island State Sunday School Union, trustee and fellow of Brown University and a member of its executive board.

Outside of his political activities, Mr. D. L. D. GRANGER was a trustee of the Providence Public Library and a member of the Rhode Island Historical Society. His interest in religious matters and the appreciation in which he was held by the Protestant Episcopal Church of his State is shown by the positions he held in that denomination, having been president of the Churchman's Club, member of the standing committee of the diocese, member of the vestry of St. John's Church, and for twenty-five years preceding his election to Congress superintendent of its Sunday school.

Before his election to the United States House of Representatives Mr. GRANGER was twice reading clerk of the house of representatives of Rhode Island, city treasurer of Providence for eleven years, from 1890 to 1900, and mayor of Providence for two terms, for the years 1900 and 1901.

Mr. GRANGER was elected from the first district of Rhode Island to the House of Representatives for the Fifty-eighth, Fifty-ninth, and Sixtieth Congresses and defeated last November for the Sixty-first Congress. During his service in the House of Representatives he was a member of the Committee on the Revision of the Laws and the Committee on Ways and Means.

As an evidence of the loyalty of Mr. GRANGER's political supporters I would state that in the Rhode Island election of 1907 the Democratic candidate for governor was elected by a plurality of over 2,000 votes, and the full Democratic ticket for the general assembly from the city of Providence, a part of his congressional district, was elected by an average plurality of over 3,000 votes.

At the elections last November, the presidential year, when Mr. Taft received a larger plurality than President Roosevelt in 1904, the situation described a little above was reversed, and the Republican candidate for governor was elected by a plurality of over 7,000 and the full Republican ticket for the general assembly from the city of Providence was elected by an average plurality of almost 1,000, and yet Mr. GRANGER was defeated by only 81 votes.

For some time past Mr. GRANGER's health had been seriously affected, and he was obliged during a part of two sessions of Congress to go to Florida and the South, the condition of his health being apparently much benefited by so doing. Last summer, when in England, he had, however, such a severe attack of the heart that on his return home he was advised by his physician to take little or no part in the presidential campaign, an admonition which he submitted to with rare exceptions. On November 7 last he was stricken on his way to Buffalo with a much severer similar attack, from which he never recovered to any extent.

On his death the governor of Rhode Island, a Republican, communicated the following message to the general assembly:

> As chief executive of the State, it becomes my painful duty to communicate officially to you the fact of the death of Hon. DANIEL L. D. GRANGER, Member of Congress from the First Congressional District of Rhode Island for the term ending March 4, 1909, which occurred at Washington, D. C., on the evening of Sunday, February 14.
>
> As a lawyer, statesman, and citizen, Congressman GRANGER held a place in the confidence and esteem of the people that it falls to the lot of few to attain. In the belief that some fitting recognition of his service to the State should be accorded by its legislative body, I would respectfully recommend that on the day of the funeral, Wednesday, February 17, all business before the general assembly that does not necessitate immediate action be suspended for the day.
>
> As a further mark of respect, I have ordered that the flags on all state buildings in Rhode Island be placed at half mast on the day of the funeral, from sunrise until the completion of the funeral ceremonies.

The general assembly of Rhode Island, Republican, by 95 to 12, under a suspension of the rules, passed by unanimous vote of both branches the following resolutions of respect:

> *Resolved*, That the general assembly, through the message of his excellency the governor, learns with profound regret of the death of the Hon. DANIEL L. D. GRANGER, Member of the Sixtieth Congress for the First District of Rhode Island.
>
> *Resolved*, That the extended and exalted public services of Mr. GRANGER entitle his memory to the highest respect of the people of the State.
>
> *Resolved*, That as a mark of appreciation of Mr. GRANGER'S devotion to his ideals of right and his ever-faithful performance of duty the general assembly shall, on Wednesday, the 17th day of February, the day of the funeral, adjourn at the earliest practicable hour.
>
> *Resolved*, That a committee of the general assembly, comprising three members of the senate, to be appointed by his excellency the governor, and four members of the house of representatives, to be appointed by the honorable speaker, be, and the same is hereby, created to represent the general assembly at the funeral ceremonies.

Mr. President, as a further mark of respect to the memory of the deceased, I move that the Senate adjourn.

The motion was unanimously agreed to; and (at 5 o'clock and 27 minutes p. m.) the Senate adjourned until Monday, March 1, 1909, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

SATURDAY, *February 27, 1909.*

[*Continuation of legislative day of Tuesday, February 23, 1909.*]

The recess having expired, the House, at 11 o'clock a. m., was called to order by the Speaker.

PENSIONS.

Mr. LOUDENSLAGER. Mr. Speaker, I ask unanimous consent to take from the table the motion to reconsider the vote whereby the bill (S. 9278) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain dependent relatives of such soldiers and sailors was passed and to reconsider the vote by which the bill was passed and the motion to reconsider laid on the table.

The SPEAKER. The gentleman from New Jersey asks unanimous consent to take from the table the bill S. 9278, and to reconsider the vote whereby the bill was passed. Is there objection?

Mr. CLARK of Missouri. What is this?

Mr. LOUDENSLAGER. This is a Senate bill that came over and was referred to our committee. The committee of the House put some amendments on it. Last night the bill was called up and passed, but passed as it came from the Senate, without the House amendments, and we want to reconsider the vote and put in the House amendments.

Mr. CLARK of Missouri. To whom does it give pensions?

Mr. LOUDENSLAGER. It is an omnibus bill, with several beneficiaries in it.

Mr. MANN. It is not a general pension bill.

The SPEAKER. The gentleman asks unanimous consent to reconsider the vote. Is there objection?

There was no objection.

Mr. LOUDENSLAGER. Now, Mr. Speaker, I offer the following committee amendments.

The Clerk read as follows:

Page 2, strike out lines 7, 8, 9, 10, and 11, as follows: "The name of Frances D. Webster, dependent mother of James D. Webster, late of Company A, Ninth Regiment U. S. Infantry, war with Spain, and pay her a pension at the rate of $24 per month in lieu of that she is now receiving."

Page 3, strike out lines 5, 6, 7, and 8: "The name of Florence Van Etta, former widow of John H. Purcell, late first lieutenant, First Regiment U. S. Infantry, and pay her a pension at the rate of $20 per month."

Page 4, strike out lines 5, 6, and 7, as follows: "The name of Ellen Bernard Lee, widow of Fitzhugh Lee, late brigadier-general, United States Army, and pay her a pension at the rate of $50 per month."

The SPEAKER. The question is on agreeing to the amendments.

The amendments were agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

Mr. LOUDENSLAGER. Now, Mr. Speaker, I ask to take from the table a motion to reconsider the vote whereby the bill (S. 9421) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors was passed. The same reasons apply to that bill.

The SPEAKER. The gentleman from New Jersey asks consent to take from the table the motion to reconsider and reconsider the vote whereby the bill referred to was passed. Is there objection?

There was no objection.

Mr. LOUDENSLAGER. Now, Mr. Speaker, I offer the following amendments recommended by the committee.

The Clerk read as follows:

On page 1 strike out all of lines 6, 7, 8, and 9, in the case of Jay B. Sessions.

On page 2 strike out all of lines 1, 2, 3, and 4, in the case of Winslow H. Reaves.

On page 2, line 7, strike out "forty" and insert "thirty," in the case of Marianna C. Rockwell.

On page 2, line 10, strike out "fifty" and insert "thirty," in the case of Samuel H. Askew.

On page 2, line 14, strike out "twenty" and insert "twelve," in the case of William G. Glasgow.

The amendments were agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

Mr. LOUDENSLAGER. Mr. Speaker, I ask unanimous consent that the bill H. R. 27249 be taken from the Speaker's table and the House disagree to the Senate amendments and ask for a conference.

Mr. JONES of Virginia. Mr. Speaker, reserving the right to object, I want to ask the gentleman a question. Is there a provision in one of these bills for pensioning Ellen Bernard Lee, widow of Fitzhugh Lee?

Mr. LOUDENSLAGER. No; there is not.

Mr. JONES of Virginia. Was the provision disagreed to by the House?

Mr. LOUDENSLAGER. It was.

Mr. JONES of Virginia. Then, Mr. Speaker, unless the gentleman will consent to an amendment of this bill incorporating the name of Ellen Bernard Lee, I am afraid I shall have to object to the consideration.

Mr. LOUDENSLAGER. We could not agree on it.

Mr. JONES of Virginia. I will ask the gentleman why the amendment was rejected.

Mr. LOUDENSLAGER. I can only say that Mrs. Lee is the widow of a Regular Army officer who had been in the service for a very short period. He died without any disability incurred in the service, and it has been the uniform practice of both committees not to grant pensions to either the widows of officers or the widows of soldiers or sailors who served in the regular service in time of peace. He did not die from disabilities received in the service, and this would be an exception, and an exception in favor of the widow of an officer who served but a very short period and during a time of peace.

Mr. JONES of Virginia. Mr. Speaker, I would like to make just a brief statement in regard to what the gentleman from New Jersey [Mr. LOUDENSLAGER] has said. The Senate has passed a bill to grant a pension to Mrs. Lee, widow of the late Gen. Fitzhugh Lee, but up to this time the House Committee on Pensions has failed to act upon it. General Lee was not only a major-general in the Spanish war, and he not only performed distinguished services as consul-general at Habana just prior to the beginning of that war, but, in addition to this, Mr. Speaker, he served in the Regular Army of the United States prior to the civil war, during which service he was seriously wounded in a fight with the Indians. If it be true, as has been stated, that his service as brigadier-general in the Regular Army subsequent to the Spanish war was of short duration, it should not be forgotten that he held high command and rendered distinguished services during that war, and that he well-nigh lost his life when a young lieutenant fighting Indians on the frontier prior to the civil war.

Mr. LOUDENSLAGER. Mr. Speaker, as this bill does not pertain at all to the question referred to by the gentleman from Virginia, I withdraw my request.

Mr. JONES of Virginia. Mr. Speaker, I do not want to delay the passage of the bill, and rather than do that I will withdraw my objection. My only purpose in objecting to this particular bill, or rather reserving the right to object, was to put the House in possession of the real facts connected with the military services of General Lee.

Mr. LOUDENSLAGER. Mr. Speaker, I will say to the gentleman that I will take the matter up at some other time.

SELLING SURPLUS INDIAN LANDS, KAW AND OSAGE TRIBES.

Mr. SHERMAN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 8554) authorizing the Secretary of the Interior to sell part or all of the surplus lands of members of the Kaw, or Kansas, and Osage tribes of Indians in Oklahoma, and for other purposes, which I send to the desk and ask to have read. I will state that this is the bill I had the other day, and to which the gentleman from Illinois [Mr. MANN] objected. He now withdraws his objection.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he hereby is, authorized and empowered, upon application, to sell, under such rules and regulations as he may prescribe, part or all of the surplus lands of any member of the Kaw, or Kansas, and Osage tribes of Indians in Oklahoma: *Provided*, That the sales of the Osage lands shall be subject to the reserved rights of the tribe in oil, gas, and other minerals.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

JOHN SHULL.

The SPEAKER laid before the House the bill (H. R. 4286) for the relief of John Shull, with Senate amendments thereto.

The Senate amendments were read.

Mr. MILLER. Mr. Speaker, I move to concur in the Senate amendments.

The motion was agreed to.

COMPAÑÍA DE LOS FERROCARRILES DE PUERTO RICO.

The SPEAKER laid before the House the bill (H. R. 15681) for the relief of the Compañía de los Ferrocarriles de Puerto Rico, with Senate amendments thereto.

The Senate amendments were read.

Mr. MILLER. Mr. Speaker, I move to concur in the Senate amendments.

Mr. CARLIN. Mr. Speaker, I will ask what committee that comes from?

Mr. MILLER. It comes from the Committee on Claims.

Mr. CARLIN. I would like to ask the gentleman if those bills were reported by a majority of the full committee or by a committee of four, appointed to consider the Senate bill.

Mr. MILLER. They were reported by the full committee, and passed by the committee, and this has been passed by the Senate with an amendment, simply a change in the wording of the original report.

Mr. CARLIN. Is it not true that the gentleman's committee has delegated its authority, with reference to Senate bills, to a committee of four?

Mr. MANN. Mr. Speaker, to that I make a point of order.

The SPEAKER. The point of order is sustained.

Mr. CARLIN. Does this require unanimous consent?

The SPEAKER. It does not. The question is on the motion of the gentleman from Kansas that the House concur in the Senate amendments.

The question was taken, and the Senate amendments were concurred in.

INTERNATIONAL CONGRESS OF APPLIED CHEMISTRY.

Mr. HARRISON. Mr. Speaker, I ask unanimous consent for the present consideration of House joint resolution 261, authorizing the President of the United States to invite the International Congress of Applied Chemistry to hold its eighth meeting in the United States of America in the year 1912, which I send to the desk and ask to have read.

The Clerk read as follows:

House joint resolution 261.

Resolved, etc., That the President of the United States be, and is hereby, authorized to invite the International Congress of Applied Chemistry, now about to assemble in the city of London, to hold its eighth meeting in the United States of America in the year 1912: *Provided, however*, That no appropriation shall be asked or granted for any expense connected with said congress.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on the engrossment and third reading of the House joint resolution.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

ASSIGNMENT OF ROOMS, CAPITOL AND OFFICE BUILDING.

Mr. MANN. Mr. Speaker, from the Committee on Distribution of House Rooms, I present the following privileged report (H. Rept. No. 2277) and resolution, which I send to the desk and asked to have read.

The Clerk read as follows:

House resolution 599.

Resolved, That the following assignment of rooms be, and the same is hereby, made, to wit:

IN THE CAPITOL BUILDING.

To the Committee on Elections No. 2, the room on the first floor now occupied by the Committee on the Judiciary.

To the Committee on Foreign Affairs, the rooms now occupied by the Committee on Elections No. 1 and No. 2.

The room now occupied by the Committee on Foreign Affairs is hereby assigned to be used as a ladies' retiring room.

The space now occupied for ladies' retiring room is hereby assigned to be used as a part of the reporters' gallery.

IN THE HOUSE OFFICE BUILDING.

To the Committee on the Judiciary, rooms 481, 483, and 483A.

To the Committee on Elections No. 1, room 297, heretofore assigned for the use of the press.

To the Committee on Banking and Currency, as an additional room, room 450.

The SPEAKER. The question is on agreeing to the resolution.

The question was taken, and the resolution was agreed to.

Mr. SMITH of Michigan. Mr. Speaker, I call up the bill S. 8520.

The SPEAKER. The Chair can not recognize the gentleman until some matters of a privileged nature are disposed of, at least the Chair desires to give the House an opportunity to dispose of them before the District of Columbia matter is considered.

Mr. SMITH of Michigan. Then, Mr. Speaker, I move to suspend the rules and——

The SPEAKER. One moment. The Chair has a few matters, if the gentleman will withhold his matter.

AGRICULTURAL APPROPRIATION BILL.

Mr. SCOTT. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 27053) making appropriation for the Department of Agriculture, to nonconcur in the Senate amendments, and ask for a conference.

The SPEAKER. The gentleman from Kansas asks unanimous consent to take from the Speaker's table the agricultural appropriation bill, to disagree to the Senate amendments, and ask for a conference. Is there objection? [After a pause.] The Chair hears none.

The Chair announces the following conferees.

The Clerk read as follows:

Mr. SCOTT, Mr. HAUGEN, and Mr. LAMB.

PERSONAL PRIVILEGE.

Mr. COOK of Colorado. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. COOK of Colorado. To a question of personal privilege.

The SPEAKER. But matters of the highest privilege are now being considered. However, the gentleman will state it.

Mr. COOK of Colorado. Mr. Speaker, in the Washington Post of this morning an article headed "Fun for President" is published. I desire, Mr. Speaker, to read a portion of the article given out at the White House, referring to me as a Member of this House.

As had been arranged Thursday, the House yesterday morning referred to a select committee the speech of Representative COOK, in which he assailed the President. The resolution referring the speech to a committee was introduced by Chairman TAWNEY, of the Appropriations Committee, after being suggested by Representative HUGHES of West Virginia. The committee will report to the House on Monday what action it recommends.

The debate on the resolution was largely parliamentary, but CHAMP CLARK opposed it on general grounds, declaring that he had opposed expunging Mr. WILLETT'S remarks, because it was a tendency toward throttling free speech, and he opposed expunging the remarks of Mr. COOK on the same ground. He did so, he declared, the more freely because Mr. COOK was a Republican, and no trace of partisanship could be seen in his action.

SUGGESTED CAUSE OF ATTACK.

It was said at the White House yesterday that Mr. COOK'S recent outburst may have been inspired by the President's opposition to a measure which he has been endeavoring to have become a law, dealing with a question of the boundary of Colorado. It was pointed out to Mr. COOK that, under the Constitution, it was necessary to have affirmative action of the Colorado legislature before Congress could act in the matter, but that difficulty did not seem to appeal to him as of sufficient weight.

This speech is the second time Mr. COOK has "gone after" the President. About a year ago, soon after he came to Congress, and during the preliminary campaign for the Republican presidential nomination, he sent out a letter attacking Mr. Roosevelt savagely. Mr. COOK was elected Congressman-at-large from Colorado in 1906, succeeding Franklin E. Brooks, of Colorado Springs. He was not renominated last summer, and the man who did get the Republican nomination was defeated by a Democrat at the November elections.

Mr. COOK of Colorado. Mr. Speaker, I positively deny the President of the United States——

Mr. PAYNE. Mr. Speaker, I submit to the Chair that this is not a question of personal privilege, from beginning to end, and I make the point of order against it.

The SPEAKER. The gentleman from New York makes the point of order that the gentleman from Colorado does not present a matter of personal privilege. The Chair must say, having listened to the reading of the article, that it does not seem to the Chair that the article affects the gentleman in his representative capacity; and the gentleman, in the opinion of the Chair, could only proceed by unanimous consent.

Mr. MACON. Mr. Speaker, I ask that the gentleman may be allowed to proceed——

Mr. PAYNE. How much time does the gentleman desire?

Mr. COOK of Colorado. About four minutes.

Mr. PAYNE. Mr. Speaker, I ask unanimous consent that the gentleman may have four minutes.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. COOK of Colorado. Mr. Speaker, I positively deny the President of the United States pointed out to me that under the Constitution it was necessary to have affirmative action of the Colorado legislature before action could be taken in the matter. In the President's veto of the Colorado, Oklahoma, and New Mexico boundary-line bill, he gave as a reason for vetoing the boundary-line bill passed by the Sixtieth Congress that it would remove from the jurisdiction of Colorado and add to the Territory of New Mexico at least five post-offices and an appreciable number of inhabitants. This is also an incorrect statement, in proof of which I hold a letter, signed personally by Mr. Meyer, the Postmaster-General, dated January 20, 1909, which I read:

OFFICE OF THE POSTMASTER-GENERAL,
Washington, D. C., January 20, 1909.

MY DEAR CONGRESSMAN: In answer to your letter of January 19, requesting the names of any post-offices that were taken from Colorado and reestablished in the Territory of New Mexico under what is known as the "Carpenter survey," I have to advise you that the only post-office shown by the records of this department to have been affected by that survey is that of Edith, N. Mex., which, in accordance with the

survey, was changed from Colorado to New Mexico in 1904. Edith post-office is shown on the current post-route map of the Territory of New Mexico.

Respectfully, GEO. V. L. MEYER.

Hon. GEORGE W. COOK,
House of Representatives.

Mr. COOK of Colorado. This transfer was made at the time the Interior Department approved and accepted the Carpenter survey establishing the thirty-seventh parallel and boundary line between Colorado, Oklahoma, and the Territory of New Mexico. The thirty-seventh parallel and boundary line was established by the act making Colorado a Territory February 28, 1861 (12 Stat. L., 172), and by the enabling act passed by Congress March 3, 1875, and accepted in the constitution of Colorado when admitted into the Union in 1876. If the President had taken time to refer to his letter of January 10, 1905, addressed to the Senate and House of Representatives inclosing a letter from Secretary Hitchcock, of the Department of the Interior, dated January 7, 1905, he would have seen that the Secretary of the Interior used the following language:

The State of Colorado, by act of general assembly of April 11, 1901, authorized the appointment of a commissioner to act in conjunction with representatives of the General Government and the adjacent Territories for the purpose of fixing and determining a part of said south boundary line.

In my letter to the President, dated December 31, 1908, and personal interview with the President, I called his attention to the act passed by the Colorado legislature and to the fact that on July 1, 1902, Congress made an appropriation of $31,500. Under this authority the Department of the Interior made a contract July 7, 1902, with Howard B. Carpenter, surveyor and astronomer, for the execution of the reestablishment. The work was commenced in September, 1902, and completed in October, 1903. Said resurvey was accepted by the act of the Colorado legislature, passed April 11, 1901, and was approved and accepted by the Interior Department February 15, 1904. In my letter of December 31, 1908, to the President, and my personal interview, I said:

The only objection in Colorado made to the action of the Sixtieth Congress and the Interior Department is by the Colorado Fuel and Iron Company, to avoid the payment of taxes on thousands of acres of land underlain with coal, situate along the thirty-seventh parallel, and this company is now owned and controlled by the Standard Oil Company.

Evidently the President, judging from his veto message, is not in this important matter antagonizing the interests of the Standard Oil Company.

As to the reference made at the White House that I was not renominated as a Member of the House, I desire to say, Mr. Speaker, that at no time was I ever a candidate for reelection to this House from my State. [Applause.]

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

A message in writing from the President of the United States was communicated to the House of Representatives by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had approved and signed bills of the following titles:

On February 26, 1909:

H. R. 3844. An act for the relief of E. L. Simpson;

H. R. 4307. An act for the relief of E. J. Reed;

H. R. 15442. An act to amend an act entitled "An act to establish a court of private land claims and to provide for the settlement of private land claims in certain States and Territories," approved March 3, 1891, and the acts amendatory thereto, approved February 21, 1893, and June 27, 1898;

H. R. 16269. An act authorizing the extension of Ninth street NW.;

H. R. 17171. An act for the relief of Benjamin F. Curry;

H. R. 17303. An act authorizing the extension of Girard street NW. from its western terminus to Fifteenth street NW.;

H. R. 21019. An act to reimburse Agnes M. Harrison, postmaster at Wheeler, Miss., for loss of money-order remittance;

H. R. 21167. An act to reimburse J. N. Newkirk, postmaster of San Diego, Cal., for moneys lost by burglary;

H. R. 26068. An act providing for an additional judge for the western district of Pennsylvania, and for other purposes;

H. R. 27139. An act to provide for the sittings of the United States circuit and district courts of the northern district of Ohio at the city of Youngstown, in said district; and

H. R. 27425. An act to provide for the parole of juvenile offenders committed to the National Training School for Boys, Washington, D. C., and for other purposes.

On February 27, 1909:

H. R. 18694. An act relating to the use, control, and ownership of lands in the Canal Zone, Isthmus of Panama,

ENROLLED BILLS SIGNED.

The Speaker announced his signature to enrolled bills of the following titles:

S. 9422. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and helpless and dependent relatives of such soldiers and sailors; and

S. 9454. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and helpless and dependent relatives of such soldiers and sailors.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 27053. An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910.

GENERAL DEFICIENCY BILL.

Mr. TAWNEY, from the Committee on Appropriations, reported the bill (H. R. 28376), the general deficiency bill, making appropriation to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes, and submitted a report (H. Rept. No. 2274) thereon, which bill and report were referred to the Union Calendar and ordered to be printed.

Mr. FITZGERALD. Mr. Speaker, I reserve all points of order.

CODE OF LAW, DISTRICT OF COLUMBIA.

Mr. SMITH of Michigan. Mr. Speaker, I call up the bill (S. 6055) entitled "An act to amend section 691 of subchapter 7, building associations, of the Code of Law for the District of Columbia," and move to suspend the rules and pass the same.

The SPEAKER. The gentleman from Michigan moves to suspend the rules and pass the following bill and agree to the committee amendments. The Chair suggests to the gentleman that he had better hold the matter temporarily. The Chair is under the impression that there is another amendment that somebody desired to offer which was acceptable to the gentleman's committee.

Mr. SMITH of Michigan. The gentleman from Pennsylvania [Mr. BRODHEAD], who has immediate charge of the bill, may know of that amendment.

The SPEAKER. The Chair calls the attention of the gentleman from Pennsylvania [Mr. BRODHEAD] to the motion of the gentleman from Michigan to pass this bill with committee amendments. The Chair is under the impression, from the gentleman from Pennsylvania [Mr. MOORE], or somebody who talked to the Chair about it, that there was an additional amendment, which was agreed to.

Mr. BRODHEAD. Yes; there is an additional amendment.

The SPEAKER. Will the gentleman inform his colleagues on the committee what that amendment is, so that the motion can cover that as well as the committee amendment?

Mr. SMITH of Michigan. To save time, then, I withdraw it for the moment.

The SPEAKER. Perhaps we had better get at it now. Has the gentleman the amendment?

Mr. BRODHEAD. Yes.

The SPEAKER. Will the gentleman confer with his colleague, the gentleman from Michigan [Mr. SMITH], a moment?

Mr. BRODHEAD. I will.

Mr. CARLIN. Mr. Speaker, I desire to offer an amendment to that bill at the proper time.

The SPEAKER. The Chair has no control over the matter, except that the Chair was led to believe from members of the committee that this was an amendment concerning which they are now conferring—that they desired to have considered in relation to the motion to suspend.

Mr. CARLIN. Mr. Speaker, I would like to have this withdrawn for the present until I can prepare an amendment and hand it to the gentleman.

The SPEAKER. For what purpose does the gentleman rise?

Mr. CARLIN. I would like to ask the chairman of this committee to withdraw this bill for a moment or two until I can prepare an amendment.

The SPEAKER. Does the gentleman from Michigan [Mr. SMITH] withdraw the bill for the present?

Mr. SMITH of Michigan. I do.

UNSURVEYED PUBLIC LANDS, CRAIGHEAD COUNTY, ARK.

Mr. MACON. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. MACON. I rise for the purpose of asking unanimous consent to call up a Senate bill for immediate consideration.

The SPEAKER. Is it on the House Calendar?

Mr. MACON. It is on the Union Calendar.

The SPEAKER. Does the gentleman from Michigan [Mr. SMITH] withhold for a moment the request for unanimous consent?

Mr. SMITH of Michigan. Yes.

The SPEAKER. The gentleman from Arkansas [Mr. MACON] asks unanimous consent to discharge the Committee of the Whole House on the state of the Union from further consideration of the following bill (S. 8654), which the Clerk will report.

The Clerk read as follows:

An act (S. 8654) for the relief of certain occupants of unsurveyed public lands in Craighead County, Ark.

Be it enacted, etc., That the survey, made under the authority of the State of Arkansas in the year 1898, of a small area of land known as Cane Island, situated in St. Francis River, in townships Nos. 14 and 15 north, range 6 east, Craighead County, Ark., into blocks numbered, respectively, from 1 to 33, inclusive, shall, upon the filing in the local land office, and with the Commissioner of the General Land Office, of that plat of said survey and the field notes thereof, be accepted as the governmental official survey of said body of land.

SEC. 2. That, under rules and regulations to be prescribed by the Secretary of the Interior, all persons who at the date of the passage of this act are bona fide occupants and owners of improvements situated upon any of the blocks returned by said survey, shall have a preferred right at any time within one year from the passage of this act to make entry, under the provisions of the homestead laws, of the block or blocks so occupied and upon which their improvements are situated, as their respective interests may appear, or to make purchase of such lands at the rate of $1.25 per acre: *Provided*, That no person shall be permitted to acquire title under this act to more than 160 acres: *Provided further*, That nothing in this act shall be construed to grant to any person title to any part of the island, herein referred to, which is shown to be within the limits of land previously surveyed and disposed of by the Government.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. MACON, a motion to reconsider the vote by which the bill was passed was laid upon the table.

NIAGARA RIVER.

Mr. BURTON of Ohio. Mr. Speaker, I desire to ask unanimous consent for the consideration of House joint resolution 262, which I will ask to have read.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House joint resolution 262, extending the operation of an act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes.

Whereas the provisions of the act entitled "An act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes," approved June 29, 1906, will expire by limitation on June 29, 1909; and

Whereas a date for the termination of the operation of said act was provided therein, but with a view to the more permanent settlement of the questions involved by a treaty with Great Britain and by further legislation appropriate to the situation, and such treaty not having been negotiated, it is desirable that the provisions of said act should be continued until such permanent settlement can be made: Therefore be it

Resolved, etc., That the provisions of the aforesaid act be, and they are hereby, extended for two years from June 29, 1909, being the date of the expiration of the operation of said act, save in so far as any portion thereof may be found inapplicable or already complied with.

The SPEAKER. Is there objection?

Mr. PORTER. Mr. Speaker——

Mr. MANN. Mr. Speaker, reserving the right to object, I simply wish to ask the gentleman, the chairman of the Committee on Rivers and Harbors, whether the passage of this resolution would in any way affect the controversy now in court or going on concerning the additional flow of water out of Lake Michigan at Chicago?

Mr. BURTON of Ohio. I do not see how it can. I take it that it is an entirely separate matter.

Mr. MANN. There was a provision in one of the laws that the Secretary of War declared determined the matter. The gentleman does not remember whether it was in the law concerning this or not?

Mr. BURTON of Ohio. It is under the general law rather than the act.

Mr. PORTER. Mr. Speaker——

The SPEAKER. Does the gentleman from Ohio yield?

Mr. BURTON of Ohio. I do.

Mr. PORTER. Mr. Speaker, I want merely to make a brief statement of the facts in connection with this resolution. The act of 1906, which this resolution keeps in operation for two years from June 29, 1909, when it would expire by limitation, was enacted with the intent to limit and regulate the diversion of water from the Niagara River for power purposes, and thereby to preserve the scenic beauty of the falls and of the rapids both above and below them, whose beauty it was widely and in many respects erroneously claimed was in imminent danger, because of the existing and proposed diversions of water. These diversions had been authorized on the American side by the State of New York, and similar, though larger, diversions had been authorized on the Canadian side. Since this act was passed some charters which had been granted by the State of New York for power diversion, and which were dormant, have been repealed. The act of 1906 limited the amount of water on the American side for which revocable permits could be issued. Time and investigations have proved that more than that limit can be granted with safety to the scenic beauty.

The investment of many millions of dollars within the city of Niagara Falls, N. Y., in the development of many thousands of horsepower brought many large industries to that city and trebled the population between 1890 and 1905. The volume of water going over the falls had not been affected to any appreciable degree; yet the cry was set up that the falls of Niagara were being destroyed and the Federal Government was called upon to exercise its powers and rights over the Niagara River as a boundary stream in order to "preserve" the falls.

Why, Mr. Speaker, the people living in the city of Niagara Falls are more interested in preserving those falls and all the wonderful scenery at and adjacent to them than any other people on earth; not merely because they share the universal admiration for the unique scenic beauty, but also because so many of them are engaged in lines of business that cater to nearly a million and a half people who annually visit Niagara. Any damage that might be done to either the falls themselves or to the rapids above or below them by reason of diversion of water would be, in a scenic sense, a calamity not only to the people of the United States but to the people of the world, and, in a business sense, especially so to the people who live in the immediate vicinity of the falls.

Of course my constituents want to "preserve" Niagara. But there is a vast amount of power in the falls which can be developed and utilized without any damage to those falls or to the scenery, and up to the limit to which power can be developed with safety to the scenic beauty of Niagara, both the falls and the rapids, we desire to have it done. Under the act of 1906 the many industries at Niagara Falls, N. Y., are now operating on revocable permits granted to the companies developing power. Since June, 1906, when the act which this resolution extends became a law, we have not had a single great industry which requires large blocks of power located there, and this is solely because, under that act, they can now be guaranteed nothing but a revocable license for their power.

The act of 1906, section 4, called upon the President to open negotiations with Great Britain for a treaty to regulate and control the waters of Niagara River and to preserve the scenic beauty of the falls and the rapids. A treaty embodying those points and other subjects is now before the Senate. The people of Niagara Falls are extremely anxious to have this whole question definitely settled by a treaty. Power conditions at Niagara Falls and business conditions depending thereon can only be made better by a permanent, not a temporary, condition. The act of 1906 limited the diversion of water on the American side to 15,600 cubic feet per second, whereas the treaty now before the Senate is reported to contain, and I believe correctly, a consent for the diversion of 20,000 cubic feet per second on the American side.

I have desired and I have contended that the extension of the above act shall be for only one year, for as short a period as possible, until a treaty can be ratified and made effective; but when the treaty shall be ratified by the Senate some new legislation will undoubtedly be required, and the argument is made that one year might, and probably would, prove too short a time in which to complete such legislation. And with a full knowledge of conditions at Niagara, on that ground, therefore, I shall offer no objection to the adoption of this resolution.

The joint resolution was ordered to be engrossed for a third reading; and being engrossed, it was accordingly read the third time and passed.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had insisted upon its amendments to the bill (H. R. 27053) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. WARREN, Mr. DOLLIVER, and Mr. MONEY as the conferees on the part of the Senate.

BROWNSVILLE AFFRAY.

Mr. DALZELL. Mr. Speaker, I submit the following privileged report from the Committee on Rules.

The Clerk read as follows:

House resolution 600.

Resolved, That immediately after the adoption hereof it shall be in order to consider the bill of the Senate (S. 5729) to correct the records and authorize the reenlistment of certain noncommissioned officers and enlisted men belonging to Companies B, C, and D of the Twenty-fifth U. S. Infantry, who were discharged without honor under Special Orders, No. 266, War Department, November 9, 1906, and the restoration to them of all rights of which they have been deprived on account thereof, and that after one and a half hour's debate, to be divided between those in favor of the measure and those opposed to the measure, the previous question shall be considered as ordered on the bill to final passage without any intervening motion.

Mr. DALZELL. Mr. Speaker, the purpose of this resolution is to bring up for present consideration Senate bill 5729. That bill provides that the Secretary of War shall be authorized to appoint a court of inquiry to consist of five officers of the United States Army not below the rank of colonel. The court is to be authorized to hear and report upon all charges and testimony relating to the shooting affray which took place at Brownsville, Tex., on the night of August 13–14, 1906, and the bill provides that this board shall be authorized to report after examination as to the qualification for reenlistment of the parties who were discharged under the order made by the President, with a view to restoration to the army of those who may be proven eligible and with a view of their restoration to pay from the date of discharge.

Mr. LIVINGSTON. Is there any provision made for an appeal from that board?

Mr. DALZELL. There is no provision for an appeal.

Mr. LIVINGSTON. Would the gentleman accept an amendment of that kind, and send that to conference?

Mr. DALZELL. I am not authorized to do so. I now move the previous question, but will first yield to the gentleman from Mississippi to make a statement.

Mr. WILLIAMS. I want to state to this side that in order to get forty-five minutes of debate rather than the twenty minutes under the rule, I agreed in committee not to call the yeas and nays on the passage of the rule, calling for the yeas and nays only on the passage of the bill. I furthermore agreed to request that nobody else should call for it on the rule.

Mr. DALZELL. I now ask for the previous question.

The question was taken on ordering the previous question, and the Speaker announced that the ayes seemed to have it.

Mr. WILLIAMS. Division!

The House divided; and there were—ayes 125, noes 90.

So the previous question was ordered.

The question was taken, and the resolution was agreed to.

The SPEAKER. Under the practice of the House it seems to the Chair that the gentleman from Iowa, chairman of the Committee on Military Affairs, should be recognized for forty-five minutes and some member of the minority on that committee would be entitled to recognition.

Mr. CLARK of Missouri. Mr. Speaker, inasmuch as the gentleman from Mississippi [Mr. WILLIAMS] is the ranking member of the Committee on Rules that brought in the rule, I want him to have control of our time.

The SPEAKER. Without objection, it will be so ordered. The Chair hears no objection.

Mr. HULL of Iowa. Mr. Speaker, I would have been entirely satisfied for the gentleman from Pennsylvania to have had control of the time for this side of the House; but he requested that I should take the position, and I am perfectly willing to assume the responsibility of parceling out the time.

Mr. Speaker, the entire membership of this House is thoroughly familiar with the question that is to be determined by us at the close of this debate by our vote on the bill. There was an unfortunate occurrence at Brownsville, Tex., many months ago, and it seemed impossible for the President to determine who were the guilty parties; and the result of his investigation led to what seemed to be a legitimate exercise of executive power, and, in my judgment, he was clearly within his rights as the Executive of the Nation in issuing an order by which three companies of a regiment of the United States were mustered out of service without honor.

There is no pretense on the part of anyone that all these soldiers were guilty of the crime charged against the companies. There is no pretense that there were more than a small minority of the soldiers engaged in the riot. I recognize, Mr. Speaker, the fact that a soldier of the United States, sworn to observe the law and to preserve peace, should be held to a stricter responsibility for any rioting or for any unlawful measures than any other person under the Government.

But I also recognize the fact that those who by long service have proven their value to the country as soldiers, who by many years of service have proven their high character and standing as individuals as well as soldiers, should have at some place, somehow, and at some time, an opportunity to establish their innocence; that their records should not be tarnished by remaining under an order of dismissal from the army without honor; and I hail this compromise measure, that has been agreed to by all the factions in another body, as furnishing in some measure relief to those who were not guilty of any crime under the sun. There were soldiers in the garrison, many of them, not being even in the locality that night.

Mr. GARNER. Will the gentleman yield there?

Mr. HULL of Iowa. In one minute. This act provides for a board of five officers not below the grade of colonel, who shall have one year in which to investigate. Any soldier discharged without honor because of the Brownsville affair can go before that board and furnish such testimony as he is able, still handicapped by the presumption of guilt, which is contrary to the theory of the law; still handicapped by the fact that he must prove practically a negative. But if he satisfies that board of his innocence of any participation in this crime, the board has the absolute power to let him reenlist in the army——

Mr. GILLESPIE. Will the gentleman yield right there for a question?

Mr. HULL of Iowa. That will break me right off. I should like to finish this sentence if I can.

Mr. GILLESPIE. But it fits right in here.

Mr. HULL of Iowa. All right; if it fits, go ahead.

Mr. GILLESPIE. How does the gentleman infer from this resolution that the presumption of guilt obtains against these men and that they are required to prove their innocence? The resolution does not read that way or make any such provision.

Mr. HULL of Iowa. The man has got to satisfy the board of his innocence.

Mr. GILLESPIE. But the resolution does not say that.

Mr. HULL of Iowa. That is the object of the board, and if the gentleman will read the bill he will find I am correct.

Mr. GILLESPIE. I will ask the gentleman if it is not also true that this board of officers, although they may find that one of these——

Mr. HULL of Iowa. This should not come in my time. Gentlemen on that side have three-quarters of an hour. I do not want to take much time.

Now, it is provided that if a man satisfies this board of his innocence, if the board is satisfied that he was not guilty of participation in the riot, he can reenlist; and the second section does the further justice, which is absolutely right in my judgment, of providing that he shall be reenlisted as of the date of his discharge, without losing any time whatever or any right of retirement under the law. He would, by this act, also be entitled to his pay for the entire time. Our law provides that reenlistments, in order to become effective for retirement, must be continuous. If this bill provided simply for a reenlistment from the day of the finding of this board of officers, with the loss of intervening service, he would get no benefit from his previous service; but if he was not guilty of participation in this riot at Brownsville, this great Government, while it can not do entire justice, can do partial justice by seeing that the man shall not suffer any wrong, financially at least, in being permitted to reenlist as of the date of his discharge. These are the entire provisions of the bill, and in my judgment it is a long-delayed measure of justice; and I hope that this House, by more than a two-thirds vote, will agree to it, although a majority will pass it.

Mr. GARNER. Will the gentleman yield now?

Mr. HULL of Iowa. I will yield for a question, but the gentleman must realize——

Mr. GARNER. The gentleman made the statement a while ago, when I undertook to interrupt him, to the effect that this board would determine who were guilty and who were innocent.

Mr. HULL of Iowa. Oh, no.

Mr. GARNER. I understood the gentleman to make that statement.

Mr. HULL of Iowa. Oh, no.

Mr. GARNER. What is the object of this board, then?

Mr. HULL of Iowa. It is to pass on all who apply for reenlistment, and to determine whether those who apply shall under the provisions of this law be given the right to reenlist, by practically clearing their skirts of any participation in the Brownsville riot.

Mr. GARNER. Must not the board necessarily, then, pass upon the guilt or innocence of those who apply?

Mr. HULL of Iowa. I should imagine so, of those who apply, because if they were guilty, no one would desire to have them reenlist.

Mr. GARNER. Then, in that connection, I want to ask if these soldiers have not had their day in court, to have their guilt or innocence determined, before the Senate committee?

Mr. HULL of Iowa. No; they have not.

Now, I reserve the balance of my time, Mr. Speaker, and ask the other side to use their time.

Mr. WILLIAMS. Mr. Speaker, I do not desire to consume any time except to say this: Some of these men committed murder, and many more were engaged in an effort to commit a crime. All the balance of them have evidently entered into a conspiracy of silence in order to shield the criminals, and they ought not thereby to be permitted to have the privilege and honor of wearing the uniform of the United States Army. I now yield four minutes to the gentleman from Texas [Mr. HENRY].

Mr. HENRY of Texas. Mr. Speaker, regardless of the section or State from which I come, it is my duty to oppose the passage of this bill. There is great misconception of the real issue. The gentleman from Pennsylvania [Mr. DALZELL] and the gentleman from Iowa [Mr. HULL] have not touched the question now pending before the House.

In the first place, this is not a resolution, as it has been characterized, but a bill to be passed by Congress. The gentleman from Iowa stated that these men charged with the shooting affray at Brownsville "must establish their innocence" before they can be reenlisted. I deny it, and say that such is not the fact. There is nothing in the bill that indicates such purpose and effect. I challenge the gentleman to deny my statement and analysis.

It is a bill—

To authorize the reenlistment of certain noncommissioned officers, and for the restoration to them of all rights of which they have been deprived on account thereof.

This is the purpose of the bill as indicated by the caption. Its meaning is manifest.

In four minutes I can not discuss and analyze the various provisions of this bill. Briefly, in the first part of section 1 a "court of inquiry" is provided for, and a little further along in the same section it is provided that the board may hear certain charges and testimony that may come before them. A little further in the same section it is provided that such board may make "final" and "partial reports" of the results of such inquiry, and then in the latter part of the section it is provided that those men may reenlist—

Which said court shall find and report as qualified for reenlistment in the Army of the United States.

The board can report that each and every one of them is qualified, and also that they are eligible for reenlistment in the army. That is the plain provision of this statute, and the power is undeniably given. Here it is, and the gentleman from Iowa wants to mislead this House concerning the purpose of the bill. He is entirely mistaken about what is in it and the real provisions of the act.

What more? In the next section of the bill it is provided that after they are enlisted they shall receive pay from the time they were discharged. There is no mandatory requirement for anyone to come before the board and prefer charges, and no detailed method of procedure is fixed. The board can assemble, under this act, and disregard every line of testimony ever taken or to be taken and report that these men, regardless of guilt or innocence, are entitled to reenlistment. Such power is indisputably given the board. I shall oppose the passage of such an unreasonable and unjust measure. [Applause.]

Mr. HULL of Iowa. I want just a minute to say that the bill provides, in lines 10 and 11, page 2—

as said court shall find and report as qualified for reenlistment in the Army of the United States shall thereby become eligible for reenlistment.

They can not find and report as qualified for reenlistment any man unless that man should convince the board that he is not guilty. The general law makes provision as to who can enlist.

Mr. HENRY of Texas. The gentleman's resolution does not say so.

Mr. HULL of Iowa. The bill speaks for itself.

Mr. HENRY of Texas. But the gentleman's statement is not correct, if he will read the bill, and if I had time I could prove it.

Mr. HULL of Iowa. The words are "shall find and report that he is qualified for reenlistment."

Mr. HENRY of Texas. The gentleman said they must prove their innocence before they can reenlist, and there is no such provision in the bill.

Mr. WILLIAMS. Now, Mr. Speaker, I yield fifteen minutes to the gentleman from Texas [Mr. SLAYDEN].

Mr. SLAYDEN. Mr. Speaker, this bill purports to be a measure to appoint a court of inquiry to hear and report upon all charges and testimony relating to the shooting affray at Brownsville in August, 1906. The court is to make a final report in one year from the date of appointment, and from time to time it is to make partial reports for the purpose of restoring, just as rapidly as these reports can be made, such of the discharged soldiers and noncommissioned officers as shall be found qualified for reenlistment.

That is the first paragraph of the bill. The second provides that such of these men as shall be found qualified and do reenlist shall have all the pay and benefits that they would have had if their discharge had been honorable and the service continuous. All that do reenlist under these findings will receive a considerable sum in cash for a service they never rendered, and others will go at once on the retired list of the army, to be hereafter supported in idleness and in comparative comfort out of the Public Treasury.

The bill will pass, of course, for it has become a party measure. It is the result of a compromise between the senior Senator from Ohio and the present occupant of the White House. It does not concede all that the Senator demanded, but it does yield much more than it was thought the President would ever give up. The effect of it is to provide the reward of insubordination, a bonus for murder, and a premium on infamy. [Applause on the Democratic side.]

Under the direction of the President this atrocious murder by organized military bodies was repeatedly and thoroughly investigated. These investigations were made by officers of the army who were supposedly jealous of the good name of the service, and who would have been glad to be relieved of the odium it brought to the uniform.

Mr. HOBSON rose.

The SPEAKER. For what purpose does the gentleman rise?

Mr. HOBSON. Will the gentleman from Texas yield for a question?

The SPEAKER. Does the gentleman yield?

Mr. SLAYDEN. Mr. Speaker, I regret to say that I can not. It will be almost impossible in the time allotted to me to say what I desire to say. I mean no discourtesy to the gentleman.

Mr. HOBSON. I will be glad to let the gentleman have a minute of my time.

Mr. SLAYDEN. I can not yield. It was investigated by gentlemen from the Department of Justice, one of them a man of such character and attainments that he was subsequently nominated to a place on the federal bench.

These investigations were all made when the "affray" was of comparatively recent occurrence, when the witnesses were at hand, and when correct conclusions could be more easily reached.

Everybody knows what the verdict was. Secretary Taft was convinced of the actual guilt of some of the soldiers and of the guilty knowledge of the others. The President was convinced, of course; thoroughly convinced, or the order of dismissal would not have been issued. He found that conspiracy and perjury were called to the support of murder. In fact I know of no fair-minded man, who is not blind with prejudice against the people of one section of the country or whose judgment is not clouded by unreasonable sympathy for an alien race, who has reached any other conclusion. The most righteous act of the administration of Mr. Roosevelt is to be undone now for political reasons. Why? Because the negro is the most cherished political asset of the Republican party, and as such entitled to special legislation, and is to receive distinguished consideration. [Applause on the Democratic side.] These men are fortunate in their color. If that midnight assault on an innocent and unsuspecting community had been made by white soldiers, the righteous act of the President in dismissing them would never have been questioned. Indeed, sir, it would have been universally approved. From no political pulpit would there have been clamor for their reenlistment. None of these editors who seem to be, under all circumstances, out of patience with their own race, would day by day have thundered their demands for a reenlistment of soldiers who so far forgot their duty as to shoot down unarmed and unresisting American citizens. If the criminals had been white, great statesmen would not have dedicated themselves to the task of giving a lot of mad savages another chance to disgrace the uniform by engaging in organized assassination.

But, then, white men are not a political asset, always bulked and always ready at the call of a party.

I shall take just a few minutes, Mr. Speaker, to review the history of the regiment to which these companies belong.

The facts that I shall briefly relate are all from the official records in the War Department, and I will state, Mr. Speaker, that this is largely a quotation from a speech I had the honor to make here on a previous occasion, and let me say is an exact copy of official records accessible to every Member of this House upon a visit to the War Department.

While stationed at Fort Meade, Dak., in 1885, Corporal Hallon, of the Twenty-fifth Infantry, murdered a citizen. With "neatness and dispatch" the people of that community lynched the

murderer. Three weeks later 15 or 20 of the negro soldiers raided and shot up the town of Sturgis, firing into dwellings and business houses, and killed one citizen.

At Winnemucca, Nev., in June, 1899, while going to the Philippines to elevate the benighted people of those islands, men of the same regiment invaded a liquor saloon, took possession of the bar, and shot the barkeeper.

In October, 1899, at the San Carlos Agency, in Arizona, they murderously assaulted four unarmed Indians. General Merriam, who commanded, and now a resident of the city of Washington, advised that the negro troops be taken away and white soldiers sent to take their place, as they "would make less trouble."

At El Paso, Tex., to which place they were sent from San Carlos—and they are always unloaded on the South when they raise trouble in other sections of the country—they—

Took rifles from the arms racks and went to the city jail of El Paso, where two soldiers were held for trial by the city authorities for being drunk and disorderly, fired into the jail, and killed a policeman on duty there.

That is a quotation from the report made by Captain Loughborough, of the army.

Mr. STEPHENS of Texas. Mr. Speaker, I will ask the gentleman to allow me to state that that policeman was an ex-soldier of the Spanish war, and left a father and mother dependent upon him alone for support, who are now without any property whatever.

Mr. SLAYDEN. At Key West, Fla., in 1898, the Twenty-fifth Infantry was delayed just a few hours en route to Cuba. In that brief time they assaulted and attempted to kill citizens. When the particular assailants were lodged in jail their comrades took their guns, surrounded the jail, and liberated the prisoners.

What they did later at Brownsville is history.

The Ninth and Tenth regiments of negro cavalry made similar crimson records at Suggs, Wyo.; Huntsville, Ala.; and San Antonio, Tex.

These incidents cover a period beginning with 1867, when men of Company E of the Ninth Cavalry, a negro regiment, killed one and wounded two other lieutenants at San Antonio.

I submit, Mr. Speaker, that these facts go to show their absolute unfitness as soldiers.

The Secretary of War, Mr. Taft, in June, 1906, wrote to a Senator of the United States as follows:

The fact is that a certain amount of race prejudice between white and black seems to have become almost universal throughout the country, and no matter where colored troops are sent there are always some who object to their coming.

There are excellent reasons for believing that before the Twenty-fifth Infantry was sent to Brownsville in 1906 they were to have gone to a northern station. Protests from eminent public men prevented the execution of the order. Their destination was changed to another northern station, and again eminent men protested and once more the order was canceled. They were then sent to Texas, where there are no eminent men with influence in Washington.

The distinguished citizen who was then Secretary of War and is now the President-elect was right when he said that race prejudice was "universal throughout the country." With equal accuracy he might have said throughout the world. It is manifested throughout all history and everywhere. I believe that it is a God-given instinct to preserve race integrity, and I know that it ought to be recognized in all administration. It is commanded in all experience, and wise statesmen will not disregard it. It is an effort of nature to preserve the purity of the blood, to insure the breeding of thoroughbreds.

Speaking in New York this week, Mr. Taft said:

Race feeling is a fact. Denial of it is illogical. You can not dispose of it by saying that it does not exist.

I am glad to see that the man who is to be our President is no mere theorist. I am glad to know he has a comprehension of the facts of life, and hope he will adjust his administration to those facts, so as to maintain harmony and peace between all of the people whom fate has decreed should be residents of this land, for a long time at least.

But in the same interesting speech he falls into an economic error in his comments on race prejudices. He says:

The negro is absolutely essential to the development of the South.

I challenge that statement. It is not true. Mr. Taft is mistaken in his view of conditions in the South.

The great crop of the South is cotton. One of the great export crops of the country is cotton. The cotton that we send abroad about marks the balance of trade that is in favor of our country. The development of the South depends more on cotton than on any other one thing. We do not know with absolute accuracy the amount of that staple produced by the whole world, but we do know it approximately, and of that vast total Texas produces more than a fourth and something less than a third. Texas produces about 4,000,000 bales, and of that quite 85 per cent is planted, cultivated, and harvested by white labor. [Applause on the Democratic side.]

We do not want our climate and economic conditions misrepresented. White men can work in the fields of the South and in all of them, Mr. Speaker, without danger to health and with no greater discomfort than attaches to similar outdoor work in the Middle States, and white men only are essential to its development. All others are a clog on the wheels of progress, a social and economic incubus.

I have taken pains to inquire of my colleagues from the cotton States, and they all confirm my personally held view that the larger part of the crop in each of those States is made by white labor. And the ratio of production by white men is increasing year by year. The negroes find farming distasteful. They go to the towns and to menial and personal service in preference. Each year they are of less and less importance in production. They are leaving for the North, where, as their numbers increase, they are doing excellent missionary work.

The President-elect is right. We have race prejudices and race problems, and I sincerely hope, Mr. Speaker, that during the next administration we may have less meddling with the affairs of other countries and other races. Mr. Taft knows that race antipathy exists. He must know that when antipathetic people come into contact trouble is likely to ensue.

For the sake of our own future I hope that we will leave the Africans to their own devices in Haiti, Santo Domingo, Liberia, and elsewhere. We have an indigestion now. Heaven only knows what will happen to us if we undertake any more of that sort of thing.

The people of the Pacific coast, especially those of California, are getting into the vestibule of the comprehension of this question. Although they are not seriously threatened, although they are now protected by treaties and statutes, they are in a pitiable, a ludicrous state of funk. The suggestion of the gentleman from Iowa that the country—the whole country, not California, mind you—would find employment for half a million cooks and chambermaids has given them a fever of fright. It succeeded in arousing their intermittent and local interest in the welfare of the Caucasian race. For the time being and for the Pacific coast they have a revival of race pride. They cheerfully surrender their brethren in the South to the peril of invasion from the West Indies and Africa of a race even more alien, and themselves clamor for help because a few Chinese or Japs divide jobs with them. I greatly fear that it is purse pride, not race pride, that controls them. They strain at an Asiatic gnat and cheerfully swallow an African camel.

But, Mr. Speaker, in spite of their shortsighted policy, in spite of the very intermittent nature of their interest in the larger question, and in spite of their lack of gratitude and indifference to the woes of others, I shall do my best to protect them against the threatened invasion of Colonel HEPBURN'S cooks and chambermaids.

Here is an article clipped from the Washington Post of yesterday that I think contained a gratifying suggestion:

SAYS A MOSES IS NEEDED—NEGROES NOT TO REMAIN IN AMERICA, ASSERTS DOCTOR COROTHERS.

Asserting that the negroes of America were never destined to remain here, but that their "temporary sojourn as citizens of this country is but the carrying out of their mission as designated by a divine power," the Rev. S. L. Corothers, pastor of Galbraith African Methodist Episcopal Zion Church, made a plea last night before a large audience in Shiloh Baptist Church for aid for the people of Liberia.

"The appointment of a commission by this Government," said Doctor Corothers, "to subscribe funds and suggest ways and means for the relief of our black brothers in Liberia would be the casting of bread upon the waters. And it is important to demand that since it is the man of color who is to be aided, the commission to do the work should be composed of colored men.

"The relief of their debt-ridden and oppressed country by the American negro will work naught but good for him. While it may rankle in the hearts and bosoms of some for me to say that the negro is not destined to remain forever in America, I am firmly convinced of this fact. Who knows but what we are preparing a promised land for our own people by aiding the people of Liberia? As the Jews went to Egypt on God's own mission, so it is my belief that the negroes were sent to America for a like reason by the all-powerful Spirit. It needs but a Moses among us to lead us to the land of promise."

It is expected that another meeting will be held shortly to place before the Congress resolutions asking that the United States take a hand in the relief of Liberia.

If he will head the hegira I shall be glad to have him connect with the pay of the proposed commission. [Applause on the Democratic side.]

Mr. HULL of Iowa. Mr. Speaker, I yield five minutes to the gentleman from New Jersey [Mr. PARKER], a member of the committee.

Mr. PARKER. Mr. Speaker, this bill orders the calling of a court of inquiry. I shall not go into the race question. A

court of inquiry is well known under the old Articles of War. It can be ordered by the President or a commanding officer to investigate and examine into the nature of any transaction of or accusation or imputation against an officer or soldier.

Article of war No. 115: A court of inquiry to examine into the nature of any transaction of or accusation or imputation against any officer or soldier, may be ordered by the President or by any commanding officer.

Nothing more appropriate than such a court can be devised to examine into the question respecting these men, who have been, some of them, for twenty years soldiers of the United States and of good character, whether they be white or black.

Mr. HULL of Iowa. One of them for twenty-eight years.

Mr. PARKER. One of them for twenty-eight years, and a sergeant.

Unfortunately the old act as to a court of inquiry does not apply to any man who has ceased to be an officer or a soldier, and the discharge issued in this case barred the President thereafter under the law as it stood from ordering such a military court of inquiry. This bill rightly cures that difficulty and allows such a court to be called. The court in this case would be larger than the usual court of three members, having five, and it is limited to officers who hold at least the rank of colonel in the army. The powers of the court, however, are settled by the general statutes. There are few words in the bill, but in constituting a court of inquiry it gives the court, *under article* of war 118, all the powers and duty of a court-martial to summon and examine witnesses under oath and to allow the accused to examine and cross-examine them.

Article of war No. 118: A court of inquiry, and the recorder thereof, shall have the same power to summon and examine witnesses as is given to courts-martial and the judge-advocates thereof.

Such witnesses shall take the same oath which is taken by witnesses before courts-martial, and the person accused shall be permitted to examine and cross-examine them so as fully to investigate the circumstances in question.

That right should belong to these men and is provided for in this bill to the extent granted by the general law.

The function of the court of inquiry is briefly stated in the bill. It is to "find and report" whether any and which of these men are "qualified for reenlistment."

Such qualification is determined by the statutes. By the act of August 1, 1894—

No soldier shall be again enlisted in the army whose service during his last preceding term of enlistment has not been honest and faithful.

When this bill asks the court of inquiry to find and report whether they are qualified for reenlistment, it puts before this great court in each case the duty of determination upon the proofs, yea or nay, whether the soldier's service has been honest and faithful. [Applause.]

Mr. HULL of Iowa. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. MADDEN].

Mr. MADDEN. Mr. Speaker, the passage of the bill now before the House will bring nothing more than long-delayed justice to the black men now known as the "Brownsville soldiers." Every man charged with the commission of a crime is presumed to be innocent until he is proven guilty. I hold that none of these men have been proven guilty of the crime with which they are charged. No braver men ever fought for the protection of the flag than these men have proved themselves to be. They fought with a valor that received the plaudits of every citizen of America. They are the men who led the charge in the only important engagement between the American and the Spanish forces in our war for the extension of Christianity, humanity, and civilization.

Mr. GARNER. Will the gentleman yield?

Mr. MADDEN. I only have a minute, and I can not yield. And they are entitled to decent treatment. They are American citizens, and they are entitled to the equal protection of every law that every other citizen enjoys. There would be no question involved of their guilt or innocence if it were not for the color of their skin and it is unfortunate that discrimination should be made between American citizens because one man is black and another is white.

Who objected to their leading the charge at San Juan? Who questioned their color then? Was the question one of color then, or was it one of bravery? Does anyone suppose that the victory was any less worthy, because it was won in a charge led by men having black skin? Not at all. Does anyone suppose that because the negro soldiers held the front of the line and fought with a courage never surpassed and seldom equaled, that the victory was less appreciated by the American people? By no means. The country owes something to the men who had the courage to march fearlessly forward under such circumstances.

Such men are at least entitled to simple justice. The bill now under consideration offers them a chance to reenter the service in which they have on more than one occasion proved their valor. When a call to arms is made for the defense of the flag, what are the questions asked? Not what is your color, not where were you born, not what is your religious belief; but Are you ready to offer up your life in defense of your country? The question, then, is, Have these men proved their courage; have they performed their duty when called upon; have they proved themselves brave in the hour of need; have they been worthy to wear the blue? I say yes, unequivocally. We claim the right to govern. If this claim be admitted, we must assume the responsibility. In assuming that responsibility, we must exercise the powers of government justly; justly not only with respect to our transaction of the ordinary business affairs of the country, but also with respect to that higher and more important function which involves the equal treatment of our masters—the citizens of the country. We can not afford to be charged with unfairness; we would be unworthy of the high place we occupy if we fail to exercise the authority reposed in us with due regard for justice.

The liberty of the humblest citizen is as dear to him as that of the most exalted. The honor of the one is as worthy of protection as that of the other. It is our duty to protect both. Injustice against whomsoever practiced by the Government is inexcusable, and no man is worthy to exercise the functions of government who is unwilling to deal fairly with the governed.

Mr. GAINES of Tennessee. Will my friend yield?

Mr. MADDEN. I decline to yield. I believe that these men when given an opportunity to prove their side of this case will be found to be worthy to wear the uniform of the United States Army. They would, then, after being found to be so worthy, be entitled as a matter of justice to the pay and to the privileges which they would have the right to enjoy had no controversy about this unfortunate question ever arisen.

Members on the other side charge me with favoring legislation favorable to the colored man, because of the fact that a great number of them happen to live in my congressional district.

Why, Mr. Speaker, I was a consistent and sincere friend of the negro long before I even dreamed of coming to Congress, and that friendship did not come from a desire on my part to influence their votes, but came rather from an inborn desire to be fair and just to all classes of citizens. The Creator did not put into my heart a selfish or domineering disposition, and I thank God for that.

Mr. Speaker, it has never been easy for me to understand how a man enjoying all the blessings vouchsafed to an American citizen, blessings such as no other people on earth enjoy, can so far forget the biblical injunctions as to permit himself to deny rights to others he demands for himself. The oft-repeated insinuation that a man's color, if it be other than white, is a fruitful reason for discrimination does not at all appeal to me. The Constitution of the United States was made for all of the people of this blessed land of ours, and the laws made under it were made, not for the protection of one branch of our citizenship, but for all the people—North, South, East, and West, white, black, and mixed—and it is therefore extremely difficult for me to understand why it is that Members of this body coming from a section where live, it is claimed, the only true friends of the black man, are always found on their feet scolding long and loud whenever a measure is before the House which, if adopted, would bring relief and comfort to this much-abused race.

I certainly hope that the patriotism of the membership of this House, regardless of what their political affiliations may be, or the sections of the land in which they live, will prompt them to vote for the restoration of these men to the position which they have so long occupied with so much honor to themselves and to the United States. [Applause.]

Mr. HULL of Iowa. How much time did the gentleman from Illinois use, Mr. Speaker?

The SPEAKER pro tempore. The gentleman from Illinois used four minutes.

Mr. HULL of Iowa. The gentleman yields back the other minute. I may want to use it, not for myself. I now yield to the gentleman from Ohio [Mr. DOUGLAS].

Mr. DOUGLAS. Mr. Speaker, whatever may be the individual opinion of any Member of this House as to the guilt or innocence of any number of the soldiers of these three companies, whatever may be the individual opinion of any Member of the House to any question of law, whether criminal, civil, or constitutional, arising out of this occurrence and the disposition of it which has been made from time to time by the Executive and War Department, I submit that there ought not to be, in common justice, a vote in this House against this conservative

and just measure. This bill simply authorizes, if in his discretion he deems it wise, the Secretary of War to inaugurate a court or commission to inquire into this whole matter, with the object of finding out, if possible, which of these soldiers were guilty, if any, and which innocent, so that the innocent may not suffer with the guilty.

It does not seem to me that this is a political question, nor a sectional question, nor a race question, or any other sort of a question, but a question of simple justice.

No Member upon this floor, to whatever party he may belong, or from whatever State he may come, ought to be willing to deny to such of these colored soldiers who may be able to do so, or to all of them, the opportunity to establish their innocence; and so I trust that no one upon either side of the House will vote against this just bill.

Mr. HULL of Iowa. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. PRINCE], a member of the committee.

Mr. PRINCE. Mr. Speaker, it is most unfortunate that the military law was not invoked immediately after this affray at Brownsville. On page 745 of the military laws of the United States, section 1863 reads as follows:

> A court of inquiry to examine into the nature of any transaction of or accusation or imputation against any officer or soldier may be ordered by the President or by any commanding officer.

Had that law been invoked, the time of Congress and the discussion before the country would not have occurred on this question that is now before the House. For the first time this branch of Congress has had presented to it a concrete proposition on this question. The proposition is to establish in effect a court of inquiry to find out whether these soldiers should have been separated from the service without trial. Now, with hat in hand, they come before this board of inquiry with a stigma placed upon them as men who have violated their oaths as soldiers, who have disgraced the army blue that they wore. They have to come with that stigma upon them before a court of inquiry to hear whether they should be reenlisted or not. They ought to have their day in court. This is a free country——

Mr. GARNER. Will the gentleman yield?

Mr. PRINCE. I can not yield. Ordinarily I would. These are soldiers; remember that. It is not a question of color; it is a question of treating fairly a soldier; the color does not enter into the question at all. He is a soldier wearing the blue, maintaining the flag, and he has been separated from the service. Now he comes and asks whether he is a proper person to be reenlisted in the service of the United States. A commission or a court of inquiry that ought to have been invoked when the affray occurred, after two and one-half years Congress is called upon to create, and we are now asked to vote in favor of it. Without question, some of these men are not guilty. I am not one of those who want to pass upon the guilt or innocence of these men.

Mr. GARNER. Will the gentleman yield just there?

Mr. PRINCE. I decline to yield to anybody. This board we are creating for that specific purpose. We are asking officers above the grade of colonel, who have taken an oath, many and many a time, to support the laws and the Constitution and maintain the honor of the army, to sit in judgment upon these men, and these officers, under oath, are to report from time to time whether these men should be reenlisted or not. If they are again put back into the service—and they have been separated from the service without trial—is it unfair to restore them to the place where they were before they were separated without trial? It seems to me it is fair and even-handed justice toward a soldier who had been separated from the service, and I am sorry to see my friend and colleague, for whom I have a high regard and appreciation, seek to say that this is a political question because, forsooth, in some portions of the country the colored voters saw fit to vote the Republican ticket. If it were a political question, we might have raised it before the presidential election, but not now. [Applause.]

Mr. WILLIAMS. Mr. Speaker, I yield two minutes to the gentleman from Georgia [Mr. BARTLETT].

[Mr. BARTLETT of Georgia addressed the House. See Appendix.]

Mr. SLAYDEN. Mr. Speaker, I make the same request.

Mr. MADDEN. Mr. Speaker, I make the same request.

The SPEAKER pro tempore. The gentleman from Georgia [Mr. BARTLETT], the gentleman from Texas [Mr. SLAYDEN], and the gentleman from Illinois [Mr. MADDEN] ask unanimous consent to extend their remarks in the RECORD. Is there objection?

There was no objection.

Mr. BARTLETT of Georgia. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. HULL of Iowa. Mr. Speaker, I ask unanimous consent that all who have spoken on this matter have permission to extend their remarks in the RECORD.

Mr. WILLIAMS. I would suggest that the gentleman state that the remarks be printed prior to the adjournment of this Congress.

Mr. HULL of Iowa. Mr. Speaker, I ask that all who have addressed themselves to this resolution may have permission to extend their remarks in the RECORD, the extension to be limited to the matter before the House, and the remarks be printed before the adjournment of Congress.

Mr. BARTLETT of Georgia. My permission was not limited to three days. I got my permission to extend under the rule.

The SPEAKER pro tempore. The gentleman from Iowa asks unanimous consent that those who speak on this subject may have permission to extend remarks in the RECORD on the resolution within three days. Is there objection?

Mr. GILLESPIE. I object.

The SPEAKER pro tempore. The gentleman from Texas objects.

Mr. GILLESPIE. I withdraw the objection.

Mr. OLLIE M. JAMES. Why does the gentleman confine it to those who speak? Why not let all who desire to extend remarks put them in the RECORD?

Mr. BURLESON. I would object to that.

Mr. HULL of Iowa. I do this for the purpose of saving the time of the House by gentlemen asking permission to extend their remarks after they have spoken. I now yield three minutes to the gentleman from Alabama [Mr. HOBSON].

Mr. HEPBURN. Before the gentleman sits down, will he explain a portion of this bill which to my mind is very peculiar?

Mr. HULL of Iowa. I will not take time to do so now.

Mr. HEPBURN. Somebody ought to explain it.

Mr. HOBSON. Mr. Speaker, these three minutes will cost me a contest in my district, and may cost me my seat in Congress. I wore the uniform of the United States for eighteen years, and I have never known a case where an officer or an enlisted man was punished severely without a court of inquiry. I know that he is not allowed to be punished to the extent of thirty days' imprisonment without a court-martial—to dishonorably dismiss a man without a court-martial is unheard of. When these crimes were committed at Brownsville——

Mr. GARNER. Will the gentleman allow me?

Mr. HOBSON. No, sir; my time is too short. When these crimes were committed at Brownsville, the President of the United States could have ordered all officers and men to remain within barracks and could have ordered a court of inquiry, followed by a court-martial, which, held on the spot without delay, would no doubt have established the guilt or innocence of all the men, and would have given a regular, legal opportunity to every innocent man to establish the fact of his innocence. If, under duly administered oath, any man had refused to tell the whole truth or had been found to have concealed or abetted the guilty, he could have been punished accordingly. By such a regular and legal procedure the guilty, all of them or part of them, at least, could have been brought to full punishment at the scene of their hideous crime, fulfilling the ends of justice. But the President did not proceed in this regular, legal way. He scattered the men, guilty and innocent alike, to the four winds, and thus prevented the ends of justice. This action of the President prevented the establishment of the guilt of the guilty and prevented the innocent from establishing their innocence. These men have never had a chance to appear before a court of inquiry; never before a court-martial; have never been under oath. This bill provides the least that can now be done for the cause of justice.

Mr. Speaker, I saw black men carrying our flag on San Juan Hill; I have seen them before Manila. A black man took my father, wounded, from the field of Chancellorsville. Black men remained on my grandfather's plantation after the proclamation of emancipation and took care of my mother and grandmother. The white man is supreme in this country; he will remain supreme. That makes it only the more sacred that he should give absolute justice to the black man who is in our midst. [Loud applause.] I submit it to the conscience of my colleagues. This ought not to be made a party measure. We are standing here on the field of eternal justice, where all men are the same. It is justice that links man to the divine. Whether the heavens fall or the earth melt away, while we live let us be just. [Loud applause.]

Mr. GARNER. Mr. Speaker, Brownsville being in the district which I have the honor to represent, I feel that it is my duty to the people of that city and to myself to state to the House some

of the facts preceding the location of these soldiers at Brownsville, some of the circumstances leading up to this unfortunate affair, and to call attention to some of the facts which conclusively showed that they were the people who perpetrated the outrage, rather than some one else in the city of Brownsville.

In the first place, Mr. Speaker, these soldiers should never have been located at Fort Brown. As my colleague from Texas [Mr. SLAYDEN] has already stated to the House, the War Department had decided to send them to some place in the North. Protests were made to the War Department, and they then changed them to another place in the North. Protests were again made, and then it was decreed that they should go to Brownsville.

Hearing of that, my constituents protested against it. I visited the War Department, interviewed the Assistant Secretary of War, then Acting Secretary, and told him of the conditions existing there, and that the people did not want this black battalion stationed at Fort Brown. I was told by the Acting Secretary of War, General Oliver, that these soldiers were not wanted anywhere, but it was Texas' time to take them [applause], showing conclusively that, in the estimation of the War Department, this character of soldier was not welcomed by the people situated near to any of the forts of this country. They were sent to Brownsville, as I say, over the protests of the citizens, and it is represented that after they got there not a single act on the part of the citizens of Brownsville, not a single act on the part of its officers, not an act on the part of anyone else unless it could be said that of a representative of the Government itself, was responsible in any degree for the trouble referred to in the testimony taken before the Senate Military Committee.

After they had been stationed there a few days it seems that a soldier met a customs officer, and the officer knocked him down on account of offensive conduct toward his wife. This officer was an employee of the present administration, and while I think he did right in defending his family against the insults of these murderers, I mention it simply to show that it was not a private citizen, but a part of the Government itself, who brought on the trouble.

Mr. Speaker, I think it may be said that the people of Brownsville are composed in a greater degree of United States ex-soldiers and ex-officers of the Union Army than any other city of its size in the United States. The mayor of the city is an ex-officer of the United States Army. One of the leading citizens of that town, the president of a leading bank, is an ex-officer of the United States Army. A large percentage of the people of that town is made up of ex-soldiers of the United States Army. So it can not be said, here or elsewhere, that the people of that town have any animosity toward those who wear the uniform of an American soldier.

Now, what was the result? The town was shot up at the hour of midnight. The citizenship undertook to determine who did the act. They immediately selected a committee, and I want to say to the House that that committee was composed of as high-class men as there are in Texas, therefore as there are in the United States. That committee was selected to investigate the question as to who was guilty of this crime. They met and heard testimony, and sent the result of that testimony to the President of the United States, who made an inquiry of the commanding officer of that post, and he, realizing that the testimony was so strong, wired the War Department that he regretted to say that the evidence was convincing that the soldiers had perpetrated this murderous outrage.

I was surprised that the gentleman from Illinois, or any other gentleman on the floor of this House, should rise and say he did not believe that any one of these soldiers perpetrated this crime. The gentleman from Illinois evidently has not read the record. I can not conceive how any reasonable man, how any man who is not influenced by prejudice, how any man whose mind is open to conviction, and who has read the record could say that he believed that none of these soldiers perpetrated this crime.

It has been investigated by seven distinct and impartial investigations; first, by the commanding officer; second, by the citizens' committee, headed, as I said a moment ago, by an ex-officer of the United States Army. That committee took the evidence on the ground and concluded, beyond any doubt, that these soldiers perpetrated the crime. Then Major Blocksom, an impartial officer of high rank in the United States Army, made a full investigation and reported that there was no doubt but what the soldiers committed this murderous assault. Then Mr. Purdy, from the Department of Justice, a high-class lawyer and capable of distinguishing between legal and illegal testimony, was assigned the duty of investigating and determining who shot up Brownsville. He, likewise, after an exhaustive investigation, advised the President that no one could doubt but that the infamous Twenty-fifth were guilty as charged. (It might be remarked just here, that Mr. Purdy has since been made a United States judge.)

Again, the grand jury at Brownsville, composed of as law-abiding citizens as you will find in the United States, investigated the matter and in their report emphatically stated that no doubt existed in the mind of any one of them that the soldiers of this battalion had been guilty of murder; but they were unable to specify the identical party who pulled the trigger, therefore, respecting their oaths, they could not return bill of indictment, not being able to designate the particular soldiers who committed the crime.

Some have said that this was an indication that the people of Brownsville had some doubt as to the guilt of these men, but to my mind, it is another evidence of their love of law and justice, and the respect that each had for his oath as a grand juror. Had they desired to enter into a conspiracy to punish these troops regardless of their oaths, they could have indicted any number of them, and under the agreement with the military authorities, had them returned to Brownsville and incarcerated in the county jail; and had the court and the people generally, as some high in official life have intimated, been in a conspiracy to punish these men regardless of their guilt or innocence, they would have tried and convicted them.

Again, Brig. Gen. A. E. Garlington, Inspector-General of the United States Army, as well as Lieutenant-Colonel Lovering and Gen. A. B. Nettleton have, after full investigation, advised the War Department that these men were guilty, and that the President was not only justified but was in duty bound to issue the order which relieved the army of this band of murderers.

But, sweeping aside all these matters, and turning to the Senate investigation, we find some 200 witnesses have been examined; the affidavit of every soldier has been taken; and in all some 6,000 pages of testimony have conclusively shown that these soldiers were guilty. If 17 eyewitnesses and the strongest circumstances that have ever surrounded any case coming under the observation of any court can not convince one of the guilt of these soldiers, when the contrary evidence is the sole affidavit of the accused, then it must be apparent that the color of these men has so blinded his vision to justice that he can not see, impartially, the proof that is so overwhelming and conclusive.

Mr. Speaker, it will be remembered that the President of the United States has declared that this was the blackest crime in the history of the American army; it will also be remembered that he has declared more than once that after all the investigations had been made it was conclusively shown that some 15 of these soldiers pulled the triggers that caused the death of an American citizen; and that many of them had knowledge of the facts before, and all of them had information after, the crime that would have led to the detection of the most guilty. Therefore, in discharging the battalion, it can not be said that the innocent have suffered except by their own acts in refusing to give information that would lead to the detection of the midnight assassins. So these so-called "innocent members" of that battalion, while they may not have participated in the raid itself, have brought just punishment upon themselves by trying to shield their comrades.

Mr. HOBSON. Will the gentleman yield for a question?

Mr. GARNER. I will extend to the gentleman the courtesy that he refused to extend to me and will yield to him. [Applause.]

Mr. HOBSON. Did any one of these soldiers have a chance before a regularly constituted court of inquiry or court-martial?

Mr. GARNER. They did. I will say to the gentleman here is the record of the court-martial of Major Penrose. The gentleman says he has worn the uniform of an American soldier for eighteen years. I want to read to him a list of this court-martial and ask him if he does not consider it to be equal to any that the President will be able to call under this bill?

Mr. HOBSON. If the gentleman will simply read the heading of the general order, saying that it was a court-martial, regularly constituted, before whom these men appeared, that will answer the question.

Mr. GARNER. By an examination of this record he will see that the second specification in this court-martial was that the soldiers shot up the town of Brownsville, and in response to that specification the court-martial unanimously returned a verdict of guilty. While it can not be said that these men were being court-martialed themselves, the issue involved was exactly the point raised here, that a part of this battalion was guilty of shooting up the town of Brownsville. That issue was determined by the court-martial.

Mr. HOBSON. Was it a board or a court?

Mr. GARNER. It was a court-martial, and here is the order convening it:

Special Orders, No. 264.

DEPARTMENT OF TEXAS,
San Antonio, Tex., December 20, 1906.

2. A general court-martial will convene at these headquarters at 10 o'clock a. m., Friday, January 4, 1907, or as soon thereafter as practicable, for the trial of such persons as may properly be ordered before it.

Now the detail for the court was:

Col. George Le Roy Brown, Twenty-sixth Infantry; Lieut. Col. Louis M. Maus, deputy surgeon-general; Lieut Col. Charles J. Crane, military secretary; Lieut. Col. Alfred C. Sharpe, Thirtieth Infantry; Lieut. Col. Edward J. McClernand, First Cavalry; Lieut. Col. Robert R. Stevens, deputy quartermaster-general; Lieut. Col. Frank Baker, Ordnance Department; Maj. Hamilton S. Wallace, paymaster; Maj. Charles W. Taylor, Thirteenth Cavalry; Maj. Henry D. Snyder, surgeon; Maj. Charles J. T. Clarke, Twenty-sixth Infantry; Maj. Charles A. Bennett, Artillery Corps; Maj. John H. Gardner, First Cavalry.

One of the specifications in this court-martial was that the troops under Major Penrose's command were guilty of shooting up the town of Brownsville; that was the second specification. They took testimony for three weeks, making a volume of 1,100 pages, where the troops of this company, every one of them, could have appeared before it. The witnesses from Brownsville appeared before the same court, each party had able counsel, and, after full hearing, the second specification was sustained; therefore these soldiers were found guilty of shooting up the town.

Mr. MADDEN. This man was court-martialed because he was off duty without leave.

Mr. HOBSON. Will the gentleman yield for a question right there? If the same procedure had been instituted against these men that was instituted against this officer, I would never have made my point this morning or made my speech.

Mr. GARNER. Neither would the gentleman from Alabama have made his speech if he had known of the record in this case. [Applause.] But, Mr. Speaker, I believe, furthermore, that if the gentleman from Illinois had read the record, and he had not been afraid of some people in his district, who might read the record to-day, he would not have made the speech he did a few minutes ago.

Mr. MADDEN. I think the gentleman from Texas will agree with every Member of the House that nobody can charge "the gentleman from Illinois" with cowardice; no man in this House can charge "the gentleman from Illinois" with not having the courage of his convictions.

Mr. GARNER. Mr. Speaker, I did not charge the gentleman from Illinois with cowardice; but it is peculiar, indeed, that every time the race question comes up the men on that side of the House that have the greatest number of negroes in their district are the quickest and the loudest in their approval of the negro. [Applause.]

Mr. Speaker, remarkable as it may seen, when the matter was considered by every department of this Government, every verdict that has been rendered up to this good hour has been that the negroes perpetrated the crime. Now, I want to ask if there is a man on that side of the House or on this side of the House who has investigated the record in this case who will rise in his place and say that none of these soldiers perpetrated the crime? [Applause.]

Mr. Speaker, if these had been white soldiers, I do not believe there would even have been a resolution of inquiry in either branch of Congress, much less the confusion that this matter has brought about. The negro is a political asset in the Republican party. Therefore he will continue to be a disturbing factor so long as he is essential to the success of that party in their political contests in several States of the Union. This is, indeed, unfortunate for the Southland, because every time an act of this kind is passed it is calculated to and does encourage those people to believe that they will receive protection, and even encouragement, from the Republican party in their efforts to place themselves upon a social plane with the white race. This can never be done, and the more strenuously the negro and his white sympathizers undertake to bring about this state of affairs the more harm will result to him and the greater confusion and discord among the whites.

You may pass all the laws you please, place it in the Constitution, declare it from the pulpit, proclaim it from the mountain top, but there is no power on earth that will make the African the equal of the white man, and those who undertake it are doing both races a great injury.

No one can tell how this race question is to be solved, but all who understand the question admit that it is best to permit the South to solve it in its own way, knowing that the white race in that section has as keen a sense of justice and righteousness as any in the world.

Mr. Speaker, what will be accomplished by the passage of this bill? Either every man who applies for readmission into the army must be admitted upon his affidavit, or else every man who applies must be refused admission upon his affidavit. In either case the board will have no discretion in the premises, for all must be tried alike, and each and every one has sworn that he did not participate in the crime, nor did he know who perpetrated it. Under these conditions they must all be admitted who apply, or else all be rejected. Those believing that all should be returned where the most guilty can not be identified, should propose a bill directing their reenlistment, those who believe that the murderers should not be a part of the army should vote against this bill.

Every witness who knew any circumstance tending to show who shot up the town has been examined; every soldier's affidavit has been taken; all the testimony is in; and no one has been able to say who of the soldiers did the shooting, though all admitting that some of them did.

What will the board of five officers do? They can not secure additional testimony, therefore must pass on the record already made.

I can not help but believe that it is the intention of this bill to readmit every soldier who applies, but I indulge the hope that this committee of army officers will not admit a single one until he has established to their satisfaction that he neither perpetrated the crime nor had knowledge that would lead to the detection of the guilty.

What an anomalous condition we will have should these soldiers be readmitted into the army. The Commander in Chief of that army, the President-elect, of which they would be a part, has declared that the evidence was overwhelming, and beyond doubt showed that they were guilty, and no one here doubts his great legal ability, his statesmanship, and his sense of justice; therefore he would either have to exercise his constitutional right and again dismiss these troops, or else by his own decree continue in the army persons guilty of the heinous crime of murder. Wonderful, is it not, what political emergencies will do?

There is not a man in this House who would go further toward protecting the innocent negro than will I. And yet I say there is not a man in this House, and there is not a committee that can be appointed, that can ascertain, for the life of them, who was innocent and who was guilty, without the assistance of some of these soldiers. That being the case, I do not think that a battalion of men should be put back into the army where it is conceded by all that a portion of them are guilty.

In fact, according to my mind, there is not an innocent man in the battalion, for the reason that he either pulled the trigger or had knowledge of it, or has knowledge of facts that would aid the Government in ascertaining who was innocent or who was guilty. [Applause.]

Mr. WILLIAMS. Will the gentleman from Iowa now use a portion of his time?

Mr. HULL of Iowa. I want to be charged with a half a minute, just to say a word. The gentleman from Texas read from a court-martial proceeding in Brownsville, which was convened to try an officer who was in command of the post after the order was issued and the troops were discharged. The troops themselves have never had a court of inquiry. They did have an inspector-general go down there and report that the town was shot up by colored troops. That is not in controversy here. The simple question in this bill is to give the individual colored soldier a chance to show that he did not participate in this riot, and all who can show it can be reinstated. They never have had a court-martial or a court of inquiry. The individual soldier has never had an opportunity to do that, and will not have until this bill passes.

Mr. GARNER. Will the gentleman from Iowa yield for a question?

Mr. HULL of Iowa. I can not yield now.

Mr. WILLIAMS. Does the gentleman from Iowa propose to consume the balance of his time in one speech?

Mr. HULL of Iowa. Oh, no; I have a dozen gentlemen who want time.

Mr. WILLIAMS. I wish the gentleman would use some of his time now.

Mr. HULL of Iowa. Mr. Speaker, I yield three minutes to the gentleman from New York [Mr. WALDO.]

Mr. WALDO. Mr. Speaker, this is not a political question, this is not a race question, so far as I am concerned. I am about to leave this body, and it is highly improbable that I shall ever hold a political office again. I am here to ask merely that the Ameri-

can people, whether they be North or South, shall concede to men who have been discharged in violation of law and without authority an opportunity for such trial as our laws guarantee to them. That is all. It is very likely that many people might be convinced by the testimony that some of these colored troops were guilty. I am inclined to think, from a careful reading of this testimony, that some 5 or 6 men were. As to the others, there is absolutely no proof. On the contrary, the proof taken by all these officers shows that they were not guilty, and yet they have been discharged without honor and deprived of rights to which they are entitled, some of them, by honorable service for twenty-six years. One of these men has been in constant service for nearly twenty-six years. He has been in every war that we have had for the last quarter of a century—the Spanish-American war, the war in the Philippines, and in all the Indian wars. He was one of the men who helped save the white troops in Cuba. If he were the only man who is to be found innocent, the American people ought to give him the opportunity to show his innocence. I desire here publicly to thank the gentleman from Alabama [Mr. HOBSON] for having the courage to rise in his place and, in defiance of the universal prejudice of the people of the South, state that he is in favor of justice to negro soldiers. That is all that I am in favor of. [Applause.]

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. HULL of Iowa. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. SULZER].

Mr. SULZER. Mr. Speaker, I am in favor of doing justice to the negro soldiers of Companies B, C, and D of the Twenty-fifth U. S. Infantry. I want to give these colored soldiers their day in court. They are entitled to this, and they never have had this opportunity of proving their innocence. If one be guilty, let him be punished, but the innocent should be reenlisted in the army and given all their rights and emoluments. The innocent should not be punished for the guilty. I voted in favor of this bill in the Committee on Military Affairs, and I shall vote to pass it through this House. No fair-minded man can consistently oppose this measure. It is honest and it is just. It will do justice to the innocent men and go far to ascertain the guilty. If we fail to do substantial justice in the case, we will be false to ourselves and false to every principle that we revere and hold most dear. If we refuse to do impartial justice to the colored soldiers who are innocent, we will violate every tenet of our boasted love of fair play. In my opinion, if this bill becomes a law no guilty man will be able to reenlist in the army, and no innocent man should be prevented from doing so. I have confidence that the board of inquiry created by this bill will be composed of men of ability and of high character. I have no doubt that the board will do its full duty in the premises, and I believe no soldier will be reenlisted until it is shown beyond the peradventure of a reasonable doubt that he is guiltless of any complicity in the Brownsville affair. I have no prejudice in a matter where justice is concerned. I want to say that I am now and always have been, and I trust always will be, in favor of equal and exact justice to all men—here and everywhere throughout the world—without regard to race or to creed or to previous condition. We must do justice in this Brownsville matter. We can not do less without stultifying ourselves and bringing our free institutions into strange contrast with our acts and performances. I want to see justice done, and I hope the bill will pass. It is never too late to do justice. "For justice, all seasons summer and all places a temple." [Applause on the Republican side.]

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. HULL of Iowa. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. COCKRAN].

Mr. COCKRAN. Mr. Speaker, the remarks of my colleague [Mr. SULZER] indicate the reasons which constrain me to support this measure. It is idle to ignore the fact that consideration of this proposal is complicated by the element of race antagonism. It is idle to ignore the fact that where two races dwell in considerable numbers together supremacy of one race will be asserted and established in some way or other. I fully sympathize with the determination of the white race in the South to maintain its supremacy as necessary to the preservation of its integrity against all opposition and against every obstacle; but, Mr. Speaker, how is this supremacy to be established? You can not establish superiority by asserting it, but by proving it. What is the test of superiority in Christian civilization? The greatest capacity to establish justice and the utmost readiness to do justice. [Applause.]

When a question arises between members of a superior and an inferior race, the superior, which insists upon exercising exclusive control of government, must vindicate its position by doing not only exact justice, but, in cases of doubt, by doing more than justice to the weaker. [Applause on the Republican side.] The stronger race can justify itself in excluding the other from equality of political rights only by showing that under its domination more perfect justice will always be done men and women of the weaker race than they could establish for themselves if they were admitted to a share in the management of public affairs. And, sir, be it said with all credit to the friends who sit around me here that never in the whole range of human experience has this problem of adjusting the relations between two races—one intent upon maintaining its supremacy, whatever the cost—been forced upon a people under circumstances so difficult and conditions so disastrous as in the Southern States of this Union after the civil war, and never has it been met with such wisdom, faced with such success, solved with such credit to a nation or such promise to the progress of civilization! [Applause.]

It is a fact, I believe, that whenever a controversy concerning property or wages occurs between a white and a colored man in the South juries and courts nearly always give the benefit of every doubt to the member of the race which is considered inferior. Political rights are denied to the negro, but all his natural rights are fully protected. While you gentlemen of the South are accused by your critics in the North of excluding the black man from the enjoyment of equal political rights, nobody can doubt you have extended to him in the fullest measure the enjoyment of industrial rights. Indeed, I believe the condition of the colored man is better under the system you have established than it is in any northern State. In the North the negro is permitted to vote, but industrial conditions are such that he is practically denied a chance to work. In the South, on the other hand, he is refused the right to vote, but given every opportunity to work. In the North he is welcome to carry a torch in the political procession, but he is not allowed to carry a dinner pail in the industrial procession; while the white people of the South, who have excluded him from the political procession, welcome him to the industrial procession. And, in my judgment, it is the measure of justice which the negro admittedly enjoys that has reconciled the conscience and judgment of civilization to the peculiar political position he occupies in the Southern States. [Applause.]

Mr. Speaker, the proposal before this House now is to do complete justice where some negroes were charged with conduct which has deeply moved the indignation of a southern community. I agree with the gentleman from Texas [Mr. SLAYDEN] that grave crime has been committed. I agree with the gentleman from Texas, and all the gentlemen who have spoken on the same side, that a number of these colored soldiers are undoubtedly guilty of it.

Moreover, sir, I sympathize with the President of the United States in the action which he took. That a military company enlisted, organized, and equipped for the protection of American citizens, which had shown itself capable of committing crime and had actually accomplished assassination, should have been immediately dismissed from the service of the United States, disbanded, and discharged seems to me absolutely self-evident. And I thank God this was promptly done by executive order.

But, sir, it is equally true that besides the men comprising that battalion who were undoubtedly guilty there may have been one, two, five, perhaps ten, or even more, who were innocent. The protection of society and the vindication of military discipline were subserved when that military company or organization was disbanded. That measure of discipline having been accomplished, justice requires that any individual members who may be able to show they were innocent of any share in the crime that made disbandment of the battalion an imperative duty of the President shall be permitted to return and reenlist in the army, not to join the same company—that has ceased to exist—but to be distributed among other branches of the service where they will be under the influence of different and better associations.

Mr. BURLESON. But they will take them all back in the army. Mark my prediction.

Mr. COCKRAN. The gentleman may be as good a prophet as Samuel of old, but surely, Mr. Speaker, it will not be contended that prophecy can be made the basis of legislation. We must legislate upon principles applicable and comprehensible to all of us, not upon gifts peculiar to the prophets. [Laughter and applause.]

Mr. SLAYDEN. Will the gentleman tell us why he thinks some of them may be innocent?

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. COCKRAN. If I may have the time to answer——

Mr. SLAYDEN. I want to know why he assumes that—upon what information that has come to us officially or otherwise he reaches the conclusion that any of them may be innocent.

The SPEAKER pro tempore. The gentleman from Texas is out of order.

Mr. HULL of Iowa. Mr. Speaker, I yield one minute to the gentleman from New York to enable him to answer the question.

Mr. COCKRAN. Here is my answer: I do not assume that any are innocent, but I say some of them may be innocent, and justice forbids the possibility of injustice being done to anyone, even though he be the blackest, the poorest, the most ignorant of all the population. [Applause.]

Mr. SLAYDEN. I thought the gentleman said that undoubtedly some of them were innocent.

Mr. COCKRAN. I say some of them may be innocent, and this bill merely provides machinery for an inquiry into that very fact, and if there be any found innocent to give them the rights to which their innocence entitles them. [Loud applause.]

Mr. ADAIR. Mr. Speaker, I can not in the time allotted me enter into a detailed discussion of the merits of the bill before the House. I must therefore content myself with a brief statement, setting forth my reasons and the motive which prompts me in favoring the passage of the bill.

I am going to vote for this bill, Mr. Speaker, because I believe it is a matter of justice and right. I want every man to have equal opportunities under the law, regardless of whether he be black or white. I want the men discharged because of the Brownsville occurrence to have the right to establish, if possible, their innocence, and if they can do so I want to see them reinstated. This is not a political question, neither is it a racial question; it is a question of the guilt or innocence of these discharged soldiers; and this bill provides a method of determining who are guilty and who are innocent, and it also provides for the reinstatement of all who it is ascertained had no part in that unfortunate occurrence. It has been suggested that some Members are supporting this bill because there are a large number of colored voters in their districts, and that their support of the bill is due to that fact rather than to the merits of the bill.

Mr. Speaker, it can not be charged that my support of the bill is due to such a motive, as there are a very limited number of colored voters in my district, and they are sufficiently intelligent to cast their votes according to the dictates of their own conscience, and will not be controlled or influenced by what I may say or do with reference to this bill.

I have always been and always expect to be a consistent and sincere friend of the colored man, and shall always recognize and advocate his rights under the Constitution and the laws of our country. Our laws are enacted not for a particular race or nationality, but for all American citizens, and so long as I am a Member of Congress I shall use my voice and vote in bringing about the enactment of such legislation as will do full and complete justice to every man, without regard to race, creed, or previous condition. While I do not want to criticise anybody, I can not but believe that if these discharged soldiers had been white men their cases would have been heard and determined long ago. Every honest man will admit that, while possibly not intentional, there is nevertheless more or less discrimination against the colored man in cases of this kind. We all admit they are the weaker race, and that is a strong reason why they should be given due consideration. They go out in the battle of life handicapped by reason of their color, and the least we can do is to see that they are given all their rights under the Constitution.

Many of these soldiers had served for twenty years with credit to themselves and credit to the Government. Their bravery had been demonstrated on more than one occasion and their loyalty and devotion to the country and the flag had never been questioned. I am not, Mr. Speaker, trying to obscure the fact that murder was committed and that some of these men are guilty. I am just as anxious that the guilty may be punished as any Member of this House, and I am also anxious that the stain of guilt may be removed from the innocent and that the right of reenlistment be restored to them. All I ask is a square deal for both the innocent and the guilty, and I believe this bill will give it to them.

The bill provides that a court of inquiry, to consist of five officers of the United States Army, not below the rank of colonel, shall be appointed by the Secretary of War to hear and report upon all charges and testimony relating to the shooting affray which took place at Brownsville, Tex., on the night of August 12–14, 1906. It provides that this court of inquiry shall, within one year from the date of its appointment, make a final report and from time to time shall make a partial report to the Secretary of War of the results of such inquiry. It provides that such soldiers and noncommissioned officers of Companies B, C, and D, of the Twenty-fifth Regiment, U. S. Infantry, who were discharged from the military service as members of said regiment under the provisions of Special Orders, No. 266, dated at the War Department the 9th day of November, 1906, as said court of inquiry shall find and report as qualified for reenlistment in the army, shall thereby become eligible for reenlistment.

It further provides, Mr. Speaker, that any noncommissioned officer or private soldier who shall be made eligible for reenlistment under the provisions of this bill shall, if reenlisted, be considered to have reenlisted immediately after his discharge, and to be entitled from the date of his discharge to the pay, allowances, and other rights and benefits that he would have been entitled to receive according to his rank from the date of discharge, as if he had been honorably discharged and had reenlisted immediately.

I can not see anything wrong or unfair in the provisions of this bill. It simply gives the discharged soldiers the right to appear before this court of inquiry and establish their innocence, and if they are unable to do that, they will not be eligible for reenlistment. Under the rule of law every man is presumed to be innocent until proven guilty beyond a reasonable doubt. Under this bill the burden rests upon the discharged soldiers, as it requires them to establish their innocence to the satisfaction of the court of inquiry and the Secretary of War.

It is only fair that these men be given an opportunity somehow or somewhere to establish their innocence, and up to this time that privilege has been denied them. Give them a day in court, let them be heard, and if guilty punish them, but in the name of justice do not punish the innocent because of the guilty.

I do not see how anyone can consistently oppose this measure. Its effect will be to vindicate the innocent and punish the guilty. I believe the court of inquiry appointed under the provisions of this bill will consist of men of high character, standing, and ability, and that no man will be allowed to reenlist until he has established his right. The passage of this bill is a matter of tardy justice. Let us show to the country that this House stands for equal and exact justice to all men regardless of race or color, by giving these discharged soldiers the right to be heard, and the right of reenlistment, if their innocence is established.

[Mr. MILLER addressed the House. See Appendix.]

Mr. HULL of Iowa. Mr. Speaker, how much time have I remaining?

The SPEAKER pro tempore. The gentleman from Iowa has six and one-half minutes remaining.

Mr. WILLIAMS. Does the gentleman from Iowa [Mr. HULL] intend to yield all of his time to one person?

Mr. HULL of Iowa. I will yield to one.

Mr. WILLIAMS. How much time has the gentleman remaining?

The SPEAKER pro tempore. Will the gentleman from Iowa [Mr. HULL] inform the Chair whether he yields?

Mr. HULL of Iowa. No; I reserve the balance of my time.

Mr. WILLIAMS. I understand the gentleman from Iowa is going to yield it all to one person.

Mr. HULL of Iowa. Yes.

Mr. WILLIAMS. Then I will yield the balance of the time on this side to the gentleman from Missouri [Mr. CLARK].

The SPEAKER pro tempore. The gentleman from Missouri [Mr. CLARK] is recognized for eight minutes.

Mr. HEFLIN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on this subject.

Mr. WILLIAMS. Mr. Speaker, I regret that I have to do this. I think the printing business by unanimous consent in order to extend for those who have really spoken is all right, but to let everybody print who have not spoken upon this question, and thereby encumber the RECORD, I think I will have to object to.

Mr. CLARK of Missouri. Mr. Speaker, how much time have I?

The SPEAKER pro tempore. The gentleman from Missouri is recognized for eight minutes.

Mr. CLARK of Missouri. Mr. Speaker, there is no sense in gentlemen becoming heated up about this question on either side. It is purely and simply a legal proposition. One gentleman says it is a political question, and another gentleman says it is not a political question, while yet another one says it is a racial question. It is, however, neither a racial nor political question; but if it is a political question, which I do not believe, I stand with my party. [Applause on the Democratic side.] If it is a racial question, which I do not believe it is, I stand with the people of my blood. I have never been ashamed or afraid to stand up and be counted with any crowd to which I belong in any station of life.

The gentleman from New York [Mr. COCKRAN] says that the race to which we belong has conquered by reason of its sense of justice. That is not true. He is mistaken. We have conquered by the power of the lion's paw and the eagle's claw. That is the way we have gotten along in this world. [Applause on the Democratic side.] In every country where we have set our feet we have either achieved the mastery or we have found a grave. And that will be the way of it until the end of time. [Applause.] It is in the blood. It is our destiny. We could not escape it if we would, and we would not escape it if we could.

I will tell you about the political phase of this question. In the numerous debates I have had with our beloved friend, Gen. Charles Henry Grosvenor, on one occasion he was telling of the marvelous prosperity that prevailed in 1892, during Gen. Benjamin Harrison's administration. I said, "General, if that is true, how did we happen to mop up the face of the earth with you that fall?" He said, "It was that d—d Homestead strike!" That was the politics that year. There has never been any partisan politics in this thing. There has been a great deal of factional Republican politics in it, as much as there was of partisan politics in the Homestead strike. This Brownsville wrangle removed Senator JOSEPH BENSON FORAKER absolutely as a candidate for the Presidential nomination. It contributed largely to an event that I am glad of, and that was the election of the Hon. THEODORE E. BURTON to the Senate of the United States by putting Senator FORAKER out of the running. [Applause.]

As long as there was any factional politics to be played in this matter the Republicans split up and fought each other with the pertinacity of the Kilkenny cats. Now, having carried the election, you are doing what you generally have managed to do—you are getting together for further political effect, and that is all the politics there ever was in it. [Applause on the Democratic side.]

Mr. Speaker, a large number of men in this House have been prosecuting attorneys. That is one of the favored paths to a seat in this House. I have prosecuted hundreds; I have defended hundreds. I never made the slightest difference between a negro and a white man, either in the discharge of my duty as prosecuting attorney or in defending them in court. Some of the hardest fights I ever made in my life inside of a courthouse I made on the appointment of a judge to defend some poor negro that did not have a nickel with which to pay any living man to defend him. [Applause on the Democratic side.] I have no unkind feeling in my heart toward them. I worked with them when I was a boy, in the same field, played with them when I was a child, and every one of them that lives in my town to-day is my personal friend and I am their personal friend. When they want help, they come to me, and I have never yet turned one of them away empty-handed. I never will.

Mr. Speaker, you used to be a circuit attorney, and I was prosecuting attorney. The law in every civilized community where the English tongue is spoken is this: That the man that gives aid or comfort to a murderer is a murderer himself—an accessory after the fact. [Applause on the Democratic side.] Indeed, in the criminal code passed through this House only a few days ago both accessories before the fact and accessories after the fact are specifically declared to be principals in felonies. Now, what are the facts in this case?

Mr. HOBSON. Will the gentleman yield to a question?

Mr. CLARK of Missouri. I have not time. I do not want to be discourteous, but that is exactly the situation.

Some of these soldiers committed murder. There is not any doubt about that in any sensible man's mind. The man murdered was a peace officer, killed in the discharge of his duties. They tried to commit two more murders. Every man in that battalion that has any knowledge of that transaction is as guilty in the eyes of the law as the man that pulled the trigger. and you can not get away from that. [Applause on the Democratic side.] There is not a single man here or elsewhere who ever read a hornbook on criminal law who would, under oath, take issue with me on the law as I have stated it.

What was offered after President Roosevelt, as Commander in Chief of the Army and the Navy, put these men out of the service? William H. Taft was Secretary of War. They both said that if the men of that battalion would deliver up to justice the guilty ones the rest of them should be reinstated in the army. [Applause.] That was your President, Mr. Speaker, and that is your President-elect. Their proposition was a fair one, and the law ought to have been enforced on them whether they were black men or white men. [Renewed applause.] See how it is? The United States soldiers are the only men permitted to carry arms under the law and swagger around with them, except in a few towns, where the policemen have that power. If I knew of any man in Washington who had threatened hundreds of times to take my life, I do not have the poor privilege under the law of carrying a pistol for self-defense.

Soldiers, of all men, ought to behave themselves, whether black or white. This can not be twisted into a race question. It is purely a legal question. You can not befog it by talking about black men and white men. You can not befog it by talking about Republicans or Democrats. You will fool nobody by such jabber and such tactics. Every man that commits murder—I do not care whether in the army or out of the army—ought to be hanged until he is as dead as the men who lived before the flood. [Laughter and applause.] President Roosevelt has denounced the men that committed that crime as "bloody butchers and murderers." Mr. Speaker, there are some 200 of us in this town that one night witnessed a spectacle never seen before by human eyes and in all probability never to be duplicated in all the centuries yet to be. We saw a Senator of the United States [Mr. FORAKER] in a public place hold a joint discussion with the President of the United States and hold his own. It grew out of this Brownsville business and was a most thrilling performance. Just exactly how anybody can get his own consent that a murderer shall not be punished I can not tell.

One thing more and I will quit. This bill ought to be entitled "A bill to put a premium on perjury." [Loud applause.]

The bill runs as follows:

An act to correct the records and authorize the reenlistment of certain noncommissioned officers and enlisted men belonging to Companies B, C, and D, of the Twenty-fifth U. S. Infantry, who were discharged without honor under Special Orders, No. 266, War Department, November 9, 1906, and the restoration to them of all rights of which they have been deprived on account thereof.

Be it enacted, etc., That the Secretary of War is hereby authorized to appoint a court of inquiry, to consist of five officers of the United States Army, not below the rank of colonel, which court shall be authorized to hear and report upon all charges and testimony relating to the shooting affray which took place at Brownsville, Tex., on the night of August 13–14, 1906. Said court shall, within one year from the date of its appointment, make a final report, and from time to time shall make partial reports, to the Secretary of War of the results of such inquiry, and such soldiers and noncommissioned officers of Companies B, C, and D, of the Twenty-fifth Regiment U. S. Infantry, who were discharged from the military service as members of said regiment, under the provisions of Special Orders, No. 266, dated at the War Department the 9th day of November, 1906, as said court shall find and report as qualified for reenlistment in the Army of the United States shall thereby become eligible for reenlistment.

SEC. 2. That any noncommissioned officer or private who shall be made eligible for reenlistment under the provisions of the preceding section shall, if reenlisted, be considered to have reenlisted immediately after his discharge under the provisions of the special order hereinbefore cited, and to be entitled, from the date of his discharge under said special order, to the pay, allowances, and other rights and benefits that he would have been entitled to receive according to his rank from said date of discharge as if he had been honorably discharged under the provisions of said special order and had reenlisted immediately.

The second section of this bill, when intelligently interpreted, provides that the men who perjure themselves, or whom you can not prove are guilty, shall not only be reinstated in the army, but they shall receive their emoluments for the two years, I believe it is, that they have been out of the army, and for the time until they go back into the army. In addition to that they are to resume rights to be put on the retired list. Does any sane man believe that a man who commits assassination will not also commit perjury? Others may vote for this bill. I will not.

The SPEAKER. The time of the gentleman has expired.

Mr. CLARK of Missouri. Just one more sentence. I say now, speaking for every man here, that if these soldiers will give up the guilty ones the innocent ones may be taken care of. [Loud applause.]

Mr. HULL of Iowa. I yield the balance of my time to the gentleman——

Mr. BEDE. May I ask the gentleman from Missouri one question?

The SPEAKER. The gentleman has not the floor.

Mr. WILLIAMS. I have not the time to yield. If I had, I would gladly do so. [Cries of "Give him half a minute!"]

Mr. HULL of Iowa. I ask unanimous consent that the gentleman from Minnesota may have the right to ask one question of the gentleman from Missouri, and that he have time to reply.

Mr. CLARK of Missouri. I would like to have time to answer it.

Mr. HULL of Iowa. That is my request.

The SPEAKER. Is there objection?

Mr. HULL of Iowa. I will ask unanimous consent that the gentleman from Minnesota may have the right to ask the gentleman a question, not to exceed half a minute, and that the gentleman from Missouri have one minute to reply.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. BEDE. I ask the question merely as a layman. The gentleman from Missouri has stated that many Members of this House have been prosecuting officers. I ask him this question from his knowledge of jurisprudence, as it would clear up my mind a little before this vote; if he can tell me if there has ever been a case where 167 men went into a conspiracy? There were 167 of these soldiers. I have never heard of a case where that many men went into a conspiracy.

Mr. CLARK of Missouri. Why, there are cases where thousands of men went into conspiracy. There is no question about that.

It does not make any difference what you call it. There were the Bald Knobbers in Missouri; there were the Night Riders, the Kuklux; the Mollie Maguires in Pennsylvania; the White Cappers; the Mafia in Louisiana; and the race riots at Springfield, Ohio, and Springfield, Ill. [Applause and laughter on the Democratic side.]

Mr. HENRY of Texas. I ask unanimous consent——

Mr. HULL of Iowa. Mr. Speaker, I must object. I want to yield the balance of my time now.

Mr. HENRY of Texas. Mr. Speaker——

The SPEAKER. Does the gentleman from Iowa yield?

Mr. HULL of Iowa. I will not.

The SPEAKER. The gentleman declines to yield.

Mr. HULL of Iowa. I yield the remainder of my time to the gentleman from Ohio [Mr. KEIFER].

Mr. KEIFER. Mr. Speaker, neither in the judgment of civilized man nor in the judgment of Almighty God will the Saxon or white race ever attain, establish, or maintain supremacy in this world by or through acts of cruelty or injustice to an inferior race. [Applause.]

On the night of the 13th of August, 1906, an unfortunate thing happened in Brownsville, Tex. One man was killed; the chief of police was dangerously wounded. Some superficial examination was made by an officer of the army, specially detailed, with reference to ascertaining who was guilty. So far as I have been able to read the testimony taken of some of the men who are arraigned here to-day and charged with being guilty of crime, not one of them was asked any question the answer to which would or could have tended to show who committed the crime or that the witness being examined knew who committed it.

General Garlington, who made the report, based on the testimony, simply reported that the men at whose door the crime was laid were given the opportunity to prove that they did not know who was guilty. This was not true in any real sense. They were offered no such opportunity. The testimony, it would seem to a lawyer, was taken with a view to not eliciting from the witnesses examined any important thing they might know as to either the guilt or innocence of anybody. But of this, more at length, a little later.

Mr. GARNER. Will the gentleman yield?

Mr. KEIFER. No; not now. On the 9th of November, 1906, by the direction of the President, a War Department order, No. 266, was issued, discharging without honor from the service of the United States Companies B, C, and D, of the Twenty-fifth U. S. Infantry, including about 167 enlisted men. Part only of the members of these companies were at Brownsville when the shooting took place, and some of those then there were, for minor offenses, locked up in the guardhouse, and still others who were there were sick in hospital, and about 18 of the enlisted men of these companies were a thousand or more miles away, principally in Oklahoma, on furlough or on detail duty.

The gentleman from Missouri [Mr. CLARK], who has just taken his seat, says that they are all guilty of perjury; and he lays down as a principle of law something that has never been recognized in any court of justice in the world. In effect his legal claim is that if a man had an opportunity, or might in some way have, by possibility, the means of knowing that somebody was guilty of a crime, he himself becomes guilty with the principal as an accessory after the fact. No such absurdity has ever crystallized into the law of a civilized country, and never will.

It is not even true, as the distinguished gentleman from Missouri states, "that the man that gives aid or comfort to a murderer is a murderer himself—an accessory after the fact." This announcement of such a rule of law was hastily made or it never would have been made by the distinguished gentleman. An accessory after the fact to any crime, at common law or by statute, is very rare and never can exist where the crime is murder. There may be an accessory before the fact where the party did something to promote the murder before the deed was consummated. There can be no accessory after the fact in homicide or murder. After the murder has been committed there can be no new party to it. There must be a participation in some way in the commission of the crime before guilt can attach. An accessory to a crime, before or after the fact, arises only through participation, directly or indirectly, in the acts, or some of them, constituting or connected with the crime and with a guilty intent; and there can be no accessory after the fact to a crime of any character growing out of a suppression of knowledge of the crime or of the evidence of the guilt of the real criminal. An accessory after the fact to a crime is a person who, with no previous relation to it and after the principal act constituting it has been committed, participates in subsequent acts necessary to its full or final consummation. In larceny and like offenses where property is taken a person may be an accessory after the fact who, after the taking, aids in carrying it off and secreting it. There must be a participation in the crime while it is yet incomplete. Larceny consists in the unlawful taking of property of another, and the offense is regarded as committed any time after the original asportation, but the crime is held to be continuing and repeated so long as the goods are in the possession or under the control of the thief; and he may be prosecuted for the crime in any county of the same State where he has taken the stolen property. A horse stolen in one county and ridden to another renders the thief liable to prosecution in either. There may be repeated accessories in larceny and kindred incomplete offenses, but not in homicide.

But in no case can a man become an accessory after the fact by merely failing to give information as to who the guilty party was, even though he possessed full knowledge of the crime; and to announce, as does the gentleman from Missouri, that "every man in that battalion that has any knowledge of that transaction is as guilty in the eyes of the law as the man that pulled the trigger" is to announce that which is not supported by any authority and is unsound in principle and is not supported by sound reason.

There are many in higher life than the soldiers involved who withhold information as to a guilty party for various reasons, and sometimes justifiably do so, but whether the reason for not disclosing such informtion or knowledge is justifiable or not, those who do so are not regarded, criminally or otherwise, as accessories to a crime. There never was a conviction of a person as an accessory to a crime where the indictment or information only alleged that the person possessed knowledge that some other person had committed it. No such foolish indictment or information was ever framed.

Clergymen, attorneys, and physicians often acquire directly from the guilty the most accurate and detailed information as to their guilt, which is sacredly concealed from the public authorities and which they are not allowed by the common law or by state and federal statutes to disclose in a court of justice, however willing they may be to do so. The law does not regard these professional men as criminals, but guards their knowledge acquired in a confidential way from publicity, and wisely so.

Priests in the confessional may learn the author of the most heinous crime, and their sacred calling warrants and protects them in sacredly keeping the knowledge secret. If the rule of criminality said to exist was applied to priests, they would all be condemned to prison or the gallows.

It has always, in this and other countries, in schools, colleges, and universities, theological institutions included, been regarded as dishonorable for one student to disclose the bad conduct or acts of his fellows, and it is nowhere in civilization held to be dishonorable or criminal to keep secret knowledge of offenses committed by comrades or friends.

But these poor unfortunate negroes are here arraigned as murderers because they did not disclose their supposed knowledge of the guilt of some of their soldier comrades. And it is only assumed that they possessed or could possess knowledge of the guilt of any one of their comrades.

The shallow theory that all of the three companies were in a conspiracy to suppress all knowledge of the shooting up of Brownsville deserves no attention. No such conspiracy was possible or could have been carried out successfully.

Mr. Speaker, I do not care here to go into the question of the power of the President to issue the order of dismissal, and I would not regard it necessary, if I had the time, to arraign him for issuing it, however much I differ with him as to its wisdom or as to his right and power to issue it.

I have heard it said, and I believe it has been repeated on the floor here to-day, that there were precedents for commanding officers of the army dismissing whole battalions of men because of some misconduct. I know of no such precedent and I have reason to believe none can be found. A precedent has been talked about as coming from General Lee, when he issued an

order in October, 1864, with reference to a battalion of the army of northern Virginia. In that case General Lee expressly declined to exercise the power to dismiss the battalion, but simply ordered it out of the army of northern Virginia in disgrace. He did not assume to do anything more. That is the only precedent I have heard cited on the confederate side in the civil war. I will read here this much-talked-of order of General Lee:

General Order No. —.
HEADQUARTERS ARMY OF NORTHERN VIRGINIA,
October —, 1864.

The ——— Battalion, for cowardly conduct on every battlefield from Gettysburg to the present time, is unworthy of a place as an organization in the Army of Northern Virginia. It will be marched to division headquarters Wednesday afternoon at 4 o'clock and surrender its colors and marched to the rear in disgrace. The general commanding the Army of Northern Virginia regrets that there are some brave officers and men belonging to this organization who must share in this common disgrace, but the good of the service requires it, and they must bear it as brave soldiers.

Gen. R. E. LEE,
———,
Assistant Adjutant-General.

It will be seen the battalion was only sent to the rear in disgrace, and the whole battalion was held guilty of cowardice, as the order recites, and of course all its members must suffer together.

Mr. BARTLETT of Georgia. The President in his message cited the precedent of an Ohio regiment.

Mr. KEIFER. I can not now allow the gentleman to take my time. General Grant or General Lee could order an organized army into battle where possibly 50 per cent or more of them might be killed or wounded, but neither of those generals had the right to order any of them dismissed from the army, organized under and in pursuance of law, without trial by court-martial.

The power of the President, as Commander in Chief, to command the Army of the United States does not carry with it the power to disband that army. And of course this is so as to generals commanding armies. The dismissal of the officers and enlisted men of the Volunteer Army in times of war would not be a precedent for the dismissal of officers and soldiers from the Regular Army, as the commissions and enlistment in the Volunteer Army provide for a term of months or years or during the war and always coupled with a condition—"or until sooner discharged." Hence the enlisting authority might discharge during the war an organization of volunteers at any time. The Regular Army of the United States in all its history furnishes no precedent for the presidential order.

The present adjutant-general of the United States Army, Maj. Gen. F. C. Ainsworth, of date of December 10, 1906, in a memorandum furnished at the request of the Secretary of War, among other things, says:

A protracted examination of the official records has thus far resulted in failure to discover a precedent in the Regular Army for the discharge of those members of the three companies of the Twenty-fifth Infantry who were present on the night of August 13, 1906, when an affray in the city of Brownsville took place.

* * * * * * *

No record of the summary discharge from the Regular Army, prior to the recent discharge of a battalion of the Twenty-fifth Infantry, of a considerable number of enlisted men at one time has been found.

The individual cases of summary discharge without honor and without court-martial from the Regular Army are shown by the same authority to be on account of "fraudulent enlistment," "desertion," "imprisonment after conviction by a civil court," and for "having become disqualified for service through their own misconduct," and not because the soldiers were charged with any crime punishable under the Army Regulations or by statutes, state or federal. And in most of the cases other than those arising from desertion the soldier was discharged on his own application.

Involuntary discharges from the United States Army seem to be unknown, especially where vested rights, due to long service and repeated enlistments, were involved. Only after conviction by a duly organized military court can such rights be properly or legally taken away and the soldier be dishonorably discharged.

The alleged precedents arising in the civil war where it is said volunteer military organizations were discharged the service I have already sufficiently commented on and pointed out that by the terms of enlistment they were at all times subject to discharge by the President from the service.

There were cases in the Union Army, like the one I have referred to in General Lee's army, where a regiment, battalion, or company was sent to the rear in disgrace as a punishment, but I think no precedent can be found of even an enlisted man being discharged for any offense by an army commander without trial by court-martial.

The case of an Ohio regiment just referred to by the gentleman from Georgia [Mr. BARTLETT] as a precedent was doubtless like the General Lee case, where a regiment was ordered to the rear by General Grant as a punishment for bad conduct on the battlefield of Shiloh. Other instances cited are purely cases where the President discharged volunteer military organizations for various reasons, but in accordance with their terms of enlistment.

But here is the question: These men never had a trial; never have faced a tribunal; never were shown to be guilty before the order for their dismissal was issued, nor since, unless possibly a very few of them on ex parte testimony and without trial.

I should like to read the testimony of one or more of these witnesses which my friend from Missouri [Mr. CLARK) says makes them guilty of perjury because they did not answer the questions and disclose somebody's guilt. This witness and the other witnesses responded to the questions asked.

Mr. HENRY of Texas. Read it all.

Mr. KEIFER. I will read the testimony of Musician Jones:

Q. Where were you on August 13 when the shooting commenced?—A. I was in my bed in the quarters.
Q. Asleep or awake?—A. Asleep, sir.
Q. Anybody ever abuse you in Brownsville?—A. No, sir.
Q. Have you ever been in a barroom in Brownsville?—A. No, sir.

Mr. HENRY of Texas. Read it all.

Mr. KEIFER. That is every word of it. That man was then dismissed without further inquiry and not permitted to testify further, and the gentleman from Missouri [Mr. CLARK] calls him a perjurer because he did not disclose who committed the crime. I have looked over the testimony of a large number of the witnesses who testified and who were examined in the same way, and I do not recall one of them having been asked a question that could have elicited an answer as to who was guilty had the witness known. The questions put to all of these witnesses seem to have been designedly so framed as to avoid getting any desired information.

Mr. HENRY of Texas rose.

Mr. KEIFER. Now, I can not yield. I have not the time. I would if I could. If you will give me half an hour I will give you half of it.

Lest the testimony of this witness may be thought exceptional I will read that of a number of other members of Companies B, C, and D, of the Twenty-fifth U. S. Infantry, who were called as witnesses. The testimony of each witness is read in full:

PVT. MARK GORMAN, COMPANY C, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13 when shooting commenced in Brownsville?—A. In bed.
Q. Where was the bed?—A. Upstairs.
Q. In quarters?—A. Yes, sir.
Q. Asleep or awake?—A. I was asleep; they woke me up.
Q. Anybody in Brownsville ever abuse you?—A. No, sir.
Q. Were you asleep at 11 o'clock inspection?—A. Yes, sir; I guess I was; I did not know when they came through.

PVT. JOSEPH ROGERS, COMPANY C, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13, 1906, when shooting commenced?—A. I was at the guardhouse.
Q. Asleep or awake?—A. Asleep, sir.
Q. Who did you first see when you awoke?—A. The sergeant of the guard.
Q. Name him.—A. Sergeant Reid.
Q. Was the shooting still going on?—A. Yes, sir.
Q. Anybody ever abuse you in Brownsville?—A. No, sir.

PVT. JAMES T. HARDIN, COMPANY C, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13, 1906, when shooting commenced in Brownsville?—A. I was at Lieutenant Higgins's quarters.
Q. Awake or asleep?—A. Asleep, sir.
Q. Who did you first see when you awoke?—A. Artificer Rudy, next morning.
Q. Anybody in Brownsville ever abuse you?—A. No, sir.

PVT. AUGUST WILLIAMS, COMPANY C, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13 when the shooting commenced?—A. In Brownsville, Tex.
Q. What part of Brownsville?—A. I was in the post; in quarters.
Q. Awake or asleep?—A. Asleep, sir.
Q. Anybody in Brownsville ever abuse you?—A. No, sir; nobody ever abused me.
Q. Who, if anybody, told you that they had been abused?—A. Nobody that I remember.

PVT. ROBERT TURNER, COMPANY C, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13 when shooting commenced?—A. Was over across the garrison at Lieutenant Hay's quarters at Fort Brown.
Q. Did you hear the shooting?—A. Yes, sir.
Q. Were you awake or asleep when the shooting commenced?—A. I was asleep when it first commenced.
Q. Did anybody in Brownsville ever abuse you?—A. No, sir.
Q. Did anybody ever tell you that they had been abused in Brownsville?—A. Yes, sir; one was Private—don't remember his name.

PVT. JOHN T. HAWKINS, COMPANY C, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13 when the shooting commenced?—A. I was asleep in bed in quarters.
Q. Anybody ever abuse you in Brownsville?—A. No, sir.

PVT. LEARTIS WEBB, COMPANY C, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13 when the shooting commenced?—A. In bed, asleep; bed was near the door upstairs; in the quarters.

Q. Awake or asleep —A. Asleep.
Q. Anybody ever abuse you in Brownsville?—A. No, sir.
Q. Anybody ever tell you that they had been abused in Brownsville?—A. No, sir.

PVT. CALVIN SMITH, COMPANY C, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13 when the shooting commenced?—A. I was in my bed, sir; in quarters.
Q. Awake or asleep?—A. I was asleep; woke up by noise of shooting.
Q. Anybody ever abuse you in Brownsville?—A. No, sir.

PVT. JOHN SMITH, COMPANY C, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13 when the shooting commenced at Brownsville?—A. I was in confinement.

PVT. HENRY T. W. BROWN, COMPANY D, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13, 1906, when the shooting commenced?—A. Fort Brown, Tex.; in barracks, asleep.
Q. Anybody ever abuse you in Brownsville?—A. No, sir.
Q. Any man ever tell you that he had been abused in Brownsville?—A. Once. His name is Newton, belonged to C Company. Man by the name of Reed, belonged to C Company. That is all.
Q. Ever hear of anybody else being abused there from any company?—A. No, sir.

COOK ROBERT WILLIAMS, COMPANY D, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13 when the shooting commenced?—A. In my room, sir; asleep.
Q. Anybody ever abuse you in Brownsville?—A. No, sir.
Q. Any man ever tell you he had been abused in Brownsville?—A. No, sir.

CORPL. ALBERT ROWLAND, COMPANY D, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13 when the shooting commenced?—A. I was in my quarters.
Q. Awake or asleep?—A. I was asleep at the beginning of it.
Q. Anybody ever abuse you in Brownsville?—A. No, sir.
Q. Did you ever hear anybody say that he had been abused in Brownsville?—A. I heard one man say; I can not think of his name; belongs to C Company; the man that said he got hit.
Q. Did you ever go into a saloon in Brownsville?—A. Only one; a discharged soldier had one there; I went into it.
Q. Was that a private saloon for the Twenty-fifth Infantry soldiers?—A. Yes; I think it was.
Q. Never went into a city saloon?—A. No, sir; never went into a city saloon.

PVT. DORSIE WILLIS, COMPANY D, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13 when the shooting commenced?—A. I was in bed, sir; in quarters in garrison; Company D quarters.
Q. Anybody ever abuse you in Brownsville?—A. No, sir.
Q. Hear any rumors that men were abused in Brownsville?—A. Yes, sir.
Q. Name those that you heard were abused.—A. Private Newton, Company C.
Q. Anybody else?—A. Private Reed, also Company C.
Q. Have you ever been in a city saloon in Brownsville?—A. No, sir; only that one that was run there by a discharged soldier.

PVT. WILLIAM E. JONES, COMPANY D, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13 when the shooting commenced?—A. I was in Captain Lyon's quarters, asleep.
Q. Anybody ever abuse you in Brownsville?—A. No, sir.

MUSICIAN HENRY JIMERSON, COMPANY B, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13, 1906, when shooting in Brownsville commenced?—A. In quarters, sir.
Q. Awake or asleep?—A. Asleep.
Q. Were you ever abused in Brownsville?—A. No, sir.
Q. Were you ever in a saloon in Brownsville?—A. No, sir; I never was.

PVT. WILLIAM M. MATTHEWS, COMPANY D, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13, 1906, when shooting commenced?—A. In quarters, sir.
Q. Awake or asleep?—A. Asleep, sir.
Q. Were you ever abused in Brownsville?—A. No, sir.
Q. Were you ever in a saloon in Brownsville?—A. Once, sir; called the depot saloon—Mexican saloon.

PVT. GEORGE W. PERKINS, COMPANY C, TWENTY-FIFTH INFANTRY.

Q. How long have you been in the service?—A. Eight years.
Q. Where were you on August 13, 1906, when the shooting commenced?—A. In Brownsville; in quarters, in bed.
Q. Awake or asleep?—A. Asleep at the time.
Q. Have you ever been abused in Brownsville?—A. No, sir.
Q. Have you ever been in a saloon in Brownsville kept by a white man?—A. Once I started in there and turned back. A Mexican told me not to go in those saloons, because they wouldn't serve me, so I turned back and wouldn't go in. On one occasion I was downtown unloading freight; stopped in; otherwise haven't been in.
Q. Ever been in a Mexican saloon?—A. No, sir.

PVT. JOHN BROWN, COMPANY B, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13 when shooting commenced?—A. In the baker shop, asleep.
Q. Have yau ever been abused in Brownsville?—A. No, sir.

PVT. WILLIAM E. JONES, COMPANY D, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13 when shooting commenced?—A. In Fort Brown, sir.
Q. Whereabouts?—A. Asleep, when the shooting commenced.
Q. Where?—A. In my bunk; sleeping in my quarters.
Q. Were you ever abused in Brownsville?—A. No, sir.

PVT. FRANK BUNSLER, COMPANY C, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13, 1906, when the shooting commenced?—A. In the guardhouse at Brownsville.

PVT. HENRY ODOM, COMPANY B, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13 when shooting commenced at Brownsville?—A. Asleep, sir; in barracks.
Q. Who did you first see when you woke up?—A. I got up and put on my trousers and ran down; met the major; first I saw.
Q. Have you ever been abused in Brownsville?—A. No, sir.
Q. Have you ever been in a barroom kept by a white man?—A. No, sir.
Q. Why not?—A. Because I very seldom went down town, sir.

PVT. LEROY HORN, COMPANY B, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13, 1906, when shooting commenced at Brownsville?—A. Laying in bed, asleep, sir. Bed on side of house next to town, in barracks.
Q. Were you ever abused in Brownsville?—A. No, sir.

PVT. SOLOMON JOHNSON, COMPANY B, TWENTY-FIFTH INFANTRY.

Q. On August 13, 1906, where were you when shooting commenced?—A. In quarters, sir; in barracks, in bed.
Q. Asleep or awake?—A. Asleep.
Q. Were you ever abused in Brownsville?—A. No, sir; I wasn't.
Q. Were you ever in a saloon in Brownsville kept by a white man?—A. No, sir.
Q. Why not?—A. It was said partition had been put between white and colored, so I never went down there.

PVT. WILLIAM ANDERSON, COMPANY B, TWENTY-FIFTH INFANTRY.

Q. Where were you on August 13, 1906, when shooting commenced?—A. In my bed asleep; in barracks when shooting begun. When I woke up, shooting was going on; shooting and call to arms woke me up, together.
Q. Anybody ever abuse you in Brownsville?—A. No, sir; never had any trouble any time with anyone.
Q. Did you ever hear of anyone having trouble? If so, state who.—A. I heard of Private Reed, C Company, and Newton, C Company, so I heard say; I don't know, though.
Q. Anybody else?—A. No, sir.

The testimony of these soldiers is sufficient to show that no real effort was made in good faith to have the members of these companies disclose any knowledge they might have possessed as to the guilt or innocence of anybody, and there was no effort to have them exculpate themselves. There was much testimony of members of the three companies of the character quoted.

On this character of testimony General Garlington, in his report to the War Department and the President, was pleased to say:

> The uniform denial on the part of the enlisted men concerning the "barrack talk" in regard to these acts of hostility upon the part of certain citizens of Brownsville indicated a possible general understanding among the enlisted men of this battalion as to the position they would take in the premises, but I could find no evidence of such understanding.

And, further, that—

> It has been established, by careful investigation, beyond reasonable doubt that the firing into the houses of the citizens of Brownsville, while the inhabitants thereof were pursuing their peaceful vocation or sleeping, and by which one citizen was killed and the chief of police so seriously wounded that he lost an arm, was done by enlisted men of the Twenty-fifth Infantry belonging to the battalion stationed at Fort Brown. After due opportunity and notice, the enlisted men of the Twenty-fifth Infantry have failed to tell all that it is reasonable to believe they know concerning the shooting. If they had done so, if they had been willing to relate all the circumstances—instances preliminary to the trouble—it is extremely probable that a clew sufficiently definite to lead to results would have been disclosed. They appear to stand together in a determination to resist the detection of the guilty; therefore they should stand together when the penalty falls.

And by way of conclusion he said:

> I recommend that orders be issued as soon as practicable discharging, without honor, every man in Companies B, C, and D of the Twenty-fifth Infantry serving at Fort Brown, Tex., on the night of August 13, 1906, and forever debarring them from reenlisting in the Army or Navy of the United States, as well as from employment in any civil capacity under the Government.

On this report the President acted, and his order was as comprehensive as the recommendation just quoted. The bill we are about to pass will only partially and tardily repair the consequent injustice done.

It has been frequently asserted here to-day that Secretary of War Taft approved the issuance of the order of dismissal. My understanding is that he did not, and that he delayed its issue until he had no discretion in the matter.

It is said, after careful scrutiny of the testimony taken by the Senate Committee on Military Affairs, that about five or six, as I now recollect, of these persons have been inculpated, and the balance, according to every test that is applied to criminal procedure, are innocent. The bill is hardly just to these soldiers, but it is hoped that it will secure substantial relief to all who are found to be innocent. It is the best that can be done now, and the bill should be passed.

The SPEAKER. The time of the gentleman has expired.

Mr. HULL of Iowa. Mr. Speaker, on the passage of the bill I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 211, nays 102, answered "present" 1, not voting 72, as follows:

YEAS—211.

So the bill was passed.

The Clerk announced the following pairs:

Until further notice:

Mr. GARDNER of Michigan with Mr. HAMILL.

Mr. ELLIS of Missouri with Mr. SMITH of Missouri.

Mr. CARY with Mr. WEISSE.

Mr. JACKSON with Mr. WOLF.

Mr. CALDER with Mr. GOLDFOGLE.

Mr. GRAHAM with Mr. LEGARE.

Mr. BIRDSALL with Mr. BROUSSARD.

Mr. STERLING with Mr. SAUNDERS.

Mr. WATSON with Mr. SABATH.

Mr. MOORE of Pennsylvania with Mr. RUCKER.

Mr. MOON of Pennsylvania with Mr. RIORDAN.

Mr. MCMILLAN with Mr. RHINOCK.

Mr. LOVERING with Mr. REID.

Mr. MCGAVIN with Mr. PRATT.

Mr. LORIMER with Mr. POU.

Mr. ADDISON D. JAMES with Mr. LAMAR of Florida.

Mr. HUGHES of West Virginia with Mr. LAMAR of Missouri.

Mr. FOULKROD with Mr. HILL of Mississippi.

Mr. FOELKER with Mr. HARRISON.

Mr. FASSETT with Mr. FLOYD.

Mr. DAWES with Mr. LASSITER.

Mr. DAVIDSON with Mr. HAMLIN.

Mr. COUDREY with Mr. HACKETT.

Mr. COOPER of Pennsylvania with Mr. FULTON.

Mr. COOK of Pennsylvania with Mr. COOPER of Texas.

Mr. COCKS of New York with Mr. CLARK of Florida.

Mr. BURKE with Mr. BOWERS.

Mr. BINGHAM with Mr. BARTLETT of Nevada.

Mr. MANN with Mr. ANSBERRY.

On this vote:

Mr. HUFF with Mr. JOHNSON of Kentucky.

The result of the vote was announced as above recorded.

On motion of Mr. HULL of Iowa, a motion to reconsider the last vote was laid on the table.

GENERAL DEFICIENCY APPROPRIATION BILL.

Mr. TAWNEY. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 28376) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes. Pending that motion, Mr. Speaker, I ask unanimous consent to include in the bill certain amendments, one of which was agreed to by the committee, but was by mistake in the printing of the bill omitted, and that is the amendment for the entertainment of foreign representatives of the English and French Governments who have been invited by the State Department to participate in the Champlain celebration next summer. Another is an amendment which the gentleman from Illinois [Mr. MANN] has in regard to a matter that was not determined until too late to be included in the bill, but which ought to be included.

The SPEAKER. The gentleman will have the amendments sent to the desk, and the Clerk will report them.

The Clerk read as follows:

Insert on page 55, after line 18:

"For allowance to ALBERT ESTOPINAL, for expenses incurred as respondent to the memorial asking that he be declared not elected a Member of the Sixtieth Congress, $511.35."

The SPEAKER. The Clerk will report the other amendments.

Mr. WILLIAMS. Mr. Speaker, reserving the right to object, will the gentleman from Minnesota [Mr. TAWNEY] yield to me for a moment?

Mr. TAWNEY. I yield to the gentleman.

Mr. WILLIAMS. Mr. Speaker, you are operating now under a rule under which you have made a majority amount to two-thirds, and under which you have ordered that a second should be granted, and as long as you are operating under a rule of that sort and not under the normal and natural rules of the House, I shall object to any favors that are asked while making efforts to operate under that rule. I therefore object.

Mr. MANN. Will the gentleman reserve his objection for a statement?

Mr. WILLIAMS. It is absolutely useless, because my objection does not go to the amendments. I am in favor of both of the amendments.

Mr. MANN. Will the gentleman reserve his objection?

Mr. WILLIAMS. No; I will make it.

Mr. MANN. The gentleman is not acting as usual about such matters. He is very courteous ordinarily.

Mr. WILLIAMS. That may be; but this proceeding is not as usual either.

Mr. MANN. I may say to the gentleman that it will probably cost his colleague on that side of the House $535.

Mr. WILLIAMS. Oh, I think not.

Mr. MANN. There is no way it will ever be in order except now.

Mr. WILLIAMS. If you have a set of rules that do not enable Congress to go ahead without unanimous consent, the Committee on Rules can bring in another rule.

Mr. MANN. The gentleman can take the responsibility with his colleague for this if he desires.

The SPEAKER. The committee can not bring in a rule which is not asked and voted for by the majority.

Mr. TAWNEY. Mr. Speaker, then I move to suspend the rules and pass the bill (H. R. 28376) making appropriations to supply deficiencies in the appropriations for the fiscal year end-

ing June 30, 1909, and for prior years, and for other purposes, with amendments, which I send to the desk and ask to have read.

The SPEAKER. The gentleman from Minnesota moves to suspend the rules and pass the bill with certain amendments. The Clerk will report the bill, with the amendments.

The bill as amended was read at length.

During the reading,

Mr. STANLEY (interrupting the reading). Mr. Speaker, I make a point of order on the item about a housekeeper in the White House. It is not authorized by existing law.

The SPEAKER. But this is a motion to suspend the rules and pass the bill as it is with the amendments, whether they be matters subject to a point of order or not.

Mr. STANLEY. As I understand it, this does away with existing law?

The SPEAKER. Not at all.

Mr. MANN. It is in accordance with law.

The SPEAKER. Existing law can not be done away with without legislation by Congress. This is a motion to suspend the rules, such rules as might interfere and all rules that do interfere, if any, with the present and immediate consideration of this bill and the amendments. It is a motion to suspend all the rules and pass the bill with the amendments.

The reading of the bill having proceeded for some time, the following occurred:

Mr. GAINES of Tennessee (interrupting the reading). Mr. Speaker, I would like to make an inquiry.

The SPEAKER. For what purpose does the gentleman rise?

Mr. GAINES of Tennessee. If I am in order, I would like to ask a question.

The SPEAKER. The gentleman can not interrupt the reading.

Mr. GAINES of Tennessee. Then, I am not in order; that is what I asked. One never knows when you are in order here, you make so many rules.

The SPEAKER. The gentleman has served long enough in Congress to know he is not in order.

Mr. GAINES of Tennessee. I did not know I was not in order. I have just come into the Chamber; I have been at work, and public work at that, as usual.

The SPEAKER. The gentleman should learn——

Mr. GAINES of Tennessee. It takes a student like the Speaker to know all these rules, and he has to study them every minute, with somebody to prompt him.

The SPEAKER. The gentleman from Tennessee is absolutely discourteous and misstates the fact.

Mr. GAINES of Tennessee. "The gentleman" is not discourteous any more than the Speaker is discourteous to the gentleman from Tennessee. "The gentleman" has not misstated the fact.

The SPEAKER. The Chair sitting as Speaker of the House, desiring to be as nearly impartial as he can, a practice has grown up, on the supposition that the Speaker's tongue is tied, to insult him, and the Speaker will not sit silent——

Mr. GAINES of Tennessee. "The gentleman's" tongue is not tied, and he is insulted as often as the Speaker. He has done that for twelve years——

The SPEAKER. The gentleman will be in order, and the Clerk will proceed.

Mr. GAINES of Tennessee. The Speaker will be in order, too, and has no right to lecture a Member——

The SPEAKER. The gentleman will be in order.

Mr. GAINES of Tennessee. I am trying to be, Mr. Speaker.

The SPEAKER. The gentleman will be in order, and the Sergeant-at-Arms will see that he remains in order.

Mr. GAINES of Tennessee. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman is not recognized for a parliamentary inquiry.

Mr. GAINES of Tennessee. I will sit down, then.

The Clerk resumed and concluded the reading of the bill.

The SPEAKER. Is a second demanded?

Mr. LIVINGSTON. Mr. Speaker, I demand a second.

The SPEAKER. Under the rule a second is ordered, and the gentleman demanding the second is entitled to twenty minutes and the gentleman from Minnesota is entitled to twenty minutes.

Mr. TAWNEY. Mr. Speaker, this bill carries appropriations for deficiencies for the fiscal year 1909. The aggregate estimates upon which the bill is based were $21,217,315.51. The amount recommended in the bill is $17,548,932.84. Thirteen million eight hundred and eighty-four thousand five hundred and seventy-eight dollars of this amount is made up of three items, neither one of which is a deficiency growing out of the discretionary action on the part of the department in the matter of public expenditures for the public service. Without exception, they are all made necessary by reason of laws passed by Congress authorizing and requiring additional obligations, for which the committees of Congress reporting the legislation failed to make the appropriations necessary to meet the obligations thus created.

That is true of two of these items, and especially and partially true of the third one. For the military establishment this bill carries $5,229,935. Of this amount $4,000,000 is for pay of officers and enlisted men in the army, made necessary by the law enacted recently increasing the compensation of officers and enlisted men of the army, for which the Congress did not appropriate sufficient money to meet these increased obligations created by this law. Hence this deficiency. With the exception of a few minor items the remaining amount of this deficiency is on account of our military occupation of Cuba, which amounts have been expended during the current fiscal year.

Mr. SHERLEY. Will the gentleman yield for a question?

Mr. TAWNEY. Yes.

Mr. SHERLEY. What effort is being made by the United States Government looking to have the Government reimbursed for these expenditures in Cuba?

Mr. TAWNEY. So far as the Congress of the United States constitutes a part of the Government it has endeavored to secure the reimbursement of our Treasury for this extraordinary expenditure made for the benefit of the people of Cuba. The act making appropriations to supply the deficiencies in the appropriations for the fiscal year ending June 30, 1907, approved March 4, 1907, contains the following provision:

> The President is hereby authorized to receive from the treasury of the Cuban Republic and pay into the Treasury of the United States from time to time such amounts to reimburse the United States, for the expenditures from the United States Treasury made necessary on account of the present intervention, as he may consider the Cuban treasury may be able to pay without serious embarrassment.

Mr. SHERLEY. What amounts have been received under that authorization?

Mr. TAWNEY. None whatever, as I am advised by the officials of the War Department.

Mr. SHERLEY. The Federal Government is no longer in charge of the revenues of Cuba?

Mr. TAWNEY. No; the Federal Government is no longer in charge of the revenues of Cuba and has not been since some time in January last.

Mr. SHERLEY. And no effort was made while we were in charge to reimburse the Government for these extraordinary expenses?

Mr. TAWNEY. None that I know of.

Mr. SHERLEY. Does the gentleman know what prospect there is of ever getting this money back?

Mr. TAWNEY. I do not know of any prospect now unless the State Department should be authorized to negotiate with the Republic of Cuba for the purpose of securing a reimbursement some time in the future of all or part of this extraordinary expense.

Mr. SHERLEY. Will the gentleman permit the offering of an amendment to that effect on this bill?

Mr. TAWNEY. No; I will not. I could not permit the offering of an amendment of that kind. The matter was discussed hastily, not in the formal meeting of the committee, but by members of the committee, and there is a diversity of opinion among members of the committee themselves on the subject, and the amendments I have offered here are amendments on which there is no disagreement whatever. I would say to the House that the aggregate amount which we have expended on account of our intervention for the purpose of bringing about peace in the island of Cuba this last time is $6,102,956.

Mr. Speaker, we have another item of $5,458,000, which carries the deficiency appropriation for the Isthmian Canal. These deficiencies arise out of the fact that the commission is doing a great deal more work this year than it was estimated a year ago, when the estimates were submitted, would be accomplished. These four items aggregate $13,884,578, and, deducted from the total amount carried as a deficiency, leave a deficiency in all other departments and branches of the public service of $4,715,254. And that includes an item of over a million dollars that is not really chargeable as a deficiency. Five hundred and seventy-four thousand six hundred and eighty-six dollars of that remaining balance is awards of the Spanish Treaty Claims Commission, judgments of the Court of Claims, judgments in Indian depredation claims, judgments in United States courts, and audited accounts.

Another item is $500,000 for the collection of the customs revenues, and to supplement the permanent definite appropriation of $5,500,000 for that purpose.

So the real deficiencies are comparatively small. Mr. Speaker, one of the primary causes for the fact that legitimate deficiencies are so very small now is due to the fact that Congress enacted four years ago this winter the so-called "antideficiency law;" and this law has not only been of benefit in preventing the creation of deficiencies, but it has also been of benefit in restoring to Congress the power of fixing the standard of public expenditure in all the departments of the Government.

There is no disposition now on the part of the departments to begin the expenditure of their appropriations on the basis of their estimates and irrespective of the amounts which Congress has seen fit to allow. I say the law has, therefore, been not only of great benefit in the matter of keeping down deficiencies by compelling the departments to keep within their appropriations, but it has also resulted in giving the departments to understand, and they now understand, that it is the Congress of the United States and not the departments of this Government that fixes the standard of public expenditures. The actual deficiencies carried in this bill of $4,000,000 added to the amount carried in the urgent deficiency bill of a little over $800,000 make the total deficiencies for this fiscal year less than $5,000,000. I reserve the balance of my time.

Mr. LIVINGSTON. I yield ten minutes to the gentleman from New York [Mr. FITZGERALD].

Mr. FITZGERALD. Mr. Speaker, it is unfortunate that the difficulties of the Republican party make it necessary to use time in order to straighten out their troubles that should be used in the discussion of public business. This appropriation bill, carrying seventeen million five hundred thousand and some odd dollars, has many items in it which should receive serious consideration at the hands of this House. There is no real necessity for the passage of this bill at this time. It could easily wait until the next session and receive ample consideration. Unfortunately, however, there are some Members on that side of the House who believe that the rules of this House should receive some consideration and be changed in some respects. In order to prevent this growing revolt from assuming such proportions that would make success possible in the next House, it is now proposed to take the time that might have been devoted to this important measure to consider a report from the Committee on Rules that will amend in one trivial respect the rules of this House and so break the force of the revolt which is now impending. Since the exigency of the Republican party requires that this condition be met, and so time taken that otherwise would be devoted to this bill, let me at least call attention to a few items in this bill, without any hope of effect on the result when the vote is taken, but that all may know just what is being done.

On the 29th of December, 1906, the Government of the United States occupied Cuba with her military forces. Since that time, until of 1st of February of this year, the United States Government has kept a force of about 6,000 men in the island of Cuba. It has cost this Government a little over $6,000,000 to do so. Some time ago, when Congress realized what was being done, it provided that the President should receive from the treasury of Cuba whatever moneys might be necessary in order to reimburse this Government for its expenditures. That has not been done. Not a single dollar expended in the pacification of Cuba has been or will be reimbursed, although the revenues of Cuba were ample to have done so. I have a report of Governor Magoon, made under date of December 1, 1907, in which he shows that from September 29, 1906, the day of occupation, until October 31, 1907, one year, the revenues of the Republic of Cuba, in the control of this Government, were $54,867,000. The expenditures were about $39,000,000; so that there was a surplus of revenues of about $15,000,000. In 1908 the revenues were $25,466,000; the expenditures, $23,309,000. So that there were ample funds in the treasury of the Cuban Republic to have completely reimbursed this Government for its expenditures. That has not been done. We have given up possession, the money has been expended, and there is little reason to believe that reimbursement will ever be made.

There is another item in this bill to which I desire to call attention, a deficiency appropriation for the mint at Philadelphia. It is not really a deficiency in the appropriation, but the appropriation is made necessary because of the unauthorized diversion of the funds that were appropriated for the mint. Moneys appropriated for certain purposes and obligations under contract were taken under the direction of the President and paid to men who were employed to design the new gold coins, without authority of law, so far as I know, and without any appropriation having been made for it.

There are some other items here to which attention might be called. I might call attention to the generosity with which the great Committee on Ways and Means have been treated. They have a clerical force equivalent to the clerical force of the Committee on Appropriations. Ordinarily the Committee on Ways and Means is not called upon to do much work. They have a clerk at $3,000, an assistant clerk at $2,000, and another clerk at $1,500 a year, and a janitor at $1,000. Since the 10th of November last that committee has been engaged in laborious work on the tariff bill; and because of the additional work, because of work imposed upon it for the first time in ten years, the committee receives $10,000, not for additional clerks, but for additional compensation to their regular clerks and to some men who have been assigned to the committee for special work.

I regret that the political necessities of the Republican party, the situation that requires the fixing up of the troubles that exist among themselves, have made it necessary to bring this bill in under a motion to suspend the rules. I should like to test the House on some of these items. It is useless to point out many of them, but there are others to which the attention of the House could justly be called and which should receive the condemnation of the House. I will not do more than refer to one other item in the bill.

It is not a gracious thing, as a rule, to object to appropriations that are for the convenience or benefit of Members with whom we are closely associated; but in this bill is a provision that those Members of Congress who are now members of the Monetary Commission created in the last session of Congress, and who were unsuccessful in their attempts to be reelected to the House, should be continued as members of that commission with a salary equal to that which they received as Members of Congress. There is no limitation upon the life of the commission; there is no time fixed when this commission shall report; and three Members of Congress, two in this House and one in the other, who have rendered valuable services as Members of Congress, who have also undoubtedly rendered valuable services as members of this commission, are to be continued as members of the commission with a salary equivalent to that which they received for their services as Members of the House as well as members of the commission.

It is in no mean or captious spirit that I criticise this proceeding. It is not in harmony with what I believe to be proper legislation; and however pleasant my relations happen to be with those gentlemen who will be the beneficiaries of this provision, I do not feel that it should pass without being condemned. [Applause.]

Mr. LIVINGSTON. Mr. Speaker, I yield to the gentleman from Kentucky [Mr. SHERLEY] ten minutes.

Mr. SHERLEY. Mr. Speaker, ordinarily the Republican party can never be accused of any hesitancy in disregarding the rights of the minority or of the people in the discussion of a bill, but in this particular instance they have failed to take advantage of two things. They have permitted the reading of a bill that carries $17,000,000, and they are going to grant twenty minutes a side for discussion, notwithstanding the fact that no amendment can be offered and that both the reading of the bill and the discussion, so far as a change in the legislation is concerned, are a waste of time.

I do not believe that any condition can arise that warrants the passage of a bill of this kind under a suspension of the rules. Inasmuch as we are to have a special session of Congress shortly there is no great need, and it is an outrageous invasion of the rights of membership in this House to pass such a bill through it in this way. There are items here that are subject to points of order, items that could stand neither the test of the legislative rule nor the test of the common sense of this House, and that would be stricken out if an opportunity was given. Now, the gentleman from Minnesota felicitates himself and the House on the fact that there are less deficiencies this year than usual. The explanation is very simple. When we appropriate a billion dollars at each session, even the greed of the departments is more or less satisfied, and there is not much room left for deficiencies. But there is one deficiency here that I want to call attention to. Men talk about expenditures, and say, "Oh, well, expenses have to go on, and you can not correct them." Now there is a deficiency in this bill of $600,000 for the Department of Commerce and Labor. On its face it is apparently a deficiency in regard to the Immigration Service. In point of fact the major part of the deficiency has been caused by the extravagant expenditures of an immigration commission authorized by Congress.

That commission in a little over two years has spent or will have spent at the end of this fiscal year $450,140.02. No one has been informed of the items that go to make up that expenditure. The men who are members of that commission—Mem-

bers of Congress, Members of this House and the other—owe it to Congress and to themselves to give to the Congress statements as to these detailed expenditures.

Mr. BENNET of New York. Will the gentleman yield for a brief statement?

Mr. SHERLEY. I will yield for a question. I can not yield for a statement.

Mr. BENNET of New York. Very well.

Mr. SHERLEY. This expenditure, according to the testimony——

Mr. FINLEY. Will the gentleman yield?

Mr. SHERLEY. For a question.

Mr. FINLEY. Do I understand the gentleman to say that no itemized statement has ever been made?

Mr. SHERLEY. I did not say that; but if there has been any report made by that commission I am not aware of it.

Mr. FINLEY. I have no knowledge of the matter, and I am asking if that is the fact.

Mr. SHERLEY. If there has been a report by the commission, I hope some gentleman will correct me.

Mr. LIVINGSTON. There has been no report.

Mr. SHERLEY. Now, inside of two years to have an expenditure of over $400,000 for a commission of this kind requires an explanation. On its face it does not look right to me.

That is the way some of our money goes. Here is another provision which is going to authorize some more of it to go the same way. We created a monetary commission, and, as I now recall, there is no fixed life to that commission. There is no limit upon its expenditure. I am informed that its expenses have been moderate. I trust that is true. I find in this bill a provision that authorizes the payment to members of that commission, who after the 4th of March will cease to be Members of Congress, a salary of $7,500 a year.

Now, at present, these men who are performing work, both as Members of Congress and members of this commission, are receiving $7,500; but when all of their work as Members of Congress ceases, and when only their work as members of the commission continues, they are to receive the same salary of $7,500.

It is not pleasant, as my colleague says, to call attention to this matter. I have the highest respect for the members of that commission whose terms as Members of Congress are about to end, and I think their loss is a loss to the House; but that does not take from us the obligation to check this sort of expenditure. Not one of these gentlemen needs to be taken care of, and it is not proper that we should provide for the payment of such sums to a commission that may run along year after year.

I am also told personally that the commission will last but a short time. We were told that in regard to the Immigration Commission. It was said also of the Commission on Revision of the Laws, that existed for years and years and had to be finally stopped, after quite an effort, by an act of Congress. So I insist that we owe it to ourselves to prevent this sort of an expenditure. They may not be great in any particular case, although the immigration matter is a large matter; but in their aggregate they help to make up a very large sum, and there are enough legitimate expenditures of the Government to warrant us in curtailing all these unnecessary expenditures.

Now, we are deprived on this side of any opportunity of making a point of order against any of these provisions, or to move to strike them out, or to have any real discussion. We are required either to vote for the whole bill or to vote against the whole bill, and there has been no excuse given for forcing this parliamentary situation upon the House. To my mind it is unjustifiable in the extreme. I for one am not willing to lend my sanction to these two items that I have mentioned, or to several others in the bill that time forbids me to now discuss.

Mr. LIVINGSTON. Mr. Speaker, how much time have I remaining?

The SPEAKER. One minute and a half.

Mr. LIVINGSTON. Mr. Speaker, a matter has been referred to by the gentleman from Kentucky [Mr. SHERLEY] that needs a little explanation. It is a deficiency created in the Bureau of Immigration. This House and the Senate have passed four acts establishing immigration stations—one at Charleston, one at Mobile, one at New Orleans, and the other day, just a day or two ago, one at Boston. The comptroller holds that these are special appropriations and have the right of way over the absolute current expenditures in the bureau and in the department, and there is a large amount of money that has been diverted in that way from the head tax that should have gone to the support of the bureau, and the bureau is not to blame any more——

Mr. SHERLEY. I agree with the gentleman, Mr. Speaker, that the bureau had no control over the expenditure of the commission, unfortunately.

Mr. LIVINGSTON. But, Mr. Speaker, this House is to blame for such legislation. They have no use for an immigrant station in Boston, and some of these other places are just as impractical, and the House should blame itself for some of these deficiencies, and not put all onto the committee or on the bureau or on the department. We ought to take our medicine when it comes to us.

Mr. FITZGERALD. I want to ask the gentleman if it is not a fact that the bureau, with a force of inspectors necessary when the immigration fund amounted to $1,200,000, has maintained the same force when it has fallen off to about $600,000 a year?

Mr. LIVINGSTON. That is true; yes. They are anticipating the month of March for the tide of immigration to begin to flow in again, and, if that is true, they will have more money.

Mr. TAWNEY. Mr. Speaker, how much time have I remaining?

The SPEAKER. Thirteen minutes.

Mr. TAWNEY. I yield three minutes to the gentleman from New York [Mr. BENNET].

Mr. BENNET of New York. Mr. Speaker, the remarks of the gentleman from Kentucky [Mr. SHERLEY] in relation to the Immigration Commission were not founded on knowledge. Out of the head tax, under the operation of the law which limits the amount which can be paid into the immigrant fund to $2,500,000, there were paid into the Treasury of the United States, into the general fund, last year in excess of that sum $880,000, so that really after this $600,000 item in the bill is deducted there would still be a surplus in the Treasury on account of these matters of $288,000, plus. Furthermore, the gentleman charges all the deficiencies to the Immigration Commission. I desire to indorse emphatically what the gentleman from Georgia [Mr. LIVINGSTON] has said about other expenditures.

We authorized a building at Charleston for $70,000, at New Orleans for $70,000, at Galveston for $70,000, at Philadelphia for $250,000, at Boston for $250,000, and in New York City, where 75 per cent of the immigration comes through, very properly and rightly, the Committee on Appropriations has reported out appropriations aggregating in the last two Congresses over one million and a half of dollars for buildings, every one of which was needed. Besides those appropriations the sum spent by the commission cuts a very small figure. The gentleman says that we ought to file a statement. Three hours ago the statement which he desired was filed in the Senate of the United States, and I now ask unanimous consent, Mr. Speaker, to present to this House for printing as a document a statement to Congress relative to the work and expenditures of the Immigration Commission, with a financial statement.

Mr. SHERLEY. Was not that report filed in the Senate as a result of a resolution of the Senate calling for it?

Mr. BENNET of New York. It was not. This is a report to Congress.

The SPEAKER. The gentleman from New York asks unanimous consent to have printed as a document (H. Doc. No. 1489) the report to which he refers. Is there objection?

There was no objection.

Mr. TAWNEY. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. VREELAND].

Mr. VREELAND. Mr. Speaker, both the gentleman from New York [Mr. FITZGERALD] and the gentleman from Kentucky [Mr. SHERLEY], members of the committee, have referred to an item in this bill relating to the Monetary Commission. This item and its purpose was fully explained to each of these gentlemen. I had hoped that they would take a broader view of the necessity for it than that it was simply seeking an opportunity to pay a salary to several distinguished gentlemen. A year and a half ago, Mr. Speaker, we had a panic in the United States—a monetary panic. As the result of that there was a paralysis of business, millions of men were turned out of employment, untold suffering came to the American people, which to some extent still exists to-day. The effects of it will still be felt for years to come.

The Congress of the United States passed a temporary measure designed to prevent a currency famine in the future, but it limited the life of that law to May, 1914, and appointed a commission to take up and study the whole subject, for the purpose of preventing in the future monetary panics such as have prevailed in the past. A commission was appointed consisting of nine Members of the House and nine Members of the Senate. They have put in a year of study, constant work in the study of this question, in the collection of information and statistics and

data relating both to our own experience and to the experience of the other great commercial nations. Mr. Speaker, I will ask unanimous consent to insert as a part of my remarks a pamphlet prepared by the commission, showing the extensive field of investigation into which it has entered.

I ask unanimous consent, Mr. Speaker, to file that as a part of my remarks, for the information of the House.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. VREELAND. Mr. Speaker, I think that any gentleman who looks that over and carefully examines the field which this commission is attempting to cover will say that if no other result comes from their efforts they will have at least accumulated the most exhaustive fund of information in reference to financial and currency matters that has ever been collected together. Now, at the end of a year's work we find that three members of this commission are going out of Congress—Senator TELLER, in the Senate; Representative OVERSTREET and Representative BONYNGE, in the House.

We confidently expect that we will be prepared to report to this Congress and recommend legislation which we shall ask to have enacted into law at least a year from this time, somewhere in March or April of the long session of Congress of next year. That is our hope and our expectation, that we will be able to conclude our investigation and make a report to be passed at that time. Now, any gentleman who examines the work that has been gone over by this commission and by those gentlemen who have taken an important part in it will understand that any new men coming upon that commission would be almost worthless in the pursuance of its labors. Senator KNOX is a member of that commission. He goes into the State Department, and we asked him to remain as a member of the commission, and he consented to place his great legal knowledge at the disposition of the commission. Representative THEODORE E. BURTON is going to the Upper House as a Senator from the State of Ohio.

This act will remove any doubt as to his standing as a member of the commission; so that the House will readily see that it would disarrange the work of this commission to have those men who have taken so active and important a part in this year's investigation go out and the Congress and the committee lose the knowledge of the work which they have gained in that time. This simply means that those two distinguished gentlemen of the House and Senator TELLER in the Senate will remain on for another year, and during that time they shall continue to draw the pay of a Member of Congress.

Mr. OLLIE M. JAMES. May I ask the gentleman a question? How much has this commission expended?

Mr. VREELAND. I am unable to state to the gentleman, but it has had no expenses except traveling expenses and to pay the employment of some experts who are preparing specific items in this work.

The SPEAKER. The time of the gentleman from New York has expired.

Mr. OLLIE M. JAMES. But the amount that could be expended is unlimited.

Mr. VREELAND. I suppose it is.

List of conferences in London, Paris, and Berlin held by representatives of the National Monetary Commission, and of papers and statistics to be prepared for the commission.

EUROPEAN CONFERENCES HELD BY REPRESENTATIVES OF THE NATIONAL MONETARY COMMISSION.

CONFERENCES IN LONDON, 1908.

August 12. Parr's Bank (Limited), London, Mr. R. W. Whalley, general manager. Union Discount Company, London, Mr. Christopher R. Nugent, manager; Prof. Herbert S. Foxwell.

August 13. London City and Midland Bank, Mr. Edward H. Holden, M. P., managing director. National Provincial Bank of England, Mr. R. T. Haines, general manager; Sir George Murray, K. C. B., permanent secretary of the treasury.

August 14. The Statist, London, Mr. George Paish, editor.

August 15. Parr's Bank (Limited), Mr. R. W. Whalley, general manager; Bank of England, Mr. W. Middleton Campbell, governor; Mr. Frederick Huth Jackson, director; Mr. Alfred C. Cole, director; Mr. Edward C. Grenfell, director.

August 17. London City and Midland Bank, Mr. Edward H. Holden; Bank of England, Mr. H. W. Search, discount officer; London and Westminster Bank (Limited), Mr. T. J. Russell and Mr. Edward Clifton Brown.

August 18. Baring Bros. & Co., London, Mr. Gaspard Farrer. Hongkong and Shanghai Banking Corporation, Mr. C. S. Addis, manager in London.

August 19. Bank of England, Mr. Frederick Huth Jackson, Mr. Alfred C. Cole; Munroe & Co., Mr. F. de Reiset, 7 Rue Scribe, Paris; Bank of Liverpool, Mr. James H. Simpson, general manager.

August 20. Swiss Bankverein, London, Mr. Leon Rueff, managing director; Mr. L. Joseph, submanager.

CONFERENCES IN BERLIN.

August 26. Deutsche Bank, Dr. Paul Mankiewitz, director.

August 27. Deutsche Bank, Dr. Paul Mankiewitz, director; Reichsbank, Doctor von Glasenapp, vice-president; Doctor von Lumm, director.

August 28. Reichsbank, Doctor von Glasenapp, vice-president; Doctor von Lumm, director.

August 29. Dresdner Bank, Herren Schuster & Nathan, directors.

August 31. Dresdner Bank, Herren Schuster & Nathan, directors; Reichsbank, Doctor von Glasenapp, vice-president; Doctor von Lumm, director.

September 1. Deutsche Bank, Dr. Paul Mankiewitz, director.

September 2. Reichsbank, Doctor von Lumm, director; Dresdner Bank, Herren Schuster & Nathan, directors.

September 4. Schulze-Delitsch Genossenchaften, Herr Kleemann, director.

September 7. Preussische Central Genossenschafts-Kasse, Geheimrat Hessberger et al.; Berliner Kassen Verein, Herr Hoppenstedt.

September 8. Preussische Central Bodenkredit Actien Gesellschaft, geh. Regierungsrat von Klitzing.

September 9. Preussische Central Genossenschafts-Kasse, Geheimrat Hessberger et al.; Pfandbrief Bank, Kommerzienrat Dannanbaum.

September 10. Royal Seehandlung, Geheimer Oberfinanzrat Littner, vice-president.

September 11. Kur- und Neumarkisches Ritterschaftliches Kredit-Institut, Geheimrat Heintze, president; Neues Brandenburgischer Kredit Institut and Kur- und Neumarkische Ritterschaftliche Darlehns Kasse.

September 14. Berliner Handels Gesellschaft, Doctor Mosler; Disconto Gesellschaft, Doctor Salomonsohn.

September 15. Von Mendelssohn & Co., Herr Franz von Mendelssohn; S. Bleichroeder, Doctor von Schwabach.

September 16. Berliner Sparkasse, Stadtrat, Herr Emil Gehricke, president.

September 18. Disconto Gesellschaft, Doctor Salomonsohn.

CONFERENCES IN PARIS.

August 24 and September 26. Banque de France, M. Pallain, gouverneur.

August 25. Crédit Lyonnais, Baron Brincard, administrator.

September 29. Crédit Lyonnais, M. Lefevre, chef des études financières; Comptoir D'Escompte, M. Ullmann, directeur.

October 1. Crédit Lyonnais, M. Lefevre.

October 2. Crédit Agricole, M. Decharme, chef du service du crédit mutuel et de la coopération agricoles; Crédit Foncier, M. Touchard, secrétaire général.

October 3. Crédit Lyonnais, M. Lefevre.

October 5. Caisse des Dépôts et Consignations, M. Delatour, directeur-général.

October 6. Mouvement des Fonds (ministère des finances), M. Sergent, chef; Caisses d'Epargne, M. Georges Paulet, directeur de l'assurance et de la prévoyance sociales, au ministère du travail.

October 7. Banque de Paris et des Pays-Bas, M. Moret, directeur; Banque de France, M. Pallain, gouverneur.

ADDITIONAL CONFERENCES IN LONDON.

October 12. Lord Swaythling; London Joint Stock Bank, Mr. Charles Gow, manager.

October 13. The Union of London and Smith's Bank, Sir Felix Schuster, governor.

ENGLAND.

Reports to be prepared in England.

Prof. H. S. Foxwell, lecturer in the London School of Economics, 1 Harvey road, Cambridge, will prepare a history of banking in England, to include the Bank of England, joint-stock banks, private and merchant bankers, and any other institutions engaged in commercial banking.

H. Withers, financial editor of the London Times, 15 Copthall avenue, London, E. C., will prepare a study of banking practice in England and Scotland, including an account of the London Stock Exchange. (See later pages for details.)

Francis W. Hirst, editor of the Economist, 3 Arundel street, Strand, London, E. C., will prepare a paper upon the growth of the public debts of England, France, and Germany during the last thirty-five years, including national, provincial, municipal, and all publicly guaranteed obligations (e. g., of railroads), to contain some analysis of the budgets of the countries concerned.

George Paish, editor of the Statist, 51 Cannon street, London, E. C., will prepare a paper on the balance of trade and indebtedness between America and England.

Robert Martin Holland, honorable secretary of the clearing house, Post-Office Court, Lombard street, E. C., will prepare an account of the clearing system in London and other cities of the United Kingdom.

Ernest Sykes, of the Central Bankers' Association and of the Institute of Bankers, 34 Clements lane, London, E. C., will prepare a brief statement of the objects and history of these institutions.

ENGLISH STATISTICS.

R. H. I. Palgrave, F. R. S., Henstead Hall, Wrentham, Suffolk, will prepare statistics for the Bank of England since 1844. (See later pages for details.)

Francis W. Hirst, of the Economist, 3 Arundel street, Strand, London, will prepare statistics for the joint-stock and other banks during the last thirty years; as to British exports and imports of gold and rates of international exchange for the last fifty years; as to the growth of population, business, wealth, and commerce of Great Britain since 1867; as to the money supply of Great Britain at intervals since 1844; and also as to the growth of debts, national, provincial, municipal, and changes in the national budgets since 1870 in Great Britain, France, and Germany. (See later pages for details.)

H. W. Search, head of the discount department of the Bank of England, has prepared statistics of the rates for discounts, loans, and deposits of the joint-stock and other banks in London, provincial cities, and country towns for the past twenty years.

R. W. Whalley, of Parr's Bank, 4 Bartholomew lane, London, E. C., will secure information regarding proportion of checks or cash in his bank (metropolitan offices, provincial and country branches being separated).

GERMANY.

Provisional list of books and articles upon German banks to be translated.

I. THE REICHSBANK.

The law of 1875, with amendments and comments as given by R. Koch: Die Reichsgesetzgebung Über Münz-und-Notenbankwesen, Berlin, 1905, pages 1–43, 129–267, Allgemeine Bestimmungen über den Ge-

schäftsverkehr mit der Reichsbank, pages 44–133; also law of February 20, 1906.

Dr. Carl Melchior: Article (to be prepared) upon the kinds and forms of corporations, and upon methods of remunerating directors.

German statistics.

Doctor Wittner and Doctor Breslauer, of the Centralverband des Deutschen Bank- und Bankiergewerbes, 7 Dorotheenstr. 3 II, Berlin, will prepare statistics of the Reichsbank, of the money supply of Germany, the exports and imports of gold, the rates of international exchange, the published rates of discount and deposit in different parts of the country, the growth of population, business, wealth, and commerce, statistics also of the Kreditgenossenschaften and the savings banks. (See later pages for details.)

Robert Franz, of the Deutsche Oekonomist, Burgstrasse 3, Berlin, C. 2, will prepare statistics of the joint-stock and other banks for the past twenty years, of the Hypothekenbanken and Landschaften. (See later pages for details.)

The president of the Reichsbank, Excellenz Havenstein, has furnished statistics of rates of discount and deposit throughout Germany corresponding to the figures collected by Mr. Search in England.

Geh. Kommerzienrat E. Jacob, of the Verein Berliner Kaufleute und Industrieller, Jägerstr. 22, Berlin, has been asked to collect data with regard to the relative use of coin, bank notes, and credit instruments, such as checks, drafts, money orders, among the different firms connected with that organization in Berlin.

ADDRESSES.

Doctor Wittner and Doctor Breslauer p. adr., Centralverband des Deutschen Bank und Bankiergewerbes, 7 Dorotheenstr. 3 II, Berlin.

Geh. Justizrat Doctor Riesser, Lichenstein-Allée 4, Berlin.

Geh. Regierungsrat Prof. Johannes Conrad, 13 Muhlweg, Halle a. d. S.

Doctor Whittaker, Wilhelmstrasse 98, Berlitz School, Berlin (translator of Jubiläumschrift).

H. L. Lutz, 49 Wendell street, Cambridge, Mass. (translator of other German material).

Dr. Carl Melchior, 75 Ferdinandstrasse, Hamburg.

FRANCE.

Monographs to be prepared in France.

André Liesse, professeur au Conservatoire National des Arts et Métiers (18 Rue Denfert-Rochereau), Paris, will prepare a history of banking in France to include the Banque de France, the Sociétés de Crédit, the local banks, the Crédit Foncier, and the Crédit Agricole, showing their evolution in form and policy and their interrelations during the past century, with critical opinions as to their relations with the Government, the policies pursued, and the services rendered by them to different classes.

Albert Aupetit, chef du service administratif et des études économiques de la Banque de France, will prepare a study of banking practices in France, showing the distinctive functions of each class of banks and differentiating the character of the business done by the several classes of institutions in Paris, in the large departmental cities and in rural communities, showing also the provisions of law or custom governing their organization, capital, reserve, liabilities of stockholders, officers, and directors, their methods of supervision and inspection, and the nature and extent of returns required or published. The account will portray the general nature of the business done, including the character of the deposits and of current accounts, with the usual rates of interest, if any, paid on both, and a statement of any charges upon the turnover, including the general character of bills discounted, loans, advances to customers, cash credits, and acceptances, with the usual rates charged for each.

It should include an explanation of all terms appearing in the ordinary reports of banks. It should also include a statement as to the use of checks, crossed checks, etc., a description of the organization and methods employed in the Paris chambre de compensation, with a statement as to the kinds of devices which are cleared; also a statement as to the number and aggregate transactions of the other chambres de compensation in France, and a description of the methods of making payments at a distance. There should also be included a description of any organizations or associations of banks other than clearing houses existing either in Paris or elsewhere in France.

Finally, the paper should present in appendices the text of the principal statutes governing the operations of the various classes of banks.

The study is to include the Bank of France, the Sociétés de Crédit, the local banks, the Crédit Foncier, the Crédit Agricole, the Caisse des Dépôts et Consignations, and the Caisses d'Epargne ordinaires and the Caisse d'Epargne Nationale.

Alfred Neymarck, editor of Le Rentier, 33 Rue St. Augustin, ancien président de la Société de Statistique de Paris, will prepare a paper upon savings in France, under the following heads:

1. The formation and development of saving in France.
2. The ordinary savings banks and the postal savings banks.
3. French and foreign securities; their distribution in France and abroad.
4. The influence of security investment upon the rate of discount, upon the banks, their deposits, their reserves, etc.

E. Vidal, editor of La Cote de la Banque et de la Bourse, 1–3 Place de la Bourse, will prepare an account of the history and method of the Paris Bourse, its regulations, whether of law or custom, regarding its organization, conditions of membership, kinds of business done, methods of listing, machinery of settlement, etc.

French statistics.

Albert Aupetit, chef des études économiques, Banque de France, rue la Vrillière, Paris, will collect the statements of the Bank of France since 1875, with tables of rates of interest charged, and the published market rates of discount, statistics of exports and imports of gold, of the rates of international exchange, of the money supply of France, and of the proportion of money and money substitutes in trade. (See later pages for details.)

M. Lefevre, chef des études financières, Crédit Lyonnais, Boulevard des Italiens, Paris, will collect statistics of the Sociétés de Crédit and other banks for the last twenty years, of the Crédit Foncier, of the Crédit Agricole, of the Caisses d'Epargne, and statistics showing the growth of population, business, wealth, and commerce in France. (See later pages for details.)

The governor of the Bank of France, M. Georges Pallain, has been asked to furnish statistics of rates of discount and deposit throughout France corresponding to the figures collected by Mr. Search for Great Britain.

English statistics.

[Statistics to be prepared by R. H. I. Palgrave, F. R. S., Henstead Hall, Wrentham, Suffolk.]

BANK OF ENGLAND STATEMENTS.

To include both issue and banking departments, stated separately—

1. For period since 1844, grouped in annual and decennial averages.
2. For last twenty years, weekly (omitting last five figures).
3. These should also state in each case percentage of reserve (gold, silver, and notes) in banking department to total deposit liabilities.
4. Also annual amount of dividends paid.
5. Average weekly fluctuations for the twenty years (1887–1907) of—
   a. Notes issued.
   b. Notes held by the public.
   c. Bank's reserves.
   d. Public deposits.

TABLE OF BANK OF ENGLAND RATES SINCE 1844.

1. Average rate for annual and decennial periods.
2. Maximum and minimum rates for each year.
3. Number of changes each year.
4. For twenty years (1887–1907) table showing date and character of all changes.

NOTE ISSUES.

a. By Bank of England (as above).
b. By other banks of issue in England and Wales.
c. By banks in Scotland.
d. By banks in Ireland.

1. Annual and decennial averages since 1844 with per capita amounts at decennial periods.
2. Four-weekly statements for last twenty years.
3. Average four-weekly fluctuations for these twenty years.

[Statistics to be prepared by the Economist, Granville House, 3 Arundel street, Strand. Francis W. Hirst, editor, 27 Campden Hill Square, London, W.]

JOINT-STOCK AND OTHER BANKS.

These should be stated separately, to include (*a*) London clearing-house banks, (*b*) other joint-stock banks in England and Wales, (*c*) private banks and merchant bankers who make reports, (*d*) Scotch banks, (*e*) Irish banks, (*f*) foreign and colonial banks doing business in England, as to their English business.

Statements of joint-stock and other banks and bankers should include, as far as possible, the following:

a. The name of the bank or banking house.
b. Number of branches.
c. Subscribed capital.
d. Paid-up capital and reserve fund.
e. Reserve liability of shareholders.
f. Number of shareholders.
g. Cash on hand and at Bank of England (where possible these to be separately stated).
h. Percentage of same to deposit liabilities.
i. Money at call and short notice.
j. Percentage of same to deposit liabilities.
k. Government and other securities.
l. Percentage of same to deposit liabilities.
m. Deposits.
n. Bills discounted.
o. Loans and advances.
p. Percentage of capital and reserve fund to other liabilities.
q. Dividend rate per cent paid last year.
r. Number of reports per year.

CONSOLIDATED STATEMENTS ANNUALLY FOR ALL BANKS FOR TWENTY YEARS.

1. Bank of England.
2. Other banks in England and Wales—
   a. London Clearing-House banks.
   b. Other joint-stock banks in England and Wales.
   c. Private banks and merchant bankers who make reports.
   d. Total for banks of England and Wales.
3. Scotch banks.
4. Irish banks.
5. Foreign and colonial banks doing business in England, as to their English business.
6. Total United Kingdom.

Figures to be given for the following items:

a. Number of banks.
b. Number of branches.
c. Number of inhabitants to each bank and branch.
d. Subscribed capital.
e. Paid-up capital and reserve funds.
f. Reserve liability of shareholders.
g. Deposits.
h. Cash on hand and at Bank of England; percentage of same to deposit liabilities.
i. Money at call and short notice; percentage of same to deposit liabilities.
j. Investments in securities.
k. Discounts, loans, and advances.
l. Percentage of capital and reserve fund to other liabilities.
m. Dividends.

GOLD MOVEMENTS.

Exports and imports of gold—
a. From Great Britain to and from various countries, for annual and decennial periods since 1857.
b. Weekly shipments and receipts for last ten years.
c. Monthly for twenty years.

RATES OF INTERNATIONAL EXCHANGE.

Quoted rates for sight exchange for same time as above (weekly for last ten years, monthly for last twenty years) between—
a. London and New York.
b. London and Paris.
c. London and Berlin.

GROWTH OF POPULATION, BUSINESS, WEALTH, AND COMMERCE.

For annual and decennial periods since 1867 for Great Britain, as shown by—
a. Population.
b. Foreign commerce (exports and imports).
c. Registered tonnage.
d. Amount of bank capital and reserve fund.
e. Bank deposits.
f. Postal, trustee, or other savings banks deposits.
g. Banks clearing-house transactions.
h. Home consumption of tea and sugar.
i. Amount of public revenues.
k. Amount of iron and steel production.
l. Transportation statistics, including gross earnings of railways and number of tons of freight carried 1 mile.
m. Growth in wealth as shown by income-tax returns yield per penny.
n. Total ratable value of lands and houses.
o. Any other available statistics showing industrial growth.
All the above should show also per capita growth.

PROPORTIONS OF MONEY AND MONEY SUBSTITUTES IN TRADE.

Statistics as to the relative use of coin, bank notes, and credit instruments, such as checks, drafts, money orders, etc., as shown by the receipts on a given day of several department stores and several shops in London, in some large provincial cities, and in one or two country towns.

QUOTED MARKET RATES.

The published rates for twenty years, for thirty days and six months' bills, for money on call, and the deposit rates of banks and discount houses, as published in the Economist.

MONEY SUPPLY OF THE UNITED KINGDOM.

1. Total supply of gold at periodic intervals since 1844:
2. Per capita supply of gold at same dates.
3. Total supply of notes at same dates.
4. Per capita of notes at same dates.
5. Percentage of gold supply to total note issue at same dates.
6. Percentage of gold supply to aggregate of notes and deposits.
7. Such figures as can be obtained showing the amount of gold and notes in the banks and in the hands of the people.
8. Amount of silver in circulation.
9. Per capita amount of silver in circulation.

The Economist will endeavor to supplement the figures collected by the deputy master of the mint, with regard to the gold and silver holdings of the banks, by figures especially collected showing the amount of notes held by them, for the purpose of finding the total amount of actual money held by the banks.

GROWTH OF PUBLIC DEBTS IN ENGLAND, FRANCE, AND GERMANY.

To include national, provincial, and municipal debts and all obligations guaranteed by the public, such as railroad bonds and the like.

NATIONAL BUDGETS OF ENGLAND, FRANCE, AND GERMANY.

a. Totals to be presented at intervals of five years during the last four decades.
b. Comparative analysis and classification of revenues and expenses in the budgets of the three countries for the last year available.

German statistics.

[Statistics to be prepared by Dr. Max Wittner and Doctor Breslauer, of the Centralverband des Deutschen Bank und Bankiergewerbes, 3 Dorotheenstrasse, Berlin.]

REICHSBANK STATEMENTS.

1. For period since 1875, grouped in annual and decennial averages.
2. For last twenty years, weekly (omitting last five figures).
3. These should also state in each case percentage of reserve (gold, silver, and Reichskassenscheine):
   a. To note issue.
   b. To notes and deposits.
4. Also annual rate of dividends paid to stockholders and to Government.
5. Average weekly fluctuations for the twenty years (1887–1907) of—
   a. Notes held by the public.
   b. Banks' reserves (coin, bullion, Reichskassenscheine).

TABLE OF REICHSBANK RATES SINCE 1875.

1. Average rate for annual and decennial periods.
2. Maximum and minimum rates for each year.
3. Number of changes each year.
4. For twenty years (1887–1907), table showing date and character of all changes.

NOTE ISSUES.

a. By Reichsbank (as above).
b. By other banks of issue in Germany.
1. Annual and decennial averages since 1875, with per capita amounts at decennial periods.
2. Monthly statements for last twenty years.
3. Average monthly fluctuations for these twenty years.

QUOTED MARKET RATES.

The published rates of the Reichsbank during twenty years, for thirty days and three months' bills, for money on call, for Lombards thirty days, and the private discount rate for the same period in Berlin, in leading provincial cities, and in country towns covering thirty, sixty, ninety, and one hundred and twenty day bills, money on call, on thirty-day Lombards, on advances to customers and on overdrafts, also rates paid on deposits (in so far as these can be obtained).

MONEY SUPPLY OF GERMANY.

1. Total supply of gold at periodic intervals since 1871.
2. Per capita supply of gold at periodic intervals since 1871.
3. Total supply of notes at same dates.
4. Per capita supply of notes at same dates.
5. Percentage of gold supply to total note issue at same dates.
6. Percentage of gold supply to aggregate of notes and deposits.
7. Such figures as can be obtained showing the amount of gold and notes in the banks and in the hands of the people.
8. Amount of silver in circulation.
9. Per capita amount of silver in circulation.

GOLD MOVEMENTS.

Exports and imports of gold—
a. From Germany to and from various countries for annual and decennial periods since 1871.
b. Monthly shipments and receipts for last twenty years.

RATES OF INTERNATIONAL EXCHANGE.

Quoted rates for sight exchange (weekly for last ten years, monthly for last twenty years) between—
a. Berlin and New York.
b. London and Berlin.
c. Paris and Berlin.

GROWTH OF POPULATION, BUSINESS, WEALTH, AND COMMERCE.

For annual and decennial periods since 1871 for Germany, as shown by—
a. Population.
b. Foreign commerce (exports and imports).
c. Registered tonnage.
d. Amount of bank capital and reserve funds.
e. Bank deposits.
f. Savings banks deposits.
g. Bank clearing-house transactions.
h. Home consumption of coffee, sugar, and beer.
i. Amount of public revenues.
k. Amount of iron and steel production.
l. Transportation statistics, including gross earnings of railways and number of tons of freight carried 1 mile.
m. Growth of wealth in Prussia as shown by income-tax returns.
n. Total ratable value of lands and houses.
o. Any other available statistics showing industrial growth.
All the above should show also per capita growth.

KREDITGENOSSENSCHAFTEN.

1. Number of Kreditgenossenschaften and Centralverbände in the Empire.
2. Number of members.
3. Classification of Kreditgenossenschaften according to limitation of liability, with number of members in each group.
4. Extent of members' balances.
5. Extent of reserves.
6. Extent of outside deposits.
7. Kinds and amounts of credit extended (discounts, current accounts, etc.), and other investments.
8. Rates of interest and of discount.
9. Classification of Kreditgenossenschaften as Schultze-Delitsch Raiffeisen, and Haas, and activities of each group, according to above scheme.

SAVINGS BANKS IN PRUSSIA AND IN EMPIRE, WHERE POSSIBLE.

1. Number of institutions.
2. Number of depositors.
3. Proportion of depositors to population.
4. Amount of deposits at the end of each year.
5. Proportion of deposits to depositors and to the total population.
6. Amount of yearly additions to deposits.
7. Amount of yearly withdrawals.
8. Rates of interest paid upon deposits.
9. Classification of investments of savings bank funds.

Above figures to be given for period from 1870 to 1907, and to be divided between city and community savings banks.

[Statistics to be prepared by Dr. Robert Franz, of the Deutsche Oekonomist, Burgstrasse 3, Berlin. C. 2.]

JOINT-STOCK AND OTHER BANKS.

These should be stated separately, to include—
a. Joint-stock banks in Germany.
b. Other banks and bankers who make reports.
c. Foreign and colonial banks doing business in Germany, as to their German business.

Statements of joint-stock and other banks and bankers should include, as far as possible, the following:

a. The name of the bank or banking house.
b. Number of branches (not including agencies).
c. Subscribed capital.
d. Paid-up capital and reserve funds.
e. Reserve liability of shareholders.
f. Number of shareholders.
g. Cash on hand and at Reichsbank (where possible these to be separately stated).
h. Percentage of same to deposit liabilities.
i. Money at call and short notice.
j. Percentage of same to deposit liabilities.
k. Government and other securities.
l. Percentage of same to capital and reserve fund.
m. Deposits and acceptances (stated separately when possible).
n. Bills discounted.
o. Loans and advances.
p. Percentage of capital and reserve fund to other liabilities.
q. Dividends, rate per cent paid last year.
r. Number of statements per year.
s. Syndicate interests and amount invested in the capital of other banks or bankers (stated separately where possible).

CONSOLIDATED STATEMENTS ANNUALLY FOR ALL BANKS FOR TWENTY YEARS.

1. Reichsbank.
2. All joint-stock banks in Germany.
3. Other banks and bankers who make reports.
4. Total for banks of Germany (not including foreign and colonial).
5. Foreign and colonial banks doing business in Germany, as to their German business.
6. Total of German banks.

Figures to be given for the following items:
a. Number of banks.
b. Number of branches.
c. Number of inhabitants to each bank and branch.
d. Subscribed capital.
e. Paid-up capital and reserve funds.
f. Reserve liability of shareholders.
g. Deposits and acceptances (stated separately when possible).
h. Cash on hand and at Reichsbank. Percentage of same to deposit liabilities.
i. Money at call and short notice. Percentage of same to deposit liabilities.
j. Investments in securities.
k. Discounts, loans, and advances.
l. Percentage of capital and reserve funds to other liabilities.
m. Dividends.
n. Syndicate interests and amount invested in the capital of other banks and bankers.

HYPOTHEKENBANKEN AND LANDSCHAFTEN.

Statements should be made for each institution separately for the most recent date available.

Consolidated statements for all institutions taken together should be given annually for twenty years. To include—
a. Number of banks.
b. Number of branches.
c. Subscribed capital.
d. Paid-up capital.
e. Reserve liability of shareholders.
f. Surplus.
g. Total capital and surplus.
h. Mortgage bonds issued.
i. Communal bonds issued.
*i*². Small railway bonds.
j. Deposits.
k. Acceptances.
l. Credit accounts.
m. Covering mortgages.
n. Free mortgages.
o. Communal loans.
p. Small railway loans.
q. Cash on hand and at the bank.
r. Discounts.
s. Securities.
t. Advances on collateral.
u. Deposits with other banks.
v. Amount of dividend.
w. Percentage of dividend.
x. Average size and average duration of mortgages.

French statistics.

[Statistics to be prepared by Albert Aupetit, Chief des Études Économiques de la Banque de France (Rue la Vrillière).]

STATEMENTS OF THE BANQUE DE FRANCE.

1. For period since 1875, grouped in annual and decennial averages.
2. For last twenty years, weekly (omitting last five figures).
3. These should also state in each case percentage of reserve (gold and silver) to (a) note issue, (b) notes and deposits.
4. Also annual rate of dividends paid to stockholders and percentage of capital paid to Government.
5. Average weekly fluctuations for the twenty years (1887 to 1907) of (a) notes held by the public, (b) bank reserves (coin and bullion).

TABLE OF RATES OF INTEREST SINCE 1875.

1. Average rate for annual and decennial periods.
2. Maximum and minimum rates for each year.
3. Number of changes each year.
4. For twenty years, 1887 to 1907, table showing date and character of all changes.

NOTE ISSUES.

1. Annual and decennial averages since 1875, with per capita amounts at decennial periods.
2. Monthly statements for the last twenty years.
3. Average monthly fluctuations for these twenty years.

MARKET RATES OF DISCOUNT.

Rates of the Banque de France during twenty years for thirty-days and three-months bills, for money on call, for thirty-day Lombards, and the rate in other institutions of credit during the same period in Paris, in the leading provincial cities, and in country towns, covering thirty, sixty, ninety, and one hundred and twenty day bills, money on call, on thirty-day advances upon security, and on overdrafts, as well as rates paid on deposits.

GOLD MOVEMENTS.

a. Exports and imports between France and various important countries for annual and decennial periods since 1871.
b. Monthly shipments and receipts for last twenty years.

RATES OF INTERNATIONAL EXCHANGE.

Quoted rates for sight exchange weekly for last ten years, monthly for last twenty years, between—
a. Paris and New York.
b. Paris and London.
c. Paris and Berlin.

MONEY SUPPLY OF FRANCE.

1. Estimated supply of gold at periodic intervals since 1871.
2. Per capita supply of gold at same intervals since 1871.
3. Quantity of notes issued at same date.
4. Per capita amount of notes issued at same date.
5. Percentage of gold supply to total note issue at same dates.
6. Percentage of gold supply to aggregate of notes and deposits.
7. Any figures obtainable showing amount of gold and notes in the banks and in the hands of the people.
8. Amount of silver in circulation.
9. Per capita amount of silver in circulation.

PROPORTION OF MONEY SUBSTITUTES IN TRADE.

Statistics as to the relative use of coin, bank notes, and credit instruments, such as checks, drafts, money orders, etc., as shown by the receipts on a given day from large banks or credit institutions, several department stores, and shops in Paris, in some large provincial cities, and in one or two country towns.

[Statistics to be prepared by Mr. Lefevre of the Études Financières du Crédit Lyonnais, Boulevard des Italiens.]

SOCIÉTÉS DE CRÉDIT AND ALL OTHER BANKS MAKING REPORTS.

The following items from the last annual statement should be given:
a. The name of the institution.
b. Number of branches (not including agencies).
c. Subscribed capital.
d. Paid-up capital and reserve funds.
e. Reserve liability of shareholders.
f. Number of shareholders (where possible).
g. Cash on hand and at the Bank of France.
h. Percentage of same to deposit liabilities.
i. Money at call and short notice.
j. Percentage of same to deposit liabilities.
k. Government and other securities.
l. Percentage of same to capital and reserve funds.
m. Deposits and acceptances, stated separately when possible.
n. Bills discounted.
o. Loans and advances.
p. Percentage of capital and reserve fund to other liabilities.
q. Dividends, rate per cent paid last year.
r. Number of statements per year.
s. Syndicate interests and participations, with amount invested in the capital of other banks, stated separately where possible.

CONSOLIDATED STATEMENTS ANNUALLY FOR ALL BANKS FOR TWENTY YEARS.

Separate groupings to be made for (1) Bank of France; (2) the Sociétés de Crédit; (3) all other banks making reports; (4) total of all banks in France. The figures should include the following items:
a. Number of banks.
b. Number of branches.
c. Number of inhabitants to each bank and branch.
d. Subscribed capital.
e. Paid-up capital and reserve funds.
f. Reserve liability of shareholders.
g. Deposits and acceptances, stated separately where possible.
h. Cash on hand and at Bank of France.
i. Percentage of same to deposit liabilities.
k. Money at call and at short notice.
l. Percentage of same to deposit liabilities.
m. Investments in securities.
n. Discounts, loans, and advances.
o. Percentage of capital and reserve funds to other liabilities.
p. Dividends.
q. Syndicate interests and participations in the capital of other institutions.

CRÉDIT FONCIER.

a. Number of branches.
b. Subscribed capital.
c. Paid-up capital.
d. Reserve liability of shareholders.
e. Surplus.
f. Total capital and surplus.
g. Mortgage bonds issued.
h. Communal bonds issued.
i. Deposits and current accounts.
j. Acceptances.
k. Amount of mortgages taken.
l. Average size of mortgages.
m. Average duration of mortgages.
n. Communal loans.
o. Cash on hand and at the bank.
p. Discounts.
q. Securities.
r. Advances on collateral.
s. Deposits with other banks.
t. Percentage of dividend.

CRÉDIT AGRICOLE.

1. Number of caisses locales.
2. Number of caisses regionales.
3. Number of members.
4. Number with limited liability.
5. Number with unlimited liability.
6. Extent of reserve fund.
7. Kinds and amounts of credit extended (discounts, current accounts, and so on) and other investments.
8. Rates of interest and of discount.

CAISSES D'ÉPARGNE.

The figures should be given separately for the Caisses d'Épargne Ordinaires and for the Caisses Nationales, to include:
1. Number of institutions.

2. Number of depositors.
3. Proportion of depositors to population.
4. Amount of deposits at the end of each year.
5. Proportion of deposits to depositors and to the total population.
6. Amount of yearly additions to deposits.
7. Amount of yearly withdrawals.
8. Rates of interest paid upon deposits.
9. Classification of investment of savings-bank funds.

Above figures to be given for period from 1870 to 1907.

GROWTH OF POPULATION, BUSINESS, WEALTH, AND COMMERCE.

For annual and decennial periods since 1871, as shown by—

a. Population.
b. Foreign commerce (exports and imports).
c. Registered tonnage.
d. Amount of bank capital and reserve fund.
e. Bank deposits.
f. Savings-bank deposits.
g. Bank clearing-house transactions.
h. Home consumption of coffee, sugar, and wine.
i. Amount of public revenue.
k. Amount of iron and steel production.
l. Transportation statistics, including gross earnings of railways and number of tons of freight carried 1 mile.
m. Growth of wealth in France as shown by any particular tax returns.
n. Total ratable value of lands and houses.
o. Any other available statistics showing industrial growth.

[Suggestions for the study of banking practice to be prepared by H. Withers, of the London Times. City office: 15 Copthall avenue, London, E. C. Private address, 6 Linden Gardens, London, W.]

1. What are the distinctive functions of—
a. Bank of England.
b. Joint-stock banks.
c. Private banks and merchant bankers.
d. Postal and trustee or other savings banks.
e. Discount houses.
f. Banks of Scotland.
2. What are the laws which govern each class as evidenced—
(1). By legislation, or
(2). By custom, growing out of the understood unwritten laws, to include in each case the provisions of law or custom governing—
a. Organization.
b. Government and control.
c. Capital and reserve fund.
d. Liabilities of stockholders, officers, and directors.
e. Requirements, if any, for the government or other supervision, inspection, or examination.
f. Nature and extent of statements or returns, public or private, if any, required or published.
3. What is the character of the business done by various classes of banks under the following different conditions:
a. In rural communities.
b. In industrial and financial centers, like Manchester.
c. In commercial centers, like Liverpool.
d. In the great international exchange center of London, to include in each case—
1. General nature of the business done.
2. General character of (*a*) deposits, (*b*) current accounts, with the usual rate of interest, if any, paid on each class.
3. General character of (*a*) bills discounted, (*b*) loans, (*c*) advances to customers or cash credits, with the usual rate of interest on each as compared with the bank rate, (*d*) acceptances.
(To include description of "crossed checks," charges on the turnover, distinction between current and deposit accounts, etc.)
4. Are there organizations or associations of banks other than clearing houses in existence; and if so, what is their character?
5. Number and character of clearing-house organizations in the United Kingdom.
6. Description of London Stock Exchange; its organization; conditions of membership; regulations whether of law or custom; methods of listing; kinds of business done, machinery of settlement, etc.

CANADA.

Reports to be prepared in Canada.

R. M. Breckenridge, 216 Jackson street, Hamilton, Ontario, will prepare a paper upon the history of banking in Canada, giving especial attention to recent legislation and to the organization of the Canadian Bankers' Association, with a compilation of the banking statutes revised to date.

Prof. Joseph French Johnson, of New York University, will prepare a study of banking practices and of the relations between the banks in Canada at the present time.

The commission will also conduct personal inquiries in leading Canadian cities.

JAPAN.

Prof. O. M. W. Sprague, of Harvard University (18 Sumner road, Cambridge, Mass.), will prepare a paper upon the organization and history of the banking system of Japan.

Steps have also been taken to secure information from the Marquis Katsura, premier and minister of finance; Baron Takahashi, vice-governor of the Bank of Japan, and other Japanese authorities.

Reports from other countries.

Dr. Julius Landmann, das Schweizerische Bankgesetz, Untersuchungen zur Geschichte und Kritik der Schweiz. Notenbankgesetzgebung, insbesondere des Bundesgesetzes vom 6 Oktober, 1905, über die Schweizerische Nationalbank.

To be translated under the supervision of Mr. Léon Rueff, of the Swiss Bankverein, 43 Lothbury, London, E. C.

A. W. Flux, of the London Board of Trade, Gwydyr House, Whitehall, London, S. W., England, will prepare a paper upon the recent history of Swedish banking, with especial reference to the changes of the last few years in the note-issuing arrangements.

Charles A. Conant, 32 Nassau street, New York, will prepare papers upon the organization and history of the banking systems of Belgium and Mexico, and short descriptions of the central banks of Austria-Hungary, Russia, and Holland.

Paul M. Warburg, of Kuhn, Loeb & Co., William and Pine streets, New York, will prepare a paper upon the organization of the discount market in London and European financial centers, with a discussion of the methods and effects of rediscounting as practiced there.

L. M. Jacobs, of the foreign-exchange department of the National City Bank, New York, will prepare a paper upon the business of "accepting" in English and European banks, with a discussion of acceptances as a means of increasing the flexibility in a country's credit.

UNITED STATES.

Reports upon banking in the United States.

Prof. William Graham Sumner, of Yale University, New Haven, Conn., has been asked to prepare a paper surveying the banking experiences of the United States during the past hundred years and summarizing the lessons to be learned therefrom.

Prof. Davis R. Dewey, of the Massachusetts Institute of Technology, will prepare a study of banking history in America before the civil war, giving especial attention to the first and second United States banks and the safety fund and free banking systems of New York.

Andrew McFarland Davis, 10 Appleton street, Cambridge, Mass., will prepare a study of the origin of the national-banking system, with especial reference to the motives which led to its creation and the conditions and principles which had influence in giving it form.

Prof. O. M. W. Sprague, of Harvard University (18 Sumner road, Cambridge, Mass.), has been asked to prepare a paper upon the experiences of the banks during the several periods of panic and general suspension since the organization of the national-banking system.

Alexander D. Noyes, 24 Vesey street, New York, financial editor of the Evening Post, will prepare a paper upon the changes in the amount of notes issued by the national banks since their institution in 1864.

Prof. Edwin W. Kemmerer, of Cornell University (Goldwin Smith Hall), Ithaca, N. Y., will prepare a statistical study of seasonal variations in the demand for currency and capital, as evidenced by changes in the domestic exchange rates upon New York in certain cities, the shipments of cash to and from various parts of the country, the movements of loans and reserves in the banks of leading financial centers, the changes in the loan and discount rates, the exports and imports of gold, the rates of foreign exchange, and the prices of certain active investment bonds.

Prof. David Kinley, of the University of Illinois, Urbana, Ill., will prepare a study of the development of the independent treasury system of the United States from its origin down to the present day.

John E. Gardin, of the foreign exchange department of the National City Bank, New York, will prepare an analysis of the balance of indebtedness of the United States during the last twenty of thirty years, with estimates of the amounts of the several items entering that balance and a discussion of their tendencies.

Samuel A. Welldon, 24 Broad street, New York, of the New York bar, will prepare a digest of the laws actually current in the various States, with regard to state banks, trust companies, and savings banks.

——— ——— will prepare a paper upon methods of bank clearances in different parts of the United States, including the settlement of balances and the treatment of checks upon outside towns.

Statistics for the United States.

Lawrence O. Murray, Comptroller of the Currency, will obtain:

First. A report of condition from all the national banks, giving specific items according to a special scheme prepared by the commission.

Second. A report from the national banks as to the relative use of coin, paper money, and credit instruments as shown by the deposits and receipts of the banks on given days (like the reports of 1881, 1890, 1892, and 1896). (This report is to be tabulated under the direction of Prof. David Kinley, of the University of Illinois.)

Third. Recapitulative tables for the national banks for the last twenty years, according to a scheme to be prepared.

The state-bank supervisors, in cooperation with Pierre Jay (room 125, State House, Boston, Mass.), president of the National Association of Supervisors of State Banks, will secure from the state banks and trust companies statistics similar to those secured by the Comptroller of the Currency from national banks.

O. P. Austin, Chief of the Bureau of Statistics, Washington, D. C., will secure statistics as to the annual growth of population, business, wealth, and commerce, and as to the exports and imports of gold during the last forty years.

The Commercial and Financial Chronicle, William B. Dana, editor, 140 Front street, New York, will collect (1) the rates of foreign exchange weekly for the last ten years and monthly for the last twenty years between New York and London; (2) weekly shipments and receipts of gold in New York during the same period; (3) quoted market rates for loans and discounts in New York for the same perior, to include call loans, time loans, and commercial paper for different lengths of time and of as many kinds as are available.

Fred I. Kent, vice-president Bankers' Trust Company, 7 Wall street, New York, will collect (1) the high and low rates for foreign drafts between (*a*) New York and London, (*b*) New York and Berlin, (*c*) New York and Paris, weekly for the last ten years, and monthly for twenty years; (2) the rates for domestic exchange upon New York in Chicago, New Orleans, St. Louis, and San Francisco during a similar period.

The managers of the clearing houses in all cities of 50,000 or more inhabitants will be asked to collect from the banks in those cities a statement of the shipments and receipts of cash from such banks, month by month from January, 1905, to December, 1908.

The managers of the clearing houses in Chicago, St. Louis, New Orleans, and San Francisco will be asked to furnish statements as to the movements in the deposits, loans, and cash reserves of their banks, week by week for the last ten years.

Other papers to be arranged for.

Mr. TAWNEY. Mr. Speaker, I do not wish to occupy any more of my time, unless the gentleman from South Carolina——

The SPEAKER. The question is on suspending the rules——

Mr. TAWNEY. Mr. Speaker, I promised to yield one minute to the gentleman from South Carolina [Mr. LEVER].

Mr. LEVER. Mr. Speaker, operating, as we are, under a rule forced upon the minority which does not permit any debate to amount to anything and prohibits amendments to any of these appropriation bills, I am denied the privilege of offering several amendments to this bill which, I am sure, would make it a much better bill. If the rule would permit it, I would offer ar

amendment striking out the appropriation allowed Dantzler and Myers, who contested the seats of myself and my colleague, Judge PATTERSON. The appropriation amounts to $2,500 and is a pure gift to these negroes, who had no idea of winning a seat and no other purpose than getting the fees allowed in this bill. I want the country to know the ridiculousness of these contests, and, with unanimous consent, I desire to submit a statement of the contested-election cases in South Carolina for the past twenty years. This farcical procedure, this unnecessary drain upon the Treasury, will never cease until this Congress has the courage to say to these negroes that "Your case must be more than a farce, more than a ridiculous pretense, before any fees will be allowed." Three contests have been filed again for the Sixty-first Congress, and they will never stop until the Republican majority joins with us on this side in refusing fees where the only purpose of the contest is to obtain the fees. I wish I had the chance to test the sense of the House on this matter, but your rule does not permit it, and I can only voice my protest.

The list shows 18 cases, only 2 of which were successful. The list will also show that the votes received by these Republican contestants have grown less and less, until they now practically amount to nothing.

List of contested election cases from South Carolina from the Fiftieth to the Sixtieth Congresses, both inclusive.

FIFTIETH CONGRESS.

Seventh district, Robert Smalls (vote 5,961) *v.* William Elliott (vote 6,493).

FIFTY-FIRST CONGRESS.

Seventh district, Thomas E. Miller (vote 7,003) *v.* William Elliott (vote 8,358). Miller seated.

FIFTY-SECOND CONGRESS.

Seventh district, Thomas E. Miller (vote 1,410) *v.* William Elliott (vote 3,792).

FIFTY-FOURTH CONGRESS.

First district, George W. Murray (vote 3,913) *v.* William Elliott (vote 5,650). Murray seated.

FIFTY-FIFTH CONGRESS.

First district, George W. Murray (vote 173) *v.* William Elliott (vote 2,478).
Second district, B. P. Chatfield (vote 635) *v.* W. Jasper Talbert (vote 7,999).
Seventh district, Thomas B. Johnston (vote 1,342) *v.* J. William Stokes (vote 8,065).

FIFTY-SIXTH CONGRESS.

Third district, R. R. Tolbert (vote 332) *v.* Asbury C. Latimer (vote 4,029).

FIFTY-SEVENTH CONGRESS.

Seventh district, A. B. Dantzler *v.* A. F. Lever.

FIFTY-EIGHTH CONGRESS.

First district, Aaron P. Prioleau (vote 175) *v.* George S. Legare (vote 3,749).
Seventh district, A. D. Dantzler (vote 167) *v.* A. F. Lever (vote 4,220).

FIFTY-NINTH CONGRESS.

First district, Aaron P. Prioleau (vote 234) *v.* George S. Legare (vote 6,068).
First district, James A. Noland (vote 346) *v.* George S. Legare (vote 6,068).
Second district, Isaac Myers (vote 419) *v.* James O. Patterson (vote 7,426).
Seventh district, Charles C. Jacobs (vote 563) *v.* Asbury F. Lever (vote 8,726).

SIXTIETH CONGRESS.

First district, Aaron P. Prioleau (vote 28) *v.* George S. Legare (vote 3,965).
Second district, Isaac Myers (vote 226) *v.* J. O. Patterson (vote 4,588).
Seventh district, A. D. Dantzler (vote 133) *v.* A. F. Lever (vote 5,391).

Mr. TAWNEY. Mr. Speaker, I yield one minute to the gentleman from Minnesota [Mr. STEVENS].

Mr. STEVENS of Minnesota. Mr. Speaker, the Committee on Interstate and Foreign Commerce has given consideration to the subject of locks and dams and waterways. There have been many inquiries by Members of the House upon the subject, and a pamphlet has been compiled by the committee at the request of some Members, and I ask unanimous consent to insert this in the RECORD as part of my remarks.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. STEVENS of Minnesota. The pamphlet is as follows:

DAMS AND WATER POWER.

WASHINGTON, D. C., *February 25, 1909.*

To the Committee on Interstate and Foreign Commerce,
House of Representatives:

Your subcommittee, appointed to consider and report upon the matters of the construction of the dam across Rainy River, Minnesota, the construction of a dam over the James River, Missouri, and the general subject of dams over navigable streams and the water power developed thereby, has conducted hearings which are in print and are documents of your committee, and in various ways has sought to obtain and compile information. At this time it has not seemed feasible to formulate any plan for legislation the enactment of which could now be definitely recommended. Your subcommittee appreciates the force and importance of the suggestions and recommendations of the President, as set forth in his messages to Congress and in other public documents. Nothing can be of greater consequence to the people than the preservation of the public rights of control and regulation; and of proper tolls, charges, or taxes by public authority over the water powers of the country.

These immense natural resources, in large part dormant, should be developed for the real welfare of the whole country, and not solely for the benefit of those few individuals who had the shrewdness and foresight to acquire such property rights as may be sufficient to dominate and utilize mostly for themselves these privileges. At the same time due regard must be had to the private rights which such individuals may have acquired and of which they can not be deprived without due process of law, and which can not be taken for public use without just compensation. The time will soon come when these water powers should be developed to the advantage of the sections in which they are located, and when great public improvements of varied importance must depend upon such development to properly utilize other vast natural resources. It should be the purpose of Congress to encourage this utilization and development without sacrificing public interests or private rights. If the National Government had the entire jurisdiction and control of all phases of the subject, the problem of suitable legislation would be much easier, though even then its solution would be perplexing and arduous. But when the power of the National Government is so carefully defined and limited by the Constitution of the United States, and when so large a part of the authority over this subject must necessarily remain with the States, and when the boundary of private rights must be ascertained and respected in the instances where such rights exist, and yet the whole range of utilization, control, rights, and charges must be considered in the preparation of any legislation to be passed by Congress, the difficulties of ascertaining accurately the respective powers of the National Government, the States, and the individual owners, of considering the divergent views and interests, and of formulating such provisions as shall be adequate to secure development of these great natural resources, are vastly increased and require much time for their proper understanding, thorough consideration, and final settlement.

Under the circumstances, your subcommittee has thought it wise to submit a partial report to the whole committee advising as to the progress it has made, and presenting the information of record it has gathered upon the subject. The views of the President are given in his veto of the Rainy River dam bill, his letter to Hon. J. ADAM BEDE, and his veto of the James River dam bill, all of which are included in and made a part of this report. The views of the Senate Committee on Commerce are embodied in a report of that committee, a copy of which is herein included. The views of the War Department are contained in a report and memorandum submitted to this committee, and an opinion upon a hearing by Hon. William H. Taft, Secretary of War. Some of the views of your committee may be found in a report of the committee upon the veto message of the President on the Rainy River dam bill.

There is also included in this report a letter containing various interrogatories propounded to Hon. Henry M. Hoyt, Solicitor-General of the United States, and Mr. Hoyt's reply thereto. There is also submitted a tentative draft of a bill "Committee print" reenacting the existing law, and proposing several amendments to the general law approved on the 21st day of June, 1906, "Regulating the construction of dams over navigable streams." This is not designed as a final expression of the views of the subcommittee but rather is submitted as a basis for discussion. It seeks to extend the regulating power of the National Government, through the War Department, to the largest practicable limits under the Constitution, so that there have been drafted two alternative propositions, setting forth different views as to the powers of the National Government; first, that the charge to be exacted by the National Government should be limited by the amount which should be necessary to restore the streams to the condition of navigability existing at the time the grant is made; or, second, such amount as the War Department should deem it wise to exact, to be paid into the Treasury and applied to the purpose of improvement of navigation, which sums must be otherwise provided by taxation as Congress shall direct. There is also proposed in the bill a time limit for the franchises, and a provision for the disposition of the franchises and property at the expiration of the limited term.

Your committee makes no further recommendations at this time, but submits this partial report and invites your attention to the documents herein included.

F. C. STEVENS.
JOHN J. ESCH.
WILLIAM RICHARDSON.
C. L. BARTLETT.

[Congressional Record, April 13, 1908, p. 4854.]

VETO MESSAGE RELATING TO EXTENSION OF TIME FOR CONSTRUCTION OF DAM ACROSS RAINY RIVER.

The Speaker laid before the House the following message from the President of the United States, which was read:

"*To the House of Representatives:*

"I return herewith, without my approval, House bill 15444, to extend the time for the construction of a dam across Rainy River.

"This bill is returned for several reasons, some of which are general, others special. In this particular case permission to construct this dam was originally given, as being in Rainy Lake River, by the act of May 4, 1898 (30 Stat., 398), which limited the time for commencing the work to one year and for completing it to three years from that date. Further extensions of time were granted as follows: For commencement, three years, and for completion, five years from May 4, 1900, by the act of that date (31 Stat., 167); for construction until May 4, 1907, by the act of June 28, 1902 (32 Stat., 485); for completion until July 1, 1908, by the act of February 25, 1905 (33 Stat., 814). The act of 1905 substituted the Rainy River Improvement Company for the original permittee. All rights given by these acts will expire July 1, 1908, unless the dam is completed on or before that date. In other words, the permittees will then have enjoyed for more than ten years the exclusive privilege of constructing this work, and have apparently failed to take advantage of it, for this bill would extend the time for three years longer to some unnamed day in July, 1911.

"I do not believe that natural resources should be granted and held in an undeveloped condition either for speculative or other reasons. So

far as I am aware, there are no assurances that the grantees are in any better condition promptly and properly to utilize this opportunity than they were at the time of the original act, ten years ago.

"In all permits of this character the duty of declaring a forfeiture, after notice and hearing, for failure to begin or complete construction within the time limited by the permit, or for other breach of conditions, should be definitely imposed upon the proper administrative officer (in this case the Secretary of War). There have been many unfortunate experiences resulting from conditional grants, which, though on their face apparently terminable for breach of condition, proved practically indeterminate because no one official was specifically given power to discover and declare the breach. The general statute regulating dams in navigable waters (act June 21, 1906, 34 Stat., 386), though representing an advance, yet leaves uncertain much that should be definitely expressed in each act permitting the construction of dams under this statute.

"A definite time limit is one of these important omissions. The public must retain the control of the great waterways. It is essential that any permit to obstruct them for reasons and on conditons that seem good at the moment should be subject to revision when changed conditions demand. The right reserved by Congress to alter, amend, or repeal is based on this principle; but actual experience of what happens with indeterminate public-utility franchises proves that they are in the vast majority of cases practically perpetual. Each right should be issued to expire on a specified day, without further legislative, administrative, or judicial action.

"Every permit to construct a dam on a navigable stream should specifically recognize the right of the Government to fix a term for its duration and to impose such charge or charges as may be deemed necessary to protect the present and future interests of the United States in accordance with the act of June 21, 1906. There is sharp conflict of judgment as to whether this general act empowers the War Department to fix a charge and set a time limit. All grounds for such doubt should be removed henceforth by the insertion in every act granting such a permit of words adequate to show that a time limit and a charge to be paid to the Government are among the interests of the United States which should be protected through conditions and stipulations to be imposed either by the War Department or, as I think would be preferable, by the Interior Department.

"The provision for a charge is of vital importance. The navigability of every inland waterway, and of all connected and connectable inland waterways as a whole, should be improved for the purposes of interstate and foreign commerce upon a consistent unified plan by which each part should be made to help every other part. One means available for the improvement of navigation at a particular point on any river may be a dam creating a slack-water pool of sufficient depth. Such a dam may, in many cases, develop power of sufficient value to pay, in whole or in part, for the improvement of navigation at that point, and if there is any surplus it can be spent upon improvements at other points in accordance with the general plan. Since the Government can do by any proper agency what it can do directly, it is in principle immaterial whether this income to construct needed improvements is derived from works constructed directly by the Government or by a corporation acting under federal authority, since federal authority is the one indispensable legal prerequisite for the work, though the charge to be paid to the Government for the power would, of course, differ in the two cases; indeed, the charge would necessarily vary greatly, for where the improvement was both costly and of great benefit to the public the charge would naturally be made low and the time limit long.

"The income derivable from this source would materially aid in the complete improvement of our navigable waters, for which there is now such crying need. The Chief of Engineers of the Army reports that the bills pending at this session of Congress permit the construction of dams in navigable streams capable of developing over 1,300,000 horsepower. These rivers run every hour in the day and every day in the year. To develop this amount of power would, under average conditions, require about 25,000,000 tons of medium-quality coal every year. This natural wealth is the heritage of the people. I see no reason for giving it away, though there is every reason for not imposing conditions so burdensome as to prevent the utilization of the power. The authority to make, modify, or withhold grants manifestly implies both the power of inquiring into the grounds on which the grants are asked and the duty of administering the grants in the public interest.

"We are now at the beginning of great development in water power. Its use through electrical transmission is entering more and more largely into every element of the daily life of the people. Already the evils of monopoly are becoming manifest; already the experience of the past shows the necessity of caution in making unrestricted grants of this great power.

"The present policy pursued in making these grants is unwise in giving away the property of the people in the flowing waters to individuals or organizations practically unknown and granting in perpetuity these valuable privileges in advance of the formulation of definite plans as to their use. In some cases the grantees apparently have little or no financial or other ability to utilize the gift, and have sought it merely because it could be had for the asking.

"In place of the present haphazard policy of permanently alienating valuable public property, we should substitute a definite policy along the following lines:

"First. There should be a limited or carefully guarded grant in the nature of an option or opportunity afforded within reasonable time for development of plans and for execution of the project.

"Second. Such a grant or concession should be accompanied in the act making the grant by a provision expressly making it the duty of the designated official to annul the grant if the work is not begun or plans are not carried out in accordance with the authority granted.

"Third. It should also be the duty of some designated official to see to it that in approving the plans the maximum development of the navigation and power is assured, or at least that in making the plans these may not be so developed as ultimately to interfere with the better utilization of the water or complete development of the power.

"Fourth. There should be a license fee or charge which, though small or normal at the outset, can in the future be adjusted so as to secure control in the interest of the public.

"Fifth. Provision should be made for the termination of the grant or privilege at a definite time, leaving to future generations the power or authority to renew or extend the concession in accordance with the conditions which may prevail at that time.

"THEODORE ROOSEVELT.

"THE WHITE HOUSE, *April 13, 1908.*"

LETTER OF THE PRESIDENT TO MR. BEDE.

THE WHITE HOUSE,
Washington, May 7, 1908.

MY DEAR MR. BEDE: While I stand absolutely for the policy with regard to the development of water powers announced in my message of February 26, because I believe that policy is just and in the interests of the whole people of the United States, still I am anxious that no injustice should be caused in this particular case in Minnesota which you have brought to my attention. At the time of my veto of the Rainy River dam bill I was not in possession of the information which has since come to me from you, that the dam is already about half completed under previous grants by Congress. That fact does not by any means remove Rainy River dam from the sphere of the new method of protecting the interest of the public, but it does warrant special consideration of the promoters of that project, because they have already expended part of their money under the old policy. There is, I believe, a simple way by which the interests of the people at large and of the Rainy River Improvement Company can be met at the same time, and that without in any degree sacrificing the policy for which I stand or establishing any unfortunate precedents in connection with it.

There are two provisions without which I will not approve any bill granting the rights to develop water power on a navigable stream. The first is a definite limitation in time. That limitation can be made long or short, as the circumstances in each case require. In the present instance I suggest a term of ninety-nine years, which, I doubt not, will be abundantly sufficient for every need of the Rainy River Improvement Company. The second provision relates to a charge for the benefits obtained by any company as the result of the permission granted to it by the United States. In view of the fact that the Rainy River dam is reported to me as half built, I suggest that a specific provision be inserted in the bill fixing the time when the Secretary of War may begin to collect a charge at twenty-five years from the date of the passage of the bill. Thus the Rainy River Improvement Company will be relieved of an immediate charge which it had not anticipated, and at the same time the future interests of the people of the United States will be protected. If these two provisions can be inserted in the bill as passed, I shall be very glad, indeed, to sign it.

In reference to the claim that it is the State and not the Nation which has power in connection with these waters, I would like to call your attention to the fact that as soon as the persons privately interested in these improvements get that position acknowledged, they are absolutely certain to take the further position that the State itself has no power in the matter. For example, the Illinois legislature has been for twelve months fighting about measures for the improvement of the Des Plaines and Illinois rivers and the development of water powers to pay for the improvement, the private citizens who desire to use the waters in their pecuniary interest maintaining that the waters are the property of the riparian owners and can not be used by the State. It seems to me clear that the United States Government, in cases where it can make or withhold a grant according as it chooses, can impose in connection with any grant it actually gives such conditions as may be necessary for the protection of the public. I do not see how there can be any question that it has the right to make the grant only for a limited time. Indeed, I can not imagine any argument being made against this proposition. As for the imposing of a charge, I can conceive of an argument being made that this can not be done. Nevertheless, it also seems to me absolutely clear that we have the right to do it.

In my judgment it is not a case as to whether the Constitution authorizes the action, but as to whether the National Government does or does not choose to take the position that, as a grant of this kind is an exclusive and therefore a monopolistic grant, it is fair that the holder, as a condition of the enjoyment, should give just compensation to the public at large, by whom, through the Government, that grant has been given. It seems to me unwise for Congress to take any other position. The greater the pecuniary gain to the holder of the grant, and the greater the value of the property by reason of this exclusive monopolistic right, the greater should be the compensation to the public at large. The compensation would be available for the use of the public, through the Federal Government, either in still further improving or aiding navigation, or in rebuilding the dam in case the company failed, or in removing an obstruction if it be an obstruction to navigation. It seems to me clear that the right to impose a compensation in any of these cases is an incident to the control which the Federal Government has over navigation, and which it can exercise either negatively by removing obstructions or affirmatively by improving navigation. Whether the United States itself constructs the dam or gives leave to construct it is, to my mind, wholly unimportant as regards the matter we have under consideration.

Sincerely, yours,

THEODORE ROOSEVELT.

Hon. J. ADAM BEDE,
House of Representatives.

HOUSE COMMITTEE REPORT ON RAINY RIVER DAM BILL (H. R. 15444).

The Committee on Interstate and Foreign Commerce, to whom was referred the bill (H. R. 15444) extending the time for the construction of a dam across Rainy River, having considered the same, report thereon with a recommendation that it pass.

This bill was passed by the House of Representatives on the 4th day of March, 1908, and was passed by the Senate on the 4th day of April, 1908, and on the 13th day of April, 1908, was returned by the President without his approval. The bill was referred to the Committee on Interstate and Foreign Commerce, which gave extended hearings upon the subject-matter of the bill. During the progress of the hearings, on the 5th day of May, Hon. James R. Garfield, Secretary of the Interior, appeared before the committee and made a general statement regarding the attitude of the administration toward this particular bill and its general position toward the question of similar legislation affecting water power. The following appears as a portion of the statement of Secretary Garfield (pp. 87 and 88 of the hearings):

"As regards this particular bill, I am advised that there was not before presented, at the time the bill was vetoed, all the facts which have since developed relating to the character of the work that had been done by the company which is seeking to have this act passed, which is a renewal of previous acts. In the veto message of the President there were five provisions which the President suggested as essential provisions for measures of this character, and it was desired, as to two of those particularly, that a statement be made to the subcommittee to indicate more in detail the reason why those provisions were essential.

"The first one, as to the limitation in time, that instead of there being granted an indefinite or what would be a perpetual right, in case the conditions of construction were complied with, the President has felt that there should be a limited grant made, say, for example, a grant of ninety-nine years.

"Next the question comes up as to what limitations or conditions should be imposed by the Federal Government in making such grants. One which has been felt to be exceedingly necessary is that of making a charge. I am aware that there are legal questions involved in this."

It appeared that this Rainy River is on the international boundary line between the United States and the Province of Ontario; that the company seeking a renewal of its privilege had proceeded with due diligence in carrying out its work; that the work done up to date represents an expenditure of more than $750,000 in the partial construction of the dam, race ways, etc., the securing of necessary property and rights; that the Dominion parliament of Canada and the provincial parliament of Ontario had granted proper rights and licenses to its associate company in Ontario to do the Canadian portion of this work. It further appeared that this whole project was a unit, and that it was necessary for the successful operation of it that both the American and Canadian rights be secured by one company, and that it be constructed and operated as one plant, in order to produce proper and profitable results to the public and to its owners.

It also appeared that the Dominion and provincial parliaments made this project a part of their navigation system between Lake Superior and Lake of the Woods, and that one of the reasons for the Canadian grants was that this improvement would maintain the waters of Rainy Lake at a higher level during the low-water period and be of great advantage to navigation. (Hearings, p. 133.)

House Document No. 431, Fifty-ninth Congress, first session, page 4, contains the following statement:

"The board believes that any decided betterment of navigation can be brought about only by extensive and costly works, which are not justified by present and prospective commerce. Moreover, this is an international waterway with a greater development and demand for navigation on the Canadian than on the United States side of the river, which condition would suggest that when the necessity for the improvement of the river is recognized it should be undertaken by a mutual arrangement between the two countries.

"In view of the foregoing, the board can not concur in the opinion of the district officer and the division engineer as to the advisability of making a survey. In the board's opinion the present and prospective commerce of this locality and the commercial interests of the American people are not sufficient to justify the probable cost of an effective improvement. It therefore believes that it is not advisable for the United States to undertake the work at the present time.

"For the board:

"R. L. HOXIE,
"Lieut. Col., Corps of Engineers,
"Senior Member Present.

"DECEMBER 18, 1905."

This is a report by the Corps of Engineers of the United States upon a survey for navigation and improvements at this point.

In view of these conceded facts both as to the public benefits accruing to Canada and the United States by reason of this improvement, and by reason of the equities of the projectors, who had made large investments in good faith and with due intelligence, relying upon the governmental action of the two countries, it seemed to the representatives of the administration and to your committee that this grant should be continued and this work should be prosecuted to a successful conclusion, provided it could be done by preserving the rights to the people and to the Government of the United States as laid down by the President in his message of disapproval of this bill. Accordingly several conferences have been held between the representatives of the administration and your committee with the endeavor to harmonize any conflicting views so far as the same might be necessary concerning this bill. The parliamentary situation of the bill is such that it is a subject of privilege in the House which must not be lost if the bill be considered at this session of Congress, and that it is not open to any amendments, but must be passed, if at all, as it was disapproved by the President.

The message of disapproval indicated that the "Act to regulate the construction of dams across navigable waters," approved June 21, 1906, was not sufficiently comprehensive in authorizing the War Department to fix a definite time limit and such charges as could be constitutionally exacted by the United States for its grant of any privilege to the company constructing the dam. Your committee realized that such defects might exist, and directed its proper subcommittee to take this whole subject under consideration, to submit such amendments to such general act at the first meeting in December next as should grant to the proper officials of the War Department the largest authority under the Constitution, to fix any definite time limit which should be necessary and such charge as could be made under the circumstances of each particular case. This action is as far as your committee can go during the present session of Congress.

The officers of the Rainy River Improvement Company in their hearings and conferences before this committee and, as we are informed, in their conferences with the officers of the administration, have always indicated their willingness to abide by whatever requirements and conditions should be exacted from them by Congress, or by the officials of the adminstration as a condition in the extension of their grant for the construction of this dam.

It appeared in the hearings before your committee from Gen. Alex. Mackenzie, Chief of Engineers, that new plans must be presented for this work in connection with the Rainy River project required by Canada. These plans have not yet come to the department. The work they are now doing is based on the old plans which do not accord with the Canadian work. Accordingly the Rainy River Improvement Company has agreed in writing with the Secretary of War that at its earliest convenience it will submit to the Secretary of War and Chief of Engineers, as provided by the general dam act of June 21, 1906, its new plans and specifications, and that as a necessary part of any approval of the same by the Secretary of War and Chief of Engineers there shall be embodied therein the following conditions and agreements:

First. Such reasonable limitations as to the time for such grant as the Secretary of War shall impose, conditioned that the United States shall not be subjected to any expense in the removal of such or any obstruction or improvement caused by said company, either at the expiration of said grant or at any other time that the United States may direct the same to be removed.

Second. That the said Rainy River Improvement Company has agreed and will agree to the payment of such charge to the United States as may be required by the Secretary of War, either under the present law or as may be hereafter determined by authority of Congress.

Third. That this grant is expressly made subject to any impositions hereinafter authorized or directed by Congress embodied in any general law or special modification or change of this or other acts, and that a special reservation to this effect shall be an essential part of such approval of said plans by the Secretary of War and Chief of Engineers.

Fourth. That any application of said company for the approval of its plans and specifications, whenever made, shall be agreed by said parties to be within the purview of a part of and as authorized by the pending act of Congress whenever the same shall become a law; and that all the provisions of the approval of the Secretary of War and Chief of Engineers to said plans and specifications and all conditions as a part thereof shall be a part of the authority of said officers now or hereafter conferred by general or special acts of Congress with reference to this project.

In view of these conditions proposed and agreed to by the Rainy River Improvement Company as an essential part of the approval by the Secretary of War and the Chief of Engineers, it seems to your committee that the requirements of the President in his message of disapproval have been met so far as possible, and that the peculiar circumstances and exigencies of this case are such as require immediate action by Congress. This report and statement have been submitted to the Secretary of the Interior, Hon. James R. Garfield, and appended are his views and report thereon:

SECRETARY'S OFFICE,
DEPARTMENT OF THE INTERIOR,
Washington, D. C., May 23, 1908.

DEAR SIR: I have discussed the report of your subcommittee on the Rainy River Improvement Company bill with the President, and I am authorized by him to say that he recognizes the conditions which mark this case off very sharply from any which may hereafter arise, in view of the fact that under an existing law much capital has already been invested by the Rainy River Improvement Company which will represent a dead loss if there is no extension of the time within which the company is required to complete its work, and, furthermore, in view of the fact that the parliamentary situation in Congress is such that no new bill nor amendment to the present bill can now be passed.

It also appears that the Committee on Interstate and Foreign Commerce has announced in the report that at the next session of Congress it will endeavor to remedy the defects of the existing general law on the subject by submitting amendments which will permit the Executive to fix definite time limits and impose reasonable charges in all such cases, while on its part the Rainy River Improvement Company, through its president, has filed with the War Department an agreement that it will submit to and abide by such conditions as may be imposed by the Secretary of War, including a time limit and a reasonable charge, when it files, as it must, the new plans which must be approved by the War Department before it can proceed under the proposed law.

These conditions having been fulfilled, the President feels that it is safe, from the view point of the public interest, and equitable to the Rainy River Improvement Company, to enact the bill into law.

Very respectfully,

JAMES RUDOLPH GARFIELD, *Secretary.*

Hon. FREDERICK C. STEVENS,
Committee on Interstate and Foreign Commerce,
House of Representatives.

SPECIAL MESSAGE.

To the House of Representatives:

I return herewith without my approval House bill 17707, to authorize William H. Standish to construct a dam across James River, in Stone County, Mo., and divert a portion of its waters through a tunnel into the said river again to create electric power. My reasons for not signing the bill are:

The bill gives to the grantee a valuable privilege, which by its very nature is monopolistic, and does not contain the conditions essential to protect the public interest.

In pursuance of a policy declared in my message of February 26, 1908 (S. Doc. No. 325), transmitting the report of the Inland Waterways Commission to Congress, I wrote on March 13, 1908, the following letter to the Senate Committee on Commerce:

"Numerous bills granting water rights in conformity with the general act of June 21, 1906, have been introduced during the present session of Congress, and some of these have already passed. While the general act authorizes the limitation and restriction of water rights in the public interest and would seem to warrant making a reasonable charge for the benefits conferred, those bills which have come to my attention do not seem to guard the public interests adequately in these respects. The effect of granting privileges such as are conferred by these bills, as I said in a recent message 'taken together with rights already acquired under state laws, would be to give away properties of enormous value. Through lack of foresight we have formed the habit of granting without compensation extremely valuable rights, amounting to monopolies, on navigable streams and on the public domain. The repurchase at great expense of water rights thus carelessly given away without return has already begun in the East, and before long will be necessary in the West also. No rights involving water power should be granted to any corporation in perpetuity, but only for a length of time sufficent to allow them to conduct their business profitably. A reasonable charge should, of course, be made for valuable rights and privileges which they obtain from the National Government. The values for which this charge is made will ultimately, through the natural growth and orderly development of our population and industries, reach enormous amounts. A fair share of the increase should be safeguarded for the benefit of the people, from whose labor it springs. The proceeds thus secured, after the cost of administration and improvement has been met, should naturally be devoted to the development of our inland waterways.' Accordingly I have decided to sign no bills hereafter which do not provide specifically for the right to fix and make a charge and for a definite limitation in time of the rights conferred."

In my veto message of April 13, 1908, returning House bill 15444, to extend the time for the construction of a dam across Rainy River, I said:

"We are now at the beginning of great development in water power. Its use through electrical transmission is entering more and more largely into every element of the daily life of the people. Already the evils of monopoly are becoming manifest; already the experience of the past shows the necessity of caution in making unrestricted grants of this great power.

"The present policy pursued in making these grants is unwise in giving away the property of the people in the flowing waters to individuals or organizations practically unknown, and granting in perpetuity these valuable privileges in advance of the formulation of definite plans

as to their use. In some cases the grantees apparently have little or no financial or other ability to utilize the gift, and have sought it merely because it could be had for the asking."

The Rainy River Company, by an agreement in writing, approved by the War Department, subsequently promised to submit to and abide by such conditions as may be imposed by the Secretary of War, including a time limit and a reasonable charge. Only because of its compliance in this way with these conditions did the bill extending the time limit for that project finally become a law.

An amendment to the present bill expressly authorizing the Government to fix a limitation of time and impose a charge was proposed by the War Department. The letter, veto message, and amendment above referred to were considered by the Senate Committee on Commerce, as appears by the committee's report on the present bill, and the proposed amendment was characterized by the committee as a "new departure from the policy heretofore pursued in respect to legislation authorizing the construction of such dams." Their report set forth an elaborate legal argument intended to show that the Federal Government has no power to impose any charge whatever for such a privilege.

The fact that the proposed policy is new is in itself no sufficient argument against its adoption. As we are met with new conditions of industry seriously affecting the public welfare, we should not hesitate to adopt measures for the protection of the public merely because those measures are new. When the public welfare is involved Congress should resolve any reasonable doubt as to its legislative power in favor of the people and against the seekers for a special privilege.

My reason for believing that the Federal Government, in granting a license to dam a navigable river, has the power to impose any conditions it finds necessary to protect the public, including a charge and a limitation of the time, is that its consent is legally essential to an enterprise of this character. It follows that Congress can impose conditions upon its consent. This principle was clearly stated in the House of Representatives on March 28, 1908, by Mr. WILLIAMS, of Mississippi, when he said:

* * * "There can be no doubt in the mind of any man seeking merely the public good and public right, independently of any desire for local legislation, of this general proposition, that whenever any sovereignty, state or federal, is required to issue a charter or a license or a consent in order to confer powers upon individuals or corporations, it is the duty of that sovereignty, in the interests of the people, so to condition the grant of that power as that it shall redound to the interest of all the people, and that utilities of vast value should not be gratuitously granted to individuals or corporations and perpetually alienated from the people or the State or the Government.

* * * "It is admitted that this power to erect dams in navigable streams can not be exercised by anybody except by an act of Congress. Now, then, if it require an act of Congress to permit any man to put a dam in a navigable stream, then two things follow: Congress should so exercise the power in making that grant as, first, to prevent any harm to the navigability of the stream itself, and, secondly, so as to prevent any individual or any private corporation from securing through the act of Congress any uncompensated advantage of private profit."

The authority of Congress in this matter was asserted by Secretary Taft on April 17, 1908, in his report on Senator NEWLANDS'S Inland Waterways Commission bill (S. 500), where he said:

"In the execution of any project and as incidental to and inseparably connected with the improvement of navigation, the power of Congress extends to the regulation of the use and development of the waters for purposes subsidiary to navigation."

And by the Solicitor-General in a memorandum prepared after a careful investigation of the subject.

Believing that the National Government has this power, I am convinced that its power ought to be exercised. The people of the country are threatened by a monopoly far more powerful, because in far closer touch with their domestic and industrial life, than anything known to our experience. A single generation will see the exhaustion of our natural resources of oil and gas and such a rise in the price of coal as will make the price of electrically transmitted water power a controlling factor in transportation, in manufacturing, and in household lighting and heating. Our water power alone, if fully developed and wisely used, is probably sufficient for our present transportation, industrial, municipal, and domestic needs. Most of it is undeveloped and is still in national or state control.

To give away, without conditions, this, one of the greatest of our resources, would be an act of folly. If we are guilty of it, our children will be forced to pay an annual return upon a capitalization based upon the highest prices which "the traffic will bear." They will find themselves face to face with powerful interests intrenched behind the doctrine of "vested rights" and strengthened by every defense which money can buy and the ingenuity of able corporation lawyers can devise. Long before that time they may and very probably will have become a consolidated interest, controlled from the great financial centers, dictating the terms upon which the citizen can conduct his business or earn his livelihood, and not amenable to the wholesome check of local opinion.

The total water power now in use by power plants in the United States is estimated by the Bureau of the Census and the Geological Survey as 5,300,000 horsepower. Information collected by the Bureau of Corporations shows that thirteen large concerns, of which the General Electric Company and the Westinghouse Electric and Manufacturing Company are most important, now hold water-power installations and advantageous power sites aggregating about 1,046,000 horsepower, where the control by these concerns is practically admitted. This is a quantity equal to over 19 per cent of the total now in use. Further evidence of a very strong nature as to additional intercorporate relations, furnished by the bureau, leads me to the conclusion that this total should be increased to 24 per cent; and still other evidence, though less conclusive, nevertheless affords reasonable ground for enlarging this estimate by 9 per cent additional. In other words, it is probable that these thirteen concerns directly or indirectly control developed water power and advantageous power sites equal to more than 33 per cent of the total water power now in use. This astonishing consolidation has taken place practically within the last five years. The movement is still in its infancy, and unless it is controlled the history of the oil industry will be repeated in the hydro-electric power industry, with results far more oppressive and disastrous for the people. It is true that the great bulk of our potential water power is as yet undeveloped, but the sites which are now controlled by combinations are those which offer the greatest advantages and therefore hold a strategic position. This is certain to be strengthened by the increasing demand for power and the extension of long-distance electrical transmission.

It is, in my opinion, relatively unimportant for us to know whether or not the promoters of this particular project are affiliated with any of these great corporations. If we make an unconditional grant to this grantee, our control over it ceases. He or any purchaser from him will be free to sell his rights to any one of them at pleasure. The time to attach conditions and prevent monopoly is when a grant is made.

The great corporations are acting with foresight, singleness of purpose, and vigor to control the water powers of the country. They pay no attention to state boundaries and are not interested in the constitutional law affecting navigable streams except as it affords what has been aptly called a "twilight zone," where they may find a convenient refuge from any regulation whatever by the public, whether through the national or the state governments. It is significant that they are opposing the control of water power on the Desplaines River by the State of Illinois with equal vigor and with like arguments to those with which they oppose the National Government pursuing the policy I advocate. Their attitude is the same with reference to their projects upon the mountain streams of the West, where the jurisdiction of the Federal Government as the owner of the public lands and national forests is not open to question. They are demanding legislation for unconditional grants in perpetuity of land for reservoirs, conduits, power houses, and transmission lines to replace the existing statute which authorizes the administrative officers of the Government to impose conditions to protect the public when any permit is issued. Several bills for that purpose are now pending in both Houses, among them the bill (S. 6626) to subject lands owned or held by the United States to condemnation in the state courts, and the bills H. R. 11356 and S. 2661, respectively, to grant locations and rights of way for electric and other power purposes through the public lands and reservations of the United States. These bills were either drafted by representatives of the power companies or are similar in effect to those thus drafted. On the other hand, the administration proposes that authority be given to issue power permits for a term not to exceed fifty years, irrevocable except for breach of condition. This provision to prevent revocation would remove the only valid ground of objection to the act of 1901, which expressly makes all permits revocable at discretion. The following amendment to authorize this in national forests was inserted in last year's agricultural appropriation bill:

"And hereafter permits for power plants within national forests may be made irrevocable, except for breach of condition, for such term, not exceeding fifty years, as the Secretary of Agriculture may by regulation prescribe, and land covered by such permits issued in pursuance of an application filed before entry, location, or application, subsequently approved under the act of June 11, 1906, shall in perpetuity remain subject to such permit and renewals thereof."

The representatives of the power companies present in Washington during the last session agreed upon the bill above mentioned as the most favorable to their interests. At their request frequent conferences were held between them and the representatives of the administration for the purpose of reaching an agreement if possible. The companies refused to accept anything less than a grant in perpetuity and insisted that the slight charge now imposed by the Forest Service was oppressive. But they made no response to the specific proposal that the reasonableness of the charge be determined through an investigation of their business by the Bureau of Corporations.

The amendment of the agricultural bill providing for irrevocable permits, being new legislation, was stricken out under the House rules upon a point of order made by friends of the House bill—that is, by friends of the power companies. Yet, in the face of this record, the power companies complain that they are forced to accept revocable permits by the policy of the administration.

The new legislation sought in their own interest by some companies in the West, and the opposition of other companies in the East to proposed legislation in the public interest, have a common source and a common purpose. Their sources is the rapidly growing water-power combination. Their purpose is a centralized monopoly of hydro-electric power development free of all public control. It is obvious that a monopoly of power in any community calls for strict public supervision and regulation.

The suggestion of the Senate Committee on Commerce in their report on the present bill that many of the streams for the damming of which a federal license is sought are, in fact, unnavigable is sufficiently answered in this case by the action of the House Committee on Interstate and Foreign Commerce upon this very measure. As stated in the House on March 18, 1908, by Mr. RUSSELL of Missouri, a bill to declare this river unnavigable was rejected by that committee.

I repeat the words with which I concluded my message vetoing the Rainy River bill:

"In place of the present haphazard policy of permanently alienating valuable public property we should substitute a definite policy along the following lines:

"First. There should be a limited or carefully guarded grant in the nature of an option or opportunity afforded within reasonable time for development of plans and for execution of the project.

"Second. Such a grant or concession should be accompanied in the act making the grant by a provision expressly making it the duty of a designated official to annul the grant if the work is not begun or plans are not carried out in accordance with the authority granted.

"Third. It should also be the duty of some designated official to see to it that in approving the plans the maximum development of the navigation and power is assured, or at least that in making the plans these may not be so developed as ultimately to interfere with the better utilization of the water or complete development of the power.

"Fourth. There should be a license fee or charge which, though small or nominal at the outset, can in the future be adjusted so as to secure a control in the interest of the public.

"Fifth. Provision should be made for the termination of the grant or privilege at a definite time, leaving to future generations the power or authority to renew or extend the concession in accordance with the conditions which may prevail at that time."

Further reflection suggests a sixth condition, viz:

The license should be forfeited upon proof that the licensee has joined in any conspiracy or unlawful combination in restraint of trade, as is provided for grants of coal lands in Alaska by the act of May 28, 1908.

I will sign no bill granting a privilege of this character which does not contain the substance of these conditions. I consider myself bound, as far as exercise of my executive power will allow, to do for the people, in prevention of monopoly of their resources, what I believe they would do for themselves if they were in a position to act. Accordingly I shall insist upon the conditions mentioned above not only in acts which I sign, but also in passing upon plans for use of water power presented to the executive departments for action. The imposition of conditions has received the sanction of Congress in the general act of 1906, regulating

the construction of dams in navigable waters, which authorizes the imposing of "such conditions and stipulations as the Chief of Engineers and the Secretary of War may deem necessary to protect the present and future interests of the United States."

I inclose a letter from the Commissioner of Corporations, setting forth the results of his investigations and the evidence of the far-reaching plans and operations of the General Electric Company, the Westinghouse Electric and Manufacturing Company, and other large concerns, for consolidation of the water powers of the country under their control. I also inclose the memorandum of the Solicitor-General, above referred to.

I esteem it my duty to use every endeavor to prevent this growing monopoly, the most threatening which has ever appeared, from being fastened upon the people of this nation.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *January 15, 1909.*

DEPARTMENT OF COMMERCE AND LABOR,
BUREAU OF CORPORATIONS,
Washington, January 14, 1909.

SIR: I have the honor to submit herewith a report on certain features of the concentration of water powers.

The water-power situation has been greatly changed by recent improvements in electric-power transmission. Two-hundred-mile transmission is now regarded as commercially possible, even in the cheaper coal areas. A 200-mile radius opens an area of 120,000 square miles for the marketing of power from a given power plant.

A strong movement toward concentrating the control of water powers has accompanied this change. A very significant fact is that this concentration has taken place practically in the last five years. The chief existing concentrations are as follows:

(1) General Electric, being those power companies controlled by or affiliated with the General Electric Company or its subsidiary corporations.

(2) Westinghouse, being those similarly connected with the Westinghouse Electric and Manufacturing Company.

(3) Other concentrations of water power which can not at present be identified with either of the first two.

Intercompany relations are easily concealed. Strictly judicial proof of such community of interests is rarely obtainable, nor is it necessary for practical purposes. It is sufficient to give, as herein, the significant evidential facts, leaving the obvious deductions to be made therefrom.

Therefore the General Electric and the Westinghouse concentrations are classified in the following groups:

(*a*) Those where a control by one or the other of these parent companies, directly or through subsidiary corporations, is admitted.

(*b*) Those where such control is inferred from substantial evidence (hereinafter summarized) with reasonable conclusiveness.

(*c*) Those where such control is at least partially indicated, though not proven, by the available evidence.

This report does not by any means assume to be a complete survey even of the present conditions of concentration. There may be many further affiliations as yet undiscovered.

The exact relations, if any, between these two groups—General Electric and Westinghouse—can not now be stated. General Electric and Westinghouse patents have been pooled since 1896, and certain individuals are interested in both General Electric and Westinghouse power companies.

(1) GENERAL ELECTRIC.

The control of the General Electric Company is shown directly or through subsidiary corporations, or indicated by the appearance of the names of certain individuals unquestionably connected with the General Electric Company.

Such subsidiary corporations are:

United Electric Securities Company (Maine, 1890).
Electrical Securities Corporation (New York, 1904).
Electric Bond and Share Company (New York, 1905).

Such individuals most closely connected with General Electric Company water-power control are—

Sydney Z. Mitchell, vice-president and treasurer Electric Bond and Share Company (General Electric; see above), formerly with Stone & Webster, of Boston, to be mentioned later.

J. D. Mortimer, assistant secretary Electric Bond and Share Company (General Electric; see above) and director of American Gas and Electric Company.

C. N. Mason, vice-president Electrical Securities Corporation and of United Electric Securities Company (General Electric; see above).

H. L. Doherty, president American Gas and Electric Company, which in 1908 controlled at least 19 lighting and gas companies in various parts of the United States, and is, in turn, controlled by the Electric Bond and Share Company (General Electric; see above).

Other names which may be mentioned are—

C. A. Coffin, president General Electric Company.

A. W. Burchard, assistant to the president, General Electric Company, and director of American Gas and Electric Company (General Electric).

C. W. Wetmore, director of Electric Bond and Share Company.

Hinsdill Parsons, vice-president General Electric Company and director of Electric Bond and Share Company.

(*a*) Those water-power companies which are admittedly controlled by the General Electric Company or its subsidiary companies are—

Schenectady Power Company, New York, developments on the Hoosick River at Schaghticoke and Johnsonville, with a total development of 26,000 horsepower. This company is owned outright by the General Electric Company.

Carolina Power and Light Company, at Raleigh, N. C., with 4,000 horsepower installed on the Cape Fear River, and leasing power, in addition, on the Neuse River. The stock of this company is held by the Electric Bond and Share Company (General Electric) and voted by Mr. J. D. Mortimer. C. Elmer Smith, of Smith interests in Westinghouse group, is also interested.

Rockingham Power Company, in North Carolina, on the Yadkin River, in process of construction, with an installation to be of 32,000 horsepower. This company is financed by the Electrical Securities Corporation (General Electric), C. N. Mason, of the latter, being president. C. Elmer Smith (see above) is also interested.

Animas Power and Water Company, Colorado, on the Animas River, with 8,000 horsepower installed, is controlled through the Electric Bond and Share Company (General Electric).

Central Colorado Power Company, in Colorado, on the Grand River, with an installation to be of 18,000 horsepower, is also controlled through the Electric Bond and Share Company (General Electric).

(*b*) Those water-power companies, the control of which by the General Electric Company or its subsidiary companies is reasonably inferred, are—

Montgomery Light and Water Power Company, near Montgomery, Ala., on the Tallapoosa River, with an installation of 6,000 horsepower. H. L. Doherty, president American Gas and Electric Company (General Electric), is first vice-president of this company.

The Summit County Power Company, at Dillon, Colo., with an installation of 1,600 horsepower, has Mr. H. L. Doherty, of American Gas and Electric Company (General Electric), on its directorate.

Butte Electric and Power Company (Montana), a holding company for various subsidiary power companies, to wit: Montana Power Transmission Company, Madison River Power Company, Billings and Eastern Montana Power Company. These companies comprise six water-power developments in operation, with a total installation of 43,000 horsepower. The holding company (Butte Electric) is apparently controlled jointly by C. W. Wetmore, of Electric Bond and Share Company (General Electric), and C. A. Coffin, president of General Electric Company. P. E. Bisland, secretary, was formerly with Electrical Securities Corporation (General Electric).

Washington Water Power Company has three developments in Washington and Idaho, on the Spokane River, with a total installation of 61,000 horsepower. Mr. Hinsdill Parsons, vice-president of General Electric Company and Electric Bond and Share Company (General Electric), is on the directorate.

Great Western Power Company, in California, on the north fork of the Feather River in Butte County, with an installed capacity of 53,000 horsepower. On its directorate are Mr. A. W. Burchard, of the General Electric Company, and Mr. A. C. Bedford, of the Standard Oil Company.

(*c*) Control partially indicated.

There are also a number of other water-power companies, with a total of about 420,000 horsepower (including installations and power sites), whose connection with the General Electric Company is at least partially indicated, though the evidence thereto is by no means conclusive.

(2) WESTINGHOUSE.

The Westinghouse group contains the following companies:

The Security Investment Company;

Electric Properties Company (New York, 1906), successor to Westinghouse, Church, Kerr & Co.; and the

Smith interests, represented by C. Elmer Smith and S. Fahs Smith, of S. Morgan Smith Company, important manufacturers of water turbines. While C. Elmer Smith is interested in at least two General Electric power companies (Carolina and Rockingham; see above), the Smith interests seem especially harmonious with the Westinghouse group, and are so classified.

The individual names most prominently identified are:

John F. Wallace, of New York, president Electric Properties Company.

George C. Smith, of Pittsburg and New York, vice-president and director of the Electric Properties Company.

C. Elmer Smith, of Smith interests.

(*a*) Those power companies which are admittedly Westinghouse are:

Atlanta Water and Electric Power Company, on the Chattahoochee River above Atlanta, Ga., with an installation of 17,000 horsepower. C. Elmer Smith is president and George C. Smith and S. Fahs Smith directors.

Ontario Power Company of Niagara Falls, a Canadian corporation on the Canadian side, with an installation of 66,000 horsepower. Together with its distributing company in the United States, the Niagara, Lockport and Ontario Power Company, it is known as a Westinghouse concern, H. H. Westinghouse being president of the latter, and the majority of its stock being voted by the Electric Power Securities Company of New York, a construction company owned by Westinghouse interests.

(*b*) Those power companies whose connection with Westinghouse interests is inferred from substantial evidence (hereinafter summarized) are:

Albany Power and Manufacturing Company, near Albany, Ga., with 3,500 horsepower installed, on the Kinchatoonee, and owning besides a site on the Flint River, estimated at 10,000 horsepower, has for its vice-president C. Elmer Smith (Smith interests).

Electric Manufacturing and Power Company, on the Broad River, near Spartanburg, S. C., with 11,000 horsepower installed, as on its directorate E. H. Jennings, of Pittsburg, a director of the Electric Properties Company (Westinghouse).

Savannah River Power Company, on the Savannah River, near Anderson, S. C., has an installed development of 3,000 horsepower, and owns besides a site of 6,000 horsepower. This company has on its directorate C. Elmer Smith (Smith interests).

Gainesville Electric Railway Company, with 1,500 horsepower installed, on the Chestagee River, a tributary of the Chattahoochee, near Gainesville, Ga. Eighty-five per cent of its stock is owned by the North Georgia Electric Company (Smith interests).

North Georgia Electric Company; one development of 3,000 horsepower and at least seven other power sites on the upper waters of the Chattahoochee, and through the Etowah Power Company, personally identified with itself, it owns four other sites on the headwaters of the Coosa River. C. Elmer Smith is vice-president.

Chattanooga and Tennessee River Power Company, in process of construction at Hale Bar, on the Tennessee River, below Chattanooga, in cooperation with the War Department, by which the Government obtains slack-water navigation. The company in return receives ownership of the power of 58,000 horsepower to be installed. This company is being personally financed by A. N. Brady, of New York, a director of the Westinghouse Electric and Manufacturing Company. Mr. Brady is also a director of the American Tobacco Company, whose interests control the Southern Power Company (see below).

Northern Colorado Power Company, which has a steam development at Lafayette, Colo., and is projecting power plants on the Platte, has John F. Wallace and George C. Smith on its directorate (Westinghouse).

(*c*) Control partially indicated.

There are also a number of other water-power companies, with a total of about 102,000 horsepower (including installations and sites), whose connection with the Westinghouse Company is at least partially indicated, though the evidence thereto is by no means conclusive.

(3) OTHER CONCENTRATIONS.

The General Electric and Westinghouse companies present the most important examples of water-power concentration, as above set forth. There are, however, a number of other companies and interests further showing the facts and tendencies of concentration.

The more important instances are as follows:

The Gould interests, located in Virginia, with undeveloped powers and power sites on the James and Appomattox amounting to 20,000 horsepower, and owning besides other sites on the Appomattox and Rappahannock rivers.

Southern Power Company, the largest operating power company in the South, has 90,000 horsepower installed in three developments, 31,000 horsepower in process of construction, and at least seven other power sites in North Carolina and South Carolina, with a total potential capacity of 75,000 horsepower. This company supplies 110 cotton mills and other factories in at least 28 towns, including a population of about 200,000. Messrs. B. N. Duke, J. B. Duke, and Junius Parker, of the American Tobacco Company, are officers and directors.

Stone & Webster, of Boston. This concern owns and controls powers and sites in Florida, Georgia, Minnesota, and Wisconsin, and in the Puget Sound region, with a total capacity of about 150,000 horsepower. Mr. Sydney Z. Mitchell, now of the Electric Bond and Share Company (General Electric), was formerly connected with Stone & Webster, and in 1908, according to Moody's Manual, 1908, was still a director in three of Stone & Webster's subsidiary corporations, to wit, Puget Sound Electric Railway, Tacoma Railway and Power Company, and Puget Sound Power Company.

Charles H. Baker interests, having proposed developments in Alabama estimated at 130,000 horsepower.

Commonwealth Power Company, together with the Grand Rapids-Muskegon Power Company (both under same interests), controlling 13 developed water powers in Michigan, with a total installation of 43,000 horsepower. A harmonious connection apparently exists with the Eastern Michigan Power Company, which controls all the power sites on the Au Sable River, Michigan.

United Missouri River Power Company, a holding company controlling at least three subsidiaries, which, with a closely related company, have five developed powers and one in construction, making a total of 57,500 horsepower.

Portland General Electric Company, with developments on the Clackamas and Willamette rivers amounting to 22,500 horsepower, near Portland, Oreg. A. C. Bedford, a director of the Standard Oil Company, is president, and F. D. Pratt, also of Standard Oil Company, is a director.

Pacific Gas and Electric Company. This is a very important holding company of the California Gas and Electric Corporation and the San Francisco Gas and Electric Company. These two latter companies in turn represent the consolidation or acquisition of the stock or property of over 30 power or power-distributing companies in California. They control 11 water-power developments, with a total installed plant of 118,000 horsepower.

Pacific Light and Power Company, with another company controlled by the same interests, known as the "Huntington interests," represent eight developments in California, with a total of 30,000 horsepower. Henry E. Huntington is vice-president and Howard E. Huntington a director.

Edison Electric Company, with six developments in California and a total of 33,000 horsepower.

Hudson River Electric Power Company, a holding company for the Hudson River Water Power Company, Hudson River Power Transmission Company, Empire State Power Company, with developments at Spiers Falls and Mechanicsville, on the upper Hudson, and Schoharie Creek, near Amsterdam, N. Y., amounting to 45,000 horsepower installed, and sites owned in the Mohawk, Sacandaga, and Upper Hudson valleys, amounting to 30,000 horsepower, or a total of 75,000 horsepower. C. Elmer Smith was director of the holding company to within a year.

SUMMARY.

An estimate of the water power, developed and potential, now controlled by the General Electric interests, admitted or sufficiently proven, is about 252,000 horsepower; by the Westinghouse interests, similarly known, about 180,000 horsepower, and by other large power companies, 875,000 horsepower. This makes a total of 1,307,000 horsepower. Adding the horsepowers of the third class (c), those whose connection with these two great interests is at least probable, to wit, 520,000 horsepower, we have a small group of 13 selected companies or interests controlling a total of 1,827,000 horsepower.

Assuming that the water power at present in use by water-power plants in the United States is 5,300,000 horsepower, as estimated by the United States Census and Geological Survey from figures of installation, it is seen that approximately a quantity of horsepower equal to more than 33 per cent of that amount is now probably controlled by this small group of interests. Furthermore, this percentage by no means tells the whole truth. The foregoing powers naturally represent a majority of the best power sites. These sites are strategic points for large power and market control. Poorer sites will not generally be developed until these strategic sites are developed to their full capacity. And should these strategic sites be "coupled up" they become still more strategic. There are powerful economic reasons for such coupling. The great problem of water-power companies is that of the "uneven load," and not only an uneven load but of an uneven source of power, because of the fluctuating flow of the stream. A coupling up utilizes not only the different storages in the same drainage basin, but, of still greater import, the different drainage flows of different basins. Also by coupling up powers which have largely "day loads" can at night help out other powers which have largely "night loads," and vice versa. Coupling up is rapidly in progress in the United States. The Niagara Falls Power Company and the Canadian Niagara Power Company are coupled. The Southern Power Company, in North Carolina and South Carolina; the Commonwealth Power Company, in Michigan; the Pacific Gas and Electric Company, the Pacific Light and Power Company, and the Edison Electric Company, in California—each concern has its various developments coupled up into one unit.

The economic reasons urging water-power concentration are thus obvious. The facts set forth above show the very rapid and very recent concentration that has already occurred, practically all in the last five years. These economic reasons and business facts indicate clearly the further progress toward concentration that is likely to occur in the near future. It is obvious that the effect on the public of such present and future conditions is a matter for serious public consideration.

Very respectfully, yours,

HERBERT KNOX SMITH,
Commissioner of Corporations.

The PRESIDENT.

[Memorandum by the Solicitor-General on the power of Congress, in granting licenses for dams and other structures in navigable streams, to impose certain conditions.]

MAY 11, 1908.

The general principle that a grant of property or of any right or privilege may be upon conditions needs no citation of authority. If a grantor may give or withhold, he may give upon terms. The authority to make a grant generally carries with it the authority to withhold, to impose conditions, to modify, and to terminate.

The Pacific railroad charters contained the condition that the government service in transporting mails, troops, supplies, and so forth, should have the preference, and in some cases in consideration of the land grants the transportation was to be free from all toll or other charge upon any property or troops of the United States. (Sec. 6, act of July 1, 1862, 12 Stat., 489, 493, Union Pacific; sec. 3, act of Mar. 3, 1863, id., 772, 773, Missouri Pacific; see also act of July 1, 1864, 13 Stat., 339; sec. 11, act of July 2, 1864, id., 365, 370, Northern Pacific, in which Congress reserved the right to restrict charges for government transportation; sec. 11, act of July 27, 1866, 14 Stat., 292, 297.) In the acts to aid in the construction of telegraph lines "to secure to the Government the use of the same for postal, military, and other purposes," it was provided that the government business shall have priority over all other business, and shall be sent at rates to be annually fixed by the Postmaster-General (e. g., sec. 2, act of July 24, 1866, 14 Stat., 221).

These charters, licenses, and grants were made under the federal authority over interstate commerce and over post-roads, and manifestly the reservations or conditions were germane to the grants and for the benefit of the whole people, being for the benefit of their government. In reference to the proposal in connection with the control of the Government over navigation and the improvement of inland waterways to limit permissive licenses for dams and other structures to a definite time, and to impose a charge for the power developed or for any use of the surplus water, it is objected that this is to usurp power or to pervert and misapply federal power to an end or object to which it has no relation.

There is no doubt of the national power over navigation, and the inquiry presupposes governmental control as proposed and the grant of licenses only in navigable streams. The question is wholly one of power. No one questions the power of Congress over navigation and navigable waters as a branch of its power to regulate interstate and foreign commerce, and the power fails here, it is said, because of the lack of connection between navigation and the purpose for which the power is to be used, because to impose terms for the use of water made possible by structures in aid of navigation or structures permitted and licensed as not seriously interfering with navigation, by limiting the time during which that privilege or right shall be enjoyed and by imposing a charge for it, is not germane to the only branch of power which Congress may constitutionally exercise here; that is, the power over navigation. It is said that the State and not the United States controls and administers the rights which riparian owners may possess in the water or the use of the water; that riparian owners do possess rights of property which may not be taken from them under the guise of a power to regulate navigation; and that the States and not the United States are clothed as matter of sovereignty and dominion with the power over and the property in the waters themselves and the beds of the streams.

But first and in general, whatever the rights of the individual riparian or the particular State, which we will examine later, there is no doubt whatever that the federal authority over navigation is paramount to everything within its sphere, and the only question here would be the truth as a fact of the federal exercise of power, whether it was actually the authority over navigation which is being exercised, and whether the proposed law or laws which carry that authority into effect are a legitimate means of exercising the power and whether there is a genuine and legitimate relation between the power and the objects and purposes to which it is applied.

The question is, then, as to the reality and degree of connection between the power and the method and effect of its exercise. In the recent measures proposed for acquiring lands in the Southern Appalachian and White mountains for national forest purposes the test is that the land shall be situated on the watersheds of navigable streams and shall be more valuable for the regulation of stream flow than for other purposes. The House committee reports show, amid divergent views as to whether the particular thing proposed was in fact a legitimate exercise of the power, that all agreed Congress, having an unquestioned right to improve navigable streams, may take land for that purpose whenever in the judgment of Congress it is necessary to the proper exercise of the power. Thus the committee resolved that the Federal Government has no power to acquire lands within a State solely for forest reserves, but under its constitutional power over navigation may appropriate for the purchase of lands for forest reserves in a State, provided it clearly appears that such reserves have a direct and substantial connection with the conservation and improvement of the navigability of a river actually navigable in whole or in part; and that any appropriation made therefor is limited to that purpose (Mr. JENKINS). Mr. PARKER did not concur, thinking the question at least doubtful, and that the United States has no interest in rivers except for purposes of navigation, and "it may fairly be said that the rivers of the Atlantic slope are not navigable above tidal flow."

Messrs. Littlefield, DIEKEMA, and BANNON have no doubt of the power, and think that if reforesting the watershed at its source is an appropriate means plainly adapted to the end of preventing the depositing in the river of accumulations that would obstruct its navigable portion, Congress has the right to acquire and control for that purpose. But the improvement of navigability in this way, by increasing the flow of the water, must not be theoretical, but physical, tangible, actual, and substantial, demonstrable by satisfactory, competent testimony in order to justify an appropriation. And the protection and improvement of navigability must also be the real, effective, sole, and not the incidental, purpose of the appropriation.

Mr. BRANTLEY holds that Congress has the constitutional power to acquire lands and forest reserves in a State by purchase, condemnation, or otherwise, as an aid to navigation, if it be made to appear to Congress that such reserves would materially or substantially aid navigation.

It is thus evident from all these views that there is no doubt of the power, and that the only real question is whether navigability is substantially aided or whether the proposed exercise of the power is too remote and fanciful to commend itself to the judgment of Congress as an appropriate means.

It is to be said respecting structures in navigable streams that the legislation of Congress has passed through an evolution up to the point now reached and the proposals now made. The Government has built many public works in aid of navigation where the improvement and protection were obvious, by dams, locks, and canals, an example of which is the canalization of the St. Marys River on the connecting waters of the Great Lakes just as they issue from Lake Superior and on the international boundary between this country and Canada. Another feature of this evolution may be noted here in that region. The

United States granted an easement for a right of way through public reserved lands of the United States to the State of Michigan for purposes of this canal, and then the state administration was surrendered and all rights reconveyed to the United States, so that locks and other works in aid of navigation there might be undertaken commensurate with the power and interests of the Nation and adequate for the enormous traffic passing that point and still increasing by leaps and bounds.

Sometimes Congress commits to municipalities or corporations or private individuals the construction and operation of works in aid of navigation where actual and practical navigation already exists and is being improved, as by the act of April 26, 904 (33 Stat., 309); and at points along such reaches of the stream where, except for the government canals and other works in aid of navigation, the river itself is not actually navigable (e. g., act of May 9, 1906, 34 Stat., 183; id., 211, 1288; act of March 6, 1906, 34 Stat., 52; extract from river and harbor act of March 2, 1907, 34 Stat., 1073, 1094); or permits structures for power development at points in rivers where government plans of navigation, improvement by locks, dams, and canals have already been adopted and the work begun, as at Muscle Shoals on the Tennessee River or on the Coosa River in Alabama; or gives the right to build a dam, maintain and operate power stations in connection with it in consideration of the construction of locks, and a dry dock in place of existing ones owned and operated by the United States, namely, Des Moines Rapids Canal, act of February 9, 1905 (33 Stat., 712); or the particular structure is also subjected to the provisions of the general dam act of June 21, 1906, hereafter to be referred to. (Act of February 25, 1907, 34 Stat., 929; act of April 23, 1906, id., 130; act of March 3, 1905, 33 Stat., 100.)

It is difficult to see any difference in principle between such a case granting the right to develop and use power in consideration of improving navigation facilities and the imposition of any other reasonable amount or kind of charge. Of course an illegal power can not be justified because it has already been illegally exercised; but the actual exercise of the power and the development of the matter under the acts of Congress are instructive and significant.

In the numerous cases where permissive licenses have been given to build dams or other structures in navigable streams at points where they are not at present actually navigable or practically used for purposes of navigation there is no question, first, that the stream being navigable as an integral thing or unit, the control over it as such belongs to Congress and not to the State. The action of Congress is an exclusion of any state authority which might otherwise exist, and the theory appears to be that although the structure may be an interference with the existing navigability, such as it is, it is, in the opinion of Congress, a reasonable interference. Congress by the very fact of its interposition and grant of license is looking to navigable character alone and to the future improvement or protection of navigation, and accordingly invariably Congress either imposes the necessity of making a proper lock or dam in all such cases and sluices or reserves the right to compel the construction in the future of a suitable lock for navigation purposes in connection therewith, subjects all plans to the approval of the Secretary of War, reserves the right at any time to take possession of the dam without compensation and control the same for the purposes of navigation, and imposes the duty of building in connection with the dam or canal or other works a wagon and foot bridge if desired in connection therewith for the purpose of travel; and the right to alter, amend, and repeal the grant or to require the alteration or removal of the structure is also reserved. (Act of June 4, 1906, 34 Stat., 265; act of June 16, 1906, id., 296.)

Not all these conditions appear in every such grant or license, but they all do appear from time to time in different acts, and it is clear that whether Congress is itself actually improving and protecting navigation or authorizing some other agency or instrumentality to do so in its behalf, or permitting a reasonable obstruction in the particular stream and place when the interests of navigation do not forbid, Congress is proceeding altogether under that power, expressly reserves full control in that behalf, and either provides for locks and canals in the particular construction authorized as part of the authority to build, or else reserves the right to do so whenever the interests of navigation demand. There are many instances of such acts. I cite a few: Act of July 3, 1886 (24 Stat., 123); act of February 27, 1899 (30 Stat., 904); act of June 14, 1906 (34 Stat., 266).

These other points are to be observed in this development of the law: The present and future interests of the United States are provided for (sec. 1, act of June 21, 1906, 34 Stat., 386); uniformly there is a stipulation that the United States shall be entitled to free use of the water power developed (id., and many other acts); a general limit of time for construction is imposed (id.); it is a standing provision and reservation that the construction authorized shall not interfere with navigation; the licensee shall be liable to riparians for damages caused by overflow, etc., the dam and works authorized shall be limited to the use of the surplus water not required for navigation (act of May 9, 1906, 34 Stat., 183); Congress may revoke, and there are provisions for forfeiture for breach of conditions. Such provisions and conditions, as I have said, appear throughout all these statutes.

Note also the special provisions in the river and harbor act of June 13, 1902 (32 Stat., 358), and in the act of June 28, 1902 (id., 408), by which leases or licenses for the use of water power in the Cumberland River, Tennessee, may be granted by the Secretary of War to the highest responsible bidders, after advertisement, limited to the use of the surplus water not required for navigation and under the condition that no structures shall be built and no operations conducted which shall injure navigation in any manner or interfere with the operations of the Government or impair the usefulness of any government improvement for the benefit of navigation.

In some casese these acts provide not only for sluiceways for logs, etc., but for sluiceways and ladders for fish. It might be as reasonably objected that the United States could make no such condition in connection with its licenses for the preservation of fish in the interest of all the people, because that was solely a matter of state control and largely a matter of riparian right, to say that it could not impose conditions and charges respecting the power developed by the surplus water.

Occasionally the title of the act recognizes the joint purpose or the collateral and subsidiary incident of power. Thus, an act of May 1, 1906 (34 Stat., 155), relative to the Rock River license, is entitled "An act permitting the building of dams, etc., in aid of navigation and for the development of water power.

In an act of June 29, 1906 (34 Stat., 628), permitting the erection of a lock and dam in aid of navigation in the White River, Arkansas, it is provided that the licensee shall purchase and pay for certain lands necessary for the successful construction and operation of the lock and dam and leave them to the United States, and that in consideration of the construction of these structures free of cost to the United States the United States grants to the licensee rights possessed by it to use the water power produced by the dam and to convert the same into electric power or otherwise utilize it for a period of ninety-nine years, but to furnish to the United States, free of cost, sufficient power to operate the locks and to light the United States buildings and grounds.

Another instance of authority granted to the Secretary of War to make leases or issue licenses for the use of water power is shown by the river and harbor act of September 19, 1890, respecting the Green and Barren rivers.

Without dwelling further on this subject, it is plain that, considering this whole body of laws, the United States is legitimately exercising the power over interstate commerce under the heading of the improvement and protection of navigation, and is imposing proper—that is, not only just, but legal—terms, conditions, and reservations, and as a question of power this is as clearly true when the United States licenses a structure which is a temporary and partial obstruction to navigation at some point where the Government is not yet ready to complete and unify the navigable use of the stream as where the Government is itself developing an actual plant for the improvement of navigation by constructing the appropriate works. And the connection between the power and its application is as evident and germane even where water power is developed and a charge made for it, because, while that or some other use of the water outside navigation use is the primary or the sole object of the licensee and the navigation use is only incidental to that use, so far as the licensee is concerned, that other use, from the standpoint of the Government and the people at large, is always and only incidental to the improvement and protection of navigation and that use. This is true as a real fact and principle controlling the subject, even if the ultimate improvement of navigation—the actual navigation use, that is—is remote in time and as a practical undertaking, and is contemplated, so to speak, far ahead.

State law, it is true, in general determines the title of riparian owners in the beds of both navigable and nonnavigable streams, and their rights of user in the flowing water. This riparian property and right, which, respecting title to the beds of nonnavigable streams as extending ad filum aquæ, is pretty uniform throughout the States, varies as to navigable streams according as States have followed the common-law rule of stopping the private title at the shore, or having followed the rule on unnavigable waters and extended it to the middle thread of the stream. Regarding the rights of the riparian in the water, the rules vary from the common-law doctrine in the humid States that the upland owner is entitled to the flow of the water as it was accustomed to flow to the doctrine of prior appropriation for beneficial use in the arid States, including the combination of the two doctrines known as the "California rule." But always and everywhere the use must be reasonable, and there is an order of preference in the uses beginning with domestic use. Even on public navigable rivers the riparian owner has many rights of user subject to the limitation that his use must be reasonable, so as not to injure the rights of others above or below him on the stream, and subject to the public easement of navigation, and generally to the public right of fishing. The riparian owner has, for instance, the right of access, but when the paramount control over navigation interferes this is a barren right, and he is not entitled to compensation; and it seems that even in States where he has the title to the submerged lands out to the middle of the stream the title is a bare, technical title not available for access or any other purpose, or at least not entitling him to compensation if the United States, for any lawful purpose, should appropriate and occupy the subaqueous lands. (Scranton *v.* Wheeler, 179 U. S., 141.)

So much for the private and individual interest of the riparian owner; and it is to be observed respecting the pending proposals that such rights are always capable of being asserted in a court of law; that presumably the Government or the government licensee will have acquired the necessary riparian ownership, and that provision is expressly made in all statutes of this character for compensation by the licensee to the riparian or others for all damages caused.

Now, as to the state interest, there is no doubt that a State may undertake the improvement of a navigable stream within her borders, or license structures over it or in it, until the United States under legislation by Congress assumes jurisdiction. In this matter and in similar instances the Supreme Court has held that there is a concurrent function and power, and that nonaction by Congress amounts to permission to the State to occupy the field. (Wilson et al. *v.* The Black Bird Creek Marsh Co., 2 Pet., 245, 252–253; The Passaic Bridges, 3 Wall., 793; Pound *v.* Turck, 95 U. S., 463; Escanaba Co. *v.* Chicago, 107 U. S., 683; Morgan *v.* Louisiana, 118 U. S., 465; New York, etc., R. R. Co. *v.* New York, 165 U. S., 631; United States *v.* Rio Grande Irrigation Co., 174 U. S., 690, 703.) But of course it can not be admitted that a State has any jurisdiction or control whatsoever after Congress has determined that the stream is navigable (whether it is explicitly so denominated or not) and proceeds to improve or protect the navigation or navigable capacity. Then the federal jurisdiction becomes plenary, paramount, and exclusive. The very fact that Congress has legislated as it has done respecting the various streams and waters embraced in the legislation above reviewed is conclusive proof that the national jurisdiction has completely ousted state jurisdiction over those waters and at those points. This seems to be the view of the States themselves and on all hands, and I do not understand that this position is disputed even by those who claim that for purposes of power and all other incidental uses of the water other than for navigation the state authority is supreme and exclusive.

It is a mistake to suppose that the federal jurisdiction and the navigability are doubtful because the stream may not be navigable now at the particular point. It is to make it navigable at some time, even if a remote future is contemplated, and slow progress toward a comprehensive and unifying plan—it is to improve navigation, to increase navigable capacity, and in the meantime to protect navigation that the national power interposes. In many senses a navigable stream is a unit. It is none the less a navigable stream because there is an obstruction at a particular point (The Montello, 20 Wall., 430), being navigable above or below or both. And while the test of navigability at any particular point is whether the stream is navigable in fact, the upper reaches of a stream and the preservation and maintenance of flow at the sources, although the stream is not navigable there, are clearly within the scope of the power as directed to the continuing protection as well as the immediate improvement of navigation. The case of United States *v.* Rio Grande Irrigation Co. (174 U. S., 690), by the necessary effect of the final order at page 710, sustains the contention that the United States may interpose to control or prevent the irrigation or other use of water above the limit of navigability, if it shall appear as a fact that such use impairs the navigable capacity over that portion of the stream where navigation does exist.

The preliminary report of the Inland Waterways Commission, with the President's message transmitting it to Congress, and the bill introduced in the Senate by Mr. NEWLANDS (S. 500), with the report and recommendations of the Secretary of War upon the same, are very instructive and significant in this matter. The bill reflects and embodies the main ideas and recommendations of the report and will alone serve the purposes of our consideration after one or two references to the report. The report and the President's message point out that a river system from the forest headwaters to the mouth is a unit and that navigation of the lower reaches can not be fully developed without the control of floods and low waters by storage and drainage; that navigable channels are directly concerned with the protection of source waters and with soil erosion, which forms bars and shoals from the richest portions of farms; and that the uses of a stream for domestic and municipal supply, for power, and often for irrigation, must be taken into account. The development of waterways and the conservation of forests are pressing needs and are interdependent. The systematic development of interstate commerce by improvement of inland waterways should proceed in coordination with all other uses of the waters and benefit to be derived from them, which constitute a public asset of incalculable value. The report notes that irrigation projects involving the storage of flood waters (in which, of course, reclamation of arid lands is the chief and primary object) creates canals as well as tending to purify and clarify waters and to conserve supply by seepage during droughts; that, on the other hand, works designed to improve navigation commonly produce headwater and develop power; that western projects are "chiefly thus far for irrigation, but prospectively for navigation and power."

Accordingly the great central idea of Mr. NEWLANDS'S measure is the conservation and correlation of the natural resources of the country in navigable waters, which are national resources, because essentially dependent upon and developed from the preservation and regulation of stream flow and the improvement of navigation. For example, section 2 of the bill provides for examinations, surveys, and investigation "with a view to the promotion of transportation; and to consider and coordinate the questions of irrigation, swamp-land reclamation, clarification of streams, utilization of water power, prevention of soil waste, protection of forests, regulation of flow, control of floods, transfer facilities and sites, and the regulation and control thereof, and such other questions regarding waterways as are related to the development of rivers, lakes, and canals for the purposes of commerce."

And again, by section 6, the projects authorized and begun under section 5 "may include such collateral works for the irrigation of arid lands (for reclamation and conservation as specified) and for the utilization of water power as may be deemed advisable in connection with the development of a channel for navigation, or as aiding in a compensatory way in the diminution of the cost of such project."

Section 7 authorizes the commission to be appointed "to enter into cooperation with States, municipalities, communities, corporations, and individuals in such collateral works."

The report of the Secretary of War on this bill, dated April 17, substantially and by inference approves its purpose and general provisions, while making certain specific suggestions. That report notes the provision of coordination between navigation and other uses of the waters in connection with their improvement for the promotion of commerce among the States, and the provision for cooperation with States, municipalities, etc., so as to promote "union of interests through mutual beneficial cooperation," which "feature is recognized by the War Department as highly desirable." The report also notes the provision for correlating the existing agencies in the departments of War, Interior, Agriculture, and Commerce and Labor, and "the utilization and control of water power available in navigable and source streams developed by works for improving navigation." To meet constitutional and legal objections, certain changes are suggested in order to make it clear that the bill contemplates no extension of federal authority beyond its recognized limits, by language which expressly restricts the plan to the development of navigable inland waterways for the purpose of regulating, improving, and protecting interstate and foreign commerce, and also by language which makes the dependence and connection of irrigation and other uses upon the navigation use more clear and certain.

If the power exists, it is for Congress to say whether the occasion for its exercise is real, and whether the connection between the occasion and the method and results of exercise of the power is substantial, and whether the means employed to carry the power into effect are legitimate. The wisdom, expediency, and justice of the means employed are all for Congress to determine. Certainly it is no objection to a power that its exercise is manifestly of vital importance and advantage to the general welfare. As I have suggested already, the interests of navigation may be a secondary or even negligible consideration with the licensees of the Government, but that does not make the government jurisdiction any the less a constitutional control over navigation, and the real object of the licensee, whether it be the development of power or irrigation, is none the less merely subsidiary and incidental from the government point of view. If the Government by its own works in actual aid of navigation, or by such works undertaken by the licensees and agents, or by private licensed and permitted structures in navigable streams where navigation is not yet in actual course of improvement, develops power, which is the natural and, indeed, necessary result of such works, it is preposterous to say that the Government can not deal with the subject on the basis of or with any reference to the power thus incidentally or intentionally developed, but must let it go to waste or give it away or turn it over to the State.

I repeat that the development of power or of irrigation from surplus waters is subsidiary and collateral to but nevertheless germane to an actual development of navigation or to an exercise of the navigation jurisdiction where development is in abeyance. Of course the terms to licensees should be fair, and this is a matter for the justice as well as the wisdom of Congress to settle. The period of license should be long enough to permit the enterprise to be financed. In some cases it may very likely be that all charges should be nominal for a reasonable period, and the rate per horsepower unit might ultimately be varied in accordance with different conditions of time, place, population, and other tributary factors.

Take a case in illustration: The proposal for the Long Sault on the St. Lawrence River contemplates a 20-foot channel in the river where now there is no navigable channel at all, and under our conventional arrangements with Great Britain vessels of the United States must use the canal on the Canadian side. This is navigation and an improvement to navigation of tremendous consequence and value. The power developed is enormous and correspondingly valuable. Of course the private enterprise which undertakes this public work is entitled to protection and reward. It may be that the contractors, in consideration of the creation of that most valuable channel, should be relieved from any government charges for the power developed for a term of years; but, on the other hand, the power developed, which belongs ultimately to and is held in trust for all the people of the United States, should not be granted forever and for nothing.

I understand that the government engineers and experts estimate that the proper use of the water powers of the country as an asset of the people would in time pay for all contemplated and possible improvement of the navigable inland waterways.

The proposed use of the funds to be produced is further evidence of the essential connection between the improvement of navigation and other uses of water thereby stored and made available, because the charges made are to constitute a permanent and general fund in aid of the development of all navigable waterways. The various States manifest concurrence and willingness toward the government plans, and while that fact would not authorize a scheme otherwise unconstitutional it is of vast practical importance that local jealousies will not be aroused and that the proposals contemplate and would receive cooperation from States, municipalities, and all others locally interested in plans which in the end are for the benefit of the whole people.

Keeping in mind the general principles established and the considerations of proper methods and particular equities which are committed to Congress, the strict constitutionality of the programme proposed can not well be doubted.

[H. R. 17707. Sixtieth Congress of the United States of America, at the second session, begun and held at the city of Washington on Monday, the 7th day of December, 1908.]

An act to authorize William H. Standish to construct a dam across James River, in Stone County, Mo., and divert a portion of its waters through a tunnel into the said river again to create electric power.

Be it enacted, etc., That the consent of Congress is hereby given to William H. Standish, of Reeds Springs, Stone County, Mo., his heirs and assigns, to construct, maintain, and operate a dam in the big bend of the James River in township 23 north, range 24 west, in the county of Stone and State of Missouri, across the said James River at said point and to impound at the narrows in said bend and by canal and tunnel to divert and conduct across said narrows such portion of the water in said river, through said tunnel, into said river again as may be necessary for electric power purposes, all subject to and in accordance with the provisions of the act of Congress entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906: *Provided*, That the Secretary of War shall have at all times control of the use of the water, even to the extent of causing the persons, firms, or corporations taking advantage of the privileges granted herein to cease using the water whenever the same may be necessary for navigation: *And provided further*, That should the United States in the work of improving the aforesaid river find it necessary to flood the aforesaid tunnels, or in any way affect the flow of water through them, the owners or operators of aforesaid tunnels shall have no claim against the United States for damage on account of said flooding of the tunnels or said effect on the flow of water through them.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

J. G. CANNON,
Speaker of the House of Representatives.
CHARLES W. FAIRBANKS,
Vice-President of the United States and President of the Senate.

I certify that this act originated in the House of Representatives.
A. MCDOWELL, *Clerk.*

REPORT OF SENATE COMMITTEE.

DAM ACROSS JAMES RIVER.

The Committee on Commerce, to whom was referred the bill (H. R. 17707) to authorize William H. Standish to construct a dam across James River, in Stone County, Mo., and divert a portion of its waters through a tunnel into the said river again to create electric power, having considered the same, report thereon with a recommendation that it pass without amendment.

Following is a copy of the House report on the bill:

[House Report No. 1256, Sixtieth Congress, first session.]

The Committee on Interstate and Foreign Commerce, to whom was referred the bill (H. R. 17707) to authorize William H. Standish to construct a dam across James River, in Stone County, Mo., and divert a portion of its waters through a tunnel into the said river again to create electric power, having considered the same, report thereon with amendments, and as so amended recommend that it pass.

The bill as amended has the approval of the War Department, as will appear by the indorsements attached and made a part of this report.

Amend the bill as follows:

In line 3, page 1, after the word "That," insert "the consent of Congress is hereby given to."

In lines 4 and 5, page 1, strike out "be, and they are hereby, authorized."

In lines 9 and 10, page 1, strike out "that at the narrows in said bend be, and they are hereby, authorized," and in line 10, page 1, after the word "impound," insert "at the narrows in said bend."

At the end of section 1 add the following:

"*Provided*, That the Secretary of War shall have at all times control of the use of the water, even to the extent of causing the persons, firms, or corporations, taking advantage of the privileges granted herein, to cease using the water whenever the same may be necessary for navigation: *And provided further*, That should the United States in the work of improving the aforesaid river find it necessary to flood the aforesaid tunnels or in any way affect the flow of water through them, the owners or operators of aforesaid tunnels shall have no claim against the United States for damage on account of said flooding of the tunnels or said effect on the flow of water through them."

Strike out all of section 2 and renumber section 3 to section 2.

[Second indorsement.]

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, March 11, 1908.

Respectfully returned to the Secretary of War with recommendation that the accompanying bill (H. R. 17707, 60th Cong., 1st sess.) to authorize the construction of a dam across James River, in Stone County, Mo., and to divert a portion of its waters through a channel into the said river again, to create electric power, be amended as indicated in red thereon.

As thus amended, I am of opinion that the bill makes ample provision for the protection of navigation interests, and I know of no objection to its favorable consideration by Congress so far as those interests are concerned.

SMITH S. LEACH,
Acting Chief of Engineers.

[Third indorsement.]

WAR DEPARTMENT, *March 12, 1908.*

Respectfully returned to the chairman Committee on Interstate and Foreign Commerce, House of Representatives, inviting attention to the foregoing report of the Acting Chief of Engineers, United States Army, and to the accompanying copy of amended bill referred to.

ROBERT SHAW OLIVER,
Assistant Secretary of War.

Following is a copy of a letter of the President received after the bill was referred to this committee:

THE WHITE HOUSE,
Washington, March 13, 1908.

SIR: Numerous bills granting water rights in conformity with the general act of June 21, 1906, have been introduced during the present session of Congress, and some of these have already passed. While the general act authorizes the limitation and restriction of water rights in the public interest, and would seem to warrant making a reasonable charge for the benefits conferred, those bills which have come to my attention do not seem to guard the public interests adequately in these respects. The effect of granting privileges such as are conferred by these bills, as I said in a recent message, "taken together with rights already acquired under state laws, would be to give away properties of enormous value. Through lack of foresight we have formed the habit of granting without compensation extremely valuable rights, amounting to monopolies, on navigable streams and on the public domain. The repurchase at great expense of water rights thus carelessly given away without return has already begun in the East, and before long will be necessary in the West also. No rights involving water power should be granted to any corporation in perpetuity, but only for a length of time sufficient to allow them to conduct their business profitably. A reasonable charge should of course be made for valuable rights and privileges which they obtain from the National Government. The values for which this charge is made will ultimately, through the natural growth and orderly development of our population and industries, reach enormous amounts. A fair share of the increase should be safeguarded for the benefit of the people, from whose labor it springs. The proceeds thus secured, after the cost of administration and improvement has been met, should naturally be devoted to the development of our inland waterways." Accordingly, I have decided to sign no bills hereafter which do not provide specifically for the right to fix and make a charge and for a definite limitation in time of the rights conferred.

Sincerely, yours,

THEODORE ROOSEVELT.

Hon. WILLIAM P. FRYE,
Chairman Committee on Commerce, United States Senate.

The bill, together with the foregoing letter, was referred to the War Department for its views, which are presented in the following indorsements:

[Second indorsement.]

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, April 11, 1908.

1. Respectfully returned to the Secretary of War.

2. The Committee on Commerce of the United States Senate refers H. R. 17707, Sixtieth Congress, first session, being a bill to authorize William H. Standish to construct a dam across the James River, Missouri, and "to divert a portion of its waters through a tunnel into the said river again, to create electric power."

3. This bill was referred to this department for report during its consideration in the House of Representatives, and, after the usual inquiry through the local engineer officer, was reported on on March 11, 1908, to the effect that, so far as the interests of navigation are concerned, there is no objection to its passage.

4. Subsequently, March 18, 1908, the President of the United States, in a letter to the chairman of the Senate Committee on Commerce, stated that all bills of this character not having provision for a limited life and a remuneration to the United States for the privileges or rights conveyed will fail to receive executive approval. The Senate Committee on Commerce now desires the opinion of the War Department upon the merits of the bill and the propriety of its passage, "in view of the letter of the President to the chairman of the committee."

5. The Chief of Engineers notes that the bill (H. R. 17707) as it now stands does not comply with either of the President's requirements, and it is not believed that such requirements are provided for in the general dam act of June 2, 1906.

6. The following provision, if inserted in H. R. 17707, after the words "nineteen hundred and six," line 6, page 2, will, it is believed, accomplish the objects aimed at: "and the Chief of Engineers and the Secretary of War shall, in accordance with said act, and as a part of the conditions and stipulations provided for therein, fix such limitation of time for the privilege hereby permitted and such charge or charges for the same as they may deem necessary to protect the present or future interests of the United States."

The details as to time and amount in each case will depend upon the facts in each case, including amount of investment relative to the interests of navigation and the amount of future responsibility which may have to be assumed by the Government in the matter of proper maintenance of dams, operation of locks, and other items, including possible failure of grantee, which may bear upon any liabilities which the Government by chance might possibly be called upon to assume. While in the form of legislation suggested no definite time or amount is considered, it is appreciated that in each case such time and amount would require consideration by the grantor in advance of preliminary work by the grantee.

A. MACKENZIE,
Brig. Gen., Chief of Engineers, U. S. Army.

[Third indorsement.]

WAR DEPARTMENT, *April 14, 1908.*

Respectfully returned to the chairman Committee on Commerce, United States Senate, concurring in the foregoing views of the Chief of Engineers, United States Army.

ROBERT SHAW OLIVER,
Assistant Secretary of War.

Following is the amendment suggested by the War Department:

Insert on page 2, line 6, after the word "six," the following: "And the Chief of Engineers and the Secretary of War shall, in accordance with the terms of said act, impose conditions and stipulations fixing such limitation of time for the privilege hereby permitted and such charge or charges for the same as they may deem necessary to protect the present or future interests of the United States."

The President, in a communication addressed to the chairman of the Senate Committee on Commerce, dated March 18 last, as well as in his veto message of April 17, relating to the bill (H. R. 15444) to extend the time for the construction of a dam across Rainy River, has declared it to be his policy not to approve of any bill permitting the construction of a dam by private parties across a navigable stream, although due provision is made for the conservation of the stream for the purposes of navigation, unless the bill provides for the payment of a royalty or compensation to the United States for the use of the water of the stream for purposes other than navigation.

This is a new departure from the policy heretofore pursued in respect to legislation authorizing the construction of such dams, and in view of this fact it becomes important to inquire whether the Government of the United States has the right to require compensation for the use of water in such streams for purposes other than navigation.

The common-law doctrine of England that a stream is not deemed to be a navigable water course unless the tide ebbs and flows in it is not the law in this country. The question whether a water course is a navigable stream is one of fact. If it is capable of being used for the purposes of trade and commerce in any mode, even for floating rafts of logs and timber, it is deemed to be a navigable stream.

(The Montello, 20 Wall., 430.)

(St. Anthony Water Power Company *v.* St. Paul Water Commissioners, 168 U. S., 349.)

The title to the water of a navigable stream within the borders of a State is not in the Federal Government, but in the State; and title to the banks and bed of the stream, after the Federal Government has parted with its riparian lands, is either in the State or in the riparian owner, or both, according to the laws of the respective States. These principles have been laid down and applied by the Supreme Court of the United States in the following, among other cases, and is the settled law of the land, to wit: Martin *v.* Waddell (16 Pet., 367); Pollard *v.* Hagan (3 How., 212); Goodtitle *v.* Kibbe (9 How., 471); Barney *v.* Keokuk (94 U. S., 324); St. Louis *v.* Myers (113 U. S., 560); Packer *v.* Bird (137 U. S., 661); Hadrin *v.* Jordan (140 U. S., 371); Kaukauna Water Power Company *v.* Green Bay and Mississippi Canal Company (142 U. S., 254); Shively *v.* Bowlby (152 U. S., 1); Water Power Company *v.* Water Commissioners (168 U. S., 349); Kean *v.* Calumet Canal Company (190 U. S., 452); United States *v.* The Chandler Dunbar Water Power Company (U. S. Supreme Court, April 20, 1908).

The use of water in such a stream is a matter of state regulation and state control. In many of the States the common-law rule, as defined in the following language of Chancellor Kent, prevails, to wit:

"Every proprietor of lands on the banks of a river has naturally an equal right to the use of the water which flows in the stream adjacent to his lands, as it was wont to run (currere solebat) without diminution or alteration. No proprietor has a right to use the water to the prejudice of other proprietors above or below him unless he has a prior right to divert it, or a title to some exclusive enjoyment. He has no property in the water itself, but a simple usufruct while it passes along. Aqua currit et debet currere ut currere solebat is the language of the law. Though he may use the water while it runs over his land as an incident to the land, he can not unreasonably detain it or give it another direction, and he must return it to its ordinary channel when it leaves his estate."

In the mining and arid States the rule of prior appropriation for mining and irrigation purposes prevails, and this rule of the States has been recognized by federal statutes (R. S., secs. 2339–2340). In some of the States there is a mixed application, as in California, of the common-law rule and the rule of prior appropriation.

But whatever rule may prevail in any State as to the use of the water in a stream, it is always subject to the following limitations, laid down by the Supreme Court in the case of the United States *v.* Rio Grande Dam and Irrigation Company (174 U. S., 690):

"Although this power of changing the common-law rule as to streams within its dominion undoubtedly belongs to each State, yet two limitations must be recognized: First, that in the absence of specific authority from Congress a State can not by its legislation destroy the right of the United States, as the owner of lands bordering on a stream, to the continued flow of its water; so far, at least, as may be necessary for the beneficial uses of the government property. Second, that it is limited by the superior power of the General Government to secure the uninterrupted navigability of all navigable streams within the limits of the United States. In other words, the jurisdiction of the General Government over interstate commerce and its natural highways vests in that Government the right to take all needed measures to preserve the navigability of the navigable water courses of the country, even against any state action."

Where the Federal Government is not interested as the owner of riparian lands, the only interest it has in the water of a stream is as to its use for purposes of navigation, and it can lay no claim to the use of the water for any other purpose, not even for irrigation. (Kansas *v.* Colorado, 206 U. S., 46.)

In this case the United States appeared as intervener; but inasmuch as it founded its claim not on the question of navigation, but on the question of irrigation, the court held that it had no ground for intervention, and dismissed its petition. In reference to this subject the court says:

"It follows from this that if in the present case the National Government was asserting, as against either Kansas or Colorado, that the appropriation for the purposes of irrigation of the waters of the Arkansas was affecting the navigability of the stream, it would become our duty to determine the truth of the charge. But the Government makes no such contention. On the contrary, it distinctly asserts that the Arkansas River is not now and never was practically navigable beyond Fort Gibson, in the Indian Territory, and nowhere claims that any appropriation of the waters by Kansas or Colorado affects its navigability.

"It rested its petition of intervention upon its alleged duty of legislating for the reclamation of arid lands. * * *

"Turning to the enumeration of the powers granted to Congress by the eighth section of the first article of the Constitution, it is enough to say that no one of them, by any implication, refers to the reclamation of arid lands. * * *

"While arid lands are to be found mainly, if not only, in the Western and newer States, yet the powers of the National Government within the limits of those States are the same, no greater and no less than those within the limits of the original thirteen, and it would be strange if, in the absence of a definite grant of power, the National Government could enter the territory of the States along the Atlantic and legislate in respect to improving, by irrigation or otherwise, the lands within

their borders. Nor do we understand that hitherto Congress has acted in disregard to this limitation."

It was the doctrine at common law that a grant of land upon the borders of a navigable stream carried the grant only to high-water mark, while a grant of land bordering upon a nonnavigable stream carried the ownership to the center or thread of the stream, subject to the public easement.

In the case of Hardin *v.* Jordan (140 U. S., 384), the Supreme Court states:

"The United States have not repealed the common law as to the interpretation of their own grants, nor explained what interpretation or limitation should be given to or imposed upon the terms of the ordinary conveyances which they use, except in a few special instances; but these are left to the principles of law and rules adopted by each local government where the land may lie. We have adopted the common law, and must, therefore, apply its principles to the interpretation of their grant."

Further on the court states the same principle in this form:

"In our judgment the grants of the Government for lands bounded on streams and other waters without any reservation or limitation of terms are to be construed as to their effect according to the laws of the State in which the lands lie."

The rule of riparian ownership as to grants of land bordering on a navigable stream is diverse in the various States. Some States hold that the grant extends only to high-water mark; other States hold that it extends to low-water mark, while another class of States—and perhaps the most numerous—hold that the grant extends to the middle of the stream, subject to the public easement in the water of the stream. But whatever may be the law in this respect as to the effect of the grant, it only relates to the proprietorship in the banks and bed of the stream and not to the ownership of the water in the stream.

In those States which hold that the title of the riparian owner only extends to the high or low water mark the title to the bed of the stream is deemed to be in the State; and whether the title to the bed of the stream is in the riparian owner or in the State, in either case the general title to the water of the stream is deemed to be in the State; but it holds it not absolutely, but in trust for all lawful public uses. The State's interest in such a stream is akin to that of a riparian owner, though more comprehensive and general in its nature and does not exist in hostility to or in diminution of the rights of the riparian owner.

(Rossmiller *v.* State, 114 Wis., 169.)
(Peoples Ice Co. *v.* Davenport, 149 Mass., 322.)
(Brown *v.* Cunningham, 82 Iowa, 512.)
(Braston *v.* Rockport Ice Co., 77 Maine, 100.)
(Martin et al. *v.* Waddell, 16 Peters, 367.)

From the foregoing it will appear that there are three different parties who are interested in the waters of a navigable stream:

1. The United States.
2. The State in which the stream is located.
3. The riparian owner.

The interest of the United States is derived from and rests upon that paragrauph of the Constitution which gives Congress the power to regulate interstate commerce, and this power only extends to the extent of conserving the navigability of the stream. Beyond that the Federal Government has no interest or property in the stream.

The interest of the State in the stream is derived from its sovereignty, and it holds its property in the stream in trust for all public uses, but in subrogation to the rights of the Federal Government as to navigation and of the riparian owner. The right to the use of the waters of a stream for any lawful purpose, outside of the right of navigation, belongs wholly to the State and the riparian owner.

(Martin et al. *v.* Waddell, 16 Peters, 367.)

Chief Justice Shaw, in the case of Elliott *v.* Fitchburg Railroad Company (10 Cushing, 191) describes the rights of the riparian owner in the use of water in a stream in the following language, which states the enlarged and modified common-law doctrine:

"The right to flowing water is now well settled to be a right incident to property in the land; it is a right publici juris, of such a character that, while it is common and equal to all through whose land it runs, and no one can obstruct or divert it, yet, as one of the beneficial gifts of Providence, each proprietor has a right to a just and reasonable use of it as it passes through his land; and so long as it is not wholly obstructed or diverted or no larger appropriation of the water running through it is made than a just and reasonable use, it can not be said to be wrongful or injurious to a proprietor lower down. What is such a just and reasonable use may often be a difficult question, depending upon various circumstances. To take a quantity of water from a large running stream for agricultural or manufacturing purposes would cause no sensible or practicable diminution of the benefit, to the prejudice of a lower proprietor, whereas taking the same quantity from a small running brook passing through many farms would be of great and manifest injury to those below who need it for domestic supply or watering cattle, and therefore it would be an unreasonable use of the water and an action would lie in the latter case and not in the former. It is therefore, to a considerable extent, a question of degree; still the rule is the same, that each proprietor has a right to a reasonable use of it, for his own benefit, for domestic use, and for manufacturing and agricultural purposes. * * *

"That a portion of the water of a stream may be used for the purpose of irrigating land we think is well established as one of the rights of the proprietors of the soil along or through which it passes. Yet a proprietor can not, under color of that right or for actual purpose of irrigating his own land, wholly abstract or divert the water course or take such an unreasonable quantity of water or make such unreasonable use of it as to deprive other proprietors of the substantial benefits which they might derive from it if not diverted or used unreasonably.

"This rule that no riparian proprietor can wholly abstract or divert a water course, by which it would cease to be a running stream, or use it unreasonably in its passage and thereby deprive a lower proprietor of a quality of his property, deemed in law incidental and beneficial, necessarily flows from the principle that the right to the reasonable and beneficial use of a running stream is common to all the riparian proprietors, and so each is bound to use his common right as not essentially to prevent or interfere with an equally beneficial enjoyment of the common right by all the proprietors. * * *

"The right to the use of flowing water is publici juris and common to all the riparian proprietors. It is not an absolute and exclusive right to all the water flowing past their land, so that any obstruction would give a cause of action; but it is a right to the flow and enjoyment of the water, subject to a similar right in all the proprietors to the reasonable enjoyment of the same gift of Providence. It is, therefore, only for an abstraction and deprivation of this common benefit or for an unreasonable and unauthorized use of it that an action will lie."

The doctrine of prior appropriation, already referred to, is thus described by Justice Field in the case of Jennison *v.* Kirk (98 U. S., 453). After describing the system of discovery and appropriation and development of mining claims, he adds the following:

"But the mines could not be worked without water. Without water the gold would remain forever buried in the earth or rock. To carry water to mining localities when they were not on the bank of a stream or lake became, therefore, an important and necessary business in carrying on mining. Here, also, the first appropriator of water to be conveyed to such locality for mining or other beneficial purposes was recognized as having, to the extent of actual use, the better right. The doctrine of the common law respecting the right of riparian owners was not considered as applicable, or only in a very limited degree, to the conditions of miners in the mountains. The waters of rivers and lakes were, consequently, carried great distances in ditches and flumes, constructed with vast labor and enormous expenditures of money, along the sides of mountains and through canyons and ravines, to supply communities engaged in mining, as well as for agriculturists and ordinary consumption. Numerous regulations were adopted, or assumed to exist, from their obvious justness, for the security of these ditches and flumes and for the protection of rights to water, not only between different appropriators, but between them and the holders of mining claims. These regulations and customs were appealed to in controversies in the state courts and received their sanction, and properties to the value of many millions rested upon them. For eighteen years, from 1848 to 1866, the regulations and customs of miners, as enforced and molded by the courts and sanctioned by the legislation of the State, constituted the law governing property in mines and in water on the public mineral lands."

These water rights by prior appropriation, as described by Justice Field, were recognized and confirmed by congressional legislation in 1866 and 1870. Those acts are now sections 2339 and 2340 of the Revised Statutes. Justice Field further adds:

"It will thus be seen that the federal statutes merely gave a formal sanction to the rules already established. Those rules had been built up in reliance on the tacit acquiescence of the United States, the true owner of the lands and waters on which appropriations were made, and these statutes acquiesced therein expressly, 'a voluntary recognition of a preexisting right rather than the establishment of a new one.'"

In the case of Broder *v.* Natoma Water Company (101 U. S., 274), the Supreme Court, in referring to the contention that these statutes established a new right, uses the following language:

"We are of the opinion that it is the established doctrine of this court that rights of miners, who had taken possession of mines and worked and developed them, and the rights of persons who had constructed canals and ditches to be used in mining operations and for purposes of agricultural irrigation, in the region where such artificial use of the water was an absolute necessity, are rights which the Government had, by its conduct, recognized and encouraged and was bound to protect before the passage of the act of 1866, and that the section of the act which we have quoted was rather a voluntary recognition of a preexisting right of possession, constituting a valid claim to its continued use, than the establishment of a new one."

These decisions of Judge Shaw, of Massachusetts, and of Justice Field, of the Supreme Court, describe fully the rights of the riparian owners to the use of the water both under the doctrine of the common law and under the so-called "doctrine of prior appropriation," and the case of Rossmiller *v.* The State (114 Wis., 169), and the cases therein re-referred to, as well as the case of Martin et al. *v.* Waddell (16 Pet., 367), show the interest and property of a State in the waters of a stream.

From the foregoing statement and citation of authorities it is evident that the only use of the waters of a stream in which the United States has any property is its use for purposes of navigation. In the use of the stream for any other purpose the Federal Government has no property and hence has nothing to sell or to exact compensation for.

The plan proposed by the President would deprive the States and the riparian owners of their rights in the use of the water of a navigable stream now vested in them by law, and would concentrate the entire disposal and control in the Federal Government, a power which neither the States nor the riparian owners can, with justice or safety, for a moment concede. But assuming for the sake of the argument that the Federal Government can lay a tribute in such cases as is proposed by the President, it can not be under the interstate-commerce clause of the Constitution, but must be under section 8 of Article I, which reads as follows:

"SEC. 8. The Congress shall have power to lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defense and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States."

Such a tribute must be either a direct tax or in the nature of an impost or excise tax. If a direct tax, it can not be levied directly by the Federal Government, but must be apportioned among the States, leaving each State to make the collection; and if an impost or excise tax, then it must be levied by the rule of uniformity upon every dam and water power in the United States not constructed directly or indirectly by the Federal Government. In other words, there must be a general excise law on the subject. The power of the Federal Government over the navigable streams of the country is no greater in the so-called "western or public-land States" than in the New England States. If a tribute can be levied on a dam and water power in Minnesota or Colorado, it can be levied on a dam and water power in Maine or Massachusetts, for the power of the Federal Government over navigable streams is the same in the one case as in the other. In the case of Pollock *v.* Farmers' Loan and Trust Company (157 U. S., 557) the court states:

"Thus in the matter of taxation the Constitution recognizes the two great classes of direct and indirect taxes and lays down two rules by which their imposition must be governed, namely, the rule of apportionment as to direct taxes and the rule of uniformity as to duties, imposts, and excises."

In the case of Thomas *v.* United States (192 U. S., 363), Chief Justice Fuller says:

"And these two classes, taxes so called, and 'duties, imposts, and excises,' apparently embrace all forms of taxation contemplated by the Constitution. As was observed in Pollock *v.* Farmers' Loan and Trust Company (157 U. S., 429, 557), 'Although there have been from time to time intimations that there might be some tax which was not a direct tax nor included under the words "duties, imposts, and excises," such a tax for more than one hundred years of national existence has as yet remained undiscovered, notwithstanding the stress of particular circumstances has invited thorough investigation into sources of revenue. * * *'

"There is no occasion to attempt to confine the words 'duties, imposts, and excises' to the limits of precise definition. We think that they were used comprehensively to cover customs and excise duties imposed on importation, consumption, manufacture, and sale of certain commodities, privileges, particular business transactions, vocations, occupations, and the like."

An act authorizing the construction of a dam is, so far as the United States is concerned, a mere revocable license or privilege, and if a tax can be imposed on such a privilege it must be general and uniform throughout the United States. It must apply to all dams and water powers on navigable streams throughout the entire country.

Nearly all navigable streams in their upper and more remote courses are not, as a matter of fact, navigable, and in such reaches of the river dams can be erected and water powers created under state authority and state license, and so long as such dams and water powers do not materially injure or diminish the navigability of the stream in its navigable portions the Federal Government has no ground for interference. It has been customary, however, in many of such cases to apply to Congress for a federal license and the granting of it, while not necessary, serves a twofold purpose; first, that it authorizes the Federal Government, through the War Department, to control and direct the construction of the dam, and, second, that it recognizes the fact, which might otherwise require proof, that the dam will not affect the navigability of the stream in its navigable portions.

(Kansas *v.* Colorado, 206 U. S., 46; United States *v.* Rio Grande Company, 174 U. S., 690.)

And in such cases it is of as much advantage to the United States as to the grantee of the license to have congressional action and recognition, but in such cases the Federal Government has nothing to sell, and therefore has no moral or legal ground to demand compensation in any form.

For reasons above given the committee report the bill without the amendment recommended by the War Department.

SUBCOMMITTEE'S LETTER TO HON. HENRY M. HOYT, SOLICITOR-GENERAL.

COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE,
HOUSE OF REPRESENTATIVES,
Washington, D. C., January 27, 1909.

Hon. HENRY M. HOYT,
Solicitor-General, Washington, D. C.

DEAR SIR: The subcommittee of the Committee on Interstate and Foreign Commerce of the House of Representatives, to which has been referred H. R. 17707, Sixtieth Congress, first session, together with the veto message of the President and accompanying papers, as well as all legislation to amend the general dam act of June 21, 1906, has under consideration the memorandum submitted by yourself, contained upon pages 16 and following, of the special veto message of the President as printed in House Document No. 1350, Sixtieth Congress, second session. We congratulate you upon the ability of the presentation of your views and appreciate the information contained in your memorandum.

There have arisen in our discussion some questions which do not seem to be covered in your opinion, and the subcommittee would much value any further information or opinion you may see fit to forward to it concerning the propositions herein set forth:

A. You have illustrated your position by the citation of numerous acts of Congress, bills proposed in Congress but not enacted, reports of commissions and expressions of executive departments, but not to any great extent by the citation of cases decided by the courts.

(I) Is there a lack of cases bearing on this point, especially in the Supreme Court of the United States?

(II) If there are such decisions, are they in accord with the opinion you express?

B. If an act should be passed containing such conditions as you indicate, would you recommend that they should be so expressed as to facilitate the power of a court to pass upon them without bringing into question the remainder of the act; and, in case they should be held invalid because beyond the power of Congress, to hold the grant by the act valid and free from those conditions?

C. Assuming that the Congress has full and exclusive authority to control every navigable stream and its waters for purposes of commerce, and therefore can grant to a private concern a privilege or license to construct a dam which may in some respects affect the natural condition of such streams, although the United States has no property rights therein or interest in such construction, or any lands, riparian or other, to be affected thereby, and has made no expenditure for improvement at that point:

(I) Can Congress impose as a condition of such grant the payment of money by the licensee or the imposition of a burden on him which can be used by Congress—

1. For general public purposes as may be provided by law.

2. For the benefit and improvement of the navigation of a designated stream or streams at any point and in any manner which may be determined by Congress.

3. For removing the particular structure which may be authorized by Congress in such grant, or for making further improvements at that place which may substantially make good any disadvantage caused by the exercise of the grant.

D. If in a given case the riparian owner is entitled to the use of the power which may be developed by a navigable stream, without impairing the navigability, can he be deprived of that use in whole or in part by any action or nonaction of the United States? For instance, if on such a stream the riparian owner has acquired lands on both sides of such a stream for the purpose, with others, of developing and selling power produced by that stream, and has now a clear legal title to those lands and to that power, the right to develop such power without impairing navigation being worth, say, $1,000 per year, has the United States the constitutional authority to prevent such development unless $500 per year be paid to the United States, or—

(I) Would such action by the United States operate to deprive the owner, without due process of law, of property worth $500 per year?

(II) Would such private property be taken for public use without just compensation?

E. Should any such payment or burden imposed as the condition of such grant by Congress be construed as a—

1. (I) Tax under the provisions of Article I, section 8, paragraph 1, or section 9, paragraph 4, of the Constitution, known as the "taxing clauses," or—

(II) As a mere incident to the exercise of power under Article I, section 8, paragraph 3, of the Constitution, known as the "commerce clause?"

2. If such charge or compensation be not a tax under any circumstances, would it be possible, as a matter of law—

(I) To exact compensation for such licenses which could be covered into the Treasury as a general or special fund, sufficient to provide for all or nearly all such public improvements, which otherwise must be provided by taxation to be raised under the powers and limitations of the Constitution, or—

(II) Could this be exacted although the work under such license might be a real, valuable, and conceded aid to navigation?

F. Briefly, in such cases—

(I) Can Congress use this license as a means of raising money to carry on general public improvements or perform other public work or—

(II) Is it necessarily confined to making improvements at the particular place, and to substantially the measure of the burden, affected by the license?

(III) If such payment be a tax, would it be a direct tax or not, and how should it be levied and collected?

G. Some grants of territory to the United States, and some treaties with foreign powers respecting boundaries, provide that the navigation of certain streams shall remain open and free. Is the authority of the United States over those streams any less than its power over other navigable streams, with respect to imposing conditions on the development of navigation or mechanical power?

H. The treaty between the United States and Great Britain of 1842, known as the "Webster-Ashburton treaty," in sections 2, 3, and 7, contains substantially the following provision:

"It being understood that all the water communications and all the usual portages, etc., * * * as now actually used shall be free and open to the use of the citizens and subjects of both countries."

The treaty between the United States and Mexico of 1848, articles 6 and 7, contains substantially the following provision:

"The navigation of the rivers (naming them) shall be common and free to the vessels and citizens of both countries, and neither shall, without the consent of the other, construct any work that may impede or interrupt, in whole or in part, the exercise of this right, not even for the purpose of favoring new methods of navigation. Nor shall any tax or contribution be laid, etc., * * * for the purpose of making said rivers navigable or for maintaining them in such state. If it should be necessary or advantageous to establish any tax or contribution, this shall not be done without the consent of both Governments."

The ordinance of 1787, passed by Congress for the government of the Northwest Territory, known as the "Northwest Ordinance," contains the following provision (article 4):

"The navigable waters leading into the Mississippi and St. Lawrence, and the carrying places between the same, shall be common highways and forever free as well to the inhabitants of said territory as to the citizens of the United States and those of any other States that may be admitted into the confederacy, without any tax, impost, or duty therefor."

The enabling acts by Congress of the following States, viz, Minnesota and Wisconsin, contain substantially the following provision:

"The said rivers and waters leading into the same shall be common highways and forever free as well to the inhabitants of the said State as to all other citizens of the United States without any tax, duty, poll, or impost whatever."

The enabling acts of Alabama, Mississippi, Missouri, and Louisiana add to the end of such paragraph the words "by the State."

1. Do these provisions with respect to the rivers and waters referred to in the above-cited provisions of those treaties and enabling acts and of that ordinance constitute any prohibition or limitation upon the power of Congress to fix such charge as it may deem best upon any project for the construction of a dam within the territory affected, in which the United States has no interest by expenditure of money, ownership of property, or otherwise, which project, as a fact, may improve navigation and facilitate commerce?

2. Can such charge be imposed in such cases to an extent which may prevent the construction of such improvement to navigation when, if such charge be not made, navigation would be improved by the owners of the riparian property?

3. In such cases, must such charge be limited by an amount sufficient to overcome any disadvantage to navigation caused by such grant, and so practically restore the stream to its original state as to its navigability?

4. In fine, is the power of the United States over those streams and waters any less than its power over other navigable streams and waters with respect to imposing conditions on the development of navigation or of mechanical power?

I. Is there any constitutional objection to a provision in a bill authorizing the construction of a dam across a navigable stream for the purpose of improving navigation that the United States may provide a proportion of the expense, to be fixed in some manner provided by law, and in return there should be paid to the United States a compensation, to be fixed or provided by law, in consideration of its contribution, which fund should go into the Treasury for general purposes as may be directed by Congress?

REPLY OF HON. HENRY M. HOYT.

OFFICE OF THE SOLICITOR-GENERAL,
Washington, D. C., February 23, 1909.

Hon. F. C. STEVENS,
Chairman, etc., House of Representatives.

MY DEAR SIR: Addressing myself to the letter dated January 27 (which I received February 13) from the subcommittee of the Committee on Interstate and Foreign Commerce, to which was referred H. R. 17707, with the veto message of the President among other associated matters, I beg to say in answer to your first two questions that there is not only a lack but an entire absence of decisions, so far as I am aware, on the particular aspect of the power of Congress over navigable waters discussed in the memorandum to which you refer, prepared by me in May of last year at the request of the President.

In the memorandum I was undertaking to trace the general principle that a grant of any right or privilege may be upon terms and conditions, and to illustrate by legislation enacted the application of the principle as affecting the incidental development of water power and other incidental conditions in cases where Congress itself was improving navigation or authorizing others to do so, or retaining absolute control of the subject for the future in licensing structures in waters not now navigable in fact at the particular point. I also considered the views of members of the Judiciary Committee of your House with reference to a suggested exercise of the power of Congress proposing to acquire forest reserve lands as a step germane to navigability, which at first glance might seem remote from the power, but was not really so.

I thought then, and still think, that the views expressed as to the constitutionality of the particular legislation under consideration or proposed are sound. It is to be remembered that the views set forth were expressed informally in reference to that particular legislation,

and for the special purpose of advice to the President on the matter then before him, and for his information respecting his proper executive action.

The categoric questions you now submit to me, however, regard many different aspects of the general inquiry. They are based upon hypothetical circumstances and search the entire subject through, constitutionally and encyclopedically. The questions relate to a new field of inquiry and are highly judicial in their nature, and of course can not be intelligently answered until the Supreme Court has adjudged some case or cases raising them. To answer the questions now would be merely an attempt speculatively to forecast the course of judicial decision on the subject, and would be a presumption on my part. Under these circumstances it seems to me obvious that it would be highly improper for me to express any opinion, and I am therefore constrained to decline to do so.

Very respectfully, yours,

HENRY M. HOYT,
Solicitor-General.

REPORT AND MEMORANDUM OF THE WAR DEPARTMENT CONCERNING THE AUTHORITY OF THE UNITED STATES OVER THE USE OF WATER FOR POWER PURPOSES.

[Circular No. 14.]

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, April 4, 1905.

The following report on a bill introduced and considered at the third session of the Fifty-eighth Congress is published for the information of officers of the Corps of Engineers in charge of river and harbor works, it being thought that the important legal propositions discussed, and a knowledge of the department's position regarding the subject-matter, may be of interest and value:

WAR DEPARTMENT,
January 17, 1905.

Respectfully returned to the chairman Committee on Interstate and Foreign Commerce, House of Representatives, inviting attention to the accompanying report of the Chief of Engineers, United States Army, of yesterday's date, and to drafts of bills therein referred to. The report seems to me to be very comprehensive, accurate, and instructive.

WM. H. TAFT, *Secretary of War.*

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, January 16, 1905.

Hon. WM. H. TAFT,
Secretary of War.

SIR: 1. I have the honor to return herewith a letter, dated the 13th ultimo, from the Committee on Interstate and Foreign Commerce of the House of Representatives, inclosing for the views of the War Department thereon H. R. 16298, Fifty-eighth Congress, third session—

"A bill to provide for and regulate the use of the navigable rivers and streams of the United States for manufacturing, industrial, and other purposes by means of water power obtained therefrom."

2. There are two distinct propositions embraced in the bill, as follows:

(*a*) To authorize the Secretary of War to grant leases and licenses to private persons or corporations for the use of water power created by dams and other structures built by the Government on navigable waters for the benefit of navigation.

(*b*) To empower the Secretary of War to authorize private persons or corporations to construct dams and other structures, and to develop and use water power, at points on navigable rivers where the Government has not built such structures.

3. In connection with legislation of this kind careful consideration should be given to the question of the limitations of the power of the Federal Government over navigable waters. By virtue of its power to regulate commerce Congress may exercise control over the navigable waters of the United States, but only to the extent necessary to protect, preserve, and improve free navigation. The Federal Government has no possessory title to the water flowing in navigable streams, nor to the land comprising their beds and shores, and hence Congress can grant no absolute authority to anyone to use and occupy such water and land for manufacturing and industrial purposes. The establishment, regulation, and control of manufacturing and industrial enterprises, as well as other matters pertaining to the comfort, convenience, and prosperity of the people, come within the powers of the States, and the Supreme Court of the United States holds that the authority of a State over navigable waters within its borders, and the shores and beds thereof, is plenary, subject only to such action as Congress may take in the execution of its powers under the Constitution to regulate commerce among the several States.

4. Many of the provisions of the bill under consideration appear to conflict with these principles of law, and particularly sections 3 and 6, which propose to confer upon the United States, and upon any lessee or grantee under the provisions of the bill, the power to condemn any land or other property bordering on or adjacent to the river or stream to be used. Eminent domain is the right to take property for public uses, and is inherent in the United States by virtue of its sovereignty. Private property can be expropriated by the Federal Government, however, for public purposes only—that is, when it is necessary for the use of the Government in the exercise of any of its legitimate powers. To take or to authorize the taking of the property of one individual for the use and benefit of another in carrying on a private business or industry, as proposed by the bill, is not a proper exercise of the right of eminent domain. There may be certain enterprises of a quasi public character, such as electric-light and railway companies, that would desire to avail themselves of the uses of water power, and to which the right to condemn private property could properly be granted; but the granting of such right is believed to be a function of the States, inasmuch as the organization and incorporation of these enterprises, as well as the title and ownership of the property affected, are matters for state control and regulation. In view of the foregoing, I am unable to recommend favorable consideration of the bill in its present form.

5. To legislation authorizing the Secretary of War to lease water power created by works constructed by the Government I see no special objection, but I know of no demand for it in the public interest.

The right of Congress to regulate, control, and dispose of such water power is believed to be unquestionable, inasmuch as the power constitutes a valuable property created at the public expense, and when utilized by private persons or corporations should be paid for. Whether a general policy of this kind should be adopted, however, is a question that should be very carefully considered. Locks and dams are built and operated for the purpose of facilitating navigation and commerce, and nothing should be permitted that would tend to impair their usefulness or interfere with their operation for this purpose. Partnerships or quasi partnerships between the Government and private persons or corporations have not been generally favored in the past, as experience has shown that they are apt to be attended by many annoying complications. I do not believe that sufficient revenue would be derived from renting water power to compensate for the trouble and inconvenience that might ensue from the adoption of such a policy. Congress has heretofore authorized the renting of land and water power at the locks and dams on the Muskingum River and Green and Barren rivers; but it is understood that this was done for the reason that at the time these works came into the possession of the United States there was in existence a number of leases granted by the former owners which constituted an easement on the property, some of which leases had many years to run. In cases where a new privilege is asked, it has been customary to invite public competition, setting a minimum price; but no active competition has been developed. There is also one company which uses land and water power at Lock No. 4 on the Kentucky River, under a lease granted by the State of Kentucky, which expires in 1977. During the past fiscal year there were in existence 27 different leases, and the total gross revenue received by the Government was only $4,500, and in a number of instances in the past the Government has been compelled to resort to suits against lessees to collect the rental. While many applications would be made for permission to use government water power, if no charge was made therefor, it is believed that few leases would be made, and then only at favored localities, if adequate compensation were exacted. In the river and harbor act of June 13, 1902, Congress authorized the leasing of water power at the locks and dams on the Cumberland River. Before the enactment of this law a number of persons appeared to be desirous of using water power in this river, but although the law has been in existence more than two years not a single lease has been applied for or granted. If, however, Congress should decide to adopt this policy, I beg to recommend that the legislation take the form of the accompanying draft of a bill which, in my opinion, is so drawn as amply to protect the interests of the Government.

6. Regarding the proposition to empower the Secretary of War to authorize the use and development of water power at localities not improved by the United States, it should be borne in mind that natural water power—that is, power made available by the existence of natural falls and rapids in a river—is appurtenant to riparian ownership, and the right to use it is governed by state laws on the subject of private property. As above set forth, the Federal Government can regulate and control it only to such extent as may be necessary in the interest of navigation. Sections 9 and 10 of the river and harbor act of March 3, 1899, cover cases of this kind, and under this law the interests of the Government can, in my opinion, be better protected than by a law general in its scope, as contemplated by the bill. I do not favor the proposed legislation, but if any is enacted, it should be permissive in its character, simply giving the consent of Congress, with suitable limitations, to the erection of the necessary structures in navigable streams for the development of water power, this consent to be executed through the Chief of Engineers and the Secretary of War, to whom should be left entire control in the matter of plans and details.

A draft of a bill embodying these views is submitted herewith for the consideration of the committee.

Very respectfully,

A. MACKENZIE,
Brig. Gen., Chief of Engineers, U. S. Army.

By command of Brigadier-General Mackenzie.

FREDERIC V. ABBOT,
Major, Corps of Engineers.

Hearing before Hon. William H. Taft, Secretary of War, in connection with the development of the Illinois Valley water power.

WAR DEPARTMENT,
DISTRICT OF COLUMBIA,
February 23, 1907—10.30 a. m.

Present: Brig. Gen. Alexander Mackenzie, Chief of Engineers, United States Army; Mr. I. Randolph, representing the State of Illinois; Hon. H. M. SNAPP, Mr. J. W. Woermann, and Mr. Charles A. Monroe, representing the Economy Light and Power Company.

Secretary TAFT. Gentlemen, as I understand this application, it is to prevent me from granting a permit to any person on the Des Plaines River to build a dam for water-power purposes, on the ground that the State is interested in supervising that matter itself. Is that about the size of it?

STATEMENT OF MR. I. RANDOLPH ON BEHALF OF THE STATE OF ILLINOIS.

The position of the State, as I understand it, is this: I am appearing in this matter at the present time for the State, because, as I understand, the Sanitary District has no interest in the present application whatever. The work of the Sanitary District, however, has made possible the development of very, very important water power on the Des Plaines and Illinois rivers. Prior to the completion of that work the water powers on the Des Plaines River were inconsequential. They amounted to but little. The water power on the Illinois River was somewhat better. There was no development at Marseilles. But the opening of the Sanitary District naturally has turned into those rivers a permanent volume of water, which makes the development of the water powers possible on quite a valuable scale.

The interest of the State in this is to see that this asset is developed to the fullest extent and that it shall be so developed as not to interfere with the creation of a waterway such as the State hopes to see put through. * * *

Mr. SNAPP. If the General Government has no right either in this property or to the water power developed thereby, there can properly be no determination of this matter by any of the officers of the Government. Now, as a matter of fact, all the property interest in the Des Plaines Valley belongs to private parties. There is absolutely no public ownership of any land in the Des Plaines Valley. The stream is not a navigable stream. In low water the entire flow of the Des Plaines River would come probably through a 6-inch pipe. It falls downhill, falling 100 feet in less than 30 miles. Neither the flow of the water nor the contour of the land makes the stream navigable, and it has been so held.

Secretary TAFT. You say the Des Plaines River is not a navigable stream?

Mr. SNAPP. It is not a navigable stream either in law or in fact. It could not be navigated in low water, in the natural condition of the river, by a birch-bark canoe.

Secretary TAFT. How do we get any jurisdiction of it, General Mackenzie?

Mr. SNAPP. Let me answer, Mr. Secretary, as a lawyer. You undoubtedly have none, and I was going to bring to the attention of the Secretary——

Secretary TAFT. Why do you come here for a permit, then?

(Mr. SNAPP then explains that they did not come for a permit, but for advice to be more safe to proceed.)

Mr. Randolph then states that the river is meandered by the surveys, and thinks that might make it navigable. Secretary Taft answers that has nothing to do with determining whether the river is navigable. A long conversation follows, after which Secretary Taft rendered the following decision, taken down in shorthand and now on file in the War Department with the Chief of Engineers:

"OPINION.

"There are two answers to the contention of the State of Illinois in this matter. The application, if I understand it—and it is rather informal than otherwise—is for this department to take no official action which may interfere with the state control of the water power which may be developed in the Des Plaines River under a proposed improvement by the construction of a 14-foot waterway; and also to take no action which may interfere with the waterway as a waterway.

"There are two answers to that. The department is not going to take any action, and has not taken any action. The advisory step, taken at the instance of Mr. SNAPP, or the person who intended to put some sort of water-power construction in the Des Plaines River, was extra-official, and really was beyond the authority of the Chief of Engineers, except as he was accommodating to express an opinion in the interest of explanation. The truth is that the Des Plaines River, not being a navigable stream, no permit was necessary to put any obstruction into it which the War Department could prevent. But even if it had been a navigable stream, and even if the application had been made, and properly made to this department, to say whether this would interfere with navigation if the department concluded it would not interfere with navigation, then it is not within the power of the department to withhold its expressing such an opinion and granting such a permit, so far as the United States is concerned, for the purpose of aiding the State in controlling the water power. If the State has any control over the water power, which it may exercise in conflict with the claimed rights of the riparian owner, then it must exercise it itself, through its own legislation and through its own executive officers. All the United States does, assuming it to be a navigable stream, is merely to protect the navigation of the stream. With reference to the water power, it has no function except in respect to water power which it itself creates by its own investment in property that it itself owns; and then, of course, it may say how that water power shall be used.

"But with respect to the water power on a navigable stream, which may be exercised without interference with the use of the river for navigation purposes, that is controlled by the laws of the State. It is controlled by the riparian ownership and by the common law as it governs those rights. Therefore I do not see, with reference to this matter, that this department has any function to perform or which it can perform.

"It has merely offered a friendly suggestion, with reference to a possible improvement of the river, which has not been authorized and which until it is authorized can not be regarded as giving any right to this Government to interfere in the use of the stream, the proposed action of the private owners here would not be in conflict with such a plan. That is an expression of an opinion with reference to existing plans, but not with respect to existing conditions.

"Therefore what General Mackenzie has done, out of the kindness of his heart, does not commit this department to any assertion of authority in the matter and certainly does not carry us to the necessity of retracing our steps and saying that they shall go on with this when we had not any power to interfere at all.

"It is not that we approve this; it is not that we disapprove it. It is that we have nothing whatever to do with it. That is the truth of it. If the State wishes to control the matter of the water power, then it is for the legislature, through which it can express that view, in so far as it may constitutionally affect it by legislation."

General MACKENZIE. That is virtually what was told the governor, Mr. Secretary, and this is the result of one of our indorsements.

Secretary TAFT. All right; I think that disposes of it.

MEMORANDUM.

Certain questions which have had the consideration of the Inland Waterways Commission relate to rights of property and to the extent and power of the Federal Government in the premises under existing law. I submit the following remarks and quotations as having, to my mind, a bearing upon the questions raised.

These facts are presented not with a view of depreciating some of the suggestions which have been advanced as to the importance of federal control in certain matters under consideration by the commission, but as my view as to conditions under existing law as to ownership and as an expression of the thought that to accomplish some of the results considered important it would appear that modifications of law and possibly amendments to the Constitution may be necessary.

First, as to the land.—The title to the lands forming the banks and beds of navigable waters is in the several States by virtue of their inherent sovereignty, and their property and dominion in these areas are supreme, subject only to the general rights of commerce and navigation and the laws and regulations which Congress may make for the protection thereof. This doctrine was fully set forth by the Supreme Court of the United States in the case of Pollard's Lessee *v.* Hagan (3 How., 212), and has been reaffirmed in various subsequent decisions.

"Lands under navigable waters belong to the States, subject to the rights surrendered by the Constitution to the United States. (Pollard *v.* Hagan, 3 How., 229.)

"On admission of a State into the Union the shores of navigable waters lying below high-water mark pass to and are vested in the State, and thereafter Congress can not grant them. (Goodtitle *v.* Kibbe, 9 How., 477.)

"The shores of navigable waters and the soils under them were not granted by the Constitution to the United States, but are reserved to the States, and the new States have the same rights, jurisdiction, and sovereignty over the subject as the original States. (St. Anthony Falls Water Power Company *v.* Water Commissions, 168 U. S., 360.)

"Ownership of and dominion over lands covered by navigable waters within States belong to the States, subject to the right of Congress to control navigations so far as necessary for the regulation of commerce. (Morris *v.* United States, 174 U. S., 216.)"

In the leading case of Shively *v.* Bowlby (52 U. S., 1) the doctrine is exhaustively discussed, and the following is quoted from the conclusions of the court:

"At common law the title and the dominion in lands flowed by the tide were in the King for the benefit of the nation. Upon the settlement of the colonies like rights passed to the grantees in the royal charters, in trust for the communities to be established. Upon the American Revolution these rights, charged with a like trust, were vested in the original States within their respective borders, subject to the rights surrendered by the Constitution to the United States.

"Upon the acquisition of a Territory by the United States, whether by cession from one of the States, or by treaty with a foreign country, or by discovery and settlement, the same title and dominion passed to the United States, for the benefit of the whole people, and in trust for the several States to be ultimately created out of the Territory.

"The new States admitted into the Union since the adoption of the Constitution have the same rights as the original States in the tide waters and in the lands under them within their respective jurisdictions. The title and rights of riparian or littoral proprietors in the soil below high-water mark, therefore, are governed by the laws of the several States, subject to the rights granted to the United States by the Constitution.

"The United States, while they hold the country as a Territory, having all the powers both of national and municipal government, may grant, for appropriate purposes, titles or rights in the soil below high-water mark of tide waters. But they have never done so by general laws; and, unless in some case of international duty or public exigency, have acted upon the policy, as most in accordance with the interest of the people and with the object for which the Territories were acquired, of leaving the administration and disposition of the sovereign rights in navigable waters and in the soil under them to the control of the States, respectively, when organized and admitted into the Union.

"Grants by Congress of portions of the public lands within a Territory to settlers thereon, though bordering on or bounded by navigable waters, convey, of their own force, no title or right below high-water mark, and do not impair the title and dominion of the future State when created, but leave the question of the use of the shores by the owners of uplands to the sovereign control of each State, subject only to the rights vested by the Constitution in the United States."

While some of the cases cited related to water courses where the tide ebbs and flows, which were the only water courses recognized in England as navigable, the doctrine enunciated is equally applicable to all the navigable waterways of the United States, and the court has so held.

"The common-law doctrine as to the dominion, sovereignty, and ownership of lands under tide waters on the borders of the sea applies equally to the lands beneath the navigable waters of the Great Lakes; and in this country such dominion, sovereignty, and ownership belong to the States, respectively, within whose borders such lands are situated, subject always to the right of Congress to control the navigation so far as may be necessary for the regulation of foreign and interstate commerce. (Illinois Central R. R. Co. *v.* State of Illinois, 146 U. S., 387.)"

In the Genesee Chief (12 Howard, 443) the court declared that "the Great Lakes and other navigable waters of the country, above as well as below the flow of the tide, are in the strictest sense entitled to the denomination of navigable waters."

In Barney *v.* Keokuk (94 U. S., 324), referring to the State of Iowa, the court says:

"It appears to be the settled law of that State that the title of the riparian proprietors on the banks of the Mississippi extends only to ordinary high-water mark, and that the shore between high and low water mark, as well as the bed of the river, belongs to the State. This is also the common law with regard to navigable waters, although in England no waters are deemed navigable except those in which the tide ebbs and flows. In this country, as a general thing, all waters are deemed navigable which are really so; and especially is it true with regard to the Mississippi and its principal branches."

Waterways which are classed as unnavigable are subject to no public easement in favor of the Federal Government, not even to that of commerce. That the States have absolute sovereignty with respect to the regulation and control of property rights in the lands forming the shores and beds of such waterways within their boundaries may be considered an admitted proposition that hardly needs assertion.

"Where a river is not navigable in fact (unless reserved in the original grant) it is a private stream and the public has no easement in it. The riparian proprietors own the bed and may bridge the river, fence it, erect dams across it, and use the water for power or other purposes, provided they do not infringe upon the rights of those above or below them." (Gould on Waters, sec. 46; Farnham on Waters, sec. 29a.)

"Streams which are not navigable in fact are not subject to public easement, and they can be made navigable only by the exercise of the power of eminent domain and the making of compensation for the easements acquired." (I Farnham on Waters, secs. 77 and 79; Cooley Constitutional Limitations, 7th ed., p. 862.)

The doctrine of state ownership and control also applies to the public domain and lands owned by the United States.

"A patent of the United States, conveying land lying upon the borders of a navigable river within the boundaries of a State, conveys no title to land lying under the stream, since the United States has no title thereto." (Scranton *v.* Wheeler, 163 U. S., 703.)

"The power of Congress to make regulations for the sale and disposition of the public lands confers no right to grant land within a State which was below high-water mark in a navigable stream at the time the State was admitted into the Union." (Pollard *v.* Hagan, 3 Howard, 230.)

In the case of Hardin *v.* Jordan (140 U. S., 371), where the question arose whether a survey or patent of the United States bounded by a lake which was not navigable was limited by the margin or extended to the center of the lake, the court held that "grants by the United States of its public lands bounded on streams and other waters, made without reservation or restriction, are to be construed as to their effect according to the law of the State in which the land lies."

And the court further says:

"With regard to grants of the Government for land bordering on tide water, it has been distinctly settled that they only extend to high-water mark, and that the title to the shore and lands under water in front of lands so granted inures to the State within which they are situated, if a State has been organized and established there. Such title to the shore and lands under water is regarded as incidental to the sovereignty of the State—a portion of the royalties belonging thereto and held in trust for the public purposes of navigation and fishery—and can not be retained or granted out to individuals by the United States. Such title being in the State, the lands are subject to state regulation and control, under the condition, however, of not

interfering with the regulations which may be made by Congress with regard to public navigation and commerce."

The foregoing citations are from leading cases, a few only of the many that could be referred to. They are deemed sufficient, however, to show that the powers of the State over the soil forming the banks and bed of water courses, both navigable and unnavigable, are plenary so far as the title, disposition, and use of such areas are concerned, restricted only by the easement conferred by the Constitution on the Federal Government for the benefit of navigation and commerce.

Second, as to the water.—The rule of the common law is that every riparian owner has a right to the continued natural flow of the stream, and that this right is not a mere easement or appurtenance, but is inseparably annexed to the soil itself.

"Riparian proprietors upon both navigable and unnavigable streams are entitled, in the absence of grant, license, or prescription limiting their rights, to have the stream which washes their lands flow as it is wont by nature, without material diminution or alteration. Each proprietor may, therefore, insist that the stream shall flow to his land in the usual quantity at its natural place and height, and that it shall flow off his land to his neighbor below in its accustomed place and at its natural level. The proprietors have no property in the flowing water, which is indivisible and not the subject of riparian ownership, but may use it for any purpose to which it can be applied beneficially without material injury to others' rights, or for which the fall of the stream may make it available as a motive power." (Gould on Waters, sec. 204.)

Says Chancellor Kent (3 Kent Com., sec. 439):

"Every proprietor of lands on the banks of a river has naturally an equal right to the use of the water which flows in the stream adjacent to his lands, as it was wont to run (currere solebat), without diminution or alteration. No proprietor has a right to use the water, to the prejudice of other proprietors, above or below him, unless he has a prior right to divert it, or a title to some exclusive enjoyment. He has no property in the water itself, but a simple usufruct while it passes along. Aqua currit et debet currere ut currere solebat is the language of the law. Though he may use the water while it runs over his land as an incident to the land, he can not unreasonably detain it, or give it another direction, and he must return it to its ordinary channel when it leaves his estate."

This language has been quoted with approval by the Supreme Court, and is considered a correct statement of the common-law rule of riparian rights in flowing water which obtains in all the States of the Union that have adopted this rule. Each State, however, has the power to change by statute the common-law rule as to streams within its borders, and in a number of States this has been done.

In the case of United States *v.* Rio Grande Irrigation Company (174 U. S., 690) the court say:

"Notwithstanding the unquestioned rule of the common law in reference to the right of a lower riparian proprietor to insist upon the continuous flow of the stream as it was, and although there has been in all the Western States an adoption or recognition of the common law, it was early developed in their history that the mining industry in certain States, the reclamation of arid lands in others, compelled a departure from the common-law rule, and justified an appropriation of flowing waters both for mining purposes and for the reclamation of arid lands, and there has come to be recognized in those States, by custom and by state legislation, a different rule—a rule which permits, under certain circumstances, the appropriation of the waters of a flowing stream for other than domestic purposes."

Regarding such legislation, the court holds "that as to every stream within its dominion a State may change the common-law rule and permit the appropriation of the flowing waters for such purposes as it deems wise," subject, however, to two limitations:

"First, that in the absence of specific authority from Congress a State can not by its legislation destroy the right of the United States, as the owner of lands bordering on a stream, to the continued flow of its waters, so far at least as may be necessary for the beneficial use of the government property. Second, that it is limited by the superior power of the General Government to secure the uninterrupted navigability of all navigable streams within the limits of the United States."

In the case of Kansas *v.* Colorado the question presented for consideration and decision was whether the State of Kansas had a right to the continuous flow of the waters of the Arkansas River as that flow existed before any human interference therewith—or the State of Colorado the right to appropriate the waters of that stream so as to prevent that continuous flow—or whether the matter was subject to the superior authority of the United States and, consequently, to national legislation, regulation, and control. The court discussed the whole question; sustained the validity of state legislation on the subject; and held that the rights of the States in regard to the flow of the Arkansas River were not subordinate to any superior right on the part of the National Government to control the system of the reclamation of arid lands, but "that each State has full jurisdiction over the lands within its borders, including the beds of streams and other waters."

The petition of intervention filed on behalf of the Government was dismissed by the court "without prejudice to the rights of the United States to take such action as it shall deem necessary to preserve or improve the navigability of the Arkansas River."

Following the line of this decision, the powers of the Federal Government may be more fully expressed as follows:

1. Paragraph 2, section 3, Article IV, of the Constitution provides that—

"The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States."

By virtue of this provision of the Constitution the Federal Government has complete jurisdiction over the Territories, and—

"Congress has full power of legislation, subject to no restrictions other than those expressly named in the Constitution, and therefore may legislate in respect to all arid lands within their limits.

"As to those lands within the limits of the States, at least of the Western States, the National Government is the most considerable owner and has power to dispose of and make all needful rules and regulations respecting its property. We do not mean that its legislation can override state laws in respect to the general subject of reclamation. While arid lands are to be found mainly, if not only, in the Western and newer States, yet the powers of the National Government within the limits of those States are the same, no greater and no less, than those within the limits of the original thirteen, and it would be strange if in the absence of a definite grant of power the National Government could enter the territory of the States along the Atlantic and legislate in respect to improving, by irrigation or otherwise, the lands within their borders."

As the owner of the lands bordering on water courses within the States, and either constituting a part of the original public domain or acquired for special purposes, the Federal Government has all the rights of a riparian proprietor under state laws, and may make all needful rules and regulations for the beneficial use of its property.

2. Section 8, Article I, of the Constitution provides, inter alia, that the Congress shall have power "to regulate commerce with foreign nations and among the several States and within the Indian tribes."

By virtue of this provision the Federal Government has dominant jurisdiction over interstate commerce and its natural highways, and consequently the right and power to take all needed measures and to enact all legislation necessary to preserve, protect, and improve navigable water courses and to secure their uninterrupted navigability, even against any state action. In this regard its powers are supreme and exclusive, and for this purpose it may regulate and control the flow of water and occupy and use the underlying lands without liability to the State or the riparian owners.

Commerce includes navigation. The power to regulate commerce comprehends the control for that purpose, and to the extent necessary, of all the navigable rivers of the United States which are accessible from a State other than those in which they lie. For this purpose they are the public property of the Nation and subject to all the requisite legislation by Congress. This necessarily includes the power to keep these open and free from any obstruction to their navigation interposed by the States or otherwise; to remove such obstructions where they exist; and to provide by such sanctions as they may deem proper, against the occurrence of the evil and for the punishment of the offenders. For these purposes Congress possesses all the powers which existed in the States before the adoption of the National Constitution. (Gilman *v.* Philadelphia, 3 Wall., 724.)

"Whatever the nature of the interest of a riparian owner in the submerged lands in front of his upland bordering on a public navigable water, his title is not as full and complete as his title to fast land which has no direct connection with the navigation of such water. It is a qualified title, a bare technical title, not at his absolute disposal, as is his upland, but to be held at all times subordinate to such use of the submerged lands and of the waters flowing over them as may be consistent with or demanded by the public right of navigation. (Scranton *v.* Wheeler, 179 U. S., 141.)

"All navigable waters are under the control of the United States for the purpose of regulating and improving navigation, and although the title to the shore and submerged soil is in the various States and individual owners under them, it is always subject to the servitude in respect to navigation created in favor of the Federal Government by the Constitution. (Gibson *v.* United States, 166 U. S., 269.)

"In a navigable stream the public right is paramount, and the owner of the fee of the land on either side of the stream or in its bed holds title subject to the paramount right of navigation over the waters of the river. (West Chicago Street Railroad *v.* Chicago, 201 U. S., 506.)"

The foregoing pages are designed simply to indicate in a general way the respective jurisdictions of the federal and state governments over the subject-matter. It is believed that the citations made are pertinent, and that they set forth clearly the general doctrine as judicially enunciated.

It is suggested, however, that knowledge of state enactments are essential to complete information on the subject. The attitude of the several States differ materially; some adhere to the common-law rule of limiting the rights of a private riparian owner to high-water mark, reserving to themselves complete ownership below that point; others make private grants to low-water mark, and still others extend such rights to the middle of the stream without restrictions of any kind. A careful examination of the statutes of the various States will be necessary to ascertain the actual existing status of those property rights with which the commission is concerned.

A bill to regulate the construction of dams across navigable waters.

Be it enacted, etc., That when, hereafter, authority is granted by Congress to any persons to construct and maintain a dam for water power or other purposes across any of the navigable waters of the United States, such dam shall not be built or commenced until the plans and specifications for its construction, together with such drawings of the proposed construction and such map of the proposed location as may be required for a full understanding of the subject, have been submitted to the Secretary of War and Chief of Engineers for their approval, or until they shall have approved such plans and specifications and the location of such dam and accessory works; and when the plans for any dam to be constructed under the provisions of this act have been approved by the Chief of Engineers and by the Secretary of War it shall not be lawful to deviate from such plans either before or after completion of the structure unless the modification of such plans has previously been submitted to and received the approval of the Chief of Engineers and of the Secretary of War: *Provided*, That in approving said plans and location such conditions and stipulations may be imposed as the Chief of Engineers and the Secretary of War may deem necessary to protect the present and future interests of the United States, which may include the condition that such persons shall construct, maintain, and operate, without expense to the United States, in connection with said dam and appurtenant works, a lock in locks, booms, sluices, or any other structures which the Secretary of War and the Chief of Engineers at any time may deem necessary in the interest of navigation, or in accordance with such plans as they may approve, and also that whenever Congress shall authorize the construction of a lock, or other structures for navigation purposes, in connection with such dam, the person owning such dam shall convey to the United States, free of cost, title to such land as may be required for such constructions and approaches, and shall grant to the United States a free use of water power for building and operating such constructions: *Provided further*, That in acting upon said plans as aforesaid, the Chief of Engineers and the Secretary of War shall consider the bearing of said structure upon a comprehensive plan for the improvement of the waterway over which it is to be constructed and for the full development of water power; and as a part of the conditions and stipulations imposed by them, shall provide for improving and developing navigation, and fix such charge or charges for the privilege granted, [as may be sufficient to restore conditions with respect to navigability as existing at the time such privilege be granted or reimburse the United States for doing the same,] [as may be proper and legal,] the proceeds of such charge or charges to be paid into the Treasury to be applied to the improvement of navigation.

SEC. 2. That the right is hereby reserved to the United States to construct, maintain, and operate, in connection with any dam built under the provisions of this act, a suitable lock or locks, or any other structures for navigation purposes, and at all times to control the said

dam and the level of the pool caused by said dam to such an extent as may be necessary to provide proper facilities for navigation.

SEC. 3. That the person, company, or corporation building, maintaining, or operating any dam and appurtenant works, under the provisions of this act, shall be liable for any damage that may be inflicted thereby upon private property, either by overflow or otherwise. The persons owning or operating any such dam shall maintain, at their own expense, such lights and other signals thereon and such fishways as the Secretary of Commerce and Labor shall prescribe.

SEC. 4. That all rights acquired under this act shall cease and be determined if the person, company, or corporation acquiring such rights shall at any time fail, after receiving reasonable notice thereof, to comply with any of the provisions and requirements of the act, or with any of the stipulations and conditions that may be prescribed as aforesaid by the Chief of Engineers and the Secretary of War, and in such case the Secretary of War is hereby authorized and directed to revoke any such right or privilege and to declare the same void, without prejudice to the equities of any such person, company, or corporation at the time of revocation: *Provided*, That in the event of any revocation under the foregoing provisions of this section or by Congress the United States shall pay the owners of any dam and appurtenant works built under authority of this act, as full compensation, the reasonable value thereof, exclusive of the value of the authority granted, such reasonable value to be determined by mutual agreement between the Secretary of War and the said owners, and in case they can not agree, then by proceedings instituted in the United States circuit court for the condemnation of such properties: *And provided also*, That the authority hereby granted shall terminate at the end of ninety-nine years from the date of the original approval of the project under this act, unless sooner revoked as herein provided, or Congress shall otherwise direct, and in the event of such termination payment may be made in the manner and to the amount provided as aforesaid.

SEC. 5. That any persons who shall fail or refuse to comply with the lawful order of the Secretary of War and the Chief of Engineers, made in accordance with the provisions of this act, shall be deemed guilty of a violation of this act, and any persons who shall be guilty of a violation of this act shall be deemed guilty of a misdemeanor and on conviction thereof shall be punished by a fine not exceeding $5,000, and every month such persons shall remain in default shall be deemed a new offense and subject such person to additional penalties therefor; and in addition to the penalties above described the Secretary of War and the Chief of Engineers may, upon refusal of the persons owning or controlling any such dam and accessory works to comply with any lawful order issued by the Secretary of War or Chief of Engineers in regard thereto, cause the removal of such dam and accessory works as an obstruction to navigation at the expense of the persons owning or controlling such dam, and suit for such expense may be brought in the name of the United States against such persons, and recovery had for such expense in any court of competent jurisdiction. Said provision as to expense shall not apply wherever the United States has been previously reimbursed or has received such charges or compensation as is provided by this act to be paid to the United States, and the removal of any structures erected or maintained in violation of the provisions of this act or the order or direction of the Secretary of War or Chief of Engineers made in pursuance thereof may be enforced by injunction, mandamus, or other summary process, upon application to the circuit court in the district in which such structure may, in whole or in part, exist, and proper proceedings to this end may be instituted under the direction of the Attorney-General of the United States at the request of the Chief of Engineers or the Secretary of War; and in case of any litigation arising from any obstruction or alleged obstruction to navigation created by the construction of any dam under this act, the cause or question arising may be tried before the circuit court of the United States in any district in which any portion of said obstruction or dam touches.

SEC. 6. That whenever Congress shall hereafter by law authorize the construction of any dam across any of the navigable waters of the United States, and no time for the commencement and completion of such dam is named in said act, the authority thereby granted shall cease and be null and void unless the actual construction of the dam authorized in such act be commenced within one year and completed within three years from the date of the passage of such act.

SEC. 7. That the right to alter, amend, or repeal this act is hereby expressly reserved as to any and all dams which may be constructed in accordance with the provisions of this act, and the United States shall incur no liability for the alteration, amendment, or repeal thereof to the owner or owners or any other persons interested in any dam which shall have been constructed in accordance with its provisions.

SEC. 8. That the word "persons" as used in this act shall be construed to import both the singular and the plural, as the case demands, and shall include corporations, companies, and associations.

Mr. TAWNEY. Mr. Speaker, I do not care to use any more of my time and I yield back the balance.

The SPEAKER. The question is on suspending the rules and passing the bill as amended.

The question was taken, and the Chair announced the "ayes" seemed to have it.

Mr. CLARK of Missouri. The yeas and nays, Mr. Speaker.

The yeas and nays were ordered.

The question was taken; and there were—yeas 161, nays 99, answered "present" 13, not voting 112, as follows:

YEAS—161.

So the rules were suspended and the bill was passed.

The Clerk announced the following additional pairs:

Until further notice:

Mr. MUDD with Mr. TALBOTT.

Mr. MADDEN with Mr. BURLESON.

Mr. BRADLEY with Mr. ELLERBE.

Mr. ANDRUS with Mr. ASHBROOK.

Mr. BARCLAY with Mr. BRANTLEY.

Mr. BEDE with Mr. BURGESS.

Mr. BOYD with Mr. CALDWELL.

Mr. CASSEL with Mr. CRAVENS.

Mr. CAULFIELD with Mr. ESTOPINAL.

Mr. DRISCOLL with Mr. GILL.

Mr. FORDNEY with Mr. GLASS.

Mr. HAUGEN with Mr. HOWARD.

Mr. HEPBURN with Mr. LAMB.

Mr. HILL of Connecticut with Mr. JOHNSON of South Carolina.

Mr. HULL of Iowa with Mr. KIMBALL.

Mr. LANGLEY with Mr. KIPP.

Mr. LINDBERGH with Mr. MCHENRY.
Mr. LOWDEN with Mr. WILLIAMS.
Mr. MCMORRAN with Mr. PUJO.
Mr. MONDELL with Mr. MCLAIN.
Mr. MOUSER with Mr. MAYNARD.
Mr. NELSON with Mr. RAUCH.
Mr. PEARRE with Mr. RUCKER.
Mr. ROBERTS with Mr. SHERWOOD.
Mr. SCOTT with Mr. SPARKMAN.
Mr. SOUTHWICK with Mr. TAYLOR of Alabama.
Mr. TOWNSEND with Mr. WILLETT.
Mr. WATSON with Mr. WALLACE.
Mr. BURTON of Ohio with Mr. RYAN.
The result of the vote was announced as above recorded.

ADDITIONAL JUDGE, WESTERN DISTRICT OF WASHINGTON.

Mr. JENKINS. Mr. Speaker, I desire to call up the conference report on the disagreeing votes of the two Houses on amendments of the Senate to the bill H. R. 27061, an act to provide for the appointment of an additional judge in and for the western district of Washington.

The SPEAKER. The Clerk will read the report.

The conference report and statement are as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 27061) to provide for the appointment of an additional judge in and for the western district of Washington, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate and agree to the same.

That the House recede from its disagreement to the amendment of the title of the bill, and agree to the same.

JOHN J. JENKINS,
D. S. ALEXANDER,
HENRY D. CLAYTON,
Managers on the part of the House.

CHAUNCEY M. DEPEW,
J. B. FORAKER,
LEE S. OVERMAN,
Managers on the part of the Senate.

STATEMENT.

Statement of House conferees accompanying report of committee of conference on H. R. 27061 under and pursuant to House Rule XXIX:

An amendment of the Senate provided for the appointment of an additional judge of the district court of the United States for the district of Oregon, and it is recommended that the House recede from its disagreement and agree to the same; and that the House recede from its disagreement to the amendment of the title of the bill and agree to the same.

JOHN J. JENKINS,
D. S. ALEXANDER,
HENRY D. CLAYTON,
Managers on the part of the House.

Mr. JENKINS. Mr. Speaker, I move the adoption of the report.

Mr. MANN. Mr. Speaker——

The SPEAKER. Does the gentleman from Wisconsin [Mr. JENKINS] yield to the gentleman from Illinois [Mr. MANN]?

Mr. JENKINS. I yield to the gentleman from Illinois for five minutes.

Mr. MANN. Mr. Speaker, this is a bill which, as it passed the House, provided for a new district judge for one of the districts of Washington. Some reason was given for that when the bill passed the House. The Senate has added to that an amendment providing for a new district judge for Oregon. It seems to me that the Senate has somewhat taken advantage of an opportunity to indulge in a little logrolling with the House. If there be occasion for a new district judge for Oregon, that matter should have been presented to the House by itself and not as a rider upon a bill providing for a new district judge for Washington. These items ought to stand by themselves and not to be forced upon the House. The question of a district judge for Oregon has never been considered in the House, and we ought not to permit the Senate, when we pass a bill providing for a district judge in one State, to force us to agree to a judge in another State, when the matter has not been presented to the House for our action, and which ought to have been reported from the Committee on the Judiciary.

Mr. TAWNEY. Will the gentleman allow me to ask him a question?

Mr. MANN. Certainly; I yield for a question.

Mr. TAWNEY. Do I understand the gentleman to say that this matter has never been considered by the House at all?

Mr. MANN. It has never been considered by the House, so far as I know.

Mr. TAWNEY. But has come here added as an amendment by the Senate?

Mr. MANN. It has been added to this bill as an amendment by the Senate.

Mr. TAWNEY. Disagreed to, went into conference, and now comes back with a final conference report?

Mr. MANN. That is as I understand it.

Mr. TAWNEY. Which is now under consideration?

Mr. MANN. Which is now under consideration, giving an additional district judge for Oregon. I do not know whether it requires another district judge or not. I know if you provide another district judge for each two Members of Congress, you have got to increase the number very greatly.

The gentleman from Washington, when he addressed this House on this bill, asking for a district judge for Washington, undertook to give special reasons for a district judge in Washington, and upon his statement of those special reasons the House passed the bill; and we are now in the position, if we do not reject the report, of acceding to the creation of another district judge for Oregon, concerning which we have never heard, concerning which no report has been made to the House. I hope the conference report will not be agreed to.

Mr. CLARK of Missouri. Will the gentleman allow me to ask him a question?

Mr. MANN. Certainly.

Mr. CLARK of Missouri. If Illinois were furnished United States judges in proportion to this Oregon matter, you would have 12 or 13 district judges out there, would you not?

Mr. MANN. That would be about what it would amount to.

Mr. CLARK of Missouri. You have come over to my platform of the other day, that the Senate ought to be resisted in these matters.

Mr. MANN. That has been my platform for some time. I am not in favor of creating district judges and circuit judges by any logrolling in the Senate.

Mr. CLARK of Missouri. I am not in favor of the Senate bullying the House in that way.

Mr. JENKINS. Mr. Speaker, I feel it due to the House and to the committee, and particularly to the conference committee, that a statement be made to the House. There has been no logrolling so far as the Senate is concerned. The facts are that the Committee on the Judiciary unanimously agreed upon the facts and evidence presented to the committee that the State of Washington was entitled to another district judge. The House, by an overwhelming vote, approved of the judgment of the Committee on the Judiciary and passed a bill, and it went to the Senate.

Now, I do not think it fair to characterize the action of the other body as logrolling. They have as good a right to amend bills as this House has to amend bills of the Senate. In their wisdom they saw fit to attach an amendment giving the State of Oregon an additional district judge. They insist that the evidence is overwhelming in favor of the proposition, and when that bill came back here with that amendment, on my motion the House disagreed to the amendment. Our attention was invited to it, and the Senate asked the House for a conference, and this House in its wisdom agreed to a conference——

Mr. HENRY of Texas. Will the gentleman yield to me for a minute?

Mr. JENKINS. Certainly.

Mr. HENRY of Texas. Has any bill ever been introduced by any Representative of the State of Oregon, and has any such bill been before the Committee on the Judiciary?

Mr. JENKINS. Why, yes; there has been a bill introduced by the gentleman from Oregon [Mr. ELLIS], I will say to my colleague.

Mr. HENRY of Texas. When was it introduced?

Mr. JENKINS. I can not say, now.

Mr. HENRY of Texas. Was it ever considered by the Committee on the Judiciary?

Mr. JENKINS. I want to make my statement, so that gentlemen will have all the facts before the House.

As I said a moment ago, an amendment was made by the Senate. They had the right to do it. And a conference having been asked and the conferees appointed, the conferees met and were forced either to smother the bill giving the State of Washington an additional judge, or we had to come to this House and throw the responsibility upon the House.

Now, the conference committee did not feel like leaving the State of Washington without an additional judge, but felt as though the House ought to take the responsibility. Therefore the conference committee brought the matter here, and it is now before the House.

Mr. MANN. I hope the gentleman did not think I was making any reflection upon the conference committee, because that is a method of presenting the question fairly to the House.

Mr. JENKINS. Of course, by what was said here the other day it was clear that those who spoke with reference to the matter were not very favorable to this additional judge; but there is so much said on the part of Members of this House and throughout the country about committees smothering legislation and depriving the House of its constitutional right to pass upon questions, that this committee thought it was due to the House to bring this entire matter here and let the House say whether or not this judge should be denied to the people of Washington, when we are satisfied that they are entitled to one. Now, the evidence produced before the conference committee satisfied the House conferees that the State of Oregon was entitled to an additional judge, and in order that the House may be in possession of all the facts, I desire to yield ten minutes to the gentleman from Oregon [Mr. ELLIS].

Mr. ELLIS of Oregon. Mr. Speaker, in regard to this bill, we are not asking anything here to-day but what we think is absolutely fair and just, and with all the facts before this House as to the existing conditions there, I am satisfied when it comes to a vote that those of you in possession of those facts will see that what we are asking is absolutely fair.

Now, we do not make any claim that Washington is not entitled to all the people of that State are asking, but we can make a better showing here to-day in facts and figures than can possibly be made by that district. In the first place, the State of Oregon is all in one judicial district, comprising over 96,000 square miles, and in order to reach the court many people must travel six or seven hundred miles. There are men under indictment there now who have been under indictment for four long years, some of them clamoring for trial, and they have not been able to have it. They must bring witnesses in many instances a distance of not less than 650 miles, which virtually amounts to a denial of justice, if the defendant is a poor man, because he can not stand the expense of getting his witnesses into court.

Mr. HENRY of Texas. Four or five years ago did we not give you an additional judge for the State of Oregon?

Mr. ELLIS of Oregon. You did not.

Mr. HENRY of Texas. I desire to say that at that time I investigated the question, and I believed you were entitled to an additional judge then. So I shall not oppose this bill.

Mr. ELLIS of Oregon. I want to say, in making a comparison of the number of cases on the dockets of the two courts, I say nothing in the disparagement of Washington, but the territory embraced in the western district of Washington does not embrace one-third of the territory embraced in the district of Oregon. Washington already has two judges, but Oregon has only one.

Mr. TAWNEY. How many subdivisions are there in your district?

Mr. ELLIS of Oregon. It is not subdivided at all. It is all in one district.

Mr. TAWNEY. I understand it is all in one district, but in how many places are terms of court held?

Mr. ELLIS of Oregon. The court is held in the city of Portland and in no other place. This bill provides for holding court in two other places, one 231 miles east of Portland, and one about 300 miles south of Portland.

Mr. TAWNEY. Would not the people of the State be benefited more by providing for, say, three divisions, and requiring the present judge to hold court at each one of those three places—a regular term?

Mr. ELLIS of Oregon. If it was possible for the present judge to do it; but the state of the business is so congested that it is absolutely impossible for him to do it.. Business is now years behind in that district. There were pending on the 6th day of July last, admiralty cases, 121; bankruptcy cases, 145; civil cases in which the United States was a party, 105; in which it was not a party, 394; criminal cases, 58.

In the western district of Washington there are pending: Admiralty cases, 113; bankruptcy, 157; civil, in which the United States is a party, 79; civil cases, in which the United States is not a party, 291; criminal cases, 52; a total of 692, or 131 more cases pending in the district of Oregon than in the western district of Washington, comprising practically one-third of the territory, with railroad facilities right at hand and water transportation, while in a large part of the State of Oregon they must use the old-fashioned stagecoach in getting to and from points, and travel six or seven hundred miles.

Then there were fines imposed in the district of Oregon during the fiscal year amounting to $17,541. In the western district of Washington they amounted to $4,200—over $13,000 difference in favor of Oregon in fines collected. It seems to me, Mr. Speaker, that under that condition of facts we are entitled to an additional judge.

A bill was introduced creating an additional district in Oregon, and I was before the committee, and others from Oregon were before the committee, urging it; but the committee of the House, as well as the committee of the Senate, seemed to be disposed not to create additional districts, and therefore the matter drifted along, until we find ourselves in the present predicament. We feel that it is an absolute necessity, and in order that justice may be meted out, in order that those under indictment may have a speedy trial, in order that the business men may have justice in our State, in order that those who live at a great distance from court may have justice by getting their cases before the court and having a hearing, I insist that the measure is absolutely just and equitable and should pass the House. [Applause.]

Mr. JENKINS. Mr. Speaker, I now yield ten minutes to the gentleman from Alabama [Mr. CLAYTON].

Mr. CLAYTON. Mr. Speaker, in reply to the suggestion—if I caught the words of the gentleman correctly—that the Judiciary Committee of the House may not be always careful in the way of creating new judgeships, I desire to say that since I have been a member of that committee the committee has repeatedly turned down propositions to create new judges and new districts.

Mr. MANN. And this is one of them.

Mr. CLAYTON. The gentleman will permit me to finish my statement. This committee, Mr. Chairman, and the records of the committee will bear me out, has rejected and rejects at every session of Congress numbers of bills creating new districts and new judges. It has adopted a rule and has unfailingly adhered to it, and that rule is not to create a judgeship or a district unless there is absolute necessity for such made manifest to that committee.

I believe my memory is correct when I say that not only has that been the rule of the committee, but it has gone further than that even, and has, as a rule, required the approval of the Department of Justice predicated upon an investigation and report made by the Attorney-General as to the state of the public business in the particular locality where the judge is desired, or where the new district is desired. That committee has always been very careful.

Now, Mr. Speaker, my recollection of this particular matter is that several years ago a bill creating a new judge in the State of Oregon passed the committee. I know that the people there have persistently asked this of the Judiciary Committee, and on account of its growth and population, on account of the development and the remarkable increase in litigation, and on account of the vast distance to be traveled, have asked for this legislation. It has been demonstrated that this judgeship is a necessity.

However, the Judiciary Committee of the House did not at this session bring itself to the conclusion that this bill should be put through at this session in regard to the judgeship of Oregon. But the gentleman from Washington and the members of the bar from that State appeared before this committee and presented what I consider an unanswerable case in behalf of a new judgeship in the State of Washington, and the Department of Justice urged it and presented irrefutable arguments in favor of it. The House committee and this House gave a judge to the State of Washington, but it did not give a judge to the State of Oregon.

Now, when the Washington bill got to the Senate, the Senate amended that bill by tacking on the Oregon judgeship proposition. Mr. Speaker, as much as we may regret the growth of business in the United States courts, the fact is it is increasing from year to year. I have stood here for ten years and tried to do at least one thing that would cut down the business of the federal courts at least in one particular.

I have asked you repeatedly to repeal the bankrupt law, for its repeal would tend to relieve the federal courts. But you have refused to do that. I have opposed the enactment of new statutes that increased the business of the federal courts. But the majority has overruled us and passed them. We have passed a great many laws necessary in the progress of the development of our country; they have also increased the business of the federal courts. The business of the federal courts, like everything else in this country, is increasing, and the business of the federal courts in the State of Oregon is growing just

as rapidly as the business developments and population of that great State are growing.

It would be a poor policy for this great Government of ours to set up the plan of withholding justice and withholding accessible courts, withholding a proper number of judges for the due and proper administration of the law. We must see to it that justice is without bargain, sale, or denial, and, in my judgment, it will prove a matter of economy to create this judgeship in the mileage that will be saved to jurors and witnesses. Speaking for the people of Oregon who are interested as litigants in that court, it would be a great saving to them in the matter of convenience and in the matter of railroad transportation. [Applause.]

This State of Oregon, in my opinion, should have this extra judge. Mr. Speaker, I could not stand up here in the House of Representatives and acknowledge, as I do now, that in the greatest State in this Union, not greatest in territory, but the greatest in resources, considering her territory, and the greatest in population without regard to numbers—the State of Alabama—has three federal judges, if I did not believe that the State of Oregon needs this new judge. We found it necessary to have three judges in Alabama in order that justice might be administered economically and freely and without denial in that great Commonwealth. Nearly every State in this Union is growing, particularly in the West and in the South, and we can *not* stop the growth, and Congress must legislate to meet the growth and the demands for the administration of public justice economically and conveniently to the people.

If the House of Representatives was right in creating a judgeship for the State of Washington—and you have voted that it was right in doing that, for you passed that bill here some days ago—manifestly it would be right to pass the proposition for the State of Oregon. Some gentleman has asked me why this increase of business out there? Mr. Speaker, the admiralty practice in the Western States that have water transportation is very much larger than it is in many of the older States. A large part of the business of transportation is done on the water, and wherever there is a large water commerce that means necessarily much litigation growing out of suits in admiralty, involving large amounts and consuming much time in its trial.

The SPEAKER. The time of the gentleman has expired.

Mr. JENKINS. I yield the gentleman one minute more.

Mr. CLAYTON. Then, Mr. Speaker, there are various sorts of lawsuits growing out of land transactions in that new country and out of all sorts of rights, mining rights, timber rights, water rights, a great class of litigation that is incident to the development of any great and growing Commonwealth such as the State of Oregon is. This bill, in my judgment, ought to pass as amended. [Applause.]

Mr. JENKINS. Mr. Speaker, I yield one minute to the gentleman from Oregon [Mr. HAWLEY].

Mr. HAWLEY. Mr. Speaker, in addition to what has already been said by my colleague, I wish to call attention to the following facts: In 1907 there were 66 civil cases in which the United States was a party, and in 1908 there were 105, an increase of 39. There was no increase in the criminal cases for those two years. Of the civil cases in which the United States was not a party, in 1907 there were 403 cases, and in 1908 515, an increase of 79. In other cases there was an increase of 124. So the total increase in cases on the docket was from 581 in 1907 to 823 in 1908, an increase of 242 cases in one year. Mr. Speaker, we need the district judge for the business of Oregon, and I hope the bill will pass.

Mr. JENKINS. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Speaker, I hold in my hand the report of the Attorney-General for the last fiscal year, giving the amount of business in the two courts, the district of Oregon and the western district of Washington. I notice that in the district of Oregon during the last fiscal year there were disposed of 16 civil cases in which the United States was a party and 51 cases in the western district of Washington. In that same year there were disposed of civil cases in which the United States was not a party 60 in the district of Oregon and 249 in the western district of Washington.

I fail to see how these figures show the necessity for an extra judge—16 cases, 8 jury trials in the whole district in the course of a year in civil cases in which the United States was a party, as against 51 in the western district of Washington, and 60 civil cases in which the United States was not a party terminated in Oregon as against 249 terminated in the western district of Washington. If there be reason for the creation of an additional judge in the western district of Washington, certainly the amount of business terminated in the district of Oregon does not justify a new judge there—not an additional judge.

Mr. SIMS. How many land-law suits did they have there?

Mr. MANN. I do not know whether I can pick up the land law, but I can the admiralty. The gentleman from Alabama referred to the number of admiralty suits.

Mr. ELLIS of Oregon. If the gentleman will permit me, I will say this, that in some of the litigation pending in Oregon were some of these land cases, which took a great deal of time, a great number of days in a single case, so the number of cases is no criterion.

Mr. MANN. That will not continue all of the gentleman's life, I hope. Now, let us take the admiralty cases to which the gentleman from Alabama referred. There were 13 terminated in the district of Oregon and 63 terminated in the western district of Washington. Does that show the necessity for an additional judge in Oregon? It may be true that there have been some extensive land-fraud cases there, but I do hope that the gentlemen representing Oregon will not undertake to say that these land-fraud cases there are to continue during the life of the State.

Mr. JENKINS. Mr. Speaker, I yield ten minutes to the gentleman from New York [Mr. ALEXANDER].

Mr. ALEXANDER of New York. Mr. Speaker, some gentlemen present will remember that the other day I spoke of the courts of the ninth circuit, saying that they had been under consideration and investigation, and fully reported upon to the Judiciary Committee. My colleague [Mr. CLAYTON] has already referred to that report. It came in connection with Oregon and Washington, and the report then made by the Attorney-General convinced the subcommittee that Oregon needed relief as well as Washington. Two years ago a bill was passed by the Senate for 2 circuit judges. We did not then have sufficient data upon which to determine whether it should be 2 circuit judges or 2 district judges. But after the investigation it was manifest that 2 additional judges were needed in the ninth circuit. Now, the ninth circuit is everything west of the Rocky Mountains. It had only 9 district judges and 3 circuit judges, while the eighth circuit has 18 district judges and 4 circuit judges.

Mr. SHACKLEFORD. What States are embraced in that?

Mr. ALEXANDER of New York. The Missouri and Mississippi Valley States. Everything west of the Rocky Mountains is within the ninth circuit, and the two additional district judges provided in this bill evens it up and gives the necessary help. The entire State of Oregon is one district, and it was thought inadvisable to divide it into two districts, but to give it an additional judge. Let me compare——

Mr. SIMS. Will the gentleman permit? Has the committee determined on an evening up? In other words, has the Mississippi country too many judges——

Mr. ALEXANDER of New York. The committee is influenced by what is necessary in the ninth circuit. We are not "evening things up."

Mr. SIMS. The gentleman said the Mississippi country had so many, and to "even it up" you were giving another one over here.

Mr. ALEXANDER of New York. Oh, no. I meant to give the ninth circuit what it needs, just as the eighth circuit has what it needs.

Mr. SIMS. In proportion to population, has not the ninth circuit a much fewer number of judges than the eighth?

Mr. ALEXANDER of New York. The ninth circuit, in proportion to population, may have as many judges as the eighth, but it is short in proportion to the work to be done.

Mr. MANN. It has a great deal more in proportion to population.

Mr. ALEXANDER of New York. In Oregon the civil cases pending July 1, 1907, to which the United States was a party, were 66; in the western district of Washington, 70. On July 1, 1908, civil cases pending in Oregon were 105, in Washington 79. Pending July 1, 1907, criminal cases in Oregon, 58; in Washington, 52. Pending July 1, 1908, criminal cases in Oregon, 58; in Washington, western district, 52. Of civil cases pending July 1, 1907, to which the United States was not a party, in Oregon, 436, and in Washington, 381.

Mr. SIMS. Another question. Why did the gentleman's committee of the House then turn down the Oregon proposition?

Mr. ALEXANDER of New York. We did not turn down the Oregon proposition.

Mr. SIMS. But you refused to report it.

Mr. ALEXANDER of New York. We did not refuse——

Mr. SIMS. Then you failed to report it.

Mr. ALEXANDER of New York. We failed to report it because we did not want to create another district.

The subcommittee to which these bills have been referred has studied them with relation to the ninth circuit, and we knew where the judges were needed.

Mr. ELLIS of Oregon. Will the gentleman yield for a question?

Mr. ALEXANDER of New York. Certainly.

Mr. ELLIS of Oregon. Is it not a fact that Oregon came asking for an additional district and not an additional judge, and the committee was opposed to creating more districts?

Mr. ALEXANDER of New York. That is the principal reason why we did not report it. The committee is opposed to increasing districts, but in favor of increasing judges when necessary.

Mr. CLAYTON. Will my colleague on the committee yield to me for one question?

Mr. ALEXANDER of New York. Yes.

Mr. CLAYTON. The gentleman from Illinois [Mr. MANN] in his speech furnished some figures showing that comparatively a few number of cases had been disposed of in the Oregon courts. That is not the question. I ask the gentleman's permission to say to the House that on July 1, 1907, there were 36 civil cases pending in the federal courts.

Mr. ALEXANDER of New York. I just read a comparative statement.

Mr. CLAYTON. A comparative statement will show the amount of business which has lately begun in the courts. We can not judge by the amount of business that is turned out of the courts, but by how much there is in the court there that ought to be turned out of the court.

Mr. ALEXANDER of New York. Yes. Mr. Speaker, I am going to add just one word more.

Mr. PARSONS. Can the gentleman explain why so few cases have been disposed of in the courts in the Oregon district?

Mr. ALEXANDER of New York. Well, one reason is, perhaps, that the judge of the Oregon district may not be as rapid a worker as Judge Hanford, of the Washington district. Judge Hanford has a reputation of being one of the most rapid workers in the United States. The judge of Oregon is equally as able, but perhaps not quite so rapid. The work, considering the amount of it, is not behind the work in other districts.

Mr. STEPHENS of Texas. The gentleman is an able lawyer and can answer one question, possibly, that will throw some light on the subject. Can not this new judge you are creating for Washington also have a district cut out in Oregon and fill the vacancy of both States by creating one judge? Can not a new district be made in Oregon and let him hold court in two States?

Mr. ALEXANDER of New York. No. The policy is to increase the judges when necessary, and not create more districts. We have too many districts in the country.

Mr. STEPHENS of Texas. As a legal proposition, could not one judge hold in two different States?

Mr. ALEXANDER of New York. Oh, yes; he often does so. He is called from one district to the other, as work demands attention.

Mr. SIMS. Can the gentleman assure us he will get a rapid worker now?

Mr. JENKINS. Mr. Speaker, I ask for a vote.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. MANN. I ask for a division.

The House divided; and there were—ayes 140, noes 56.

So the conference report was agreed to.

BUILDING ASSOCIATIONS, DISTRICT OF COLUMBIA.

Mr. SMITH of Michigan. Mr. Speaker, I move to suspend the rules and pass the bill S. 6055, with amendment, which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the bill with amendment.

The bill as amended was read, as follows:

An act (S. 6055) to amend section 691 of subchapter 7, building associations, of the Code of Law for the District of Columbia.

Be it enacted, etc., That section 691, subchapter 7, of the Code of Law of the District of Columbia, relating to building associations, be amended so that the same shall read:

"SEC. 691. Objects.—The object of such corporation shall be the accumulation of a capital in money to be derived from the savings and accumulations by the members thereof, to be paid into said corporation in such sums and at such times as may be designated by the by-laws of said corporation, from which the members thereof may obtain advances upon their shares of stock: *Provided*, That the Comptroller of the Currency, in addition to the powers conferred upon him by law for the examination of national banks, is further authorized, whenever he may deem it useful, to cause examination to be made into the condition of any building association incorporated under the provisions of this chapter, as well as any other building or loan association located or doing business in the District of Columbia. The expenses necessarily incurred in making any such examination shall be paid by such association to the Comptroller of the Currency at the time of the making of such examination: *And provided further*, That every building or loan association located and doing business in the District of Columbia shall make to the Comptroller of the Currency at least one report during each year, according to the form which may be prescribed by him, verified by the oath or affirmation of the president or secretary of such association and attested by the signature of at least three of the directors. The said comptroller shall also have power to take possession of any company or association whenever in his judgment it is insolvent or is knowingly violating the laws under which such company is incorporated, and to liquidate the same in the manner provided in the laws of the United States in respect to national banks: *Provided further*, That from and after the 1st day of July, A. D. 1909, no person, company, association, copartnership, or corporation, except corporations organized under and availing themselves of the privileges of this act, and except building associations heretofore organized and in actual operation before the passage of this act, shall conduct or carry on in the District of Columbia the kind of business named in this act without strict compliance in all particulars with the provisions of this act. Any person, officer, or agent of any company, firm, or corporation who shall willfully violate any of the provisions of this section shall be deemed guilty of a misdemeanor, and shall on conviction thereof be punished by a fine of not more than $1,000 or by imprisonment not longer than two years, or by both said punishments, in the discretion of the court. That any willful false swearing in regard to any certificate, or report, or public notice required by the provisions of this act shall be perjury, and shall be punished as such according to the laws of the District of Columbia. And any misappropriation of any of the money of any corporation or company formed under or availing itself of the privileges of this act, or of any building or loan association located or doing business in the District of Columbia, or any money, funds, or property intrusted to any such corporation, company, or association, shall be held to be larceny and shall be punished as such under the laws of said District."

SEC. 2. That there be added to the Code of Law of the District of Columbia a new section, to stand as section 691a, and to read as follows:

"SEC. 691a. That any association or corporation organized and existing under the laws of any State or Territory to do, or now doing, in the District of Columbia, a deposit, investment, loan, or mortgage business, or otherwise having any of the features of a building association, shall be subject to all the provisions of the foregoing section of this act in respect of the powers of the Comptroller of the Currency thereover, and any such association or corporation shall at all times keep on deposit with the Comptroller of the Currency in money, or stocks, bonds and mortgages, or other securities to be approved by said officer, not less than 25 per cent of its capital and surplus as security for its depositors and creditors, and as a guarantee for the faithful performance of its contracts, and may also make such further deposits of its assets as above described with the comptroller for such purpose as it may from time to time desire so to do."

Mr. SIMS. I demand a second.

The SPEAKER. The second is ordered under the rules.

Mr. SMITH of Michigan. I yield five minutes to the gentleman from Pennsylvania [Mr. BRODHEAD].

Mr. BRODHEAD. Mr. Speaker, the purpose of this bill is to provide an official examination of the affairs and accounts of building and loan associations doing business in the District of Columbia. It also provides that such building and loan associations shall make at least one report a year to the Comptroller of the Currency, and gives the Comptroller power to declare such building and loan associations insolvent and take charge of their affairs when, in his judgment, the facts require such action.

Mr. MADDEN. Does this bill provide a periodical examination of the accounts and assets of these associations?

Mr. BRODHEAD. It provides for an examination of their affairs and accounts in the discretion of the Comptroller of the Currency.

Mr. MADDEN. Does it provide for the same character of examination of building and loan associations organized in outside States doing business in the District?

Mr. BRODHEAD. Yes. There is also a provision that all building and loan associations, domestic as well as foreign, shall deposit 20 per cent of their assets, either in money or in stock or in bonds or in other securities, in the hands of the Comptroller. The purpose of all this is to protect the people who invest in building and loan associations, a large majority of whom are persons of small means.

Mr. MADDEN. There is no system of examination now of the building and loan associations doing business in the District?

Mr. BRODHEAD. None; and this bill is to fill that omission.

Mr. MADDEN. So that nobody knows whether their assets or accounts are worth anything or not?

Mr. BRODHEAD. No. There is no provision for examinations of building and loan associations in the District.

Mr. MADDEN. This is a work in the right direction.

Mr. BRODHEAD. I think that it is; and I think, therefore, the bill should pass.

This bill is meant to apply only to companies doing the business of building and loan associations, and is, indeed, a step in the right direction; but it is only a step. It seems to me there are many other steps that should be taken toward the perfecting of the laws of this District pertaining to the organization, regulation, and control of corporations doing business here.

Mr. Speaker, the remaining days of this Congress are too few, and the business now pressing on us is too great to permit of any further successful effort toward improving that part of the District Code pertaining to corporations other than the passage of this present bill. But let me take this opportunity of submitting a few observations which may be of some use to a succeeding Congress in the way of suggestions of how the District corporation laws might be amended to advantage.

First. After examination of the code it appears to me that any three or more persons may form a corporation and carry on any enterprise (with two or three exceptions, such as a bank, railroad, or real estate business) by executing and filing in the office of the recorder of deeds a certificate in the prescribed form. The law does not require that any one of the organizers should be a citizen of the District; yet later on it provides that after the first year the stockholders shall annually elect "not less than three nor more than fifteen trustees," a majority of whom must be citizens of the District. Why permit all of the organizers and all of the trustees to be nonresidents during the first year, and immediately after the first year make it obligatory that a majority of the trustees be citizens of the District? As to this the suggestion is that the code be amended so as to provide that at least one of the original incorporators and at least one of the trustees or directors shall at all times be a bona fide resident of the District, whose address shall be filed with the recorder of deeds. There is sufficient reason why at least one director should be a resident of the District to facilitate service of process, but there does not seem to be sufficient reason to hamper outside capital from coming into the District by requiring that after the first year a majority of the whole board of trustees must be residents. This amendment was provided in the bill introduced on December 2, 1907, by the gentleman from New York [Mr. GOULDEN] (See H. R. 227) and submitted to the District Commissioners, who found no fault with it. The bill is still in committee.

Second. Under the code as it now stands, domestic corporations can not be organized to buy, sell, or deal in real estate, except corporations to transact the business ordinarily carried on by real-estate agents or brokers. Exactly why the existence of domestic real-estate companies should be prohibited is not clear to me. Such companies tend to systematically develop large tracts of vacant land outside of large cities. The beautiful suburbs of Philadelphia and many other cities are examples. But, assuming that the prohibition is a good one; that having heretofore been carefully considered and written in the law, it is to that extent res adjudicata, then why not prohibit foreign real-estate corporations from doing business in the District? There is nothing in the code now that would prohibit a real-estate corporation, incorporated in some State, from entering here and doing business in the District. In this respect the suggestion is that either the prohibition against domestic corporations should be repealed or the code amended so as to exclude foreign corporations from doing a real-estate business from which the domestic corporation is excluded. A bill placing the same prohibition against foreign corporations as exists against domestic corporations was introduced by the gentleman from Texas [Mr. SHEPPARD] on March 7, 1908 (H. R. 18880), and referred to the Committee on the District of Columbia on the same day, and, on March 9, 1908, referred to the Commissioners of the District; but I can find no reply from the commissioners. The bill is therefore still pending before the District Committee.

Third. At present, upon the filing of the certificate of organization, no fees are charged, excepting those for recording. Graduated filing fees should be provided for. Such provision was contained in the bill which I have just referred to, introduced by the gentleman from New York [Mr. GOULDEN]; but, as I said, the bill is still pending in committee.

Fourth. A provision should be inserted in the code requiring the address of the resident director to be on file in the recorder's office. Upon the death or resignation of such resident director the company should be compelled, within ten days after such death or resignation, to name a successor, who shall also be a resident and whose address shall be immediately filed in the recorder's office. This provision is to facilitate the service of processes. In the absence of such resident director from the District for a period of ten days or more, service of process should be deemed good and sufficient service upon the corporation by leaving such process at the post-office address of said director or in charge of a person of full age and years of discretion and the mailing of same to the said post-office address as filed.

The provision in the code at present, I think, opens the door to a great deal of uncertainty in regard to the service of process on corporations. It is short, indefinite, and reads as follows:

SEC. 112. Corporations. In a suit against a corporation, whether foreign or domestic, if process can not be served, such corporation may be proceeded against as a nonresident defendant by notice by publication.

The provision relative to nonresidents provides that publication may be substituted for personal service upon any defendant who can not be found and who is shown by affidavit to be a nonresident or to have been absent from the District for at least six months. No order for the substitution of publication for personal service can be made until a summons for the defendant shall have been issued and returned "not to be found" and the nonresidence of the defendant or his absence shall be proved by affidavit to the satisfaction of the court, and whereupon an order of publication is issued and published at least once a week for at least three successive weeks, and so on.

It would seem much simpler in every respect to have a corporation designate a certain person, whose address shall continually be kept on file in the recorder's office, upon whom service can be had. It would make it easier for the plaintiff and would insure the defendant corporation of receiving notice, whereas a published notice once a week might escape attention.

Fifth. The code should provide that a majority of all the stock of the corporation should be represented either in person or by proxy at meetings where directors or trustees are elected. The code at present provides that the affairs of corporations shall be managed by not less than 3 nor more than 15 trustees, who shall be stockholders, and, after the first year, a majority of whom shall be citizens of the District, who shall be annually elected by the stockholders at such time and place as shall be determined by the by-laws; and that notice of such election shall be published not less than thirty days previous to such meeting in some newspaper published in the District; and that the election shall be made by such of the stockholders as shall attend for that purpose, either in person or by proxy.

The suggestion, you will see, is that at such meeting the election shall be made by the attending stockholders, either in person or by proxy, provided that a majority of all the stock is thus represented.

Sixth. What seems to me to be one of the most serious defects in the corporation laws of the District is the provision relative to the annual reports to be made by companies doing business in the District. Section 617 of the code apparently provides that every such company shall annually make a report which shall be published in a newspaper in the District, stating the amount of capital and the proportion actually paid, and the amount of existing debts, which report shall be signed by the president and shall be verified by his oath and filed in the office of the recorder of deeds.

And it is provided in section 618 that if any company fail to comply with this provision any creditor of the corporation or other person interested may, by petition, have a mandamus compelling such publication to be made, the cost of such proceedings to be paid by the corporation; and, further, upon such failure the trustees of such company shall be jointly and severally liable for the debts of the company then existing and for all that shall be contracted before such report shall be made.

It will be noticed that the penalty is wholly insufficient. This insufficiency is apparent without further analysis. Since January 1, 1902, when the District law went into effect, more than 7,000 incorporation papers have been filed, of which number 5,000 are for corporations organized for other than charitable purposes; that is, they were organized and did or are now doing business for gain. The law is meant to compel such companies to file annual reports for the information of those interested; yet less than 300 out of the 5,000 observe the law. Each year the number is growing less and less, and by next year or the year after the law will not be observed by any of them.

It is suggested that the code should be amended providing for a suitable penalty for failure to file such reports. The corporation counsel of the District should be furnished by the recorder of deeds with a list of all the corporations having failed to comply with this provision, and it should be the duty of the corporation counsel to proceed against such corporation to restrain it from continuing to conduct its business in the District and to collect a fine to be imposed for such neglect.

A remedy for the existing omission in the code was proposed by the gentleman from Texas [Mr. SHEPPARD] on March 7, 1908 (H. R. 18881) and by the gentleman from California [Mr. KAHN] by a bill he introduced March 14, 1908 (H. R. 19310), which was referred to the Committee on the District of Columbia and by that committee to the District Commissioners, who made the following favorable report thereon:

EXECUTIVE OFFICE.
COMMISSIONERS OF THE DISTRICT OF COLUMBIA,
Washington, April 2, 1908.

Hon. S. W. SMITH,
Chairman of Committee on District of Columbia,
House of Representatives.

SIR: The commissioners have the honor to recommend favorable action upon H. R. 19310, entitled "A bill to amend sections 617, 618, and 619 of the Code of Law for the District of Columbia, and for other

purposes," which was referred to them at your instance for examination and report.

This bill proposes to amend sections 617, 618, and 619 of the District Code so as to insure the filing of annual reports by domestic corporations. The code at present provides that these annual reports shall be made public and filed in the office of the recorder of deeds, but it neglects to provide such a penalty as insures the observance of the law. Since January 1, 1902, when the District law went into effect, the commissioners are informed by the recorder of deeds, more than 7,000 incorporation papers have been filed for record by that officer. The great majority of such papers were certificates of incorporation of companies organized under the provision of subchapter 4 of chapter 18 of the code. That is, companies formed for business purposes—for gain. It is estimated by the recorder of deeds that at least 5,000 such concerns have been organized here since January 1, 1902, but less than 300 of these 5,000 companies have, during the present year, filed the annual reports which the law requires of them, the recorder stating that the number complying with this law grows smaller each year.

The bill under consideration makes the law effective by authorizing prosecutions against all corporations failing to comply with the law, with the view of restraining them from doing business in the District, while it also makes any willful false swearing in regard to any certificate, report, statement, or notice required by chapter 18 of the code relating to corporations, perjury and punishable as such, and also makes any misappropriation of any money of any organization formed under the provisions of the District corporation laws, larceny and punishable as such, as well as the misappropriation of any money, funds, or property intrusted to such corporation.

Very respectfully,

HENRY B. F. MACFARLAND,
President Board of Commissioners of the District of Columbia.

Seventh. Now, Mr. Speaker, as to foreign corporations doing business in the District. In the first place, the existing law is unsatisfactory in respect to obtaining service of process on foreign corporations. Until the amendment of the code, approved February 1, 1907, it provided merely that process should be served on the agent of said corporation. Exactly as to who was the agent gave rise to much litigation. Whereupon the code was amended so as to provide that, as to a foreign corporation transacting business in the District without having any place of business or resident agent therein, service could be had upon any officer or agent or employee of such corporation.

This seems to go too far the other way, as a foreign corporation might be sued by service upon some insignificant employee—a day laborer, for instance—and the officers of the company who should defend the action would have no real notice of the impending suit; whereupon, I suppose, they would have to go into court with a petition praying to be permitted to enter a defense—maybe after a judgment had been entered for nonappearance. Then, again, arises the question as to whether the person served was the agent or was the employee of the corporation defendant.

The case of Ricketts *v.* The Sun Printing and Publishing Company, found in Twenty-seventh Appeal Cases, District of Columbia, page 222, is a case where much time was taken up merely upon the question of whether the process was good or not.

Again, a more recent case, that of Karr *v.* New York Continental Jewell Filtration Company, reported in volume 31, Appeal Cases, District of Columbia, page 459, is another instance where much time was wasted upon a mere question of the sufficiency of service. In this latter case the defendant corporation had a contract for the construction of the tunnel under Capitol Hill in connection with the recent railroad improvements there. The contract included the work necessary to readjust the street grades after the completion of the tunnel. The plaintiff sued for damages for personal injuries after the completion of the tunnel, but before the work of readjusting the street grades was finished, and service was had upon a laborer and upon a civil engineer who had been employed by the company in the construction of the tunnel. The plaintiff came into court specially and moved to vacate the service on the ground that the defendant corporation had turned over the work to readjust the street grades to another corporation, and that the persons served were their employees, and not those of the defendant. In both cases the time of the court, as well as valuable time of the litigants, was taken up by the question of what constitutes the agent or employee of a foreign corporation qualified to receive service under the District Code.

These cases illustrate the uncertain state of the law upon this question. The point is, first, the law should be so written as to enable the courts to get down to the merits of the case and not waste a year or two upon such question as the validity of service, growing out of the uncertainty of the law, the merits of the case being thereby postponed.

The suggested remedy is that every foreign corporation doing business in the District shall appoint, in writing, the recorder of deeds of said District its attorney for the purpose of receiving service of process, the duty of the recorder being to immediately inform the corporation defendant. This suggested remedy is found in the bill introduced by the gentleman from California [Mr. KAHN] on March 12, 1908 (H. R. 19175). This bill was referred to the Committee on the District of Columbia, and by that committee to the commissioners, who approved the bill. It is still pending before the committee.

Eighth. Foreign corporations should also file annual reports and pay a graduated fee thereon, and such provision should also be applicable to domestic corporations. This suggested change was proposed by the gentleman from Texas [Mr. SHEPPARD] in the bill he introduced March 8, 1908 (H. R. 18882), which was favorably reported upon by the commissioners and is still pending before the District Committee.

Ninth. The certified copies of the charters of foreign corporations should be filed with the recorder of deeds, and permits should be issued to them to operate within the District. This, too, is the suggestion of the gentleman from Texas [Mr. SHEPPARD] in his bill H. R. 18884.

It will be seen that the defects of the present code have occurred to several Members of this House, who have from time to time introduced bills for the purpose of remedying such defects. These bills have been referred to the commissioners, and upon almost all of them the commissioners have made favorable reports to the District Committee. But the question of remedying the existing code is still pending before that committee. It is an important subject, and therefore it is perfectly right that considerable time and attention should be given to it. The committee might have reported a bill this session, but I think the consideration of the subject was delayed by the committee by reason of the commissioners' letter, dated April 27, 1908, which is as follows:

EXECUTIVE OFFICE,
COMMISSIONERS OF THE DISTRICT OF COLUMBIA,
Washington, April 27, 1908.

Hon. S. W. SMITH,
Chairman of Committee on District of Columbia,
House of Representatives.

SIR: The Commissioners of the District of Columbia have the honor to suggest with reference to House bill 227, "to amend the Code of Law for the District of Columbia regarding corporations," which was referred to them at your instance for their views, that owing to the large number of bills affecting corporations, both local and foreign, which have been introduced at this session of Congress, that no action be taken upon any of these measures during the present session, but during the recess the commissioners will give consideration to the various bills with the view of transmitting to Congress upon its reassembling a measure which will present, in codified form, the changes which are proposed to be accomplished and which, in the judgment of the commissioners and the recorder of deeds, ought to be enacted.

Very respectfully,

HENRY L. WEST,
Acting President of the Board of Commissioners
of the District of Columbia.

It will be noticed, Mr. Speaker, that the commissioners, on April 27, 1908, suggested that no action be taken in this matter for the reason that during the recess occurring between the first and second sessions of the Sixtieth Congress the commissioners would give consideration to the various bills with a view to transmitting to Congress, upon its reassembling in December, 1908, a measure which would present in codified form the changes which are proposed to be accomplished, and which, in the judgment of the commissioners, should be enacted. I regret to say that the commissioners did not present such a bill. The commissioners' letter of April 27, 1908, was never followed up by the commissioners.

In the light of the several bills to which reference was made in the commissioners' letter, and to which I have referred, I endeavored to prepare a bill which presents in codified form the several changes in the code of which I have been speaking. In the preparation of this bill it is proper I should mention and give due credit to Mr. J. F. Smith, the fourth assistant corporation counsel, who gave me his most valuable assistance upon my personal request. He comes from the district which I have the honor to represent, and I took advantage of personal friendship to draw upon his knowledge of this subject. The bill which I introduced February 13, 1909 (H. R. 28108), although drawn with the help of Mr. Smith, I can not present as coming from the office of the corporation counsel of the District. The bill, however, was referred by the Committee on the District of Columbia to the commissioners, and I herewith present the commissioners' letter, from which it will be noticed that there is no objection filed to the bill. The letter is as follows:

EXECUTIVE OFFICE,
COMMISSIONERS OF THE DISTRICT OF COLUMBIA,
Washington, February 18, 1909.

Hon. J. DAVIS BRODHEAD,
House of Representatives.

DEAR SIR: With respect to your request of the 15th instant for a report upon bill (H. R. 28108) to amend the Code of Law for the District of Columbia regarding corporations, the commissioners have to state that in so far as they have been able to give it their examination and attention, it is unobjectionable except that the taxes now paid by

insurance companies, namely, 1½ per cent on the net premium receipts, are considered sufficient for such organizations, and they have so reported to the chairman of the District Committee.

The copy of H. R. 26747, having the same title, with proposed amendments thereon, is herewith returned.

Very respectfully, HENRY L. WEST,
Acting President of the Board of Commissioners of the District of Columbia.

I now present for the consideration of the House the bill which I introduced on February 13, 1909, H. R. 28108, not with the hope of its being passed at this session, for the time is too short and there are too many other important bills ahead of it, but with the hope that it may be of some use to a succeeding Congress in the framing of a more perfect measure.

[To amend the Code of Law for the District of Columbia regarding corporations.]

Be it enacted, etc., That from and after the passage of this act sections 605, 606, 607, 608, 609, 617, 618, and 619 of the Code of Law for the District of Columbia be amended so as to read as follows:

"SEC. 605. Any three or more persons, one of whom shall be an actual and bona fide resident of the District, who desire to form a corporation for the purpose of carrying on any enterprise or business which may be lawfully conducted by an individual, excepting banks of circulation or discount, railroads, and such other enterprise or business as may be otherwise specially provided for in this code, shall make, sign, and acknowledge, before some officer qualified by law to take the acknowledgment of deeds, and file in the office of the recorder of deeds of the District of Columbia a certificate in writing: *Provided*, That nothing herein contained shall be held to authorize the organization of corporations to buy, hold, sell, or deal in real estate, except corporations organized for the purpose of transacting the business ordinarily carried on by real-estate agents or brokers: *And provided further*, That corporations organized outside of the District of Columbia to buy, hold, sell, or deal in real estate, except corporations to transact the business ordinarily carried on by real-estate agents or brokers, shall not be permitted to operate in the District of Columbia.

"SEC. 606. In such certificates shall be stated—

"First. The corporate name of the company and the object or objects for which it is formed.

"Second. The term of its existence, which may be perpetual.

"Third. The amount of the capital stock of the company and the number of shares of which said stock shall consist.

"Fourth. The number of directors who shall manage the concerns of the company for the first year and their names, at least one of which directors shall be an actual and bona fide resident of the District of Columbia, whose post-office address in said District shall be stated in said certificate.

"Fifth. The name of the place in the District of Columbia at which the office of the said company is to be located and the post-office address in said District of the said office.

"SEC. 607. Upon the filing of such certificate in accordance with the provisions of the preceding sections, the persons who have signed and acknowledged the same shall pay or cause to be paid to the recorder of deeds, in lieu of other fees therefor, the following sums, to be computed upon the amount of the capital stock of the company as stated in such certificate: Upon the first $25,000, or fractional part thereof, if any, $10; upon each $25,000, or fractional part thereof, if each $100,000, or fractional part thereof, if any, in excess of $500,000, additional; upon each $50,000, or fractional part thereof, if any, in excess of $100,000, up to and including $500,000, $5 additional; upon each $100,000, or fractional part thereof, if any, in excess of $500,000, up to and including $1,000,000, $5 additional; and upon each million dollars, or fractional part thereof, if any, in excess of $1,000,000, $25 additional.

"Upon the filing of such certificate and the payment of the fees as herein provided, the recorder of deeds shall issue a charter, upon a form authorized by the official attorney for the District of Columbia, which, together with the certificate, shall be duly recorded in the office of the recorder of deeds, and upon the issuance of such charter the persons who shall have signed and acknowledged the certificate, and their successors, shall be a body politic and corporate in fact and in name, by the name stated in such certificate and charter, and by that name have succession and be capable of suing and being sued in any court of law or equity in the District; and they and their successors may have a common seal, and make and alter the same at pleasure, and they shall by their corporate name be capable in law of purchasing, holding, and conveying any real or personal estate whatever which may be necessary to enable the company to carry on its operations named in such certificate, but shall not mortgage or convey such estate or give any lien thereon, except in pursuance of a vote of the stockholders of the company.

"Any action at law or in equity may be begun against such corporation by the service of process upon the director resident in the District of Columbia, as named in its certificate aforesaid, and, in the absence of said resident director from the District of Columbia for the period of ten days or more, service of such process, which shall be deemed good and sufficient service of the same upon the corporation of which he is a director, may be made by leaving such process at the post-office address of the said resident director, in charge of a person of mature years and discretion, or by mailing the same to the said resident director at his post-office address: *Provided, however*, That the company of which such resident director is a director may, in its annual report, or in a certificate duly executed and filed with the recorder of deeds, name a successor to the director named in the certificate filed for the purposes of incorporation, which successor shall also be a resident of the District of Columbia, giving the post-office address of such successor, upon whom the service of process may be made in like manner and with like effect as if made upon the director named in the aforesaid certificate as a resident of the District of Columbia, and from time to time, as occasion may require, such company shall, by a certificate filed as aforesaid, designate a person, actually resident in the District of Columbia, upon whom process may be served as hereinbefore provided, and service of process upon the person last so designated shall be good and sufficient service upon such company. In case of the death or resignation of the director resident within the District of Columbia, or of any successor of such resident, named under the aforesaid provision, the company of which such deceased was a director shall, within ten days thereafter, name a successor to such deceased resident director, who shall also be a resident and upon whom service of process may be made in like manner and with like effect as if made upon the director named in the aforesaid certificate as a resident of the District of Columbia.

"SEC. 608. The stock, property, and concerns of such company shall be managed by not less than three and not more than fifteen directors, one of whom shall be a bona fide resident of the District of Columbia, whose post-office address shall be kept on file in the office of the recorder of deeds of the District of Columbia, who shall, respectively, be stockholders, and who shall, except for the first year, be annually elected by the stockholders at such time and place as shall be determined by the by-laws of the company.

"SEC. 609. Notice of the time and place of holding such elections shall be published not less than thirty days previous thereto in at least one daily newspaper of general circulation printed and published in the District, or shall be given to each stockholder in such other manner as may be provided by the by-laws of the company, and the election shall be made by such of the stockholders as shall attend for that purpose, either in person or by proxy, providing a majority of the stock is represented. All the elections shall be by ballot, and each stockholder shall be entitled to as many votes as he owns shares of stock in the company, and the persons receiving the greatest number of votes shall be directors; and when any vacancy shall happen among the directors it shall be filled for the remainder of the year in such manner as may be provided by the by-laws of the company.

"SEC. 617. That every corporation heretofore incorporated under the provisions of the Code of Law for the District of Columbia, and every corporation, except insurance corporations, which may hereafter be incorporated under the said provisions shall, within twenty days from the 1st of January of each year, make and file in the office of the recorder of deeds of the District of Columbia, to be by said officer duly recorded, a statement signed and sworn to by its president and secretary before an officer authorized to take acknowledgments of deeds of real estate situated in the said District, containing the following information:

"First. The name of the corporation and the place or places where its business operations are carried on, giving, wherever practicable, the street and number of the building, and whether or not it has actually entered upon the prosecution of its business.

"Second. The amount of the total authorized capital stock of the corporation, the number of shares into which the same is divided, and the par value of each share, and if there be more than one class of stock outstanding, a description of the different classes, and the amount actually paid thereon, and in case there shall have been bonds issued, the amount of its bonded indebtedness.

"Third. The names and residences of each of the directors and officers and their respective terms of office, and the date of the last preceding annual meeting and election of its directors, together with the date appointed for the next annual meeting for the election of directors, and if any part of the management of the corporation has been delegated to an executive committee, the names, residences, and terms of office of the persons comprising such committee.

"Fourth. The value of its property and assets of every description.

"Fifth. The total amount of its outstanding debts.

"SEC. 618. That it shall be the duty of the recorder of deeds of the District of Columbia during the month of February of each year to certify to the corporation counsel of said District a list of all corporations having failed to comply with the provisions of the preceding section, and it shall be the duty of said corporation counsel, within sixty days after the receipt of said report, to proceed against said corporation by proper legal proceedings to restrain such corporation from doing business in said District, and upon judgment in such proceedings against any such corporation it shall be enjoined as aforesaid, and it shall be the duty of the corporation counsel aforesaid to institute the proper legal proceedings within sixty days after receiving notice from any other source of any such default of any such corporation.

"SEC. 619. That any willful false swearing in regard to any certificate, report, statement, or notice required by the provisions of this chapter shall be perjury and shall be punished as such according to the laws of the District of Columbia. Any misappropriation of any money of any corporation, company, or association organized under the provisions of this chapter, or of any money, funds, or property intrusted to it, shall be held to be larceny and shall be punished as such under the laws of said District.

"SEC. 619a. That from and after the passage of this act every company incorporated under the laws of the District of Columbia, except cemetery companies, and companies incorporated for literary, charitable, or religious purposes, shall pay to the recorder of deeds of the District of Columbia, on filing a certificate or application for incorporation, as provided by said act, in lieu of other fees therefor, the same sums, to be computed upon the amount of the capital stock of the company, as stated in such certificate or application, as are set forth in section 607 of the code as amended by this act.

"SEC. 619b. That whenever the words 'trustee' or 'trustees' occur in any of the sections of subchapter 4 of chapter 18 of the Code of Law for the District of Columbia not hereby specifically amended the words 'director' or 'directors' shall be substituted therefor, and such sections are hereby so amended.

FOREIGN CORPORATIONS.

"SEC. 619c. That every foreign corporation now engaged in business in said District, and every foreign corporation hereafter engaging in business in said District, shall file in the office of the recorder of deeds of said District a certified copy of its charter or certificate of incorporation, together with a statement signed and sworn to by its president, treasurer, and a majority of its directors, trustees, or managers, showing the amount of its authorized capital stock and the amount thereof which has been paid in, and if any part of such payment has been made otherwise than in cash such statement shall set forth the particulars thereof: *Provided*, That the provisions of this section shall not apply to insurance corporations or to corporations and associations created for religious or charitable purposes only: *And provided further*, That foreign corporations desiring to operate within the District of Columbia shall file with the recorder of deeds certified copies of their charters before permission to operate therein shall be granted; and no such corporation shall operate within the District of Columbia without first having received a permit so to do from the Commissioners of the said District, nor until the assessor of said District shall certify in writing to said commissioners that at least 10 per cent of the authorized capital of such corporations has been paid in cash: *Provided*, That the provisions of this section shall not apply to insurance companies.

"SEC. 619d. That every foreign coporation now engaged in business in the District of Columbia, and every foreign corporation hereafter engaging in business in said District, except insurance companies, shall

appoint in writing the recorder of deeds of said District and his successors in office to be its attorney, upon whom all process in any action or proceeding against it may be served; and in such writing such corporation shall agree that any process against it which is served on such attorney shall be of the same legal force and validity as if served on the corporation, and that such appointment shall continue in force as long as any liability remains outstanding against the corporation in said District. Such original appointment shall be acknowledged before some officer authorized to take acknowledgment of deeds, and shall be filed in the office of said recorder of deeds, and a copy certified by him or by the deputy recorder of deeds shall be sufficient evidence of such appointment and agreement. Service upon said attorney shall be sufficient service upon the principal, and may be made by leaving a duly attested copy of the process with said recorder of deeds at his office, or, in the absence of the recorder, with the deputy recorder of deeds of said District: *Provided*, That the post-office address of every such corporation shall be filed with said recorder of deeds with its power of attorney, and from time to time statements of any change of address of said corporation: *Provided further*, That immediately after being served with or accepting any such process or notice, the said recorder of deeds shall make and file with said power of attorney a copy of such process or notice, with a notice indorsed thereon of the time of service or acceptance, as the case may be, and transmit such process or notice by registered mail to such corporation at the address last furnished, as aforesaid, and said recorder of deeds shall keep a record of all process served upon him, showing the date and hour when such service was made.

"SEC. 619e. That every foreign corporation doing business in the District of Columbia, and every foreign corporation hereafter engaged in business in said District, shall, within thirty days after an increase or reduction of its capital stock or change in par value of its shares, file in the office of the recorder of deeds of said District a certificate thereof substantially like that required of domestic corporations under like conditions.

"SEC. 619f. That every foreign corporation doing business in the District of Columbia, and every foreign corporation hereafter engaging in business in said District which is not required by law to make annual returns to some other official in said District shall, annually, within thirty days after each and every annual meeting, make and file a report in the office of the recorder of deeds containing, in addition to the information required from domestic corporations, a statement as to the time when the annual franchise tax, if any, was paid in its home State, and the amount of such tax.

"SEC. 619g. That no foreign corporation now carrying on, and no foreign corporation which may hereafter carry on, in said District of Columbia a banking, insurance, mortgage, loan, investment, or trust business, and no person engaged in any such business shall carry it on in or under a name which, previous to such use, was in lawful use by a corporation which was established under the laws of the District of Columbia and was carrying on the same or a similar business or in or under a name so similar thereto as to be liable to be mistaken for it. The supreme court of the District of Columbia shall have jurisdiction in equity to enforce the foregoing provisions of this section. Whoever violates the provisions of this section shall be punished by a fine of not more than $1,000.

"SEC. 619h. That the recorder of deeds of the District of Columbia shall carefully preserve in his office all documents required by this act to be filed with him, and cause the same to be accurately recorded and indexed in well-bound books to be kept in his office, and for so filing and recording said documents he shall, before receiving them for record, collect the fees now prescribed for filing, indexing, and recording other instruments: *Provided*, That in addition to the fees before mentioned in this section every foreign corporation shall pay to the said recorder of deeds the following fees: For filing a copy of its charter or certificate of incorporation, as hereinbefore required, $10; for filing the financial statement required to be filed with its said charter or certificate of incorporation, 5; for filing a certificate of increase or reduction of capital stock, $3; for filing an annual return or report, $2; for filing any other statement, power of attorney, or any other document required by law to be filed, $1.

"SEC. 619i. That no action shall be maintained by any foreign corporation in the District of Columbia until it shall have complied with the provisions of this act.

"SEC. 619j. That any corporation violating or failing to comply with the provisions of sections 617, 619c, 619d, 619e, or 619f of this act shall forfeit $50 as a penalty for such violation or failure, to be recovered by suit at the instance of the District of Columbia in any court of competent jurisdiction, and each day's violation or continuance of such failure shall be considered to give a new and distinct right of action therefor; and it shall be the duty of the recorder of deeds of the District of Columbia during the month of July of each year to certify to the corporation counsel of said District a list of all corporations so in default on the 1st day of said month; and it shall be the duty of the said corporation counsel within sixty days after the receipt of said report to proceed against said corporation by proper legal proceedings to restrain such foreign corporation from doing business in the District of Columbia, and upon judgment in such proceedings against any such corporation it shall be enjoined as aforesaid. and it shall be the duty of the corporation counsel aforesaid to institute the proper legal proceedings within sixty days after receiving notice from any other source of any default of any corporation.

"SEC. 619k. That any company hereafter incorporated in the District of Columbia to transact the business of life, fire, marine, and inland and casualty insurance, including accident, health, liability, plate-glass, steam-boiler, burglary and theft, credit, and sprinkler insurance, shall have a capital stock of not less than $100,000. Whenever any such District of Columbia or foreign corporation, now or hereafter incorporated and transacting business in the District of Columbia, shall become insolvent or impaired to the extent of 25 per cent of its capital stock it shall be the duty of the superintendent of insurance to suspend its license, and unless such impairment is made good within sixty days thereafter it shall be the duty of the said superintendent to revoke its license to do business in the District, and any insurance company or association doing business without a license, or after its license has been revoked, shall be liable to the penalties imposed by section 648 of the code.

"SEC. 619l. That each and every company heretofore chartered under the laws of the District of Columbia shall pay to the recorder of deeds an annual registration fee of $10 on or before the 1st day of May of each year; and every company which shall be hereafter chartered under the laws of the District of Columbia shall also pay to the recorder of deeds an annual registration fee of $10 on before the 1st day of May of each year after the filing of its charter: *Provided*, That any such company having an authorized capital stock of over $50,000 and less than $100,000 shall pay an annual registration fee of $20; and every such company having an authorized capital stock of $100,000 and less than $200,000 shall pay an annual registration fee of $30; and every such company having an authorized capital stock of $200,000 and less than $1,000,000 shall pay an annual registration fee of $50; and every such company having an authorized capital stock of $1,000,000 or more shall pay an annual registration fee of $100.

"Each and every company incorporated outside the District of Columbia and doing business in the District of Columbia shall, on or before the 1st day of May of each year, pay to the recorder of deeds the following registration fees:

"Every such company having an authorized capital stock of $25,000 or less, an annual registration fee of $25.

"Every such company having an authorized capital stock of over $25,000 and not exceeding $100,000, an annual registration fee of $100.

"Every such company having an authorized capital stock of over $100,000, an annual registration fee of $100, and in addition thereto an annual registration fee of $10 for every $100,000 of authorized capital stock over and above $100,000 and not exceeding $1,000,000; and if such authorized capital stock exceeds $1,000,000, then such company shall pay a still further additional fee of $1 for every $100,000 over and above $1,000,000.

"Any company organized within or without the District of Columbia which shall fail to pay the fee herein provided shall because of such failure forfeit its right to do business in the District of Columbia, which forfeiture shall be consummated without judicial ascertainment by the recorder of deeds entering upon the margin of the ledger kept in his office relating to such companies the word 'Forfeited,' giving the date of such forfeiture, and any company whose right to do business may be thus forfeited shall be denied the right to sue and defend in any of the courts of the District of Columbia, and in any suit against such company on a cause of action arising before such forfeiture no affirmative relief may be granted to such defendant company unless its right to do business is revived as provided hereinafter.

"The recorder of deeds shall, on or before the 1st day of March of each year, notify every company affected by this section by mailing a notice, addressed in its corporate name, to the post-office address as filed in his office as hereinbefore provided, written or printed, that such fee will be due at a date named therein, a record of the date of which mailing shall be kept by said officer, and which mailing of such notice and the said record thereof shall constitute legal and sufficient notice for all the purposes of this act; and in thirty days after the 1st day of May of each year said officer shall publish for ten consecutive days in at least one daily newspaper of general circulation printed and published in the District of Columbia a list of the companies whose right to do business in the District of Columbia has been forfeited for noncompliance with this section: *Provided*, That any company which shall within six months after such publication pay the fee and $5 additional thereto for each month or fractional part of a month which shall elapse after such forfeiture shall be relieved from the forfeiture of its right to do business by reason of such failure, and when such fee and the said penalty are fully paid to the recorder of deeds it shall be the duty of said officer to revive and reinstate said right to do business by erasing or canceling the word 'Forfeited' from his ledger and substituting therefor the word 'Revived,' giving the date of such revival: *Provided further*, That this act shall not be construed to repeal any law prescribing fees to be collected by the recorder of deeds.

"SEC. 619m. That all the provisions of this act applicable to foreign corporations shall likewise be applicable to all foreign joint stock companies and foreign associations doing business in said District, excepting those created only for religious or charitable purposes.

"SEC. 619n. That this act shall take effect from and after the expiration of thirty days immediately following its passage, and from and after the expiration of said period all acts and parts of acts contrary to the provisions of this act or inconsistent therewith be, and the same hereby are, repealed."

Mr. SIMS. Mr. Speaker, I was not a member of the subcommittee that investigated this bill. The gentleman from Pennsylvania, who has just taken his seat, was. It is a Senate bill, reported with an amendment, and after being reported some gentlemen spoke to me and some wrote to me in opposition to the bill, or to the House amendment to the Senate bill, which required the deposit of 25 per cent of the capital and surplus of companies chartered in the States doing business in the District.

Mr. MADDEN. I want to suggest to the gentleman whether it would not be competent for those associations to deposit interest-bearing securities, so that they would not lose anything by having to make the deposit.

Mr. BRODHEAD. Oh, yes.

Mr. SIMS. I was going to say that complaint was made to me that as the local building and loan associations did not have to make any deposit, it would be a discrimination against those outside corporations to require them to make one.

I am unfamiliar with the business of building and loan associations. I wish to submit a letter and have it read, written by Mr. CLAYTON, who signs the memorandum furnished me. Since this report of the House District Committee an amendment has been made, or offered, and is moved to be passed as a part of this bill, which, so far as I know or so far as I am able to see, removes the complaint that was made to me in reference to this bill, and I will ask that this memorandum be printed in the RECORD as a part of my remarks.

The SPEAKER. Is there objection? The Chair hears none.

Mr. SIMS. I demanded a second; and unless some other gentleman wishes to say something in opposition to the bill, I do not care to use any more time.

The memorandum is as follows:

When the war revenue act of 1898 was passed, building associations were expressly excepted from its provisions, on the stated ground that

they were cooperative societies, promotive of thrift among people of small means.

When, in 1902, the House Committee on Appropriations reported the so-called "personal tax act for the District of Columbia," building associations were omitted from it as subjects of taxation, but when the bill came out of conference and was passed it was discovered that a paragraph had been inserted taxing them 4 per cent per annum on their gross earnings. The late Representative Powers, of Maine, told the writer that this was done on representation made in behalf of trust companies, that building associations were competitors with them and ought to be taxed equally with them.

In 1904, after a full hearing before a subcommittee of the House District Committee, the tax was reduced to 2 per cent, and so remains.

In 1906 Commissioner Macfarland concluded that building associations ought to make reports to the Comptroller of the Currency and be subject to his examination, like savings banks, and the corporation counsel began the draft of a bill, which he did not complete, because he needed a consultation with building association officers and because the District Commissioners wished priority given to other measures that they deemed more urgent.

In February, 1907, Commissioner Macfarland produced the draft of a bill not prepared by the corporation counsel, and as to which neither the corporation counsel nor any building-association officer had been consulted, and was about to send it to Congress with recommendation for enactment, when it was held up on representation to the commissioners that the bill would close up every building association in the District.

In 1908 Commissioner Macfarland agreed to modify his bill so as to remove the provisions that a committee of building-association lawyers deemed destructive, on condition that the building associations would not oppose the modified bill, and they never have done so, though in place of his fragmentary bill they would have preferred such an amendment of the District Code as would enable them to incorporate under it.

The modified Macfarland bill is Senate bill 6055 of the present Congress. It has passed the Senate and is now on the House Calendar with an amendment proposed by Mr. A. B. Browne, of the local bar (see H. Rept. No. 2065). On page 2 of the report the reason given for the amendment is an alleged performance of officers of a building association organized under the laws of Montana. But there never was a building and loan association in the District with a Montana charter, and the reference is obviously to the Etna Banking and Trust Company, of Helena, Mont.

The amendment purports to relate only to building associations, but it is so worded as to have a much wider sweep, the words "otherwise having any of the features of a building association" including any trust company, bank, savings bank, or other financial organization whatsoever, because one feature of a building association is to receive money from its members, another to do a loan and mortgage business with its members, and so this language would include any financial institution whatsoever chartered outside the District. It would include those local building associations that have been contemplating conversion into mutual savings associations under some state law as a means of escaping the pursuit that has been made of them for nearly seven years by rival financial interests, and which will doubtless be continued for seven years more, if necessary.

If permitted, the building associations can produce a bill that will put them efficiently under government supervision while permitting them to live.

Mr. SMITH of Michigan. I call for a vote.

The question was taken, and the rules were suspended and the bill was passed.

Mr. BRODHEAD. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon this subject.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

HALL OF THE HOUSE.

Mr. McCALL. Mr. Speaker, I move to suspend the rules and pass the following resolution, which I send to the Clerk's desk.

The SPEAKER. The gentleman from Massachusetts moves to suspend the rules and pass the resolution which the Clerk will report.

The Clerk read as follows:

Joint resolution (H. J. Res. 265) to rearrange and reconstruct the Hall of the House of Representatives, and for other purposes.

Resolved, etc., That the Superintendent of the Capitol Building and Grounds is hereby directed to change and reconstruct the Hall of the House of Representatives, and change the seating arrangements therein, substantially in accordance with the plan marked "Scheme B," transmitted by him to the Speaker under date of December 7, 1908, under the terms of the House resolution No. 419, of the first session of the Sixtieth Congress. The said changes and reconstruction shall be made under the direction of the Speaker, the present chairman of the House Committee on the Library, the present chairman of the Select Committee on the Distribution of Rooms, and WILLIAM M. HOWARD, of Georgia, who shall also have authority to determine the character of the seating arrangements and furniture, the division of the lobby and cloakroom space, and to make slight changes from the plans of said "Scheme B." But they shall not be authorized to decrease the area at the floor level as shown on said "Scheme B" by more than 400 square feet, and they shall not increase the area at said level as shown on said "Scheme B."

SEC. 2. That to carry out the purpose of this resolution the expenditure of $350,000, or so much thereof as may be necessary, is hereby authorized; and said disbursements made under this resolution shall be made by the Secretary of the Interior, on vouchers approved by the Superintendent of the United States Capitol Building and Grounds, as the appropriations for the Capitol building are approved and disbursed.

Mr. THOMAS of North Carolina. Mr. Speaker, I demand a second.

The SPEAKER. The gentleman from North Carolina demands a second. A second is ordered under the rule. The gentleman is entitled to twenty minutes and the gentleman from Massachusetts is entitled to twenty minutes.

Mr. CLARK of Missouri. Mr. Speaker, I move that that rack down in front, with the diagram on it, be taken out, and that the House come to order and let the gentleman from Massachusetts proceed with his speech.

The SPEAKER. The gentleman from Massachusetts, as the Chair understands, has just asked to have it brought in.

Mr. CLARK of Missouri. If that is true, I will withdraw that motion, provided the gentlemen down there in front will sit down.

The SPEAKER. The Chair would be gratified if the real czar of the House could get order. The Chair concluded he would just wait. [Laughter.]

Mr. McCALL. Mr. Speaker, the object of the resolution before the House is, first of all, to reduce the size of this Chamber to the proportions of a chamber which a legislative body ought to occupy, and make it a fit place for deliberation. Then the resolution has the incidental purpose of improving the system of ventilation, by extending the House to the outer walls of the Capitol, giving us a direct connection with the outer air. Some gentlemen might not regard that consideration as second to the first one, because it is a matter vital to the health of the Members. As is well known, this Chamber in which we are sitting is by far the largest of any of the legislative chambers in the world. It is absolutely impossible, it is scarcely necessary for me to say, for a man of ordinary voice to be heard throughout this whole room. It takes a very unusual voice to make itself heard. In the ordinary business of this House a Member who is sitting upon one of the outer rows is compelled to do one of three things if he remains in the House, either to sit listlessly and know nothing of what is going on, or to come down to the center of the Hall and commit larceny by taking the seat of some other Member, or to stand up in the area in front of the Speaker.

I think there is no difference of opinion upon the part of writers of great authority who have witnessed the proceedings of the House from the gallery as to the vast character of the Hall, the bad effect that it has upon the character of our deliberations, and also the influence it exerts to make the proceedings tedious and uninteresting; but I will read to you only from two writers of authority, one a British writer and the other an American writer.

Mr. Bryce, in his American Commonwealth, gives a lively and yet a very correct description of the condition of things here. He says of the Hall that—

> It is more than thrice as large as the English House of Commons, with a floor about equal in area to that of Westminster Hall, 139 feet long by 93 feet wide and 36 feet high. * * * The proportions are so good that it is not till you observe how small a man looks at the farther end, and how faint ordinary voices sound, that you realize its vast size. * * *
>
> When you enter, your first impression is of noise and turmoil, a noise like that of short, sharp waves in a highland loch fretting under a squall against a rocky shore. The raising and dropping of desk lids, the scratching of pens, the clapping of hands to call the pages—keen little boys who race along the gangways—the pattering of many feet, the hum of talking on the floor and in the galleries, make up a din over which the Speaker, with the sharp taps of his hammer, or the orators, straining shrill threats, find it hard to make themselves audible. I never heard American voices sound so harsh or disagreeable as they do here. Nor is it only the noise that gives the impression of disorder. Often three or four Members are on their feet at once, each shouting to catch the Speaker's attention. * * * Less favorable conditions for oratory can not be imagined, and one is not surprised to be told that debate was more animated and practical in the much smaller room which the House formerly occupied.
>
> Not only is the present room so big that only a powerful and well-trained voice can fill it, but the desks and chairs make a speaker feel as if he were addressing furniture rather than men, while of the Members few seem to listen to the speeches. It is true that they sit in the House instead of running out in the lobbies, as people do in the British House of Commons, but they are more occupied in talking or writing or reading newspapers than in attending to the debate. To attend is not easy, for only a shrill voice can overcome the murmurous roar; and one sometimes finds the newspapers, in describing an unusually effective speech, observe that "Mr. So-and-So's speech drew listeners about him from all parts of the House." They could not hear him where they sat, so they left their places to crowd in the gangways near him. "Speaking in the House," says an American writer, "is like trying to address the people in the Broadway omnibuses from the curbstone in front of the Astor House * * *."
>
> Men of fine intellect and of good ordinary elocution have exclaimed in despair that in the House of Representatives the mere physical effort to be heard uses up all the powers, so that intellectual action becomes impossible. The natural refuge is in written speeches or in habitual silence, which one dreads more and more to break.
>
> It is hard to talk calm good sense at the top of your voice, hard to unfold a complicated measure. A speaker's vocal organs react upon his manner, and his manner on the substance of his speech. It is also hard to thunder at an unscrupulous majority or a factious minority when they do not sit opposite to you, but all around you and behind you, as is the case in the House. The Americans think this an advantage, because it prevents scenes of disorder. They may be right, but what order gains oratory loses. It is admitted that the desks are a mistake, as encouraging inattention by enabling men to write their letters, but though nearly everybody agrees that they would be better away nobody supposes that a proposition to remove them would succeed.

Then President Woodrow Wilson, perhaps the most authoritative American writer upon our system of congressional government, speaking of the House, says:

> There are, to begin with, physical and architectural reasons why businesslike debate of public affairs by the House of Representatives is out of the question. To those who visit the galleries of the Representative Chamber during a session of the House these reasons are as obvious as they are astonishing.
>
> It would be natural to expect that a body which meets ostensibly for consultation and deliberation should hold its sittings in a room small enough to admit of any easy interchange of views and a ready concert of action, where its Members would be brought into close, sympathetic contact, and it is nothing less than astonishing to find it spread at large through the vast spaces of such a chamber as the Hall of the House of Representatives, where there are no close ranks of cooperating parties, but each Member has a roomy desk and an easy revolving chair; an immense, capacious Chamber, disposing its giant dimensions freely beneath the great level lacunar ceiling, through whose glass panels the full light of day pours in. The most vivid impression the visitor gets in looking over that vast Hall is the impression of space.
>
> A speaker—

Mr. Wilson goes on—

> must needs have a voice like O'Connell's, the practical visitor is apt to think as he sits in the gallery, to fill even the silent spaces of that room; how much more to overcome the disorderly noises that buzz and rattle through it when the Representatives are assembled—a voice clear, sonorous, dominant, like the voice of a clarion. One who speaks there with the voice and lungs of the ordinary mortal must content himself with the audience of those Members in his own immediate neighborhood, whose ears he rudely assails in vehement efforts to command the attention of those beyond him, and who, therefore, can not choose but hear him.

It is a matter of everyday experience that we have constant calls for order. Probably in the course of an ordinary session the Speaker is engaged in using his gavel vigorously upon the desk for three or four weeks in the aggregate, and he does well that he does not have to use it more.

I shall not take any more of the time of the House at this moment, except to say that I believe it is vital to the efficiency of the House of Representatives, and, to make it meet its full purpose as the representative Chamber of the American people, that we should make some such a change as is proposed in this resolution.

Mr. COOPER of Wisconsin. Will the gentleman yield for a question?

Mr. McCALL. Certainly.

Mr. COOPER of Wisconsin. How much will the proposed change reduce the area of the House?

Mr. McCALL. The proposed change would reduce the area of the floor about 2,100 feet and the area of the galleries about 3,100 feet. It will reduce the cubical contents of the Hall from three hundred and eighty odd thousand feet to a little less than 260,000 cubic feet, or about one-third.

Mr. COOPER of Wisconsin. That would still leave it larger than the Senate Chamber?

Mr. McCALL. Larger than the Senate Chamber, both in area and in cubical contents. The Hall of the House would then contain a little less than 260,000 cubic feet, and the Senate Chamber has 210,000 feet.

Mr. NICHOLLS. Will the gentleman yield for a question?

Mr. McCALL. I will yield to the gentleman from Pennsylvania.

Mr. NICHOLLS. Will the reduction in the cubical contents of the room also reduce the amount of air available for Members to breathe, so that thereby it would be a detriment?

Mr. McCALL. The architects report that we should have as perfect a system of ventilation, as good a system of artificial ventilation, as we have now. We should also have 5 windows opening directly to the outer air, and the Speaker's desk would be put back to a level with the lobby, so that we would have another connection with the outer air, as much as the architects think it would be safe to have with reference to the health of Members. We have proportionately reduced the gallery space, so I do not think the number of cubic feet of air to each person in the Hall would be materially reduced, and our source of pure air would be much greater.

Mr. NICHOLLS. Would not the amount of air which would necessarily be changed in order to provide pure air have to come in more rapidly, and therefore endanger the health of Members from draft?

Mr. McCALL. I think there would be very little difference on that point. We should have nearly as many cubic feet of air for each person on the floor and in the galleries as we now have.

Mr. JONES of Virginia. Will the gentleman yield for a question?

Mr. McCALL. Certainly.

Mr. JONES of Virginia. I would like to ask the gentleman if he thinks the Hall so reduced would be large enough to accommodate both Houses in convention?

Mr. McCALL. It would. Both Houses have met in the Senate Chamber. We should have nearly 1,500 feet more floor space than has the Senate Chamber. Now, Mr. Speaker, I wish to make this request: I ask unanimous consent that there may be an extension of time for debate on this question.

The SPEAKER. How much?

Mr. McCALL. Thirty minutes on a side, instead of twenty minutes.

The SPEAKER. The gentleman from Massachusetts asks that there be thirty minutes' debate on each side instead of twenty. Is there objection?

There was no objection.

Mr. SIMS. Will the gentleman yield to me?

Mr. McCALL. I will yield to the gentleman from Tennessee.

Mr. SIMS. I want to ask the gentleman if he thinks any change could be made in the way of getting the desks out of here, and reducing the space of the Hall, that would not be of benefit over what we now have?

Mr. McCALL. I think it would take an ingenious architect to devise a worse system than we now have. I will say that I have not entered into the details of these plans because they have been exhibited in the lobby for several days, and Members have had an opportunity to examine them.

Mr. HUMPHREYS of Mississippi. Will the gentleman yield?

Mr. McCALL. Certainly.

Mr. HUMPHREYS of Mississippi. This resolution does not provide for any particular kind of furniture, does it?

Mr. McCALL. No; it was the purpose of the committee not to involve this general proposition with too many details, but to leave other matters over for consideration, either as to the style of chairs or anything else of that character. We had no thought of having simply benches; there are a number of styles of chairs that may be adopted, and the question of the style and kind of furniture is left open.

Mr. HUMPHREYS of Mississippi. The resolution does not commit us to the particular style of chair shown in the picture?

Mr. McCALL. No.

Mr. HUMPHREYS of Mississippi. We can have the swivel chair if we desire?

Mr. McCALL. Precisely. Mr. Speaker, I reserve the balance of my time.

Mr. THOMAS of North Carolina. Mr. Speaker, this is a very important matter, involving a very radical change in the Hall and the seating arrangements of the House. I demanded a second because I thought the membership of the House was entitled to have a full and free discussion of this joint resolution. Personally I dislike always to disagree with the chairman of the committee, the distinguished gentleman from Massachusetts; hence I did not, as a member of the Committee on the Library, file a minority report. I felt, however, that it was my duty to reserve the right to take any position I chose upon the floor of the House in order that I might state my own position and in order that we might have a full discussion of this resolution.

Mr. Speaker, this proposition to change the seating arrangement of the Hall of the House of Representatives——

Mr. CAMPBELL. Mr. Speaker, I am very anxious to hear what the gentleman now addressing the House has to say, but on account of the confusion made by the swinging of the chairs here and because of the size of the Hall, it is utterly impossible to hear what the gentleman is saying.

The SPEAKER. The gentleman makes the point that the House is not in order. The point is well taken. The House will be in order.

Mr. THOMAS of North Carolina. Mr. Speaker, as I was saying, this proposition to change the seating arrangement of the Hall of the House is by no means a new one. At the last session of this Congress the Library Committee reported a resolution providing for the removal of the desks and the placing of benches in the Hall of the House, and that proposition, after quite a full debate, was voted down by a vote of 141 to 105.

Subsequently a resolution was brought in providing that the Superintendent of the Capitol should consult with architects and experts upon ventilation and acoustics, with a view to the rearrangement of the construction of the Hall of the House of Representatives, to place it in direct contact with the outer wall or walls of the building, to improve its ventilation and acoustical properties, and to reduce its size, and to report with plans on the first Monday of December, 1908. The Superintendent of the Capitol has made his report, giving preference to what is known as "Scheme B," which is the diagram now exhibited in the Hall of the House. The idea of changing the seating arrangements of the Hall was carried into effect in 1859, and

benches were put in the Hall, and in 1860, the very next year, the plan having proven a failure, by a somewhat close vote the benches were removed and the desks were again placed in the Hall.

Again, in 1901, a proposition was made to change the seating arrangement, and that proposition, which was moved as an amendment to an appropriation bill, was voted down. At that time in the debate the present Speaker of the House of Representatives said:

Mr. Chairman, with some length of service in this House, I have noticed that when any Member had a message to his fellow-Members that they wanted to hear, there was no difficulty in their hearing it. So much for that. We have heard gentlemen quite well during this little debate of twenty minutes on a side. Now, the Architect of the Capitol tells me he can a little decrease the size of the desks and put them into blocks of four or five, and then it is quite practicable to seat all the Members in the Hall under the new apportionment. Three legs is enough for a bunch of these desks, and my own judgment is, with the necessity for a quorum, that we will get along better to retain the seats a little bit decreased in size and put closer together, and have more room than we now have. I ask for a vote.

Mr. Speaker, the proposition to change the seating arrangement and take out the desks has been always a subject of much controversy. Mr. Asher Hinds, in his Parliamentary Precedents, says such a move was made in 1829 upon the ground that the seating arrangement with the desks caused a confusion detrimental to the public business. The desks were advocated as a matter of convenience. Again, in 1841, the desks were subject to criticism, and in 1842. In 1847 the removal of the desks was again proposed, but without result. So that it appears from Hinds's Precedents of the House of Representatives that up to date numerous efforts have been made to take out the desks and change the seating arrangement of the House; but each time it has been unsuccessful, the resolution having been voted down by the Members of the House except in one instance. In 1859 the desks were removed, but quickly restored in 1860.

At the last session of Congress the proposition was to put in benches instead of chairs for seats and remove the desks, which was also voted down by the Members of the House.

The resolution of last session provided for benches for seats and was a temporary arrangement. This resolution pending is for a permanent arrangement of the Hall as to seats and a reconstruction of the Hall to cost $350,000. It is intended to provide not only for better ventilation and better acoustics in the Hall of the House, but makes a radical change and a permanent change in the seating arrangement and entire construction of the Hall. I admit that this new plan, this proposed change, is better than the benches proposed at the last session of Congress, and yet I have found it very difficult and impossible to give my assent to the change. This is a magnificent and imposing Hall in the first place, and I am very doubtful if it could be materially improved in appearance. It is comfortable, and if the ventilation could be made better I believe, and I have never been able to change my opinion on the subject, that the retention of the present desks and seating arrangement would be best for comfort and convenience of the Members.

It is said that a change should be made in the Hall of the House because Members can then be heard better in debate; but, as was said by the present Speaker of the House in the speech from which I quoted, in 1901, one who has any speech of importance upon any important subject can be heard now. In the third place, I believe that it will be difficult, if we take the desks out, to keep a quorum of Members here.

Mr. GOULDEN. Will the gentleman please tell us what the proposed change is?

Mr. THOMAS of North Carolina. I will, in a few moments. A quorum in Committee of the Whole is 100, and in the House it is a majority of the Members. Now, in the British Parliament and other parliamentary bodies in the world a quorum is much smaller. I may be wrong about the matter, but I fear if we remove these desks, leaving only chairs and a book rack, the effect will be to divide this body into two classes—those who wish to debate and those who do not debate—and we will thereby have a greatly decreased attendance upon the public business and will find it difficult to keep a quorum.

Mr. Speaker, I am apprehensive that this change will be unsatisfactory and that it may prove, as in the past, a failure. Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has eighteen minutes remaining.

Mr. PARSONS. Will the gentleman yield for a question?

Mr. THOMAS of North Carolina. Yes.

Mr. PARSONS. Were there desks in the old House of Representatives, in the old Chamber?

Mr. THOMAS of North Carolina. That is my understanding; yes. The desks have always been in the Hall of the House, whether the old Chamber or this new Chamber. Now, Mr. Speaker, I do not wish to consume much more time. I wish to say in answer to my friend from New York [Mr. GOULDEN] that the proposed change decreases materially the size of the Hall. It would be one-third less in size——

Mr. COOPER of Wisconsin. Will the gentleman permit a question?

Mr. THOMAS of North Carolina. When I have finished this sentence. It will be one-third less in size than it is now, and one-third larger than the Senate Chamber.

The scheme proposes chairs with book rack, which is a very much better arrangement than the benches proposed last session. The change contemplates removal of the desks, and chairs with book rack in front—not necessarily fixed or stationary chairs, but chairs in a half circle as now, with a book rack in front of each chair in which to keep books and papers. It also contemplates moving the Speaker's chair back to the south wall of the corridor, in front of the lobby, the present lobby remaining as it is. It contemplates having windows over the press gallery, giving better ventilation and more light from the south side of the Capitol, the river side. But with all the improvements in the plan proposed in this resolution of this session I can not help believing that eventually the change will be unsatisfactory. I may be mistaken. I now yield to the gentleman from Wisconsin.

Mr. COOPER of Wisconsin. I heard the gentleman say something about the proposition last spring to put in benches. That is not the proposition now?

Mr. THOMAS of North Carolina. Not at all; it is materially different.

Mr. COOPER of Wisconsin. Another gentleman talked about taking out the desks. That conveys the impression that there will be no facilities for writing.

Mr. THOMAS of North Carolina. I explained that to the House.

Mr. COOPER of Wisconsin. There will be ample facilities for writing and taking notes, and also for books and papers, as I understand.

Mr. THOMAS of North Carolina. There will be a kind of writing table and a book rack underneath in front of each chair. Now, Mr. Speaker, to show that I am not wedded to any particular plan, and I am only doing what I conceive to be my duty in voicing my own individual sentiments upon this matter and in having the matter debated fully, I am going to yield to a Member of the House who is in favor of the passage of the joint resolution. I now yield to the gentleman from Virginia [Mr. SAUNDERS].

The SPEAKER. How much time?

Mr. THOMAS of North Carolina. Three minutes.

Mr. SAUNDERS. Mr. Speaker, this proposition before the House is an intensely practical one and should receive the unanimous support of this body.

Whatever may be said concerning the spacious proportions, and stately appearance of our present Chamber, it is admittedly defective for the purposes of a working, deliberative body. It is the largest legislative hall in the world, though its membership is much smaller than that of either the House of Commons in England, or the Chamber of Deputies in France.

I believe I am correct in saying that the membership of the House of Commons is about 675, and that of the Chamber of Deputies about 560.

The pending proposition is to reduce the size of the Chamber, so as to bring the Members closer together, and to induce more real debate. When a like proposition was under consideration in May last, it was pointed out with great force by its advocates, that there were comparatively few Members with voices sufficiently sonorous to fill the Chamber, even in a quiet House. In the confusion that frequently prevails, and which is an inevitable incident of our present arrangements, he is fortunate indeed, who can make himself heard beyond his immediate surroundings. At such times, the Members on the outer tier of seats, are absolutely shut out from what is going on. In no real sense therefore, do they participate in the deliberations of the House, since such a participation requires, some knowledge at least, of what is being said, and of the arguments pro and con, upon the subject under consideration.

In the debate of last session, it was stated that a former Speaker of this body, Mr. Reed, decidedly favored a change in the present seating arrangements of our Chamber, and he was quoted as saying that this change was the one thing needed to make the House of Representatives what it ought to be; that the present room was too large; and that confusion would continue, until this rearrangement was effected.

Many objections are urged against the change. One is that we do not want to exchange our chairs for benches. Well, benches are not a necessary part of the proposed rearrangement. Another objection is that the chairs and desks were once taken

out, and benches put in, and after a short trial, the desks were restored.

But inquiry develops that desks were restored to enable the Members to "frank their documents and write their letters while attending the sessions of the House."

It is true that Members now write letters in the House, and possibly frank some documents, and this practice will continue so long as the desks remain. But there is no longer any excuse for this action. All the Members now have secretaries to relieve them of this clerical detail work, and in the Office Building we have the most ample accommodations for our files, books, letters, and papers of all sorts.

Another objection urged, is that with the desks removed, the Members will have no place in which either to store books of reference, and data of all sorts, needed in the course of debate, or upon which to write amendments to bills and resolutions under discussion. But there is no scheme of rearrangement suggested, which does not provide for such a place, though it may not be in the form of a desk. As to the larger books of reference that may be needed in debate, they are conveniently stored in a room adjacent to our Chamber, and can be readily furnished by the attendant in charge, as occasion requires.

Another objection urged is that in some sense this is an American system—that our arrangements as to chairs, and desks, are sanctioned by American usage—that this is an American Chamber, so to say—and that we must not copy the arrangements of the British House of Commons, the French Chamber of Deputies, or of any foreign deliberative assembly. Mr. Speaker, there is one thing at least, that is American, and that is we want the best of everything. If from the experience of others, we can devise any improvement upon existing conditions, whatever they may be, we ought to avail ourselves of that experience. The present arrangements are bad enough, so bad that they suggest that we try, at least, an experiment in search of something better. The acoustics of our Chamber are bad, and the ventilation wretched.

If our experiment proves to be unsatisfactory, we can, without difficulty, return to the old conditions.

But, Mr. Speaker, why continue to debate a proposition which can only be determined by actual trial, a trial which it is competent for us to make with but little cost, or trouble.

As a rule, innovations of any sort, however meritorious, are vehemently opposed. It is equally true, that existing conditions, however startling and objectionable, find their ardent defenders.

It seems to be a part of human philosophy, to bear the ills we know, in preference to a trial of suggested evil. Every student of English history knows that the infamous rotten borough system, found its warmest supporters among the greatest statesmen of cotemporary English life.

It is certainly true that the men who can be heard throughout the Chamber, not on special occasions when they have some special message to deliver, but in the course of ordinary debate, under the usual conditions, are few and exceptional. It is further true that many men whom the House would be willing to hear, are deterred from making the effort, by the exertion required.

If I may borrow the felicitous phrase of another gentleman, "I would like to see muscular oratory exchanged for intellectual oratory, and instead of a contest of violent vociferation, one of deliberate debate."

There are many features of the suggested change which ought to commend themselves to this House, and as a business body we ought not to be deterred from making an experiment that may lead to better things, by suggestions that we are aping other countries and following foreign precerents.

If other countries can furnish, or suggest, improvements on our present methods, even if they are consecrated by the experience of generations, let us avail ourselves of light from whatever quarter it may happen to come.

We need not fear the sneer that we are aping anyone, provided that what we may ultimately adopt, is approved by that robust common sense which, above everything else, is characteristic of the American people. In this connection I wish to make the following quotation from the speech of the Hon. Mr. McCALL of Massachusetts: "This resolution is first of all to reduce the size of this Chamber to the proportions of a chamber which a legislative body ought to occupy, and make it a fit place for deliberation. Then it has the incidental purpose of improving the system of ventilation, by extending the House to the outer walls of the Capitol, giving us a direct connection with the outer air."

We can not afford not to make this experiment. If we want to improve, we must keep on trying.

Mr. HENRY of Texas. Mr. Speaker, during the closing days of last session the gentleman from Massachusetts [Mr. McCALL] reported a proposition for removal of the seats and desks from the Hall. His plan did not contemplate changing its architectural proportions and dimensions. To this proposal I was opposed and entered my protest. After its defeat I was anxious that something should be done to give us more comfort and better ventilation. It seemed to me then that it was wholly inadvisable to remove the desks and chairs, substituting benches for them, unless the plan of the House could be changed so as to give us better acoustic properties and more wholesome atmosphere. After this resolution was defeated I went to the gentleman from Massachusetts [Mr. McCALL] and urged him to introduce his resolution anew, providing for a survey of the House, in order that the Hall might be extended to the outer walls southward, eastward, or westward for the purpose of giving outside ventilation. The gentleman from Massachusetts [Mr. McCALL] assented to this view, introduced his resolution on May 12, 1908, and it was passed during the last session of Congress.

The present report and plans are the result of that resolution and action. And now, Mr. Speaker, having carefully examined the report of the gentleman from Massachusetts [Mr. McCALL] and the plans recommended by the Superintendent of the Capitol Building and Grounds, it gives me great pleasure to say they have my cordial approval. [Applause.]

Let us contemplate for a moment the changes proposed. This new plan retains the rectangular hall, but leaves it surrounded by pillars and other details of architecture which make it a great improvement over the present one. While this plan reduces it in size, it will still remain one-third larger than the Senate Chamber. As the Hall exists at present, its dimensions are as follows: Greatest length on the floor, 113½ feet; greatest breadth on the floor, 67½ feet; length at gallery level, 139 feet; breadth at gallery level, 93 feet. Its height is 36 feet from floor to ceiling. The area on the present floor is 7,600 square feet. The area at the gallery level is 12,927 square feet. The new plan provides that the greatest length on the floor shall be 87 feet; the greatest breadth on the floor, 64 feet. The length at the gallery level shall be 118 feet. The breadth at the gallery level shall be 115 feet. The area on the floor shall be 5,440 square feet. The area at the gallery level shall be 9,616 square feet.

These changes will reduce the cubical contents of the Hall about one-third and greatly increase the cloakroom space. The seating arrangement under this new plan will admit the use of ample individual chairs, as in the Senate of the United States, or chairs joined together and continuing between the aisles. There will also be an extended rack in front of each row of chairs, giving to each Member a space on which to write and a desk and pockets large enough to hold papers and several volumes. The scheme provides for removing the Hall to the south and eliminates the corridor directly back of the Speaker's desk. The press gallery would then be directly over the present Members' lobby and open to the southward along the south front of the House, with five large windows in direct communication with the open air. This arrangement would give an abundance of outer air, ventilation, and sunshine.
